MULTILEVEL · CEFR

HOW TO USE THIS BOOK

12 mock tests
Listening + Reading

This book contains **twelve complete Multilevel mock tests** in the real exam format. Treat each one like the real exam: keep to the time, write on the answer sheet and check your score.

🎧 Listening
6 parts · 35 questions. Scan the QR / open the channel and play the audio for each test. Each recording is played twice.

📖 Reading
5 parts · 35 questions · 60 minutes. Do the test in one sitting, without a dictionary.

📝 Answer sheets
After each test there is a Multilevel answer sheet — write your answers there, just like the real exam.

🔑 Answer key & scripts
Check your answers and count your score out of 35. Then read the listening scripts at the back to see what you missed.

📈 Track progress
Repeat the mocks after a few weeks and compare your scores.

🎧 Audio for all listening tests
Scan the QR code to open our Telegram channel.

Skill	Part	Task	Questions
🎧	1	Choose the correct reply	1–8
🎧	2	Complete the notes	9–14
🎧	3	Match speakers to statements	15–18
🎧	4	Label a map / plan	19–23
🎧	5	Multiple choice (extracts)	24–29
🎧	6	Complete the lecture notes	30–35
📖	1	Gap fill (one word)	1–6
📖	2	Match texts to statements	7–14
📖	3	Match headings to paragraphs	15–20
📖	4	Multiple choice + True/False/NI	21–29
📖	5	Summary completion + multiple choice	30–35

MOCK TEST 1

🎧 LISTENING

6 parts · 35 questions
⏱️ approx. 35 minutes
🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C).**
Mark your answers on the answer sheet.

1

A) This is the plan.
B) That sounds lovely.
C) That's looks awful.

2

A) Yes, you can!
B) No, I don't!
C) Of course!

3

A) Well, that's unfortunate.
B) I bought a new wallet last week.
C) I don't like going to malls.

4

A) No, I don't forecast.
B) Yes, it says it might rain.
C) I usually go for a walk.

5

A) Don't do it!
B) Really?
C) What's the matter?

6

A) No, they shouldn't.
B) Get out!
C) Good idea.

7

A) Congratulations!
B) What a pity!
C) Poor thing!

8

A) It's next to the pharmacy.
B) Well, you can bring me some new clothes.
C) Yes, can you get me biscuits

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space.**
Write ONE WORD and / or A NUMBER for each answer.

ADVENTURE HOLIDAYS

The Netherlands tour:	You can see fields, villages as well as **9** _____ while riding a park along paths. In Amsterdam, you can rise a boat on the canals.
Iceland: It lasts **10**_____ The trip only runs until mid-autumn.	
Florence and Milan: You can visit popular **11**_____ . You can participate in a design workshop.	
Kenya: You can get to stay in **12**_____ . You can look after animals like elephants and rhinos	
French Baking Experience:	You can try **13**_____ a goat.
Website:	www. **14**_____ com

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (15-18) to their opinion about their best friend(A-F). There are TWO EXTRA options which you do not need to use.**
Mark your answers on the answer sheet.

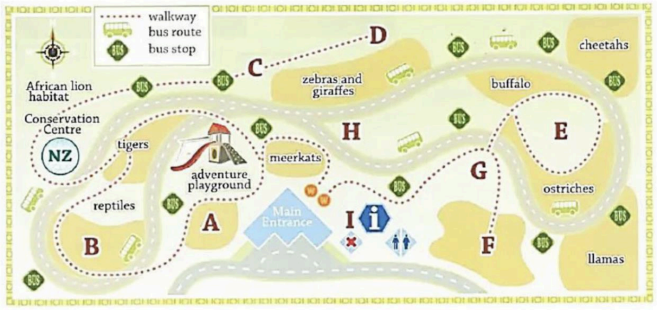

15. Speaker 1 ....
16. Speaker 2 ....
17. Speaker 3 ....
18. Speaker 4 ....

A) She liked to be the centre of attention.
B) She had unpredictable changes of mood.
C) She often used to get into trouble with the teachers.
D) She used to do well without really trying.
E) She didn't take much interest in her schoolwork.
F) She was always ready to help other people

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use.
Mark your answers on the answer sheet.

19. New Zealand Birds ...
20. African Village ...
21. Picnic Area ...
22. Afternoon walkabout meeting place ...
23. Jomo's café ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract.
Mark your answers on the answer sheet.

Extract One

You hear a university tutor talking to a student called Neil.

24 What does the tutor want to achieve by speaking to Neil?

A) To reassure Neil about something.
B) To make Neil aware of his many spelling mistakes.
C) To ask Neil to be more enthusiastic about his project.

25 Neil acknowledges that

A) he should double-check his work before he hands it in.
B) he may not use the most reliable sources when researching the topic.
C) he spends too much time on less relevant details.

Extract Two

You hear a student talking to a university accommodation officer.

26 According to the woman, what's the primary reason for offering campus accommodation to all first-year students?

A) It is easier for them to meet other students socially.
B) It removes any concerns about independent living.
C) It means they are close to all university facilities.

27 The student decides on campus accommodation because ...

A) the rooms are usually quiet.
B) there is a sense of community with other students.
C) he doesn't want the distractions of everyday life.

Extract Three

You hear two psychology students talking about their repetition of a well-known research study.

28 What are the students doing?

A) querying some of the data
B) expressing surprise at their research results
C) criticizing the experiment which they reproduced

29 The main conclusion the students come to is that ...

A) the majority of people do what a group expects.
B) results will vary greatly with different participants.
C) conformity is a relatively new feature of modern life

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space.
Write no more than one word for each answer.

THE GREAT CHEESE FESTIVAL, WISCONSIN, USA

Bradley says the festival takes place during what's known locally as 'Dairy Month'.

The festival started because a cheese **(30)** _____.. opened in another region of the USA.

Every year the three-day festival starts with a special **(31)** _____

Bradley's favourite part of the festival is the display of cheese sculptures.

This year there will be a cheese **(32)** _____ competition for all visitors.

Bradley particularly recommends the **(33)** _____ show for younger children.

It is essential to get advance tickets for the festival.

It's possible to do **(34)** _____ tours in the mornings only.

The people from the community who organise the festival are all volunteers.

Money raised at this year's festival will finance a **(35)** _____ park in the town

MOCK TEST 1

📖 READING

5 parts · 35 questions
⏱️ 60 minutes

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

There is good news for people who want to work in New Zealand. The country has relaxed its visa rules. It wants to attract "digital nomads" to live and work in the **1**_____ for up to nine months. A digital nomad is someone who can travel and live anywhere because they work online. New Zealand has a new visa that allows visitors to work remotely for a foreign employer for three months. This can be extended for up to nine **2**_____. However, someone staying for nine months may have to pay tax. Economic growth minister Nicola Willis hopes the new **3**_____ will help New Zealand's economy. She said: "We want more wealthy and super-talented people coming [through] the arrival gates."

New Zealand's **4**_____ has suffered in recent years. The Covid pandemic hurt the country's tourism industry. It has not yet recovered to pre-Covid levels. Another thing that is affecting the economy is the number of young people leaving New Zealand. Record numbers of **5**_____ in their twenties are going overseas to work. Immigration Minister Erica Stanford hoped the visitors with the new visa will spend more money. This will boost the economy. She said: "I expect in their time here, **6**_____ will spend longer than they normally would. They will spend more because they're here for longer. And the thing that we're really hoping for, is that they fall in love with the place."

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A) You can go there to enjoy some comic books.

B) You and your girlfriend want a groovy time.

C) Children can enter there without paying.

D) Performances last 14 days.

E) A fresh and romantic performance by theatre actors.

F) You check out a special someone's clothing and rooms.

G) This classic performance is for those who are looking forward to amusement.

H) You can get a drink before the show.

I) A Reward will be given there to contesters.

J) This theatre closes down next week

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below.
There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

List of Headings:

A) Like me and you
B) Nobody will see you in it
C) Some facts about robots
D) At your service
E) Your own indicator
F) A robot for a pet
G) For coach potatoes
H) They are among us

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

ROBOTS

I. The word 'robot' is a Czech word for a servant or slave. It was invented by a Czech writer Karel Capek in 1920. The word 'robotics' was first used by Isaac Asimov in 1937 in a story called Robby. The smallest robot in the world is nano-bot. They are small enough to travel inside your blood vessels. One of the hardest things to make a robot do... is walk.

II. Aibo the dog, designed by Sony, can walk, talk and wag its tail. It can express emotions of happiness, sadness, surprise, fear and dislike. You can talk to it and it will respond. Aibo can read your e-mail and take pictures. You can programme Aibo to respond to a specific name. You can also change its software so that it becomes a puppy. You don't have to clean after it and its feeding is very cheap — just recharge its batteries.

III. If you are sick and tired of helping your parents around the house, then a new robot can be the answer. It has been designed to make the people's lives easier. This yellow robot with bright eyes can do different jobs for you and help you remember things you have to do. It's so clever that when his batteries run out, the robot knows that it needs to recharge them and does it itself.

IV. Asimo is a humanoid robot. It has two legs, two arms and red lights for eyes. It can walk, talk, climb stairs and even dance. It can also recognize people's faces, gestures and voices. It took Honda's engineers 16 years to create Asimo. Today's model is 120 cm tall and weighs 43 kg. The robot is not for sale because its creators want it to become even more intelligent.

V. If you want to have a robot that can understand how you feel, then the creation of two US scientists will be of interest. They'd like their model to be sensitive to our moods and emotions. Their robot won't have emotions of its own but it should be able to respond to its owner's mood. So, if you feel sad, the robot will ask if it can help you. It's not an easy job because everyone shows emotions in quite different ways.

VI. A Japanese professor has invented an invisibility coat. A camera on the back of the person's head films the scene behind them and projects it onto the coat. The technology has practical applications: in the future doctors could see 'through' their hands or other obstacles when they are doing operations.

PART 4

Questions 21–29

Read the following text for question 21-29.

Scientists aiming to bring back woolly mammoth create woolly mice

Scientists at the US biotechnology company Colossal Biosciences plan to "de-extinct" the prehistoric pachyderms by genetically modifying Asian elephants to give them woolly mammoth traits. They hope the first calf will be born by the end of 2028. Ben Lamm, co-founder and chief executive of Colossal, said the team had been studying ancient mammoth genomes and comparing them with those of Asian elephants to understand how they differ and had already begun genome-editing cells of the latter.

Now the team say they have fresh support for their approach after creating healthy, genetically modified mice that have traits geared towards cold tolerance, including woolly hair. "It does not accelerate anything but it's a massive validating point," Lamm said. In the research, which has not yet been peer-reviewed, the team used a number of genome editing techniques to either genetically modify fertilised mouse eggs or modify embryonic mouse stem cells and inject them into mouse embryos, before implanting them into surrogates. The team focused on disrupting nine genes associated with hair colour, texture, length or pattern or hair follicles. Most of these genes were selected because they were already known to influence the coats of mice, with the induced disruptions expected to produce physical traits similar to those seen in mammoths, such as golden hair.

However, two of the genes targeted in the mice were also found in mammoths, where they are thought to have contributed to a woolly coat, with the changes introduced by the researchers designed to make the mouse genes more mammoth-like. The team also disrupted a gene associated with the way fats are metabolised in mice and was also found in mammoths, which they suggest could play a role in cold adaptation. The researchers edited different combinations of these genes, with one technique allowing them to make as many as eight edits in seven different genes at the same time.

While many of the experiments did not result in mouse pups, mice that were born had various combinations of distinctive hair types including woolly coats, long hair and golden-brown coats. However, they had a similar average body mass whether or not the gene relating to fat metabolism was modified. "The efficiency of the edits varied, but many individuals [were] 100% for all attempted edits," said Beth Shapiro, Colossal's chief science officer. Lamm said the team hoped to be able to carry out behavioural tests for cold tolerance in the coming months.

Robin Lovell-Badge, head of stem cell biology and developmental genetics at the Francis Crick Institute in London, who was not involved in the work, praised the technical aspects of the study.

But he said it did not unpick the mechanisms by which the genes produce different hair types, and that de-extincting mammoths would be far more complex than simply altering a few genes for cold tolerance – not least as it was unclear if genetic modifications would be needed to ensure the animals not just look like mammoths but behave like them too. "My overall concern is whether this is a sensible use of resources rather than spending the money on trying to prevent species becoming extinct," Lovell-Badge said, adding another problem is that, at present, there are no results on whether the modified mice are indeed cold-tolerant. "As it is, we have some cute-looking hairy mice, with no understanding of their physiology, behaviour, etc," he said. "It doesn't get them [the researchers] any closer to know if they would eventually be able to give an elephant useful mammoth like traits and we have learned little biology."

Others stressed the work did not involve introducing mammoth genes into mice, but mainly involved making changes to mouse genes to produce known effects on their coats. Dr Tori Herridge of the University of Sheffield, said: "Engineering a mammoth-like elephant presents a far greater challenge: the actual number of genes likely to be involved is far higher, the genes are less well understood – and still need to be identified – and the surrogate will be an animal that is not normally experimented upon." And while some said the goal of reviving the mammoth had drawn closer, others were more sceptical. "Mammoth de-extinction doesn't seem to be on the horizon anytime soon," said Herridge.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 The first calf of the woolly mammoth...

A) will lead to making new Asian elephants.
B) will be born by the end of this decade.
C) will help us to understand how different Asian elephants are.
D) will be the first genetically modified animal in history.

22 According to the passage, genome editing techniques ...

A) weren't that efficient.
B) were used to make a modified mouse.
C) weren't effective on embryos.
D) resulted in different kinds of mouse.

23 What is the suspected role of the disrupted fat-metabolism gene?

A) It helps the mice to become woolly.
B) It controls the mice's temperature
C) It may help with cold environment.
D) It may be combined with other genes.

24 Despite mice which were researched resulted in different hairs ...

A) they couldn't survive in cold conditions.
B) they all become too fat.
C) their weigh doesn't seem to be changed.
D) their metabolism was modified.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 Lamm claims that despite the breakthrough, the progress doesn't seem be accelerated.

A) True
B) False
C) No Information

26 The new genetically modified mice were indeed cold-tolerant.

A) True
B) False
C) No Information

27 Colossal Biosciences team are planning to revive other species after woolly mammoth.

A) True
B) False
C) No Information

28 **Dr. Tori Herridge claims that mammoth extinction seems to become real very soon.**

A) True
B) False
C) No Information

29 **De-extinct, genetically modified mammoths won't act like their original counterparts at all.**

A) True
B) False
C) No Information

PART 5

Questions 30–35

Read the following text for questions 30-35.

When the Tulip Bubble Burs

Long before anyone ever heard of Qualcomm, CMGI, Cisco Systems, or the other high-tech stocks that have soared during the current bull market, there was Semper Augustus. Both more prosaic and more subline than any stock or bond, it was a tulip of extraordinary beauty, its midnight-blue petals topped by a band of pure white and accented with crimson flares. To denizens of 17th century Holland, little was as desirable.

Around 1624, the Amsterdam man who owned the only dozen specimens was offered 3,000 guilders for one bulb. While there's no accurate way to render that in today's greenbacks, the sum was roughly equal to the annual income of a wealthy merchant. (A few years later, Rembrandt received about half that amount for painting The Night Watch.) Yet the bulb's owner, whose name is now lost to history, nixed the offer.

Who was crazier, the tulip lover who refused to sell for a small fortune or the one who was willing to splurge. That's a question that springs to mind after reading Tulipmania: The Story of the World's Most Coveted Flower and the Extraordinary Passions It Aroused by British journalist Mike Dash. In recent years, as investors have intentionally forgotten everything they learned in Investing 101 in order to load up on unproven, unprofitable dot-com issues, tulip mania has been invoked frequently. In this concise, artfully written account, Dash tells the real history behind the buzzword and in doing so, offers a cautionary late for our times.

The Dutch were not the first to go gaga over the tulip. Long before the first tulip bloomed in Europe – in Bavaria, it turns out, in 1559 – the flower had enchanted the Persians and bewitched the rulers of the Ottoman Empire. It was in Holland, however, that the passion for tulips found its most fertile ground, for reasons that had little to do with horticulture. Holland in the early 17th century was embarking on its Golden Age. Resources that had just a few years earlier gone toward fighting for independence from Spain now flowed into commerce. Amsterdam merchants were at the center of the lucrative East Indies trade, where a single voyage could yield profits of 400%. They displayed their success by erecting grand estates surrounded by flower gardens. The Dutch population seemed torn by two contradictory impulses: a horror of living beyond one's means and the love of a long shot.

Enter the tulip. "It is impossible to comprehend the tulip mania without understanding just how different tulips were from every other flower known to horticulturists in the 17th century," says Dash. "The colors they exhibited were more intense and more concentrated than those of ordinary plants." Despite the outlandish prices commanded by rare bulbs, ordinary tulips were sold by the pound. Around 1630, however, a new type of tulip fancier appeared, lured by tales of fat profits. These "florists," or professional tulip traders, sought out flower lovers and speculators alike. But if the supply of tulip buyers grew quickly, the supply of bulbs did not. The tulip was a conspirator in the supply squeeze: It takes seven years to grow one from seed. And while bulbs can produce two or three clones, or "offsets," annually, the mother bulb only lasts a few years.

Bulb prices rose steadily throughout the 1630s, as ever more speculators wedged into the market. Weavers and farmers mortgaged whatever they could to raise cash to begin trading. In 1633, a farmhouse in Hoorn changed hands for three rare bulbs. By 1636 any tulip-even bulbs recently considered garbage – could be sold off, often for hundreds of guilders. A futures market for bulbs existed, and tulip traders could be found conducting their business in hundreds of Dutch taverns. Tulipmania reached its peak during the winter of 1636-37 when some bulbs were changing hands ten times in a day. The zenith came early that winter, at an auction to benefit seven orphans whose only asset was 70 fine tulips left by their father. One, a rare Violetten Admirael van Enkhuizen bulb that was about to split in two, sold for 5,200 guilders, the all-time record. All told, the flowers brought in nearly 53,000 guilders.

Soon after, the tulip market crashed utterly, spectacularly. It began in Haarlem, at a routine bulb auction when, for the first time, the greater fool refused to show up and pay. Within days, the panic had spread across the country. Despite the efforts of traders to prop up demand, the market for tulips evaporated. Flowers that had commanded 5,000 guilders a few weeks before now fetched one-hundredth that amount. Tulipmania is not without flaws. Dash dwells too long on the tulip's migration from Asia to Holland. But he does a service with this illuminating, accessible account of incredible financial folly.

Tulipmania differed in one crucial aspect from the dot-com craze that grips our attention today: even at its height, the Amsterdam Stock Exchange, well-established in 1630, wouldn't touch tulips. "The speculation in tulip bulbs always existed at the margins of Dutch economic life," Dash writes. After the market crashed, a compromise was brokered that let most traders settle their debts for a fraction of their liability. The overall fallout on the Dutch economy was negligible. Will we say the same when Wall Street's current obsession finally runs its course?

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

Dutch concentrated on gaining independence by **30** _____ against Spain in the early 17th century; consequently, spare resources entered the area of **31** _____

Prosperous traders demonstrated their status by building great **32**_____. and with gardens in surroundings.

Attracted by the success of profit on tulip, traders kept looking for **33**_____.. lovers and speculator for sale.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 **Which of these following statements agree with the information given in the passage?**

A) In 1624, all the tulip collection belonged to a man in Amsterdam.
B) most primary school children need to lose weight.
C) Holland was the most wealthy country in the world in the 17th century.
D) From 1630, Amsterdam Stock Exchange started to regulate Tulips exchange market.

35 **According to the author, Tulipmania ...**

A) reached its peak in the 16th century.
B) were the first thing that appeared in the Amsterdam Stock Exchange.
C) were the most desired in the winter of 1636-37.
D) made many people homeless and jobless fools.

MOCK TEST 2

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) It's a pleasure to meet you too.
B) I don't think she has met him.
C) It wasn't.

2

A) That's okay.
B) I hope not.
C) Don't mention it.

3

A) I'll see you later.
B) To the library.
C) We can catch up later.

4

A) Was it interesting?
B) Haven't you?
C) Could you do it for me?

5

A) How's he?
B) How do you know?
C) What's the matter with you?

6

A) No, I wasn't at the party.
B) He looks nice.
C) Yes, I remember Steve.

7

A) Sure!
B) Calm down!
C) That's good!

8

A) Sure, I can!
B) Sure, you do!
C) Sure, we will!

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

JOINING THE LEISURE CLUB

Personal Assessment

- New members should describe any health problems.
- The **9** _____ rules will be explained to you before you use the equipment.
- You will be given a six-week **10** _____.. .

Types of membership

- There is a compulsory £90 **11** _____ fee for members.
- Gold members are given free entry to all the LP clubs.
- Premier members are given priority during **12** _____. hours.
- Premier members can bring some **13** _____. every month.
- Members should always take their photo **14** _____ with them.

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (15-18) to the description which they give about their accomodation. (A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

15. Speaker 1 ....
16. Speaker 2 ....
17. Speaker 3 ....
18. Speaker 4 ....

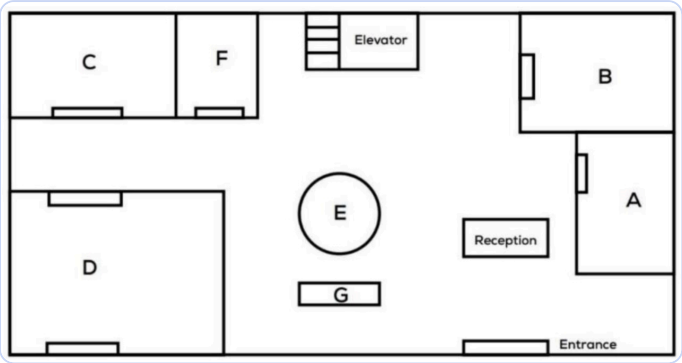

A) I made a mistake there at first.
B) I was able to settle into a new area.
C) I had no choice in the matter.
D) I have recommended it to others.
E) There are more benefits than disadvantages.
F) I would prefer to have more freedom.

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

GROUND FLOOR OF KINNEY HOTEL

19. Art Gallery .....

20. Fountain .....

21. Restaurant .....

22. Bakery .....

23. Bar .....

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You hear two students, Nick and Gemma, talking about a student house.

24 What is Gemma's main hesitation about moving into the house?

A) She won't have a good social life.
B) She won't get on with her housemates.
C) She might be distracted from her studies.

25 How does Nick address Gemma's main concern?

A) He informs her of an agreement within the house.
B) He promises to set up a study group in the house.
C) He reassures her that guests are always welcome.

Extract Two

You hear a mature student talking to a student finance advisor about a student loan.

26 The student has reservations about her ability to ...

A) secure a part-time job.
B) find a suitable bank account.
C) cover her living costs.

27 The student was previously aware that she would ...

A) need a letter of proof from her university.
B) only have to start repaying her loan once she graduated.
C) be required to pay interest from the date she received the loan.

Extract Three

You hear a student talking to a member of the university Drama Club.

28 Why is Darren hesitating to join the Drama Club?

A) He's worried he might get nervous on stage.
B) He doesn't want to over-commit himself.
C) He dislikes certain types of performances.

29 How does Nina persuade Darren to join the club?

A) She points out a less obvious benefit.
B) She claims it will boost his confidence.
C) She says it's stressful but also challenging.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than one word for each answer.

CAVERS

Cavers explore underground places such as mines and tunnels as well as caves.

When cavers camp underground, they choose places which have **(30)** _____ and fresh air available.

In the UK, the place Mike likes best for caving is Wales.

As a physical activity, Mike compares caving to **(31)** _____..

Cavers can pay as much as £20 for a suitable hard **(32)** _____

Cavers can pay as much as £50 for the right kind of lamp, which is worn on the head.

Mike recommends buying expensive **(33)** _____ to avoid having accidents.

Caving is a sport for people of all ages and backgrounds.

Some caves in Britain are called 'places of special **(34)** _____'

The need for safety explains why people don't organise caving **(35)** _____

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

Uzbekistan has introduced a new system to better support poor families. Starting from May 15, 2023, families on the Register of Poor Families and those at risk of being added will be divided into three categories: red, yellow, and green.

The new **Q1**_____ are based on how much money families who earn each month and their individual needs. Families in the red group are those who **Q2**_____ less than the minimum amount needed to live and also having a disabled member, a single elderly person in need, or losing the main breadwinner. Families in the yellow group also earn less than the **Q3**_____ amount, but all their members are able to work. **Q4**_____ in the green group earn a little more—between one and one-and-a-half times the minimum amount. From June 1, 2025, these families will receive benefits based on their category. Families in the yellow group will get a fifty percent discount on government service fees, while those in the red group will get a seventy-five **Q5**_____. If a family moves from red or **Q6**_____ to green, they will still receive support for another 12 months. The goal of this system is to give the right help to the right families, so that support is fair and focused. It also includes programs to help families in the red category earn more money and become more stable. This new approach is expected to improve the lives of many poor families in Uzbekistan.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A) This modern language course is organized by a renowned institute.

B) You want to learn a language on your own time.

C) This language course also teaches how to prepare a dish.

D) You can not only visit the city but its countryside.

E) This language course also teaches the culture, dress, and lifestyle.

F) You can communicate with people who speak this language in a club.

G) This study can last for two years.

H) You can visit the sets where popular blockbusters were made.

I) You can learn a language and filming within this course.

J) You can learn a language and have a good time.

7. ENGLISH PLUS FILM STUDIES – LOS ANGELES

• Improve your English while studying filmmaking techniques
• Includes workshops on scriptwriting, acting, and editing
• Field trips to Hollywood studios and local film festivals
• 4- to 12-week course options
Phone: +1 213 555 7788
Email: admissions@laenglishfilm.org
Website: www.laenglishfilm.org

8. CHINESE LANGUAGE SCHOOL – BEIJING

• Immersive Mandarin courses with flexible start dates
• Learn Chinese characters, pronunciation, and speaking skills
• Weekend excursions to the Great Wall and Forbidden City
• Dormitories and homestay options available
Phone: +86 10 6552 3344
Email: learn@beijingmandarin.cn
Website: www.beijingmandarin.cn

9. RUSSIAN LANGUAGE PROGRAM IN ST. PETERSBURG

• Year-round Russian language training for all levels
• Special modules: Russian literature, politics, and media
• Student visa support and accommodation assistance
• Organized trips to Moscow and nearby historical towns
Phone: +7 812 987 6543
Email: info@russianstudies.spb.ru

10. PORTUGUESE & CULTURE IN LISBON

• Learn Portuguese while exploring Lisbon's history and cuisine
• Courses available from 2 to 8 weeks
• Afternoon options: surfing, fado nights, museum visits
• Small classes with experienced native teachers
Phone: +351 213 456 789
Email: contact@lisbonlanguage.pt
Website: www.lisbonlanguage.pt

11. ARABIC FOR BEGINNERS – CAIRO LANGUAGE CENTER

• Learn Modern Standard Arabic and Egyptian dialect
• Guided visits to historical sites like the Pyramids and Islamic Cairo
• Evening conversation clubs with locals
• Affordable tuition and accommodation options
Phone: +20 2 2795 6432
Email: info@cairoarabiccenter.com

12. JAPANESE LANGUAGE & CULTURE PROGRAM IN KYOTO

• Japanese language courses from beginner to advanced
• Optional cultural workshops: tea ceremony, calligraphy, kimono experience
• Summer, winter, and year-long courses
• On-campus dormitories and cultural exchange events
Inquiries: kyoto@nihongo-ac.jp
Website: www.nihongo-ac.jp

13. GERMAN FOR PROFESSIONALS IN BERLIN

Offered by the Goethe Language Institute
• Focus on business German, communication skills, and intercultural training
• Small group and individual lessons available
• Weekend workshops and networking events
• Centrally located with modern facilities
Contact us: +49 30 6789 1234 / pro@gli-berlin.de

14. SPANISH IMMERSION IN VALENCIA

• Intensive Spanish classes for all levels
• Cultural activities: cooking classes, flamenco dancing, guided city tours
• Courses available year-round (1–12 weeks)
• Accommodation with host families or in student apartments
• Price includes materials and certificates
Phone: +34 961 23 45 67
Email: info@valenciaspanishschool.es
Website: www.valenciaspanishschool.es

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below.
There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

List of Headings:
A) The trend catches on
B) To keep shoes clean
C) Long history
D) An ambitious plan
E) For stage plays
F) An unexpected way out
G) Are they toys?
H) A European royal trend

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE PILLOW

I. The pillow was invented so that bugs would not crawl into the noses, ears, and mouths of people while they were sleeping. The pillow was first used in what is present-day Iraq over 9,000 years ago. Back then, it was carved from stone. Ancient Egyptians also used pillows because they wanted to protect their heads. Ancient Chinese used hard pillows (although they knew how to make softer ones) because of the belief that soft pillows depleted the body's energy.

II. The idea of a high heel or platform shoe is actually a seriously ancient one. One of the first traced high-level pieces of footwear in history belonged to actors in Ancient Greece. However, these weren't necessarily worn off stage; they were actually meant as a kind of shorthand about the social class of various characters in Greek drama and comedy. The higher the heel, the more "elevated" the character. There's also evidence that ancient Egyptians used heels, though not for everyday use.

III. Many noblemen of the medieval Persian empire wore heels as riding shoes, often in decadent materials and bright colours, to enable them to get a better grip on their stirrups. The European royals really perked up and took notice when a Persian monarch, Shah Abbas, came to tour European courts and make noble friends in the 1500s. The diplomatic gesture turned into a fashionable one, too: people saw the beautiful heeled shoes worn by the Shah and his entourage, and decided to make them their own.

IV. It feels like a common sense thing to say, but along with the collapse of society, the loss of power, and the lawlessness that will inevitably accompany the end of the world, your chances of using email, telephone, or Facebook to communicate will be practically zilch. Luckily, China has the answer—the carrier pigeon. According to reports, the People's Liberation Army recently trained a "pigeon army" to carry messages between military and political facilities should there be a major collapse in the country's communication network.

V. The idea of the heel actually being a "female" notion took a very long time to develop. One of the places where it took hold, however, was in Venice in the 1400s. But these weren't heels that you'd like to wear clubbing these days. Chopines, as they're called, were staggeringly high, slightly-tilted shoes with as many as 24 inches of narrowed platform underneath. They were originally designed to keep the mud off the more delicate "real" shoes of ladies walking in the street.

VI. Ethiopia is an important trading hub, which makes effective border control difficult to maintain. As a result of limited resources for border enforcement staff, serious organised crime – such as wildlife trafficking – often goes undetected. Wildlife crime is the world's fourth most prevalent form of criminal activity. Animals often die in transit when exported over borders. Cheetahs and other big cats are regularly exported to the Middle East as 'exotic pets'. To a rich elite these animals are just another status symbol, like a sports car or an expensive watch

PART 4

Questions 21–29

Read the following text for question 21-29.

THE KOKAND KHANATE

The Kokand Khanate was one of the most influential states in Central Asia during the 18th and 19th centuries. Situated in the fertile Fergana Valley, the khanate became a center of trade, politics, and culture until it was absorbed into the Russian Empire in the late 19th century. Its history reflects the struggles, ambitions, and transformations of the region during a time of shifting powers.

The Kokand Khanate emerged in the early 1700s after the weakening of the Shaybanid and Ashtarkhanid dynasties in Bukhara. The founder, Shahrukh Biy, was a tribal leader from the Ming clan of the Uzbek people. He established control over parts of the Fergana Valley and chose Kokand as the capital. This location was strategic: the valley was fertile for agriculture and located along important trade routes linking Central Asia with China, India, and Persia.

Over time, Kokand's rulers expanded their influence beyond the valley, bringing under their control regions that today belong to Uzbekistan, Kyrgyzstan, Tajikistan, and southern Kazakhstan. The khanate's expansion often brought it into conflict with its neighbors, especially the Khanate of Khiva and the Emirate of Bukhara.

The ruler of the khanate, known as the khan, held absolute authority, though his power was supported by a network of tribal leaders, military commanders, and religious scholars. Islam played a central role in governance, with Islamic law (sharia) forming the basis of the legal system. Judges, called qadis, were responsible for applying these laws in local disputes.

Society in Kokand was diverse. Uzbeks formed the majority, but the population also included Tajiks, Kyrgyz, and other ethnic groups. Many people lived in rural areas, farming crops such as wheat, barley, rice, and cotton. Urban centers, especially Kokand city, were bustling with markets, craft workshops, and caravanserais (inns for travelers).

The Kokand Khanate benefited greatly from its position on the Silk Road trade network. Merchants traded silk, cotton textiles, dried fruits, and handicrafts in exchange for goods like tea, porcelain, and spices from the east, as well as firearms and manufactured goods from the west. The khanate also levied taxes on caravans passing through its territory, providing a significant source of income.

Agriculture formed the backbone of the economy. The Fergana Valley's rich soil and extensive irrigation canals allowed for high crop yields. Cotton, in particular, became a valuable commodity, both for domestic use and for export.

The Kokand Khanate was known for its vibrant cultural life. Poetry, calligraphy, and music flourished under the patronage of the khans. The rulers also commissioned grand architectural projects, many of which still stand today. The Palace of Khudayar Khan in Kokand is a prime example, with its ornate tilework and grand halls reflecting the artistic style of the time.

Mosques and madrasas (Islamic schools) were built across the khanate, emphasizing the importance of education and religion. Many of these institutions attracted scholars and students from surrounding regions.

By the mid-19th century, the Kokand Khanate faced growing internal and external pressures. Rivalry between tribal factions weakened the central authority, while economic challenges strained the state's resources. At the same time, the expanding Russian Empire began moving into Central Asia, aiming to control its trade routes and resources.

In 1876, after a series of military campaigns, Russian forces annexed the Kokand Khanate. It became part of the Russian-controlled Fergana Oblast, marking the end of Kokand's independence. While this brought new administrative systems and economic links to the Russian Empire, it also ended centuries of local rule.

Today, the history of the Kokand Khanate remains an important chapter in the heritage of Uzbekistan and Central Asia. Its contributions to trade, architecture, and culture continue to be celebrated, and its surviving monuments stand as reminders of a time when Kokand was a powerful and prosperous state in the heart of the Silk Road.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 Why was Kokand chosen as the capital of the khanate?

A) It was the largest trade city in Central Asia.
B) It had an important strategic fort.
C) It was fertile and located on important trade routes.
D) It linked Central Asia with Russia.

22 The khan...

A) had to share his rule with the qadis.
B) was the most powerful figure.
C) had to be a military commander.
D) was weak and had to depend on his network.

23 What was one cultural achievement of the Kokand Khanate mentioned in the text?

A) The invention of a new style of metalwork, handicrafts and firearms.
B) The establishment of the cotton industry and other industries
C) The translation of Kyrgyz and Tajik texts into Uzbek.
D) The construction of notable palaces, mosques, and madrasas.

24 By the mid-19th century, the Kokand Khanate weakened because

A) the central authority was eroded.
B) tribal factions began to fight each other.
C) the economy fully collapsed.
D) Russia stopped trading with them.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 The Kokand Khanate controlled parts of present-day Afghanistan.

A) True
B) False
C) No Information

26 The population of the Kokand Khanate consisted of many different nations.

A) True
B) False
C) No Information

27 Russian annexation of Kokand were complete after a military conquest.

A) True
B) False
C) No Information

28 **The judges in the khanate mainly served as spiritual scholars.**

A) True
B) False
C) No Information

29 **The Khanate benefited greatly from the revenue from trade taxes.**

A) True
B) False
C) No Information

PART 5

Questions 30–35

Read the following text for questions 30-35.

MUSIC AND THE EMOTIONS

Why does music make us feel? One the one hand, music is a purely abstract art form, devoid of language or explicit ideas. And yet, even though music says little, it still manages to touch us deeply. When listening to our favourite songs, our body betrays all the symptoms of emotional arousal. The pupils in our eyes dilate, our pulse and blood pressure rise, the electrical conductance of our skin is lowered, and the cerebellum, a brain region associated with bodily movement, becomes strangely active. Blood is even re-directed to the muscles in our legs. In other words, sound stirs us at our biological roots.

A recent paper in Nature Neuroscience by a research team in Montreal, Canada, marks an important step in revealing the precise underpinnings of the potent pleasurable stimulus' that is music. Although the study involves plenty of fancy technology, including functional magnetic resonance imaging (fMRI) and ligand-based positron emission tomography (PET) scanning, the experiment itself was rather straightforward. After screening 217 individuals who responded to advertisements requesting people who experience 'chills' to instrumental music, the scientists narrowed down the subject pool to ten. They then asked the subjects to bring in their playlist of favourite songs – virtually every genre was represented, from techno to tango – and played them the music while their brain activity was monitored. Because the scientists were combining methodologies (PET and fMRI), they were able to obtain an impressively exact and detailed portrait of music in the brain. The first thing they discovered is that music triggers the production of dopamine – a chemical with a key role in setting people's moods – by the neurons (nerve cells) in both the dorsal and ventral regions of the brain. As these two regions have long been linked with the experience of pleasure, this finding isn't particularly surprising.

What is rather more significant is the finding that the dopamine neurons in the caudate – a region of the brain involved in learning stimulus-response associations, and in anticipating food and other 'reward' stimuli – were at their most active around 15 seconds before the participants' favourite moments in the music. The researchers call this the 'anticipatory phase' and argue that the purpose of this activity is to help us predict the arrival of our favourite part. The question, of course, is what all these dopamine neurons are up to. Why are they so active in the period preceding the acoustic climax? After all, we typically associate surges of dopamine with pleasure, with the processing of actual rewards. And yet, this cluster of cells is most active when the 'chills' have yet to arrive, when the melodic pattern is still unresolved.

One way to answer the question is to look at the music and not the neurons. While music can often seem (at least to the outsider) like a labyrinth of intricate patterns, it turns out that the most important part of every song or symphony is when the patterns break down, when the sound becomes unpredictable. If the music is too obvious, it is annoyingly boring, like an alarm clock. Numerous studies, after all, have demonstrated that dopamine neurons quickly adapt to predictable rewards. If we know what's going to happen next, then we don't get excited. This is why composers often introduce a key note in the beginning of a song, spend most of the rest of the piece in the studious avoidance of the pattern, and then finally repeat it only at the end. The longer we are denied the pattern we expect, the greater the emotional release when the pattern returns, safe and sound. To demonstrate this psychological principle, the musicologist Leonard Meyer, in his classic book *Emotion and Meaning in Music* (1956), analysed the 5th movement of Beethoven's String Quartet in C-sharp minor, Op. 131. Meyer wanted to show how music is defined by its flirtation with – but not submission to – our expectations of order. Meyer dissected 50 measures (bars) of the masterpiece, showing how Beethoven begins with the clear statement of a rhythmic and harmonic pattern and then, in an ingenious tonal dance, carefully holds off repeating it. What Beethoven does instead is suggest variations of the pattern. He wants to preserve an element of uncertainty in his music, making our brains beg for the one chord he refuses to give us. Beethoven saves that chord for the end.

According to Meyer, it is the suspenseful tension of music, arising out of our unfulfilled expectations, that is the source of the music's feeling. While earlier theories of music focused on the way a sound can refer to the real world of images and experiences – its 'connotative' meaning – Meyer argued that the emotions we find in music come from the unfolding events of the music itself. This 'embodied meaning' arises from the patterns the symphony invokes and then ignores. It is this uncertainty that triggers the surge of dopamine in the caudate, as we struggle to figure out what will happen next. We can predict some of the notes, but we can't predict them all, and that is what keeps us listening, waiting expectantly for our reward, for the pattern to be completed.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

The Montreal Study

Participants, who were recruited for the study through advertisements, had their brain activity monitored while listening to their favourite music. It was noted that the music stimulated the brain's neurons to release a substance called **30**_____. in two of the parts of the brain which are associated with feeling **31** _____..

Researchers also observed that the neurons in the area of the brain called the **32**_____. were particularly active just before the participants' favourite moments in the music – the period known as the anticipatory **33** _____.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 **Why does the writer refer to Meyer's work on music and emotion?**

A) to propose an original theory about the subject
B) to offer support for the findings of the Montreal study
C) to recommend the need for further research into the subject
D) to present a view which opposes that of the Montreal researchers

35 **According to Leonard Meyer, what causes the listener's emotional response to music?**

A) the way that the music evokes poignant memories in the listener
B) the association of certain musical chords with certain feelings
C) the listener's sympathy with the composer's intentions
D) the internal structure of the musical composition

approx. 35 minutes

Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.

1

A) Me too.
B) Can you?
C) Sure, you can.

2

A) Take bus 6.
B) It starts at 9 a.m. tomorrow.
C) It's in the center.

3

A) OK, here it is.
B) No, that doesn't suit you.
C) Sure, I'll wait here.

4

A) In the school library.
B) Since 1997.
C) Before I was born.

5

A) You should take a short break.
B) Let's get to work right now!
C) Don't worry, they haven't.

6

A) How about an ice-cream?
B) You need to wear your sweater.
C) Let's eat some fresh pizza and chips.

7

A) When does it happen?
B) Where did you see that?
C) Who told you that?

8

A) My hands are also firm.
B) Sounds like a boring person.
C) Can you expect anything?

PART 2

Questions 9–14

You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.

School trip

- **Teacher's name:** Turner
- They will visit by **(9)**_____
- The first activity they walk around **(10)**_____
- Students spend their free time in the **(11)**_____
- The lunch will be at **(12)**_____ together
- They will visit a **(13)**_____
- They should bring a **(14)**_____.

PART 3

Questions 15–18

You will hear people speaking in different situations. Match each speaker (1-4) to the place they are at(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

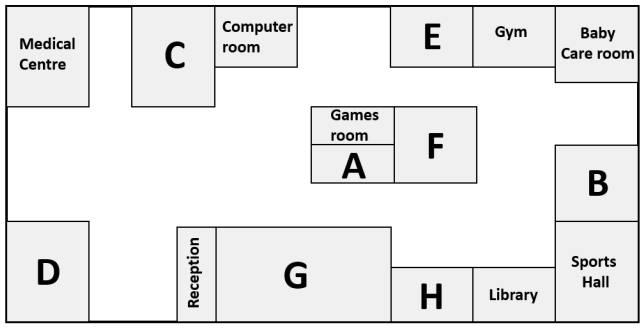

A) In a swimming pool
B) At home
C) In a shopping centre
D) In a garden
E) In a restaurant
F) In a classroom

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

COMMUNITY CENTRE PLAN

19. **Bike racks ...**
20. **Kitchen room ...**
21. **Music room ...**
22. **Shower room ...**
23. **Restroom ...**

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You hear a man and a woman discussing a new facility in their neighborhood.

24 What is the main conversation about?
A) A new library and its features
B) A recent community event
C) Renovations at the local museum

25 What is the woman concerned about?
A) The lack of seating
B) There are too many people in the evenings
C) The opening hours are too short

Extract Two

You hear two friends talking about a coffee shop they visited.

26 What is the main conversation about?
A) The menu options at a café
B) The location of a popular café
C) The size and atmosphere of a new coffee shop

27 What did the man say about the new coffee shop?
A) The service was slower
B) The prices were higher
C) The staff weren't friendlier

Extract Three

You hear a conversation between two people discussing pets.

28 What is the main conversation about?
A) The difficulty of taking care of a pet animal
B) Choosing the right breed for a family
C) Training a dog to behave indoors

29 What was the woman's recommendation?
A) Going for a smaller one
B) Buying a pet from a shelter
C) Hiring a professional trainer

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

MARKETING AND BRANDING

- A strong brand can help a company dominate its **(30)** _____.
- Apple products are considered more valuable because of their high **(31)**_____.
- Many brands focus less on selling logic and more on selling **(32)**_____.
- After drinking Coca-Cola, customers don't notice the ingredients but experience a feeling of **(33)**_____.
- Online businesses track customer preferences using **(34)** _____ history.
- This data helps improve both the customer experience and overall **(35)**_____.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

THE GREAT WALL OF CHINA

The Great Wall of China is one of the most famous landmarks in the world. It was built to protect China from attacks. Construction of the wall began over two thousand years ago during the Qin Dynasty. Different dynasties added to the wall over time, making it longer and stronger. Today, the **(1)** _____ stretches over 13,000 miles across mountains, deserts, and plains. The **(2)** _____ of the wall is incredible, as it took millions of workers to build it. Many people call it the "longest wall in the world."

The Great Wall was not just for defense. It also helped regulate trade along the Silk Road. Soldiers and guards also used the wall to **(3)**_____ the movement of goods and people. Watchtowers were built to send signals in case of **(4)** _____. These towers gave the wall a better **(5)** _____ system.

Parts of the wall have been restored, while others have crumbled over the years. Tourists from around the world visit to see this ancient structure. Some sections are steep and hard to climb, but the view from the top is worth the effort. The Great Wall is a symbol of China's unity and strength. It shows how **(6)** _____ people worked together to achieve something great. This remarkable monument continues to amaze people today.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. You are a university student looking for a job you can do on Saturdays and Sundays.

B. You are a parent who needs someone to care for your young children in the afternoons.

C. You have just graduated with a design degree and have a great collection of your work, but no job history.

D. You are a native French speaker looking for flexible work you can do from home.

E. You are a highly experienced software architect with strong management skills.

F. You want a weekday job that finishes by noon so you can have your afternoons free.

G. You are a former nurse with several years of experience working in a hospital.

H. You have a talent for organization and have previously worked for a delivery company.

I. You are a skilled builder with over ten years of experience in the construction industry.

J. You have been working as a primary school teacher for the last five years.

7. Junior Graphic Designer

We are a fast-growing marketing agency looking for a creative individual to join our team. This is an entry-level position, so professional experience is not a prerequisite, but a strong portfolio demonstrating your design skills is essential. Full training on our software suite will be provided. Must be a team player.

8. Part-Time Barista

Our friendly neighbourhood coffee shop needs a barista for morning shifts (7 am - 12 pm), Monday to Friday. The ideal candidate will have excellent customer service skills and a passion for coffee. Previous experience is a plus but not required, as we are happy to train the right person.

9. Senior Backend Developer

A leading tech firm is seeking an experienced developer to lead our server-side engineering team. Candidates must have a minimum of 8 years of experience with Python and cloud infrastructure (AWS/Azure). This is a leadership role that involves mentoring junior developers and architecting new systems.

10. Weekend Event Staff

We run large-scale public events (concerts, festivals) and require reliable staff for weekend work. Duties include ticket scanning, guiding attendees, and light setup/cleanup. This is a flexible, seasonal role, perfect for those looking to earn extra money on Saturdays and Sundays.

11. Clinical Research Associate

A pharmaceutical company is hiring a professional with a background in nursing or a related medical field. The role involves monitoring clinical trials, ensuring patient safety, and managing data. A degree in life sciences and at least 3 years of experience in a hospital or research setting are required.

12. Foreign Language Content Reviewer

We need fluent speakers of German or French to review and edit translated documents for accuracy and cultural appropriateness. This is a remote, project-based role. You must be a native-level speaker of the target language and have a keen eye for detail.

13. Logistics Coordinator

A busy shipping company is looking for an organized individual to manage schedules, track shipments, and communicate with drivers. Experience in logistics or supply chain management is highly desirable. Must be proficient with office software and able to solve problems under pressure.

14. Childminder / Nanny

A family is looking for a caring and responsible person to look after their two children (ages 4 and 7) after school. Responsibilities include school pick-up, preparing snacks, and helping with homework. Must have a clean driving record and previous childcare experience.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

LIST OF HEADINGS:

A) A summary of the decree inscribed on the stone
B) The far-reaching consequences of the discovery
C) An accidental find of major significance
D) A feature that provided the essential key
E) Ongoing debate over the object's rightful home
F) An analysis of the stone's geological composition
G) Acknowledging a principal figure's success
H) The specific strategy that unlocked the code

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE ROSETTA STONE

I. In 1799, during Napoleon's campaign in Egypt, a French soldier named Pierre-François Bouchard made an unexpected discovery in the town of Rosetta. He found a large, dark stone slab inscribed with text. Recognizing its potential importance, the slab was secured. It was immediately clear that this was no ordinary artifact, as it appeared to contain the same text written in three different scripts, presenting a linguistic puzzle that had confused scholars for centuries.

II. The true value of the Rosetta Stone lay in its trilingual inscription. The top section was written in Ancient Egyptian hieroglyphs, the script of monuments and religious texts which no one at the time could read. The middle section was in Demotic, a more common script used in ancient Egypt for everyday purposes. The bottom section was in Ancient Greek, a language that was well understood by scholars. It was this trilingual format that provided the pivotal clue for finally decoding the lost language of the pharaohs.

III. For over two decades, many scholars attempted to decipher the hieroglyphs with limited success. The final breakthrough came from a young French scholar named Jean-François Champollion. He had dedicated his life to the study of ancient Egypt and, in 1822, he announced his success. By building on the work of others and applying his own profound knowledge of Coptic (a language descended from Ancient Egyptian), he was able to unlock the secrets of the hieroglyphic script.

IV. Champollion's method was both systematic and brilliant. He hypothesized that the hieroglyphs enclosed in oval shapes, known as cartouches, represented the names of royal figures. By comparing the Greek names of pharaohs like Ptolemy and Cleopatra with the hieroglyphs in the corresponding cartouches, he was able to assign phonetic values to many of the hieroglyphic symbols. This phonetic approach, rather than treating each symbol as a picture of a word, was the crucial step that allowed the entire system to be understood.

V. The decipherment of the Rosetta Stone was a watershed moment in history. It didn't just allow one text to be read; it opened the door to understanding thousands of other inscriptions and papyri from ancient Egypt. For the first time, historians could read the history, literature, and religious beliefs of the Egyptians in their own words. This single discovery essentially gave birth to the entire field of modern Egyptology and unveiled the complexities of a civilization that had been silent for nearly two millennia.

VI. After the defeat of the French forces in Egypt in 1801, the Rosetta Stone was transferred to British possession under the terms of a treaty. It has been on public display at the British Museum in London since 1802, where it remains the single most visited object. However, its location is a source of ongoing contention, with Egyptian authorities and cultural heritage groups frequently calling for its repatriation to Egypt, arguing it is a vital piece of their national heritage.

PART 4

Questions 21–29

Read the following text for questions 21-29.

DAYDREAMING

In today's busy society, people often see daydreaming as a waste of time — a sign that someone is lazy or unable to focus. From classrooms to workplaces, being caught staring into space is usually considered a bad habit that needs to be corrected. However, recent research suggests that allowing our minds to wander freely might actually have important benefits for creativity, problem-solving, and emotional well-being.

For many years, psychologists believed that daydreaming prevented people from concentrating on real-world tasks. But a growing number of scientists now argue that the human brain is never completely at rest. Even when we are not focused on anything in particular, a network in our brain known as the default mode network becomes active. This system is responsible for imagination, self-reflection, and connecting different ideas — all of which are essential for innovative thinking.

Dr. Kalina Christoff, a neuroscientist at the University of British Columbia, has studied the brain activity of people while they daydream. Her research shows that moments of mental drifting can help the brain make unexpected connections, leading to sudden insights. She explains that when the mind is allowed to move freely from one thought to another, it can link distant memories or ideas in original ways — a process that structured, focused thinking often prevents.

To explore this idea further, a group of psychologists conducted an experiment in which participants were asked to perform a creative task after either resting quietly or doing a simple, repetitive activity such as sorting colored paperclips. Those who had a chance to let their minds wander during the dull activity produced more imaginative ideas than those who didn't. According to the researchers, these results indicate that mild mental distraction gives the subconscious mind time to process information in the background.

Moreover, daydreaming might also play a role in emotional balance. When people think about their goals, memories, or relationships during idle moments, they are engaging in a kind of mental rehearsal that can prepare them for future situations. In moderation, this helps individuals reflect on their feelings and build empathy. However, experts inform that too much or negative daydreaming — for instance, repeatedly imagining stressful or unrealistic scenarios — can lead to anxiety or dissatisfaction.

In the modern world, where people are constantly connected to screens and notifications, genuine mental pauses have become rare. Psychologists suggest that taking short breaks without digital distractions can help restore mental energy and reduce stress. So, rather than trying to eliminate daydreaming, perhaps we should embrace it as a natural and valuable function of the mind.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 What was traditionally believed about daydreaming?
A) It improves people's ability to concentrate.
B) It is a sign of deep thinking and self-awareness.
C) It stops people from focusing properly on tasks.
D) It helps people become more productive at work.

22 According to Dr. Christoff, what happens when the mind drifts?
A) It becomes unable to connect different ideas.
B) It finds creative links between thoughts and memories.
C) It stops processing information altogether.
D) It repeats the same thought patterns endlessly.

23 What did the experiment involving paperclips demonstrate?
A) Daydreaming reduces people's ability to think logically.
B) Repetitive tasks increase stress and anxiety.
C) Focused concentration produces better ideas.
D) A relaxed mental state can enhance creativity.

24 What warning do experts give about daydreaming?
A) It can have harmful effects if done excessively.
B) It always results in emotional stability.
C) It is less effective than using digital tools.
D) It should be avoided during leisure activities.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 The default mode network becomes inactive when people are daydreaming.
A) True
B) False
C) Not Given

26 Dr. Christoff's research proves that daydreaming increases intelligence levels.
A) True
B) False
C) Not Given

27 Participants who did a boring activity before the creative task failed to generate more unique ideas.
A) True
B) False
C) Not Given

28 Excessive daydreaming can sometimes contribute to adverse emotions.
A) True
B) False
C) Not Given

29 The writer suggests that technology use has reduced opportunities for genuine mental rest.
A) True
B) False
C) Not Given

PART 5

Questions 30–35

Read the following text for questions 30-35.

THE TELECOMMUTING PARADIGM

The paradigm of the traditional workplace is undergoing a seismic shift. Telecommuting, once a niche arrangement, has become increasingly prevalent across numerous sectors. Industries from technology to legal philosophy are progressively embracing flexible work models, permitting staff to operate remotely, at least on a hybrid basis. Nevertheless, the once-futuristic prophecy of near-vacant office buildings—populated only by essential maintenance or on-site personnel—remains a distant reality.

The tangible merits for employers are compelling. A distributed workforce mitigates the necessity for vast, costly office real estate. Furthermore, empirical data suggests a significant uptick in output. North American studies, for instance, indicate that remote employees can be 30-40% more prolific. Manager James Horgan posits that this surge is partially attributable to the elimination of the arduous daily commute. 'Our findings revealed a pattern of reinvestment; the time recuperated from travel was largely channeled back into professional tasks,' Horgan explains. 'This new-found autonomy was highly valued, and in a gesture of reciprocity, employees demonstrated their commitment through heightened productivity.'

Beyond productivity, offering remote work serves as a powerful tool for talent acquisition and retention. The societal dividends are equally profound. Telecommuting fosters greater workforce inclusivity, democratizing access to employment for demographics that have historically faced barriers. This includes not only primary caregivers for the elderly or infirm, but also individuals with disabilities and those residing in geographically isolated regions. An ancillary benefit is the potential for enhanced civic engagement, as the temporal flexibility afforded by remote work allows individuals to participate more fully in local community life.

The endurance of the physical office, however, is rooted in more than mere tradition. Many organizations contend that the serendipitous collaboration and rapid innovation that fuel growth are best fostered in a shared environment. The organic process of mentorship, whereby junior staff absorb professional nuances through informal observation—a kind of corporate osmosis—is notoriously difficult to replicate virtually. The office thus remains a crucial crucible for forging company culture and a tangible sense of collective identity, elements that risk dilution within a fully atomized workforce.

However, this model is not without its detriments. A significant portion of the remote workforce grapples with feelings of isolation and the absence of the spontaneous, collegial camaraderie inherent in a physical office. Moreover, the erosion of clear boundaries between professional duties and personal time can make achieving a sustainable work-life equilibrium challenging. Consequently, it is incumbent upon employers to implement proactive support structures, such as regular virtual team-building activities and robust mental wellness programs, to ensure their distributed teams remain cohesive, motivated, and psychologically sound.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

THE RISE OF REMOTE WORK

The practice of telecommuting is now common in various fields, including the technology and **(30)**_____ sectors. For companies, a key advantage is a reduced need for physical office space. For employees, productivity can see a significant surge of up to **(31)**_____ percent. This increase is partly explained by the removal of the daily **(32)**_____, with the saved time often being redirected into work. From a societal perspective, remote work promotes inclusivity by opening up job opportunities for groups such as caregivers and people living in **(33)** _____ areas.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 According to the text, what is a key psychological driver behind the increased productivity of remote workers?

A) They face fewer interruptions from colleagues compared to an office environment.
B) They feel a sense of obligation to repay the company for the flexibility it provides.
C) Their performance is more easily and accurately measured through digital tools.
D) They have access to superior and more personalized technology in their home offices.

35 What does the author imply is a crucial responsibility for companies with a remote workforce?

A) To subsidize the cost of home office equipment for all employees.
B) To actively prevent the potential for employee burnout through targeted support.
C) To decrease reliance on virtual meetings to combat screen fatigue.
D) To ensure all employees have equal access to high-speed internet.

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) So good to see you again.
B) Yes, she is very old.
C) No, you aren't her.

2

A) I'm lovely, thank you.
B) I met someone yesterday.
C) Lovely to meet you too!

3

A) My home is very big.
B) I'm from Valencia.
C) There are many parks.

4

A) Yeah, that's him.
B) No, they are.
C) Yes, that did.

5

A) You can also join our club.
B) No, it is nice of them to leave.
C) Yes, I'm happy to be here.

6

A) Never mind.
B) You're right.
C) Yeah, we can.

7

A) Yeah!
B) Sure!
C) Nice!

8

A) I am very tall these days.
B) I am twenty-five years old.
C) I've been great, thanks!

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

NEW GYM

Manager's name: Emma **(9)**_____

Opening shift at: **(10)**_____

The gym placed at the **(11)**_____ floor.

You must wear: **(12)**_____ shoes.

If you work at: **(13)**_____ you get a list of participant check-ins and others.

You place your private items in **(14)**_____

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (1-4) to the place they are at(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

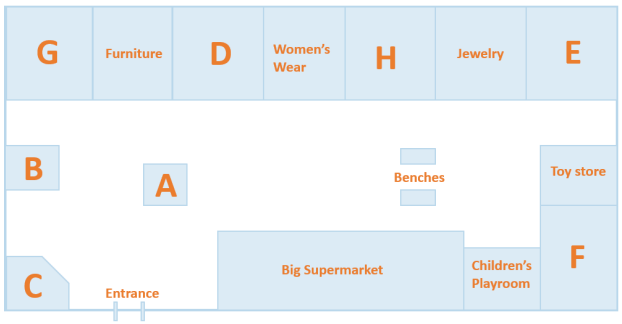

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

A) Arrange to study with another person.
B) Make sure you have a comfortable place to sit.
C) Listening to music will help you to concentrate.
D) Don't eat too much while you're studying.
E) Study in the morning when your mind is clearer.
F) Set yourself a series of targets to achieve.

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

19. Café ...

20. Kiosk ...

21. Men's wear ...

22. Accessories ...

23. Children's clothes ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

24 The man's article wasn't on this issue because ...

A) he forgot to send it to the editor.
B) he didn't have enough time to complete it.
C) he thinks the next issue will be better.

25 What does the woman think of the short stories?

A) They are very amusing.
B) They are not many.
C) They are not true to life.

Extract Two

26 What is the relationship between the speakers?

A) Doctor and nurse.
B) School principal and teacher.
C) Secretary and patient.

27 The doctor ...

A) is arriving soon.
B) has just had a break.
C) is examining someone.

Extract Three

28 Why is the woman unhappy with the item she bought?

A) Its quality is poor.
B) She doesn't like its style.
C) The color doesn't suit her.

29 What will the woman receive?

A) Her money back.
B) A different clothing item.
C) A gift card.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

WILLIAM THE CONQUEROR

William the Conqueror defeated the **(30)**_____ army in 1066

The words beef, hour, fruit and **(31)**_____ all entered the English language from French.

Gothic **(32)**_____ architecture also arrived in England from France.

Construction of Wells Cathedral started in **(33)**_____.

It was **(34)**_____ in 1490.

Wells Cathedral is one of twenty-six cathedrals in England. This **(35)**_____ is called the medieval cathedrals of England.

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

THE MAGIC OF THE NORTHERN LIGHTS

The Northern Lights, also known as the Aurora Borealis, are a spectacular natural light show visible in high-latitude regions. This phenomenon is caused by electrically charged particles from the sun colliding with gases in the Earth's atmosphere. The result is a wonderful display of dancing lights in the night sky. These beautiful **(1)**_____ can appear in many colors, though pale green and pink are the most common. The specific **(2)**_____ that are present in the atmosphere, such as oxygen and nitrogen, determine the colors we see.

For centuries, these lights have **(3)**_____ debates among scientists. Many ancient cultures believed the lights were spirits or gods. Today, science provides a clear explanation for this amazing **(4)**_____. The sun continuously sends out a stream of particles called the solar wind. When this solar wind reaches Earth, our planet's magnetic field funnels the **(5)** _____ toward the polar regions. This interaction creates the vibrant colors that mesmerize observers.

The best time to witness the Aurora Borealis is on a clear, dark night far from city light pollution. While the beauty is undeniable, the science behind the lights is just as fascinating. Understanding how particles from the **(6)**_____ create this celestial ballet only adds to the wonder of the experience.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. You are travelling by yourself, want to keep costs low, and are eager to socialise with other travellers.

B. You and your partner want a digital detox for a weekend, completely away from emails and social media.

C. Your job requires you to travel for a business trip where you'll need professional amenities and a reliable workspace.

D. You prefer a place where the mountain feels just a few steps away and comfort awaits you the moment you stop skiing.

E. You're starting a contract job in a new city for several weeks and need a place that offers more independence and home comforts than a hotel.

F. You want to book a holiday where the total cost is fixed in advance, covering all your food and entertainment.

G. You are bored with standard chain hotels and want to stay somewhere that reflects the local artistic scene.

H. You need accommodation that provides full-board catering for a large tour group.

I. You are looking for a hotel that offers a complimentary shuttle service to the airport.

J. You need accommodation with facilities specifically designed to keep your young children entertained.

7. The Grand Plaza Hotel

Located in the heart of the financial district, our hotel offers executive suites with high-speed internet, a 24-hour business center, and meeting rooms. Perfect for the discerning corporate traveller.

8. Sunset Beach Resort (All-Inclusive)

Leave your wallet at home! Our all-inclusive package includes all meals, drinks, and activities. Enjoy our private beach, multiple swimming pools, and nightly enjoyment. Ideal for a stress-free holiday.

9. The Backpacker's Hub

Offering cheap dormitory beds and a lively social atmosphere, we're the top choice for solo travellers on a tight budget. Features include a shared kitchen, a common room with games, and nightly pub crawls.

10. "The Nest" - Secluded Forest Cabin

Escape the city and reconnect with nature. Our cozy, self-catering cabin for two is located deep in the woods, with no Wi-Fi or television. It features a fireplace and a porch with stunning views. The perfect romantic getaway.

11. Family Fun Villas

Our spacious two- and three-bedroom villas are perfect for families. Each comes with a full kitchen, a private garden, and access to the kids' club and a child-friendly swimming pool. We are located just a 5-minute drive from the main theme park.

12. The Art-House Boutique Hotel

Each of our 12 rooms is uniquely designed by a local artist. We are situated in the cultural quarter, surrounded by galleries, theatres, and independent cafes. A unique experience for those who appreciate creativity and style.

13. Mountain Peak Lodge

Situated at the base of the ski slopes, we offer ski-in/ski-out access. Our facilities include equipment rental, a sauna to relax your muscles after a long day on the mountain, and a hearty breakfast buffet.

14. City Centre Serviced Apartment

A home away from home. Our apartments are available for weekly or monthly rentals and include a fully equipped kitchen, washing machine, and separate living area. Ideal for longer stays or for those who prefer more independence compered to a hotel offers.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

LIST OF HEADINGS:

A) The financial cost of implementing smart technology
B) Examples of how technology can improve urban life
C) The risk of excluding non-tech-savvy citizens
D) A definition of the core concept
E) The importance of citizen participation in planning
F) Concerns regarding data privacy and surveillance
G) The technological backbone of a smart city
H) A historical look at city planning

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE CONCEPT OF SMART CITIES

I. A "smart city" is an urban area that uses various types of electronic methods and sensors to collect data. Insights gained from that data are used to manage assets, resources, and services efficiently. The ultimate goal is to improve the quality of life for its citizens by making urban operations and services more effective and responsive to their needs.

II. The foundation of any smart city is a robust and integrated network of information and communication technology (ICT). This includes the Internet of Things (IoT), where everyday objects are embedded with sensors and connected to the internet. These sensors can be placed in everything from streetlights and rubbish bins to public transport and water pipes, all feeding real-time information into a central system for analysis.

III. The practical applications of this technology are vast. For instance, smart traffic management systems can analyze live traffic flow to adjust traffic light timings, reducing congestion and pollution. Smart grids can optimize energy distribution, preventing blackouts and promoting the use of renewable energy. Connected rubbish bins can signal when they are full, allowing for more efficient waste collection routes.

IV. While the potential benefits are significant, the development of smart cities raises serious questions about privacy. The constant collection of data on citizens' movements, energy use, and daily habits could be misused. There is a risk of creating a surveillance society where personal information is vulnerable to cyberattacks or used for social control. Establishing strong data protection regulations and transparent policies is therefore essential.

V. Another critical challenge is ensuring that the benefits of a smart city are accessible to all residents. There is a danger of creating a "digital divide," where those who are less comfortable with technology, often the elderly or low-income groups, are left behind. If services like public transport or healthcare access become primarily app-based, it could create new barriers for those without smartphones or digital literacy skills.

VI. Engagement of residents is a crucial element in the development of smart cities. Without the input of residents, urban planners may develop solutions that fail to address the actual needs of the community. Public consultations, participatory design workshops, and open forums can help ensure that smart city initiatives are inclusive and reflect the priorities of all citizens, fostering trust and collaboration between governments and the public.

PART 4

Questions 21–29

Read the following text for questions 21-29.

THE DIGITAL SHIFT

The transition to remote work was, at first, liberating. For the first few months, I relished the flexibility. No more crowded morning commutes, the freedom to structure my day, and the quiet focus I could achieve without the constant interruptions of a busy office. I felt my productivity soar, and the work-life balance I had long chased seemed finally within my grasp. However, this initial honeymoon phase began to fade as a new kind of pressure slowly crept in: the tyranny of the digital leash.

The source of this pressure wasn't a single policy or a demanding boss, but a collective, unspoken set of expectations that our team had developed. The constant 'ping' of instant messages created an obligation to be perpetually connected. Emails sent late at night seemed to demand an immediate response, blurring the lines between work and personal time until they were almost non-existent. The culture had shifted from 'working from home' to 'living at work'.

This came to a head during a critical project with a tight deadline. I needed some vital data from a colleague, Mark, to complete my section. I sent him a message on our team chat, then an email. Hours passed in what I call 'digital silence'. My anxiety escalated as my mind raced with possibilities – was he ignoring the messages? Was he annoyed about something? I imagined the worst, and my frustration grew, stalling my progress entirely. By late afternoon, I was convinced the project was in jeopardy because of his lack of response.

Just as I was about to escalate the issue to our manager, a call came through from Mark. He sounded apologetic and flustered. It turned out his home internet connection had been down all day, and his messages to me, explaining the situation and providing the data from his phone, had been failing to send due to a temporary network glitch on his end. The fault wasn't with Mark, but with our communication methods and the assumptions they encouraged. It was an epiphany for me; the real issue wasn't a lack of commitment from anyone, but the chaotic, high-anxiety system of communication we had fallen into.

That evening, I decided to be proactive. I spent a few hours drafting what I called a 'communications charter,' which I then proposed to my team leader before sharing it with the wider team. It wasn't revolutionary, but it set clear expectations: defined core working hours for communication, an agreement on expected response times (e.g., 24 hours for email, 2 hours for chat), and guidelines on when to use which tool—a phone call for anything urgent, for instance. To my relief, the idea was met with enthusiasm. It wasn't a panacea, but it was the first step in reclaiming our focus and well-being. The efficiency of the team has improved since, and more importantly, the collective anxiety has noticeably dropped.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 What was the author's initial experience with remote work?

A) She found it difficult to focus without her colleagues.
B) She felt it gave her a greater sense of personal independence.
C) She was worried about being less productive than in the office.
D) She immediately felt the pressure to be available at all times.

22 What does the author identify as the main problem that developed over time?

A) Her manager became more demanding.
B) The technology the team used was unreliable.
C) There was an unspoken expectation to always be online.
D) Colleagues were not completing their work on time.

23 What did the author realize after the incident with her colleague, Mark?

A) That Mark was an unreliable team member.
B) That the team's communication habits were the underlying problem.
C) That she should have contacted her manager much earlier.
D) That remote work was ultimately unsuitable for her team.

24 What was the main purpose of the 'communications charter'?

A) To monitor employees' working hours more strictly.
B) To stop colleagues from using instant messaging.
C) To reduce the number of team meetings.
D) To establish clear and predictable rules for interaction.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 The author believed Mark might be ignoring her on purpose.

A) True
B) False
C) No Information

26 Before this incident, Mark had a history of being rather slow to respond.

A) True
B) False
C) No Information

27 The delay in communication from Mark was due to a problem with his computer.

A) True
B) False
C) No Information

28 The author created the 'communications charter' with help from her team leader.

A) True
B) False
C) No Information

29 The team's reaction to the proposed charter was encouraging.

A) True
B) False
C) No Information

PART 5 Questions 30–35

Read the following text for questions 30-35.

THE DECLINE OF TRADITIONAL RETAIL

Over the past decade, the retail landscape has undergone dramatic transformation, with traditional brick-and-mortar stores struggling to maintain their foothold in the market. The rapid rise of e-commerce has fundamentally altered consumer behavior, with convenience, variety, and competitive pricing driving customers to online shopping platforms. While some retailers have adapted by embracing digital technologies, others have faltered, leading to the closure of countless high-street stores.

One significant factor contributing to this decline is the evolving expectations of consumers. Modern-day shoppers prioritize efficiency, often opting for the ability to browse and purchase items from the comfort of their homes. Same-day delivery and personalized marketing further enhance the appeal of online shopping. John Havers, a retail analyst, explains, "Today's consumers value immediacy and tailored experiences. Traditional retail, which often relies on outdated methods, struggles to keep pace with these demands."

Economic pressures also play a vital role. The cost of maintaining physical stores, including rent and employment, adds a financial burden that many businesses cannot sustain. By contrast, online retailers operate with much lower overheads. This disparity has created a fiercely competitive environment, with online giants often undercutting their traditional counterparts on price.

However, it would be premature to declare the death of the physical store. Many successful retailers are adopting a hybrid model, blending the strengths of online and offline commerce. For instance, the concept of "click-and-collect" allows customers to shop online and pick up their purchases in-store, combining convenience with immediacy. Additionally, some brands are leveraging their physical spaces to create immersive experiences, such as interactive displays and exclusive in-store events, which cannot be replicated online.

Still, challenges remain. The loss of retail jobs and the decline of bustling high streets have social and economic repercussions, particularly in smaller communities. Moreover, the environmental impact of e-commerce, including increased packaging waste and carbon emissions from delivery services, raises important sustainability concerns.

To survive in this evolving landscape, traditional retailers must rethink their strategies, embracing innovation while maintaining a sense of community. As Havers notes, "The future of retail lies not in resisting change but in finding ways to integrate the best of both worlds."

This means that brick-and-mortar stores need to blend digital convenience with personal, in-store experiences that online platforms cannot replicate. Investing in technologies such as augmented reality, personalized marketing, and seamless omnichannel systems can help retailers meet modern consumers' expectations for speed and customization.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

THE CHALLENGES FACING RETAIL

Traditional retail has been significantly affected by the advance of **(30)**_____, which offers convenience and competitive pricing. Consumers now expect **(31)**_____, such as same-day delivery and personalized recommendations. Physical stores face higher expenses such as **(32)**_____, and staffing costs, making it difficult to compete with online retailers. Some businesses are adopting hybrid models, including "click-and-collect" services, to combine online accessibility with in-store **(33)**_____.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 According to the text, what is one reason online shopping is more competitive than traditional retail?

A) It offers a wider range of products than in-store shopping.
B) It operates with significantly lower costs than physical stores.
C) It allows customers to physically inspect items before purchasing.
D) It is less affected by economic pressures like inflation.

35 What does the author suggest is critical for the survival of traditional retail?

A) Closing physical stores and focusing entirely on e-commerce.
B) Offering lower prices to rival those of online retailers.
C) Combining digital innovation with unique in-store experiences.
D) Advocating for stricter regulations on online competitors.

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) Yes, I always play football.
B) I'm waiting for the menu.
C) No, I'm not hungry today.

2

A) Only on weekends.
B) I'm going to the park.
C) Football.

3

A) I'm not very hungry.
B) It's nice.
C) I bought it last week.

4

A) I went shopping yesterday.
B) That's my favorite song.
C) Take a little rest.

5

A) Maybe tomorrow.
B) I only make pasta.
C) I'm watching a movie now.

6

A) I watched a video.
B) I am hungry.
C) It's very cold today.

7

A) Maybe next week's weather is good.
B) I am working late today, sorry.
C) Yes, I like pizza.

8

A) No, mine is black.
B) I live near the station.
C) It costs about ten dollars.

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

MUSIC FESTIVAL

- **Will be held in where:** **(9)**_____ Park.
- **Duration:** **(10)**_____ days.
- The cost of ticket for under 12-year-old children: **(11)** _____.
- **Bring along:** chair or **(12)**_____.
- The gates are scheduled to open **(13)**_____ a.m.
- For information:www.**(14)**_____com.

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (1-4) to their descriptions about using the internet(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

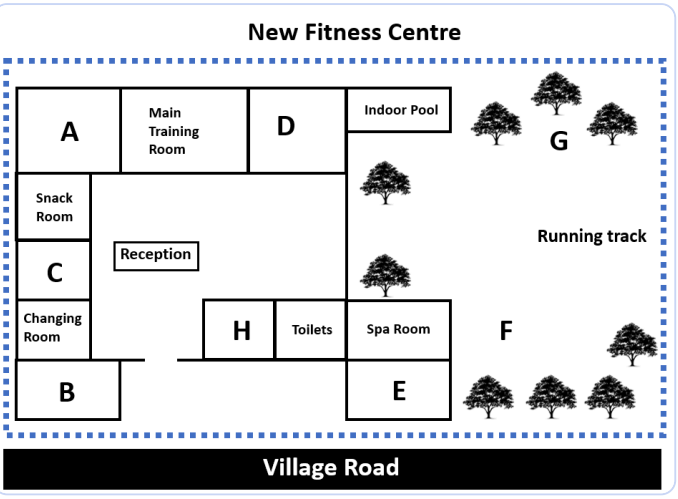

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

A) It makes people lose real social connections.
B) It helps me earn money and work from anywhere.
C) It's hard to know what information to trust.
D) It's great for learning and developing new skills.
E) It wastes too much time on unimportant things.
F) It makes shopping quicker and more convenient.

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

19. Car Park ...

20. Staff room

21. Shower room ...

22. Outdoor gym area ...

23. Cycling area

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You will hear an interview with a woman called Adriana Moretti, who works as a wildlife photographer.

24 What disadvantage does Adriana say her work has?

A) She sometimes feels lonely when she is working abroad.
B) She doesn't see her family as often as she would like to.
C) She always has to go where the agency tells her.

25 Adriana believes it is becoming harder to get work as a wildlife photographer because ...

A) so many photos of wildlife are available on the Internet.
B) there is a lot of competition for jobs in wildlife photography.
C) people are becoming less interested in wildlife.

Extract Two

You will hear an interview with travel writer Amy McCarthy about her first experience of travelling abroad.

26 When she was at the airport, Amy felt ...

A) glad she had taken sandwiches with her.
B) worried that she might miss her plane.
C) annoyed that she had spent so much.

27 Amy's friend Carla annoyed Amy because Carla ...

A) sometimes left dirty dishes in the living room.
B) often forgot her keys when she went out.
C) wouldn't do any food shopping.

Extract Three

You will hear an interview with someone who was involved in the music business.

28 What does James say about his ideas?

A) Some of them are not very realistic.
B) He expects to have good ones all the time.
C) He makes sure that he doesn't forget them.

29 James's advice to listeners who might want to go into business is to ...

A) forget about past problems.
B) learn from past mistakes.
C) take big risks.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

ARCHERY

- Anne used to shoot arrows from a bow made of plastic when she was a child.
- Anne only had time to read about the **(30)**_____ of archery before the beginner's archery course.
- Anne's archery course took place in a **(31)**_____.
- Anne was surprised that learning to **(32)**_____ properly was so difficult.
- The teacher told Anne she needed to relax her shoulders.
- One of Anne's arrows went into a **(33)**_____ by accident.
- During the breaks, Ann was happy to look at the **(34)** _____ and talk to other people.
- Some of the people on Anne's course said that a TV series had inspired them to try archery.
- Anne is trying to persuade her **(35)**_____ to do an archery course with her.

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

THE AMAZING TRANSFORMATION OF A BUTTERFLY

The life of a butterfly is a story of incredible change. This journey, known as metamorphosis, has four distinct stages. It all starts when a female butterfly lays a tiny egg, usually on a leaf or stem. This plant will serve as the first food for the creature that hatches from the **(1)**_____.

Soon, a small larva, which we call a caterpillar, emerges. The primary job of the caterpillar is to eat. It munches on leaves, growing bigger and bigger very quickly. As it grows, this hungry **(2)**_____ sheds its skin multiple times. Once it reaches its full size, it prepares for the most magical part of its life.

The caterpillar finds a safe spot and forms a protective casing around itself. This casing is called a chrysalis. Inside the **(3)**_____, the caterpillar's body completely transforms. It might look like nothing is happening from the outside, but a remarkable change is taking place.

After a period of time, which can be weeks or months, a beautiful butterfly breaks free from the casing. At first, its wings are soft and folded. The new **(4)**_____ must pump fluid into its wings to make them strong enough for flight. After resting, the butterfly with its colorful **(5)**_____ will fly away to drink nectar from flowers. This entire process of change is called metamorphosis, and it is one of nature's most amazing wonders. Understanding **(6)**_____ shows us how living things can adapt and change in extraordinary ways.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. You want to join a practical session that lets you try out acting techniques in front of an audience.

B. You're eager to spend an evening tasting cuisine from around the world.

C. You're travelling with children and want an event that combines entertainment with creative learning.

D. You enjoy architecture and want a guided experience that uncovers the city's lesser-known heritage.

E. You're hoping to meet other creative people and show your artwork publicly.

F. You'd like to attend a festival that includes open-air melodic performances by international artists.

G. You want a relaxed activity where you can produce something handmade to take home.

H. You're interested in short films that focus on social themes and want to hear from the directors afterwards.

I. You'd like a weekend course focused on improving your photography skills.

J. You're looking for a cultural activity that helps you forget daily stress through mindfulness and calm surroundings.

7. Clay & Calm Studio

Our pottery classes combine art and relaxation. Under gentle instruction, participants shape and paint their own ceramic pieces in a peaceful studio overlooking the river. Most guests say they leave feeling refreshed and creative. A small exhibition of participants' best works is held once a month, though taking part is optional.

8. Old Streets Story Walk

Step away from tourist crowds and explore hidden courtyards, forgotten monuments, and unusual tales that never appear in guidebooks. Ideal for those who like history with a touch of mystery. The route also passes a few popular cafés, where the group can stop for refreshments.

9. Screen Voices Festival

An annual showcase of independent cinema highlighting current social issues. After selected screenings, filmmakers hold discussions about what inspired their work and how audiences can get involved. Between sessions, visitors can browse a small market selling posters and film merchandise.

10. Global Flavours Evening

Spend an unforgettable night sampling signature dishes prepared by chefs from several countries. Guests are invited to chat with the cooks and learn about the traditions behind each recipe. A short cultural performance follows dinner, but the main focus remains on the food experience.

11. Young Minds Arts Day

A lively event designed for families. Children can paint murals, build musical instruments, and watch storytelling performances while parents enjoy local food stalls. Teen volunteers help run each activity, encouraging teamwork and problem-solving skills.

12. Night Under the Stars Concerts

Every Friday in summer, the park fills with music from jazz to world folk. Visitors bring blankets, listen to international performers, and enjoy the open-air atmosphere. Some evenings also feature local dance groups before the main musical acts begin.

13. City Frame Photography Retreat

This two-day course helps participants develop both camera and digital-editing skills. Outdoor photo walks are followed by feedback sessions in a creative studio. Although accommodation isn't included, nearby guesthouses offer discounts for attendees.

14. Stage Steps Workshop

Discover what it's like to perform on stage! This intensive workshop introduces improvisation, voice control, and teamwork, ending with a short showcase for friends and family. Previous participants have used the skills they learned here to gain confidence in public speaking.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once. Mark your answers on the answer sheet.

LIST OF HEADINGS

A) The negative effects of insufficient rest
B) A historical overview of sleep research
C) Practical advice for improving sleep quality
D) The role of dreams in emotional processing
E) Defining the fundamental stages of slumber
F) The essential functions of sleep for body and mind
G) How sleep patterns change throughout a person's life
H) An explanation of the body's internal clock

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE SCIENCE OF SLEEP

I. Sleep is a universal biological necessity, yet its precise mechanisms are still being explored. Far from being a passive state, sleep is a highly active period for the brain. It is governed by two main processes: the circadian rhythm, our internal 24-hour clock that tells us when to feel sleepy and when to be alert, and sleep pressure, which builds up the longer we are awake, creating a growing need for rest.

II. The architecture of sleep is complex, consisting of a recurring pattern of distinct phases. A typical night's sleep cycles between Non-Rapid Eye Movement (NREM) and Rapid Eye Movement (REM) sleep. NREM is further divided into three stages, progressing from light dozing to deep, restorative sleep. REM sleep, in contrast, is when the brain is highly active, breathing becomes irregular, and most vivid dreaming occurs. A full cycle through all stages takes approximately 90–110 minutes.

III. The reasons why we dedicate roughly a third of our lives to sleep are multifaceted. Physically, sleep is crucial for cellular repair, muscle growth, and the release of important hormones. Cognitively, it is indispensable for memory consolidation—the process by which recent learned experiences are transformed into long-term memory. It also allows the brain to clear out metabolic waste products that accumulate during waking hours.

IV. A chronic lack of sleep can have serious and wide-ranging consequences for health and well-being. In the short term, it leads to impaired concentration, poor decision-making, and mood swings. Over the long term, sleep deprivation is linked to an increased risk of significant health problems, including obesity, diabetes, cardiovascular disease, and a weakened immune system, making us more susceptible to infections.

V. Given its importance, cultivating good sleep hygiene is vital. Experts recommend maintaining a consistent sleep-wake schedule, even on weekends, to regulate the body's clock. Creating a relaxing bedtime routine, such as reading a book or taking a warm bath, can signal to the brain that it's time to wind down. It is also crucial to ensure the bedroom environment is dark, quiet, and cool, and to avoid stimulants like caffeine and electronic screens before bed.

VI. As people age, their sleep patterns often shift. Teenagers tend to fall asleep later and struggle to wake early, while older adults may become early risers and experience lighter, more fragmented sleep. These changes are influenced by hormonal variations and alterations in the body's circadian rhythm. Understanding such natural shifts helps explain why sleep needs and habits vary across different stages of life.

PART 4

Questions 21–29

Read the following text for questions 21-29.

THE POWER OF SMELL

For most people, sight and hearing are the dominant senses, while smell is often considered less important. Yet research increasingly shows that our sense of smell plays a far greater role in daily life than we realise. From influencing our emotions and memories to shaping our social connections, scent can quietly guide our thoughts and behaviour in powerful ways.

The human nose can detect over a trillion different odours, although we are rarely conscious of this ability. When we encounter a familiar fragrance, it can instantly transport us to a specific moment in the past — a phenomenon known as "odor-evoked memory." For example, the smell of fresh rain might remind someone of their childhood garden. Scientists have found that smells trigger more vivid and emotional memories than visual or auditory cues, partly because the olfactory system is directly linked to the brain's limbic region, which processes emotions and memory.

In recent years, psychologists have explored how scent can affect mood and performance. One study discovered that people exposed to the smell of lavender became calmer and performed better on memory tests, while the scent of lemon made participants feel more alert. Retailers have even begun using this knowledge: a pleasant fragrance in a shop can subtly encourage customers to stay longer and spend more money. However, the effects of scent are not universal. A smell that one person finds soothing may be irritating to another, depending on personal associations and cultural background.

Interestingly, our ability to recognise and interpret smells can also influence social behaviour. Research suggests that people subconsciously use body odour to detect emotions such as fear or happiness in others. Some scientists believe that this hidden form of chemical communication evolved to help early humans survive by warning each other of danger or signalling trust. Despite these ancient roots, the modern world has largely masked natural body scents through perfumes and deodorants, reducing our awareness of this subtle form of interaction.

While smell has clear benefits, it can also cause problems. Individuals who lose their sense of smell — a condition known as anosmia — often report feelings of isolation or depression. Without the emotional richness that smells provide, many find that food becomes less enjoyable and that they struggle to recall certain memories. Fortunately, advances in neuroscience are helping researchers understand how to restore or strengthen olfactory function, offering hope to those affected.

Although we rarely stop to think about it, smell continues to shape our thoughts, decisions, and relationships in countless invisible ways. The next time a familiar aroma catches your attention, it might be worth pausing — your nose could be telling you more than you think.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 What is the main point made in the first paragraph?

A) Smell is less influential than other senses.
B) People underestimate the impact of smell in their lives.
C) The sense of smell is primarily used for safety.
D) Smell affects people only in limited situations.

22 According to the passage, why do scents trigger strong memories?

A) Because they are easier to identify than sounds or images.
B) Because the brain stores smell information more efficiently.
C) Because they connect directly with emotional parts of the brain.
D) Because people consciously link smells with past events.

23 What conclusion can be drawn from research involving lavender and lemon scents?

A) Different smells can influence mood and behaviour in specific ways.
B) People react to fragrances in the same way across all cultures.
C) Pleasant scents always improve focus and concentration.
D) Fragrances affect mood only when people are aware of them.

24 What problem is mentioned in connection with anosmia?

A) It can cause people to become physically ill.
B) It may reduce emotional well-being and quality of life.
C) It affects people's ability to recognise colours and sounds.
D) It can permanently damage other sensory systems.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 Memories triggered by smells usually last longer than those triggered by sounds.

A) True
B) False
C) Not Given

26 Retailers use specific scents to influence customers' behaviour in stores.

A) True
B) False
C) Not Given

27 Scientists have proven that all people find the smell of lavender relaxing.

A) True
B) False
C) Not Given

28 Natural body odours once played a role in early human communication.

A) True
B) False
C) Not Given

29 Modern perfumes have completely destroyed the human sense of smell.

A) True
B) False
C) Not Given

PART 5 — Questions 30–35

Read the following text for questions 30-35.

THE PARADOX OF CHOICE

In the modern world, consumers are surrounded by extraordinary abundance. Supermarkets, online platforms, and streaming services all promise endless possibilities — from thousands of breakfast cereals to millions of songs and movies. At first glance, this variety might appear to enhance personal freedom, giving people the ability to shape their experiences exactly as they wish. Yet psychologists argue that too many options can actually have the opposite effect. Instead of feeling liberated, individuals often become overwhelmed and stressed by the sheer number of decisions they must make each day.

The American psychologist Barry Schwartz introduced the term "the paradox of choice" to describe this phenomenon. His research suggests that when people face an excess of options, they experience decision fatigue and anxiety, often ending up less satisfied with their final choices. In one well-known experiment, shoppers presented with only six kinds of jam were far more likely to make a purchase than those offered twenty-four varieties. The conclusion was clear: a smaller number of choices makes decision-making both easier and more enjoyable.

However, not all scholars fully agree with Schwartz's interpretation. Critics argue that the negative consequences of abundance depend largely on the context. For instance, individuals used to making complex decisions — such as investors, doctors, or managers — may actually thrive in environments with a wide range of alternatives. Others note that digital tools such as filters, search engines, and recommendation algorithms can simplify the process, allowing consumers to handle vast selections efficiently rather than feeling lost in them.

Cultural differences further complicate the picture. In some societies, the ability to choose freely is strongly associated with independence and personal identity, while in others, it is viewed as a potential source of pressure or confusion. Research shows that Western consumers often regard variety as empowering, whereas people from more collectivist cultures may prefer fewer, clearer choices. This suggests that the "paradox of choice" may not be a universal psychological truth, but rather a reflection of different cultural values and expectations.

Ultimately, the relationship between freedom and choice remains complex. Having multiple options can promote individuality and autonomy, yet an excess of them may undermine satisfaction and well-being. The challenge for modern societies is to strike the right balance — offering enough variety to support personal freedom without creating a sense of paralysis or discontent.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

According to the passage, people often feel **(30)** _____ when confronted with too many choices.

Schwartz's experiment with jam demonstrated that consumers are more likely to buy when options are **(31)** _____.

Critics believe that the effect of excessive choice can vary depending on the **(32)**_____ in which decisions are made.

Cultural research indicates that the link between choice and **(33)**_____ differs across societies.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 What is one argument used by those who challenge Schwartz's theory?

A) Most people prefer to avoid making any choices at all.
B) Technological aids can make decision-making simpler despite large selections.
C) Consumers in all cultures experience the same reaction to abundance.
D) There is no psychological basis for the paradox of choice.

35 What message does the writer convey in the final paragraph?

A) Excessive choice is unavoidable in the modern world.
B) Freedom of choice always results in greater happiness.
C) Societies must balance individual autonomy with simplicity.
D) Limiting variety is the only way to ensure satisfaction.

🎧 LISTENING

6 parts · 35 questions
⏱️ approx. 35 minutes
🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) I usually walk to school.
B) What a pity.
C) It starts at 7 p.m.

2

A) I think it's very expensive.
B) Sure, no problem.
C) I don't like coffee.

3

A) I take the bus every morning.
B) Yes, I know her well.
C) Sorry, I don't work here.

4

A) Quite long years.
B) I don't like that color.
C) I met her at the station.

5

A) It's very cold outside.
B) I'm looking for the supermarket.
C) Yes, you can sit there.

6

A) I can't find my phone.
B) I'd like an orange juice, please.
C) I'm going to the cinema.

7

A) Around half past nine.
B) No, it's not my bag.
C) I usually go by bus.

8

A) I don't drink cola.
B) It is on Tuesday.
C) It's near the bus stop.

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

COURSE DETAILS

- The position of speaker **(9)**_____ in the Writing Club
- Annual fee **(10)**_____ pounds
- **Running date:** **(11)**_____
- **Writing class:** Every **(12)**_____
- **The course for children:** **(13)**_____
- **Email:** efn. **(14)**_____.org

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (1-4) to the place they are at(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

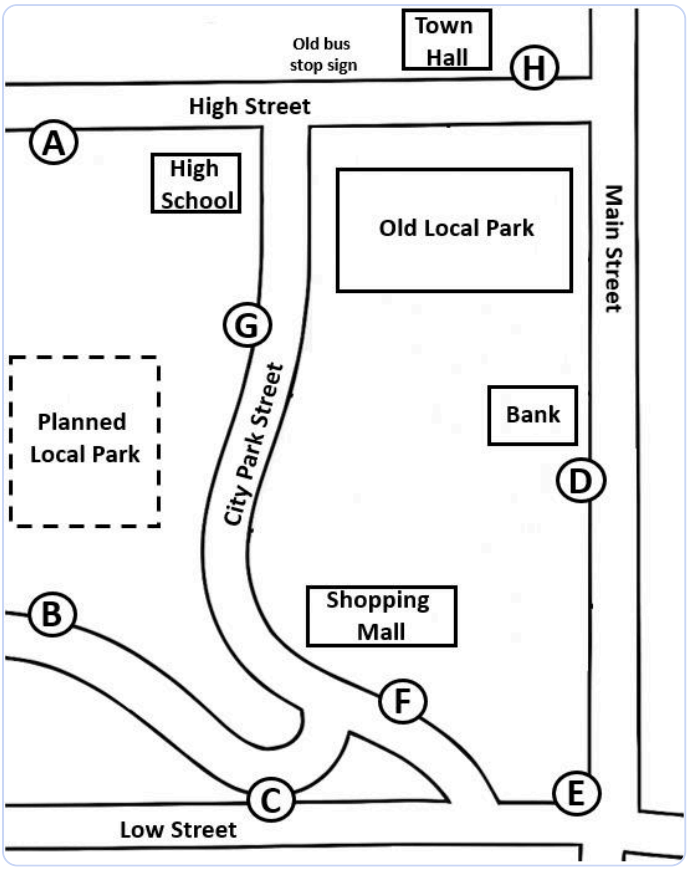

A) In drama class
B) On board a plane
C) In the cinema
D) In a swimming pool
E) In an amusement park
F) In a cafe

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

PLANNED CHANGES IN NEWSHIRE CITY

19. New Road construction ...

20. Library ...

21. Parking area ...

22. Flower shop ...

23. New bus stop sign ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You will hear two students, Sam and Liz, discussing their university orientation program.

24 What is this conversation mainly about?

A) Their plans for the first week of university.
B) The subjects they will study this semester.
C) The best places to visit near the university.

25 In the end, the two students agreed that...?

A) Sam will join the 'Careers Lecture'.
B) they both attend the 'Uni Tour'.
C) they don't know what to do in the university.

Extract Two

You will hear a student, Eric, talking to his lecturer, Ms Harris, about essay writing.

26 What is Eric mainly talking to Ms Harris about?

A) How to improve his advice on issues.
B) How to begin writing his thesis.
C) How to write summaries.

27 What advice does Ms Harris give Eric?

A) Choose a topic that genuinely interests him
B) Follow the topic suggested by his supervisor
C) Start writing before deciding on a topic

Extract Three

You will hear an interview with someone whose daughters are appearing in a show in London.

28 When Olivia tried to get a part in Mary Poppins, she

A) did not really expect to get the part.
B) was extremely upset not to get the part.
C) was immediately rejected for the part.

29 What happened at the first auditions for The Sound of Music?

A) There were so many people that the family considered leaving.
B) The family arrived later than they had been told to arrive.
C) Jackie's was able to persuade judges to see her children.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

USES OF NANOTECHNOLOGY

- Nanotechnology could allow the development of stronger **(30)**_____.
- Planes would be much lighter in weight.
- Space **(31)**_____ travel will be made available to the masses.
- Computers will be even smaller, faster, and will have a greater **(32)**_____.
- **(33)**_____ energy will become more affordable.
- Nano-robots could rebuild the **(34)**_____ layer.
- Pollutants such as **(35)**_____ could be cleaned from water more easily.
- There will be no waste from manufacturing.

MOCK TEST 6

5 parts · 35 questions

⏱️ 60 minutes

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

THE PLANET MARS

Mars is the fourth planet from the sun and is often called the red **(1)**_____. This distinct color comes from iron oxide, or rust, on its surface. For years, scientists have been fascinated by Mars, sending robotic rovers to explore its **(2)**_____. These rovers have shown us that Mars has a very thin atmosphere, composed mainly of carbon dioxide. This is one reason why the planet is so cold.

A primary goal of Mars exploration is the search for signs of ancient water. Evidence suggests that liquid water once flowed on its surface, carving out canyons and deltas. Finding the proof of **(3)**_____ is crucial because it could indicate that life once existed there. The data sent back by the robotic **(4)** _____ helps researchers piece together the planet's history. These dedicated scientists analyze every image and measurement. The ongoing exploration of the planet continues to reveal its secrets. Future missions hope to learn more about its thin atmosphere and geology. The work of these **(5)** _____ may one day answer if we are alone in the universe. This long-term **(6)**_____ is one of humanity's greatest adventures.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. You hope to take part in projects that help the environment while improving your language.

B. You need a program that provides a certificate that can help with your university application.

C. You'd like to live with a local family and experience their traditions closely.

D. You want a program that focuses mainly on improving your spoken English.

E. You're looking for a short summer course that includes cultural excursions

F. You'd like to prepare for a language exam while studying abroad.

G. You want to study abroad but don't have enough money to pay for accommodation.

H. You hope to meet people from international companies during your stay.

I. You'd like to do voluntary work related to community development.

J. You want to gain academic experience that could count toward a university degree.

7. Cambridge International College (UK)
This four-week English course emphases on conversation and pronunciation through debates, role plays, and group discussions. Weekend day trips to nearby towns are organized for an extra fee. Homestay is optional.
study@cambridgeintcollege.uk

8. GreenFuture Summer School (Sweden)
A two-week program combining ecological studies with English communication workshops. Students join recycling projects and visit eco-farms. Accommodation is included.
www.greenfuture.eu

9. CasaLingua Madrid (Spain)
A six-week intensive Spanish course that prepares students for global exams. Classes cover grammar, writing, and test-taking strategies. Students stay with local host families to improve speaking skills naturally.
+34 914 723 507

10. Global Work & Study Program (Canada)
Participants attend academic seminars and join internships at local organizations. Students can receive official diplomas recognized by several universities.
www.globalworkstudy.ca

11. Oxford Heritage Academy (UK)
Designed for ambitious learners who plan to study abroad later. The program offers scholarships covering tuition and accommodation. Students learn academic writing and research skills through project-based learning.
info@oxfordheritage.org

12. LinguaWorld Tours (Ireland)
Short-term English courses that include sightseeing, cultural visits, and guided tours. Suitable for those who want to practice language skills outside the classroom.
tours@linguaworld.ie

13. HandsOn Volunteers (Ghana)
Join a one-month volunteering experience in rural villages, helping improve schools and community centers. Participants also attend short cultural workshops. Accommodation is simple but free.
www.handsonvolunteers.org

14. BusinessBridge Paris (France)
A specialized language program for students interested in intercontinental business. It includes company visits, summits with professionals, and seminars on global communication.
info@businessbridge.fr

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once. Mark your answers on the answer sheet.

LIST OF HEADINGS
A) A wrong term that never changed
B) When friendship turned into tragedy
C) A people who respected nature
D) The first acts of generosity between cultures
E) The mystery of where they came from
F) A culture built on honesty and gratitude
G) Adopting the customs of strangers
H) Forced to leave their lands by deception and power

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

I. The Native Americans were the first known inhabitants of the Americas and are often described as the world's first environmentalists. To them, every part of nature — animal, plant, or stone — possessed a spirit and deserved respect. They took what they needed from the land but never more than necessary, showing deep gratitude for nature's gifts. Their traditions taught that harming the earth would ultimately harm the people themselves, creating a strong sense of balance and responsibility toward the environment.

II. Native Americans lived in many different regions, yet the exact origins of their ancestors remain uncertain. Some believe they have always lived on the continent since the beginning of time. Others argue that their ancestors migrated from Asia thousands of years ago, crossing the Bering Strait Land Bridge. Although many theories exist, none have been definitively proven. Modern DNA studies continue to explore these questions, revealing that the genetic history of Native peoples is far more complex than once imagined.

III. When Christopher Columbus arrived in the Americas, he mistakenly believed he had reached India. As a result, he called the native inhabitants "Indians," a name that — despite being incorrect — became permanent. In reality, there were numerous independent tribes, each with unique languages, traditions, and beliefs. Nevertheless, the collective term "Indians" persisted for centuries. Even today, the debate continues over which term — "Native American," "Indigenous," or "First Nations" — best reflects their true identity and heritage.

IV. When the Pilgrims arrived on the Mayflower in 1620 seeking religious freedom, they were warmly received by a local tribe in Massachusetts. The Native Americans shared food, farming knowledge, and hunting techniques, teaching the newcomers how to survive in the unfamiliar environment. The holiday of Thanksgiving still commemorates this early act of kindness and cooperation. Without such guidance, the settlers might not have survived their first harsh winter in the New World.

V. Sadly, this peaceful coexistence did not last long. Native Americans had no immunity to European diseases such as smallpox, measles, and typhus. As settlers spread across the land, these illnesses devastated indigenous populations. It is estimated that in some tribes, up to ninety percent of people died within a century of European contact — a tragedy beyond measure. The loss of so many lives also meant the disappearance of languages, stories, and cultural traditions that could never be recovered.

VI. As European colonization expanded, the situation for Native Americans worsened. Many were deceived into signing treaties after being given alcohol, or simply forced off their ancestral lands through violence. They were eventually confined to reservations — areas that were often barren and unfit for farming. Through lies and force, much of their territory was taken from them forever. Generations later, the struggle for land rights and cultural recognition continues to shape Native American life and identity.

PART 4

Questions 21–29

Read the following text for questions 21-29.

A MAN OF SCIENCE AND IMAGINATION

Sir Christopher Wren was one of the most remarkable figures of 17th-century England — a scientist, mathematician, astronomer, inventor, and ultimately, one of the country's greatest architects. Born in 1632 into a wealthy and educated family, he was a rather fragile child who received private lessons from tutors and his father at home. Wren's early education remains somewhat uncertain, as there are no records confirming whether he attended any formal school. However, historical sources show that in 1650 he entered Oxford University, where he studied mathematics and natural philosophy — what we now call science.

After completing his studies, Wren became a Professor of Astronomy at Gresham College in London. He was responsible for delivering weekly speeches in both Latin and English, which were open to anyone free of charge. His lectures attracted great attention and led to the creation of the Royal Society — the first official scientific organization in England. Later, he also taught at Oxford, where he continued his research in many areas, including optics, mechanics, medicine, and meteorology. Always curious, Wren designed and improved various devices and machines, experimenting with submarine construction, telescope design, and road paving techniques.

During this period, Wren's interests gradually expanded from science to architecture. In the 17th century, the job of "architect" was not yet recognized as a formal profession. Important buildings were usually designed according to the patron's wishes and executed by skilled craftsmen such as carpenters and masons. For well-educated gentlemen like Wren, architecture was considered more of a refined hobby than a career. Nevertheless, his extraordinary talent quickly gained recognition. After the Great Fire of London in 1666 destroyed much of the city, Wren was entrusted with the massive task of rebuilding many of its churches. In total, he designed 51 London churches — including his masterpiece, St Paul's Cathedral — each one distinctive yet sharing a classical elegance. His attention to detail and insistence on high-quality materials set new standards for English architecture. Wren was knighted in 1673 in recognition of his exceptional contributions.

The construction of St Paul's Cathedral began in 1675 when Wren was 43 years old. Blending elements of Medieval, Classical, and Baroque design, it remains a symbol of London's resilience and beauty. Its enormous dome and breathtaking interior demonstrate both scientific precision and artistic vision. The project took 35 years to complete, and fittingly, the final stone was laid by Wren's son.

Today, St Paul's Cathedral remains an active place of worship as well as a national landmark. Over the centuries, it has hosted numerous significant events — from the funerals of Lord Nelson and Sir Winston Churchill to services marking the end of both World Wars. More recently, it has been the site of royal celebrations, including the Queen's jubilees and birthdays.

Sir Christopher Wren passed away on February 25th, 1723, at the age of 90. He was buried in St Paul's Cathedral, the very building he had created. His gravestone bears a Latin inscription that translates: "If you seek his monument, look around you." It reminds visitors that his true memorial is not a statue or a plaque — but the magnificent work that still stands above London today.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 What is known about Christopher Wren's childhood education?

A) He attended a famous public school.
B) He was taught privately due to poor health.
C) He was educated abroad with other noble families.
D) He learned mostly through self-study and books.

22 As Professor of Astronomy at Gresham College, Wren...

A) had to give public lectures in two languages.
B) was required to teach only to university students.
C) charged a small fee for his lessons.
D) focused mainly on architecture and mechanics.

23 Which of the following was not part of Wren's scientific work?

A) Telescope design
B) Weather studies
C) Plant breeding
D) Submarine experiments

24 Why was Wren considered unusual for his time as an architect?

A) He was not a trained craftsman but a learned scientist.
B) He mostly built wooden houses instead of stone buildings.
C) He designed buildings only outside of London.
D) He refused to work for wealthy patrons.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 Wren's lectures at Gresham College were open only to scientists.

A) True
B) False
C) No Information

26 Christopher Wren became famous only after the Great Fire of London.

A) True
B) False
C) No Information

27 St Paul's Cathedral was completed entirely during Wren's lifetime.

A) True
B) False
C) No Information

28 St Paul's Cathedral was originally built in the 18th century to commemorate the end of the First World War.

A) True
B) False
C) No Information

29 Wren's gravestone expresses that his architectural work is his real legacy.

A) True
B) False
C) No Information

PART 5

Questions 30–35

Read the following text for questions 30-35.

THE SCIENCE OF HAPPINESS

Happiness is something that every culture values, yet it remains one of life's biggest mysteries. Around the world, people pursue success, wealth, and love in their search for lasting joy — but scientific research suggests that true happiness depends not only on what we achieve, but also on how we think, behave, and connect with others.

Scientists describe happiness as a blend of joy, calmness, and life satisfaction. It can originate from simple pleasures — like sharing a meal with friends, watching a sunset, or laughing at a funny story — as well as from greater accomplishments. However, happiness is not just a short-lived feeling; it's also a state of mind. Some people naturally focus on the positive aspects of life, while others find it harder to maintain that emotional balance.

Psychologists and neuroscientists have found that our brains play a crucial role in how happy we feel. When people experience positive emotions, their brains unleash chemicals like dopamine and serotonin, which are linked to delight, motivation, and eased pressure. Activities such as exercise, laughter, listening to music, or even spending time in nature can increase these chemicals, improving our overall mood and mental well-being.

It is fascinating that happiness is not determined solely by external circumstances or the possessions we own. Our mindset and everyday behaviors also play a crucial role in shaping it. Individuals who make gratitude a consistent part of their lives—by acknowledging what they value or noting down the positives—often experience greater overall well-being. Likewise, people who cultivate optimistic thoughts and treat themselves with kindness tend to handle stress more effectively and maintain stronger emotional balance.

Research indicates that individuals who maintain strong bonds —whether with loved ones, friends, or even animals—tend to enjoy better health, greater life satisfaction, and increased longevity. Kindness also has a remarkable influence. Engaging in helpful acts, volunteering, or showing generosity triggers the release of chemicals in the brain that elevate mood, a reaction often referred to as the helper's high. Even simple actions, such as a smile or a thoughtful word, can leave a surprisingly positive and lasting effect.

Money, too, affects happiness — but only to a certain extent. Financial security and the ability to meet basic needs such as food, housing, and safety are essential for peace of mind. However, once those needs are met, earning more money brings only a small increase in long-term satisfaction. In fact, people who focus too much on wealth or possessions often end up feeling less fulfilled. Experiences — like travelling, learning something new, or spending time with loved ones — usually bring deeper and more lasting happiness than material things.

Finally, happiness doesn't mean being cheerful every moment of the day. Everyone experiences sadness, anger, or stress from time to time. What matters is how we deal with those emotions. Practices such as mindfulness — paying attention to the present moment — along with good sleep, healthy eating, and regular exercise can all help us maintain a positive outlook and a sense of balance in our lives.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

Happiness can come from both everyday moments and from reaching important **(30)**_____.

Dopamine and serotonin are chemicals released in the **(31)** _____ that help people feel pleasure and reduce stress.

Practicing **(32)**_____ by appreciating life's good things often leads to greater life satisfaction.

People with close and caring **(33)**_____ usually enjoy better health, live longer, and feel happier.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 What does the text suggest about the link between money and happiness?

A) Earning more money always results in a happier life.
B) People can only be happy once they are completely wealthy.
C) Once basic needs are covered, extra income has limited impact on happiness.
D) Money is the most reliable source of long-term satisfaction.

35 Which idea best summarizes the overall message of the passage?

A) Happiness means avoiding sadness at all costs.
B) Emotional health is influenced more by gratitude, positive relationships, and attitude than by financial status.
C) Happiness comes entirely from chemical reactions in the brain.
D) Only people who achieve great success can truly be happy.

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) I bought it yesterday.
B) I'm looking for my phone.
C) It's outside.

2

A) No, I don't like coffee.
B) I'll be in Italy.
C) I start work at nine.

3

A) It's on the table.
B) I left them in the shop.
C) Maybe next weekend.

4

A) It's next to the sofa.
B) It's 07 849 700 567.
C) It's S25 Pro Max

5

A) Only on my birthday.
B) I work in the city centre.
C) Yes, I really enjoy them.

6

A) I usually take the bus.
B) It's history.
C) I'm not hungry right now.

7

A) Yes, you can pay by credit card.
B) No, I don't pay with cash.
C) It's very expensive.

8

A) No, I didn't see that movie.
B) It was great.
C) I'm meeting my friend later.

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

EVENT DETAILS

- **Name:** Daniel
- **Go to the library in:** **(9)**_____
- **Number of books to bring:** **(10)**_____
- **Day to take place the event:** **(11)**_____
- **Time:** **(12)**_____
- **Charge of the event:** **(13)**_____ pounds.
- **Website for more information:** www.**(14)**_____.com

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (1-4) to their job(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

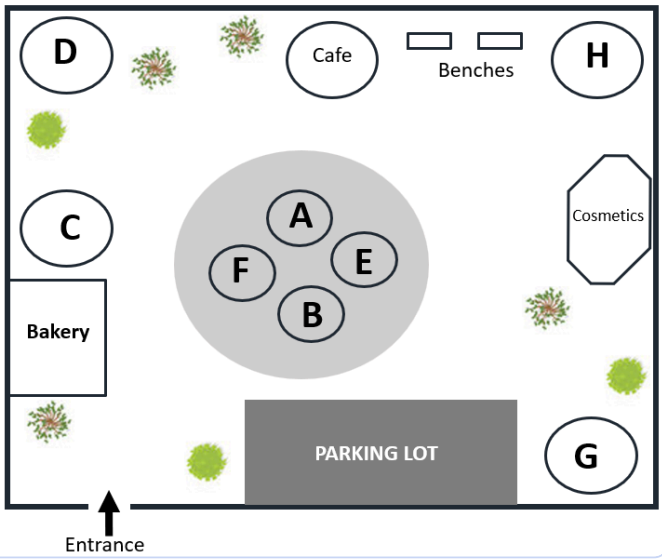

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

A) A public servant.
B) The speaker's an educator.
C) A job in telecommunications.
D) The speaker works in sales.
E) A position in a media company.
F) The speaker's job involves conservation.

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

19. Fruits ...

20. Milk ....

21. T-Shirt ...

22. Fish ...

23. Vegetables ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You will hear two speakers talking about a new relationship their friend currently has.

24 The woman thinks Noel's ex-girlfriend ...

A) spent too little time with him.
B) always agreed with him.
C) made all the couple's plans.

25 How do the speakers feel about Noel's new relationship? They're ...

A) hopeful.
B) worried.
C) excited.

Extract Two

You will hear a conversation between two speakers.

26 The speakers are discussing the ...

A) shopping facilities in their local area.
B) supermarket's car parking problems.
C) growing number of High Street shops.

27 What's the man's reaction when the woman says she has problems parking?

A) He's not interested in her view.
B) He thinks she has a good point.
C) He's surprised by her comment.

Extract Three

You will hear a phone conversation between a woman and a police representative.

28 The woman is calling because ...

A) there's a problem with her map.
B) she's run out of other options.
C) she needs help in an emergency.

29 At the end of the conversation, the woman is ...

A) relieved.
B) grateful.
C) embarrassed.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

MARIANNE GREENE – ROLLER COASTER DESIGNER

- Marianne says the first roller coaster that people paid to ride on used tracks which had originally carried coal from the mountains.
- As well as subjects Marianne studied at college, she found a knowledge of **(30)**_____ useful in her work.
- Marianne says a design for a new ride may be adapted to suit the **(31)**_____ it will be built in.
- Designers are usually more concerned than theme park owners about the **(32)**_____ the roller coaster will have to carry.
- Marianne mentions gravity and **(33)**_____ as examples of different forces people are exposed to on roller coaster rides.
- Marianne says that most of the information she uses has come from observing how airline **(34)**_____ are affected by the job they do.
- Marianne explains that most customer complaints involve rides that people think are **(35)**_____.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

THE MYSTERY OF THE MONTANA DINOSAUR

In recent years, scientists have made many fascinating discoveries about dinosaurs that have changed what we know about prehistoric life. In 2005, there was an unusual discovery found in Montana. Twenty-four different kinds of dinosaurs were uncovered in this one place. Most **(1)**_____ that are discovered are just bones. This dinosaur still had soft tissue in its bones. It had cells and blood vessels. This was not known when the dinosaur was first discovered. A scientist **(2)** _____ it when she examined it in the lab. Before this discovery, scientists never thought that **(3)**_____ in bones could survive more than 100,000 years. The scientists tested the bones. They found that they were 68 million **(4)** _____ old. This was the oldest dinosaur ever discovered with this type of tissue. This type of tissue is found in bones of birds when they are ready to make eggshells. This remarkable finding helped **(5)**_____ better understand the link between dinosaurs and modern **(6)**_____, offering new clues about evolution and ancient life.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. You're planning to study in another country and want to improve your academic language before the semester starts.

B. You'd like to stay with a local family to experience everyday life.

C. You're a professional who must improve language skills for workplace communication.

D. This course is dedicated for people who are aged around 50-60 years old.

E. You're looking for a short, intensive course that fits during your summer break.

F. You want to study in a quiet place rather than a big city.

G. You need help preparing for a language-proficiency exam.

H. You're interested in combining language lessons with voluntary or internship experience.

I. You want a course that lets you to be rich in other country.

J. You prefer to learn in an English-speaking country where lessons focus on practical communication.

7. SPANISH AND CULTURE IN SEVILLE

Learn Spanish under the Andalusian sun!
Morning classes focus on real communication, while afternoons are for guided cultural tours of the city's historic quarters and flamenco evenings. Accommodation with Spanish host families allows you to practise conversation daily. Students often join weekend excursions to nearby villages for authentic cultural experiences.
www.sevillelanguages.es

8. ENGLISH FOR CAREERS – DUBLIN

Designed for professionals who already use English at work. This course covers business meetings, email writing, and cross-cultural communication. Participants also visit Irish companies to observe workplace culture. Minimum age 25. The course concludes with a short presentation project based on real-world business situations.
www.efc-dublin.ie

9. FRENCH IN THE ALPS

If you prefer mountains to urban noise, our school in Annecy offers small-group French lessons in a peaceful setting. You'll enjoy outdoor activities such as hiking and skiing while improving fluency through natural conversation.
www.alpinefrench.fr

10. ENGLISH PRE-SESSIONAL PROGRAMME – BATH

For students beginning a university degree in the UK. The course develops academic writing, note-taking, and seminar participation skills. You'll also receive support with study techniques and research vocabulary. Participants gain access to the university library and online learning platforms during the course.
www.bathuniversityprep.ac.uk

11. FRENCH SUMMER INTENSIVE – NICE

A fast-paced four-week course focused on grammar, speaking, and listening. Ideal for students with limited time who want quick progress. Afternoon beach activities and film nights included. Accommodation can be arranged in student residences close to the school.
www.nicefrancesummer.com

12. ITALIAN + INTERNSHIP – FLORENCE

Take morning language lessons and spend afternoons gaining work experience in local shops, art studios, or charities. A great way to improve Italian while building your CV. Previous students have completed placements in tourism, fashion, and marketing sectors.
www.internitalia.it

13. ENGLISH COMMUNICATION COURSE – VANCOUVER

Emphasis on fluency, teamwork, and everyday interaction. Includes social clubs and weekend trips to nature parks. Recommended for those seeking a relaxed yet dynamic English-speaking environment. Evening conversation cafés help you practise with local Canadians in informal settings. www.vancouverenglish.ca

14. GERMAN TEST PREPARATION – BERLIN

Need to pass a language exam? This course focuses on strategies for the Goethe-Institut and TELC tests. Mock exams every week and feedback from experienced examiners ensure strong results. Study materials and exam practice booklets are included in the course fee. www.berlingoethe.de

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

LIST OF HEADINGS:

A) The ways in which laws preserve order and safeguard society
B) How new laws are designed and passed into action
C) Varied structures of global legal frameworks
D) The earliest emergence of recorded legal codes
E) Outcomes faced by individuals who violate laws
F) Reforming laws to uphold justice and equality
G) Debates over the length of certain punishment periods
H) The principal divisions within legal systems

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE ROLE OF LAWS IN MODERN SOCIETY

I. Every society requires a clear set of guidelines to operate smoothly. These guidelines, called laws, direct how individuals should act. Laws define what behavior is acceptable and what is not. Their main purpose is to safeguard people, resolve conflicts, and ensure public security. For instance, traffic regulations help prevent accidents, while criminal laws stop theft and violence. Without laws, citizens might feel unsafe, and communities could quickly fall into chaos and disorder.

II. The idea of creating laws is not new. Thousands of years ago, ancient civilizations began developing written codes of conduct. One of the earliest known examples is the Code of Hammurabi from Babylon, which detailed specific punishments for various offenses. This reveals that even ancient people valued justice and fairness. Later, Roman law became more advanced and has greatly influenced modern legal systems, especially throughout Europe and other regions shaped by Roman traditions.

III. In most countries today, new rules start as proposals written by elected lawmakers. These representatives discuss, debate, and often revise them before taking a vote. If a majority supports the proposal, it officially becomes a law. Afterward, courts and judges interpret and apply these laws to actual situations. In democratic nations, ordinary citizens can also participate by signing petitions, joining advocacy groups, or voting for leaders who share their views on justice.

IV. Laws do not all serve the same function. Criminal laws address crimes such as robbery, fraud, or assault. Civil laws handle disagreements between people, such as property issues or contract breaches. Family laws deal with matters like marriage, divorce, and child custody, while environmental laws aim to protect nature. Traffic laws help maintain safety on the roads. Dividing the law into these categories allows governments to manage society's complexity more clearly and fairly.

V. Anyone who breaks the law faces consequences. These can include paying fines, losing a license, doing community service, or, for serious crimes, going to prison. The severity of punishment depends on the seriousness of the offense. Courts are responsible for ensuring that penalties are fair and consistent. Yet, public debates often arise — some argue that certain punishments are too harsh, while others believe they are too lenient.

VI. For any legal system to function effectively, its laws must be fair, flexible, and adaptable. When rules are unjust, people may lose faith in their government, leading to protests or defiance. Strong laws protect all citizens, especially those who are vulnerable or belong to minority groups, and they must evolve with time. Modern issues such as cybercrime, digital privacy, and climate change demand new and updated legislation. A successful legal system must balance tradition and innovation to keep society both safe and fair for everyone.

PART 4

Questions 21–29

Read the following text for questions 21-29.

TINY CREATURES, MIGHTY INFLUENCE

Insects are the most abundant and varied group of animals on Earth. They inhabit nearly every environment imaginable — from humid rainforests and scorching deserts to icy mountaintops and dark underground caves. Some even share our living spaces, feeding on our food and nesting in our homes. Experts estimate that there may be over ten million species of insects worldwide, although only around one million have been formally described. Statistically, for every single person, there could exist over 200 million insects. Their hidden world is vast, intricate, and endlessly fascinating.

Despite their diversity, all insects share a number of unique physical traits. Each insect's body consists of three sections — the head, thorax, and abdomen — and features six legs and a pair of antennae. Many insects have wings, which help them to travel, locate mates, or escape predators. Yet not all species can fly; ants and fleas, for instance, lack wings but are still perfectly suited to their environments. Insects belong to the wider animal group known as arthropods, which also includes spiders, crabs, and centipedes. However, unlike their relatives, insects always possess six legs and a three-part body design, setting them apart within the animal kingdom.

Insects perform indispensable tasks within ecosystems. Bees, for example, pollinate nearly one-third of all the food humans consume. Without their activity — and that of other pollinators — the reproduction of many fruits, vegetables, and flowers would be severely disrupted. Ants contribute by cleaning their habitats, feeding on dead organisms and leftover food, helping to prevent the spread of disease. Butterflies and moths, admired for their elegance, also assist in pollination while enriching natural landscapes with color. Farmers often rely on ladybirds, which feed on pests such as aphids that damage harvests. Because of these small but vital creatures, many plants thrive without excessive dependence on chemical pesticides.

Life is not easy for insects, and survival demands creativity. Over time, they have developed remarkable defensive mechanisms. Some camouflage themselves to match leaves or bark, while others display bright warning colors like red, orange, or yellow to signal toxicity. Beetles protect themselves with hard shells, whereas flies depend on rapid flight to escape danger. Certain species release unpleasant smells or painful stings as chemical weapons. Communication is also crucial for safety — ants leave chemical trails to guide their nestmates to food, and crickets rub their wings together to produce rhythmic chirps that attract mates or claim territory.

Perhaps the most intriguing feature of insects is their life cycle. Most undergo metamorphosis, progressing through four stages — egg, larva, pupa, and adult. Take the butterfly as an example: it begins as an egg, transforms into a caterpillar, becomes a chrysalis, and finally emerges as an adult butterfly. This process enables insects to inhabit different environments and functions throughout life. Some species, such as dragonflies, begin their existence underwater before taking flight as adults — a clear demonstration of their extraordinary adaptability.

Many insects also show impressive levels of social organization. While some live solitary lives, others — including ants, bees, and termites — form highly structured colonies. These societies are divided into distinct castes: workers, soldiers, and queens, each with specialized duties. Workers gather food, soldiers defend, and queens reproduce. Such cooperation allows colonies to survive even under extreme conditions. Scientists often liken these communities to human cities, as both rely heavily on teamwork, communication, and shared purpose.

Insects are not only vital to nature but also essential to human existence. They recycle nutrients, pollinate crops, and serve as food sources for birds, reptiles, and fish. Without them, entire ecosystems would collapse, and human agriculture would face catastrophic losses. Yet insect populations are rapidly declining due to pollution, habitat destruction, and climate change. Safeguarding these small creatures is therefore critical — not merely for their survival, but for the stability of the planet and humanity itself.

Although they may seem insignificant, insects are among the most successful species ever to inhabit Earth. Their capacity to adapt, cooperate, and contribute makes them truly exceptional. They remind us that even the tiniest beings can leave the largest mark on our world.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 According to the text, scientists suggest that insects ...

A) vastly outnumber humans on Earth.
B) exist in fewer numbers than most animals.
C) are found only in warm and tropical regions.
D) have all been officially classified.

22 What feature clearly separates insects from other arthropods?

A) The ability to fly with a pair of wings.
B) Having eight legs like spiders and crabs.
C) A preference for living in organized colonies.
D) A body divided into three parts and six legs.

23 Farmers gain advantages from certain insects because they ...

A) lessen the need for chemical fertilizers.
B) naturally control other species that destroy crops.
C) provide useful substances like honey and wax.
D) improve soil structure through digging tunnels.

24 Which statement does not reflect the way insects protect themselves?

A) They employ diverse colors, scents, and behaviors as defense.
B) They depend mainly on rapid flight for safety.
C) They can change body size instantly to stay hidden.
D) They release dangerous gas to frighten predators.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 Insects' wings enable them to fly over a long distance.

A) True
B) False
C) Not Given

26 Insects and spiders belong to the same larger animal group.

A) True
B) False
C) Not Given

27 Crickets use sound created by their wings to communicate.

A) True
B) False
C) Not Given

28 Only aquatic insects experience metamorphosis during their life cycle.

A) True
B) False
C) Not Given

29 The writer argues that protecting insects is equally important for humans.

A) True
B) False
C) Not Given

PART 5 Questions 30–35

Read the following text for questions 30-35.

A NEW GIANT IN THE SKY

In the misty mountains of Guizhou Province, China, a new engineering wonder now stretches across the deep Huajiang Canyon. On Sunday, the Huajiang Grand Canyon Bridge officially opened to the public — instantly becoming the tallest bridge in the world, rising an astonishing 625 metres above the Beipan River. The project represents not only a record-breaking height but also remarkable technological progress. The bridge extends a total of 2,890 metres, with a main span of 1,420 metres, making it the longest bridge ever built in such steep and challenging terrain. It is widely viewed as one of the most advanced constructions of its kind anywhere on Earth.

For people living in the region, the bridge is far more than just a symbol of progress — it's a practical lifeline. Before it was built, drivers had to take a winding two-hour journey to cross the river. Now, thanks to the bridge, that same trip takes barely two minutes. This dramatic reduction in travel time allows local people to reach schools, hospitals, and workplaces much more easily. Transporting goods such as food, medicine, and building materials has also become far faster and cheaper. Businesses can grow more efficiently, families can stay connected, and rural areas can integrate better with nearby cities. A government official stated that the bridge would "inject new economic energy into the region" by linking isolated areas with major trade routes.

China's achievements in bridge construction are attracting global attention. According to highestbridges.com, the 18 tallest bridges in the world are all located in China — either already completed or still under construction. Experts say this success proves the country's growing leadership in large-scale infrastructure and engineering innovation.

Building the Huajiang Grand Canyon Bridge was no simple task. Engineers had to overcome dangerous winds, high altitudes, and extremely steep cliffs. To ensure safety, they equipped the bridge with special wind-resistant systems that allow it to remain stable during storms or bad weather. Advanced technology was used to lift and position materials across the deep canyon, requiring extraordinary precision and teamwork. Engineers around the world now study this bridge as a model of what can be achieved when human skill meets determination.

However, the bridge's significance extends far beyond transportation and industrial value. It has evolved into a major destination for tourists, capturing attention with its magnificent scenery. Authorities anticipate that the site will welcome a huge number of tourists annually. To accommodate them, a modern visitor centre has been established, featuring a café, a geological museum that illustrates how the canyon was formed, and even a bungee-jumping platform designed for adventure enthusiasts seeking an adrenaline rush.

In a broader sense, the bridge represents China's transformation over the past few decades. Once, many rural regions were isolated with little access to modern transport. Today, the country is home to the tallest bridges, the fastest trains, and some of the world's most ambitious engineering projects. The Huajiang Grand Canyon Bridge is more than a structure — it's a symbol of how quickly innovation can reshape a nation.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

This enormous **(30)**_____ is regarded as one of the most advanced bridges ever created, as well as the tallest.

Thanks to the new bridge, a long-distance drive has been reduced to just **(31)**_____.

Engineers added special technology to make the bridge remain steady during severe **(32)**_____.

Besides improving travel, the bridge is expected to draw millions of **(33)**_____ every year.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 What is the most significant advantage of the Huajiang Grand Canyon Bridge for locals?

A) It allows faster movement and stronger relations between communities.

B) It has become the main source of food and medicine in the region.

C) It lowers the overall cost of car ownership in China

D) It replaces older bridges that collapsed in the past.

35 Why is this bridge considered a global engineering success?

A) It was built in record time using very cheap materials.

B) It combines height, design innovation, and extreme environmental challenges.

C) It is the first bridge built entirely by international companies.

D) It is shorter than other bridges but stronger in design.

MOCK TEST 8

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) Yes, I'm going tomorrow
B) I'll call you later.
C) Not yet.

2

A) It was very expensive.
B) I have been to the post office.
C) I'm free this afternoon.

3

A) Only on weekends.
B) Yes, I learnt as a child.
C) I have no idea.

4

A) I'll have some ice cream.
B) I already finished my homework.
C) I don't have a car.

5

A) Yes, it's mine.
B) I'm going there.
C) No, it isn't hers.

6

A) It's in the kitchen.
B) I like sauce.
C) It is tomato-based.

7

A) Yes, please.
B) No, I already bought it.
C) Yes, add some salt too.

8

A) I'll show his.
B) Here it is.
C) I am very pleased.

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

DANCE COMPETITION

- **Speaker full name:** Rachel (0) Atkins.
- **For (9)_____ from:** 13-15
- **Date to enter by:** **(10)**_____
- **Send:** **(11)**_____
- **Website address:** www. **(12)**_____.com
- **Place:** **(13)**_____
- **First prize:** (14) £_____

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (1-4) to their working sector(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

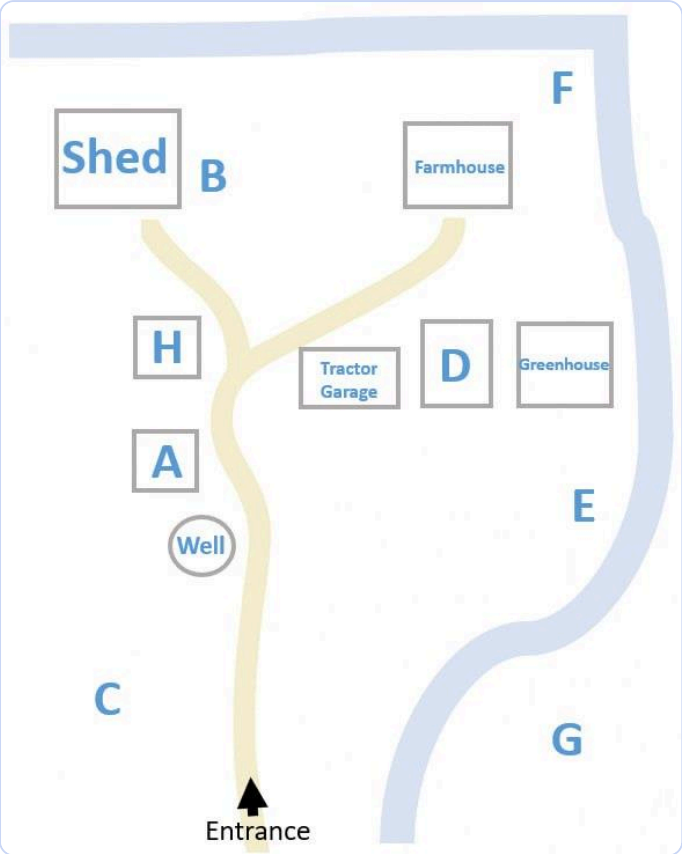

A) Education
B) Marketing
C) Healthcare
D) Tourism
E) Journalism
F) Information Technology

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

RIVER FARM

19. Corn field ...

20. The Chicken coop ...

21. The Orchard ...

22. The Vegetable Garden ...

23. The Windmill ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You will hear an interview with someone who has started a magazine for children.

24 What does Kate say about enthusiasm?

A) Children respond positively to it.
B) Children cannot maintain it for long time.
C) Children experience it more than adults.

25 Kate says that she learnt from her research that children ...

A) don't want to feel that they are being considered inferior.
B) don't like texts that have too much serious content.
C) don't know some words that she had expected them to know.

Extract Two

You will hear two faculty directors talking about which person in their university to promote.

26 The position needs someone good at ...

A) Computers.
B) Dealing with people.
C) Arts.

27 The directors will select someone from the faculty of ...

A) Arts.
B) Computing.
C) Business.

Extract Three

28 When can phone calls from artists be difficult for Rachel?

A) when their work doesn't sell
B) when they don't receive payments
C) when their work is not accepted

29 Why does Rachel include a commentary in the catalogue?

A) It gives background information about the artist.
B) It encourages people to buy paintings over the phone.
C) It tells people what experts think of the work.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

MARS EXPLORATION

- A mission to Mars could take over a **(30)**_____ just to reach the planet.
- One major concern for astronauts is exposure to harmful **(31)**_____ in space.
- Developing the technology for Mars travel is incredibly **(32)**_____.
- Astronauts may struggle with feelings of **(33)** _____ due to long periods away from Earth.
- Some critics argue that space funding should be **(34)** _____ to fight problems on our own planet.
- Scientists worry that Martian soil might contain unidentified **(35)**_____ that could pose risks.

MOCK TEST 8

📖 READING

5 parts · 35 questions

⏱ 60 minutes

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

DESERT LIFE

Deserts cover a large part of the Earth's surface, and life there is both rare and remarkable. Many unique plants and animals manage to survive in the **(1)**_____. In them, small **(2)** _____ such as lizards, jerboas, and beetles feed on seeds, insects, or tiny bits of plants. They hide under rocks during the day to escape the burning sun and come out at night to search for food. Larger animals hunt smaller ones, while some desert creatures **(3)**_____on cactus fruits, roots, and dry grasses to stay alive.

Even though most wild animals try to avoid contact with humans, they are never far away — often hiding in burrows or blending perfectly with the sand. There are many types of desert plants as well. Some plants drop their leaves during the **(4)**_____ season to reduce water loss and survive for months without rain. The ground is made of sand, dust, and the remains of ancient plants and rocks. After animals and **(5)** _____ die, their bodies rot slowly in the soil because of the heat and lack of moisture. This process helps make the **(6)** _____ slightly richer, allowing a few hardy plants to grow again when the rains finally come.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. Learning about how to reuse old materials in creative ways.

B. Asking questions directly to people who study environmental issues.

C. Finding out how cities and villages differ in their use of energy.

D. Getting ideas for small changes that make your house eco-friendlier.

E. Joining community activities that help protect nature.

F. Discovering how food choices affect the planet.

G. Learning about energy sources that don't rely on fossil fuels.

H. Comparing the environmental cost of different ways to travel.

I. Reading about companies that produce eco-friendly clothes.

J. Taking part in an online course about recycling.

7. www.greenroute.org

Planning a trip soon? This site calculates how much fuel or electricity various types of transport use. Assess trains, planes, and cars to see which option leaves the smallest carbon footprint. There's also a short guide on eco-friendly travel habits. A new feature even lets users analyze routes to see how weather conditions affect energy use.

8. www.natureconnect.org

An online platform where volunteers can find nearby projects such as planting trees, collecting litter, or helping in wildlife reserves. Users can share stories and photos from their experiences to encourage others to take part. Monthly challenges reward the most active members with eco-friendly prizes.

9. www.futureenergy.co.uk

If you want to learn how wind, water, and sunlight can power our homes and cities, this website explains everything clearly. Interactive maps show which countries are switching from oil and gas to renewable energy. It also includes interviews with engineers developing next-generation solar panels.

10. www.askascientist.net

Want to know what experts are discovering about the planet? Here you can read blog posts written by scientists and even send them your own requests. They reply to selected ones each week, making complex topics easy to understand. A podcast series is also available where specialists discuss their latest environmental studies.

11. www.homeecoideas.com

From saving water to reducing waste, this site gives practical advice for anyone who wants to live more sustainably. There are videos about turning off unused devices, growing your own herbs, and choosing energy-efficient lighting. Visitors can download a free checklist to track their weekly progress at home.

12. www.rethinkdesign.org

Discover creative ways to redesign materials that might otherwise be thrown away. You'll find tutorials on making furniture from cardboard or bags from torn jeans — proof that sustainability can be stylish too! New community challenges invite users to share photos of their own upcycled creations.

13. www.cleanplate.org

Did you know that what we eat influences the earth's health? Learn about how reducing meat, avoiding food waste, and buying local produce can lower your carbon footprint. Includes recipes from environmentally conscious chefs. A calculator also estimates how much water and land you save with each plant-based meal.

14. www.ecostyleworld.com

Stay up-to-date with fashion that doesn't harm the planet. This site reviews brands that use recycled fabrics or pay fair wages to their workers. There's also advice on how to shop responsibly and care for clothes to make them last longer. Its monthly blog highlights new designers creating eco-friendly collections worldwide.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

LIST OF HEADINGS:

A) Protected viewing: safety through distance
B) Travelling with a purpose – nature first
C) The evolution of animal expeditions
D) Etymology and worldwide expansion of safaris
E) Top global destinations for wildlife adventures
F) Pack light, travel smart
G) From hunting to harmony
H) Where the wild things truly are

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

DISCOVERING THE SAFARI EXPERIENCE

I. A safari traditionally refers to a journey through untamed land — most often in vast grasslands or dense jungles — undertaken to observe or hunt wild animals. Historically, safaris were primarily hunting expeditions organized by wealthy Europeans seeking trophies such as lion skins or elephant tusks. Over the decades, however, this perception has dramatically evolved. Today, most safaris are centred on viewing and photographing animals rather than harming them. The rise of wildlife protection laws and global concern about endangered species has led to a new, ethical approach where the aim is to witness wildlife in its natural state, not to conquer it. Modern safaris therefore represent both an adventure and a conscious act of preservation.

II. The term safari originates from the Swahili language but can be traced even further back to the Arabic verb safara, meaning to travel. While Africa remains the birthplace and spiritual home of the safari tradition, the concept has expanded across continents. Today, safari adventures can be found not only in the savannas of Kenya or Tanzania but also among the dense jungles of India, the icy landscapes of Antarctica, the arid outback of Australia, or the lush rainforests of the Amazon Basin. In Alaska and Canada, too, guided wildlife tours have become increasingly popular. In essence, any destination where animals roam freely and humans are temporary guests can be described as a safari.

III. Although the idea of trekking through the wilderness on foot sounds thrilling, it is often safer to observe animals from a secure vehicle or protected viewpoint. Predators such as lions, tigers, or bears may appear calm at a distance, but their unpredictable instincts can make close human encounters life-threatening. Likewise, frequent intrusion by humans may distress animals or disrupt their feeding patterns. For this reason, many safaris rely on jeeps, minibuses, or even specially designed observation trucks. From within these vehicles, visitors can admire wildlife at close range while remaining safely shielded. This approach ensures both the safety of travellers and the wellbeing of the animals, maintaining the delicate balance between curiosity and conservation.

IV. The duration and style of a safari can vary greatly. Some tours last a mere weekend, while others extend over several weeks, traversing vast regions by plane, jeep, or even hot-air balloon. Many itineraries include camping beneath the stars or staying in eco-lodges near wildlife reserves. Because safaris often involve multiple locations and transport changes, travellers are advised to take only essentials. Overpacking can become a serious inconvenience on budget or mobile safaris, where every kilogram counts. A compact backpack, comfortable clothing, and essential gear such as binoculars and insect repellent are far more valuable than heavy suitcases.

V. Africa remains the ultimate safari places, with Kenya, Tanzania, South Africa, and Botswana drawing millions of visitors each year. Yet, the allure of safari travel extends well beyond this continent. Australia offers unique outback tours featuring kangaroos and emus, while India's national parks are home to Bengal tigers and elephants. In South America, the rainforests of Brazil and Peru provide opportunities to observe monkeys, parrots, and river dolphins in their natural habitats. Meanwhile, in Alaska, visitors can witness the raw beauty of grizzly bears fishing for salmon or watch polar bears wandering along icy shores. Many of these excursions combine multiple experiences — such as cruises, treks, or photography workshops — making the modern safari a global and highly diverse phenomenon.

VI. Closely related to the safari experience is the concept of eco-adventure — a form of travel that emphasizes sustainability, education, and respect for nature. An eco-adventure might involve canoeing along the Amazon River, hiking through tropical rainforests, or joining a conservation-based safari in Africa. These journeys encourage travellers to engage with local communities, learn about fragile ecosystems, and minimize their environmental footprint. Responsible tour operators ensure that participants follow "leave no trace" principles and often contribute financially to local conservation projects. In this way, eco-adventure tourism transforms ordinary sightseeing into a purposeful journey that benefits both people and the planet.

PART 4

Questions 21–29

Read the following text for questions 21-29.

THE HIDDEN WORLD BENEATH THE SEA

The ocean covers more than seventy percent of the Earth's surface, yet much of it remains an untouched mystery. Scientists estimate that over eighty percent of the world's seas and oceans have never been properly explored or mapped. In other words, most of our planet's largest ecosystem is still hidden from view. Within this immense, dark, and shifting realm lie countless secrets — from strange life forms and unexplained natural sounds to puzzling underwater structures and phenomena that science has only begun to understand. The deep ocean, in many ways, is like another planet — unfamiliar, dangerous, and full of extraordinary surprises waiting to be revealed.

One of the most enigmatic areas of the ocean is the deep-sea floor. This vast region exists in total darkness, where the pressure is so immense that humans cannot survive without specially designed equipment. Because of this, exploration relies heavily on advanced submersibles, underwater robots, and remote sensors. Despite decades of research, oceanographers admit that humanity still knows more about the surface of Mars than about our own seabed. What lies beneath the waves includes underwater mountain ranges, enormous trenches deeper than Everest is tall, and even volcanoes that continue to erupt unseen. In some regions, strange shapes and formations resemble man-made buildings or pyramids. Near Japan, for example, lies the Yonaguni Monument, a mysterious underwater structure. Some claim it is the remains of an ancient civilization swallowed by the sea, while others insist it is simply the product of natural erosion.

The ocean's mysteries are not only visual but also auditory. The sea is full of sounds, many of which are still unexplained. Perhaps the most famous example is "The Bloop", a powerful low-frequency noise recorded in 1997. When it was first heard, it sparked speculation that it came from a gigantic, unknown sea creature lurking in the depths. Later studies suggested it might instead have been produced by the fracturing of icebergs, though no one has ever proved this conclusively. Similar strange noises — deep rumbles, eerie clicks, or metallic echoes — continue to puzzle scientists, who are still trying to identify their sources.

Equally fascinating is the mysterious "milky sea" phenomenon, in which vast sections of the ocean surface suddenly begin to glow with a pale blue or white light. Sailors have reported this event for centuries, describing entire horizons illuminated as if by moonlight. Modern researchers believe that this glow is caused by bioluminescent bacteria that emit light when they gather in huge colonies, although the exact process that allows such vast gatherings to occur remains unclear. Remarkably, some of these glowing seas are so extensive that satellites orbiting the Earth have captured them from space.

Beneath the waves lies a realm teeming with life — much of it unlike anything found on land. Creatures that dwell thousands of metres below the surface have adapted to an environment of perpetual darkness and crushing pressure. Many possess bizarre shapes, translucent skin, or the ability to generate their own light. Some have no eyes at all, while others display features that seem to belong in science fiction rather than reality. Every deep-sea expedition yields new species, suggesting that our catalog of marine life is far from complete. In fact, the ocean may still hold countless organisms we have yet to encounter — each one revealing something new about the possibilities of life on Earth.

The ocean has long captured human imagination not only because of what lives in it but also because of what has disappeared within it. The Bermuda Triangle, a region of the Atlantic Ocean between Florida, Bermuda, and Puerto Rico, has become famous for mysterious vanishings of ships and aircraft. Over the years, countless theories have been proposed — from supernatural forces and magnetic disturbances to unpredictable weather patterns and navigational errors. While most scientists agree that ordinary explanations such as storms or human mistakes are the most likely causes, the legend continues to fuel curiosity about what really happens in that enigmatic part of the sea.

Though science has revealed parts of the ocean, most of it remains unexplored. Its depths may hold clues to Earth's past, new medicines, energy sources, and the origins of life. As technology improves, researchers aim to explore further — not just out of curiosity, but to understand and protect this vast, mysterious world.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 According to the text, exploring the deep sea remains difficult mainly because ...

A) its terrain is too solid for vehicles to enter.
B) people are unable to create machines that survive underwater.
C) extreme darkness, pressure, and temperature make it hostile to humans.
D) it shares many features with the Martian landscape.

22 The mystery known as "The Bloop" ...

A) initially startled the scientific community.
B) has never been fully resolved.
C) was conclusively linked to an enormous creature.
D) turned out to be a simple case of breaking ice.

23 **The "milky sea" phenomenon refers to ...**

A) the reflection of starlight on calm water.
B) light patterns that are invisible from orbit.
C) oceanic brightness possibly created by shining microorganisms.
D) waves that shine because of moonlight.

24 **The Bermuda Triangle is described as ...**

A) an area notorious for unexplained disappearances.
B) a geometric barrier built by humans.
C) a common research site for new marine species.
D) a zone where bacteria cluster in luminous waters.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 **Scientists admit that we currently know more about Mars than about the deepest parts of Earth's oceans.**

A) True
B) False
C) Not Given

26 **The Yonaguni Monument has been confirmed to be the ruins of a lost city.**

A) True
B) False
C) Not Given

27 **Some of the mysterious ocean noises, including "The Bloop," still have no definite explanation.**

A) True
B) False
C) Not Given

28 **The article mentions that numerous films and documentaries have been produced about the Bermuda Triangle.**

A) True
B) False
C) Not Given

29 **Scientists have already explored almost all parts of the ocean in detail.**

A) True
B) False
C) Not Given

PART 5

Questions 30–35

Read the following text for questions 30-35.

THE FIFTH TASTE

When we were young, many of us learnt that there are four basic tastes: sweet, sour, salty, and bitter. However, scientists now say there is a fifth taste: umami. Unlike the other four, umami is more subtle and complex, often described as a deep, savory, or meaty flavor. While it may not be as immediately recognizable as sweetness or sourness, it plays a crucial role in enhancing the overall taste experience of many dishes. From rich broths and aged cheeses to ripe tomatoes and cured meats, umami is present in a wide range of foods, adding depth and satisfaction to every bite.

Umami, which has been enjoyed by Eastern countries for centuries, was recently brought to people's attention in the West by scientists at the University of Miami in the US. The word 'umami' is new to many people, but not to the Japanese, who've used it since the early 1900s to describe the fifth taste. So, what exactly is the umami taste? Well, there's no word in English which means the same, and it's often described as a savory or meaty taste.

Recognizing the umami taste takes practice; it's not as obvious as the other tastes. For example, when eating a homemade chicken soup made without salt or pepper, most people would find it too plain. Adding a small amount of something called 'monosodium glutamate' to that same soup gives it the umami taste and would probably lead you to say that the soup now tastes more like chicken soup than it did before. It's not as simple as making something more salty, as salt alone can do that. Instead, the umami taste is one of richness and fullness. Basically, it just makes the food taste more delicious.

Asian cooks began adding seaweed – a type of plant from the sea – to soups over 1,200 years ago. They'd discovered that foods cooked with seaweed simply tasted better. They didn't know, however, that the reason for this improved flavor was actually the high levels of glutamate which exist naturally in the seaweed.

Eventually, in 1908, a Japanese scientist made the connection between glutamate and seaweed. He then studied the various kinds of glutamate, trying to find one that gave the umami taste, and that could also be produced in factories. He found that the sodium salt form, called monosodium glutamate, was exactly what he was looking for. It provided umami, and it was easy for cooks to use and store. Monosodium glutamate, usually called 'MSG', was first produced in Japan in 1909. Since then, it has been used by food producers and home cooks to improve the flavor of a wide variety of dishes.

So, which foods naturally contain glutamate? Well, meats, cheese and other high-protein foods have a lot of glutamate. In some, the amount of glutamate they contain, and their flavor, increases as they get older. For example, old cheese has more glutamate than young cheese and this also happens with some vegetables, like tomatoes. This is why a red tomato tastes much better than a green one. Think about that the next time you make a sandwich or a salad!

Interestingly, umami is not only about enhancing flavor—it also plays a crucial role in nutrition. Scientists believe that our ability to detect umami evolved as a way to recognize protein-rich foods, which are essential for muscle growth and overall health. When we eat umami-rich foods, they stimulate our appetite and digestion, making us more likely to consume the nutrients our bodies need. Additionally, umami can make low-salt dishes taste more satisfying, which is why it's often used as a healthier alternative to excessive salt in cooking. This makes umami not just a fascinating taste but also an important part of a balanced diet.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

THE UNIQUE FLAVOR OF UMAMI

The **(30)**_____ have used the word 'umami' to describe the fifth taste for over a hundred years. It's hard to explain what exactly the umami taste is, but without it many of our foods would not taste quite as **(31)** _____. Foods which have a lot of protein, like meat and **(32)**_____, usually have a lot of glutamate. In some foods, the amount of glutamate in the product changes when they are **(33)**_____.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 **What was the main reason early Asian cooks started adding seaweed to their soups?**

A) They wanted to increase the amount of protein in their meals.
B) They noticed that it made their food taste better.
C) They were influenced by Western cooking techniques.
D) They were following scientific research on glutamate.

35 **How does umami contribute to a healthier diet?**

A) It encourages people to eat more carbohydrates.
B) It makes food taste saltier without increasing salt intake.
C) It eliminates the need for any seasoning in food.
D) It reduces the body's need for protein.

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) Last week.
B) I think it looks great on you.
C) From a shop.

2

A) Usually at 8 a.m.
B) Toast and coffee.
C) No, I'm not hungry right now.

3

A) Yes, please.
B) No, I already watched it.
C) Who knows, maybe.

4

A) No, I've never been there before.
B) Yes, I arrived yesterday.
C) It's my favorite city.

5

A) Prices are growing.
B) I paid by card.
C) I didn't check the price.

6

A) At 3 o'clock.
B) It's in the main building.
C) I think it was expensive.

7

A) No, I'm fine, thanks.
B) That was great.
C) He already gone home.

8

A) No, I was not sure where I was going.
B) Maybe tomorrow morning.
C) Yes, let's go.

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

LIBRARY INFORMATION FOR STUDENTS

Library name: (0) **Lincoln** library.

Hours during term time: 24 hours a **(9)**_____

Hours outside term time: **(10)**_____ - 7.00 p.m.

Number of books you can take out: **(11)**_____

Cost of returning CDs and magazines late: (12) £ _____ per day

Cost of first library card: **(13)**_____

To get a card, give in a form and: **(14)**_____

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (1-4) to the place they are at(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

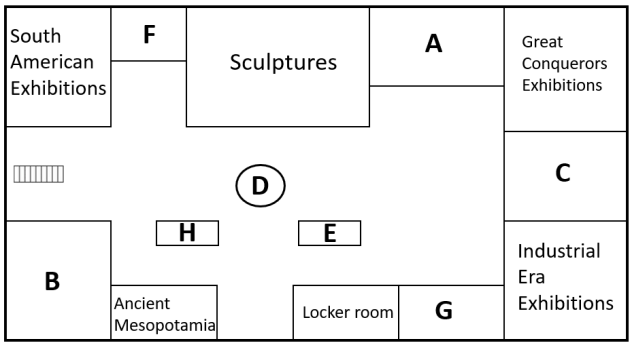

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

A) In a supermarket
B) In an airport
C) In a gym
D) At home
E) In a café
F) In the cinema

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

19. Tour guide desk ...

20. Interactive display ...

21. The museum shop ...

22. Reading room ...

23. Restroom ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You will hear two students discussing a lecture they have just attended.

24 In the lecture, Ann was impressed...

A) by the depth of the topic discussed
B) by the method of the lecturer
C) by how much she already knew

25 The speakers both agree that they should...

A) have asked more questions during the lecture
B) have been prepared better
C) have left earlier to take notes afterwards

Extract Two

You will hear two colleagues discussing about their recent business trip.

26 The reason why they went there was to...

A) meet a company representative
B) gather data for research
C) influence a decision

27 How does the man feel about the visit?

A) He was glad to achieve his goal
B) He was disappointed by the outcome
C) He felt unsure about what to say

Extract Three

You will hear a scientist who is being interviewed on a research podcast.

28 In her career, the scientist...

A) faced more challenges than recognition
B) achieved more than he expected
C) remained focused on teaching

29 The most important quality of research for young scientists would be...

A) understanding the requirements of being in research
B) developing good teamwork skills
C) publishing as many papers as possible

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

DUST STORMS

The lecture emphases on how human **(30)**_____ can impact dust storms.

Dust storms happen more when the ground is broken up or when vegetation **(31)**_____ are removed.

In the USA, the 'dust bowl' was caused by poor farming, and the decade was called the 'Dirty **(32)**_____'.

In Arizona, the worst dust clouds come from dry **(33)** _____.

Dust from storms can be dangerous to machine **(34)** _____.

In the Sahara, strong winds and long-term **(35)** _____ have increased erosion.

MOCK TEST 9

📖 READING

5 parts · 35 questions

⏱ 60 minutes

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

INTERNATIONAL INVENTIONS

Do you use paper every day? Or check the time on your watch? These everyday things weren't always part of life. Many of the **(1)**_____ we depend on today actually come from many different parts of the world.

Paper, for example, was first made in ancient China more than two thousand years ago. It was invented by a man named Cai Lun, who used tree bark and old cloth to make thin sheets. From **(2)**_____, the idea spread along trade routes to the Middle East and then to Europe. Without this discovery, reading and writing would have been much more difficult!

The wrist watch has its roots in Europe. The first small, portable clocks were made in Germany in the 1500s, and people started to wear them on their **(3)**_____ about 300 years later. Today, watches not only tell the **(4)**_____ but can also track our health and show messages.

And what about chocolate? It originally came from Central America, where the **(5)**_____ Mayans and Aztecs drank it as a bitter liquid. When Spanish explorers brought cocoa beans to Europe, people added sugar to this **(6)**_____ in order to make it sweeter. Now, chocolate is one of the most loved treats around the world.

Each of these items—paper, watches, and chocolate—shows how ideas travel and change. It's amazing how inventions from long ago shape our daily lives today.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. You enjoy learning about different cultures and want to practice a new language during your trip.

B. You want to travel abroad and stay active with other people who love the outdoors.

C. You want to explore nature but would rather not stay overnight in tents.

D. You want to visit local museums and take part in short city walks with a friendly group.

E. You'd like to go on short weekday trips in your own country with an expert guide.

F. You'd like to travel on your own schedule, but still you need help with planning and bookings.

G. You want to learn photography and take pictures of amazing natural places.

H. You want a relaxing beach holiday but also want to join group games and sports.

I. You want to go on a cultural tour but only if it's during school holidays.

J. You prefer luxury travel and comfortable hotels, and you don't mind paying more for it.

7. WanderWise Adventures

We organise active hiking and cycling holidays for people who love being outdoors. Our most popular tours include climbing routes in Spain and mountain biking in Italy. Accommodation is simple, but the landscapes make up for it. Evenings are often spent sharing travel stories around a campfire after a full day of activity.

8. CityMates Club

Every weekend we visit a new town or historic site with small groups of 10–15 people. You'll learn from a local expert, take gentle walks, and enjoy lunch together at a local café. Perfect for people who like relaxed day trips. Occasionally, members receive discounts on entrance tickets to special exhibitions.

9. SnapTravel

Want to improve your shooting skills while seeing the world? Our professional instructors will teach you how to take great nature shots in national parks and along the coast. You'll return home with stunning pictures and new friends. Workshops also include editing sessions to help you perfect your best photos.

10. SoloPlan

If you like travelling independently but hate the stress of organising everything, we can help. We'll design your perfect route, book your hotels and transport, and even suggest what to see each day — but you travel when you want. Our digital travel guide ensures you never miss local highlights along your journey.

11. Culture Connect Tours

Practice communicating in a foreign tongue while discovering the traditions of another country. Our trips combine sightseeing with language lessons, homestays, and cooking classes, so you can practise what you learn every day. Even beginners quickly gain confidence by communicating daily with their host families.

12. Beach Breeze Holidays

Sun, sand, and team fun! Each morning you can join volleyball matches, yoga sessions, or dance classes on the beach, and relax in the evenings at our open-air café. Accommodation is in seaside hotels with swimming pools. Guests often form close friendships during evening barbecues by the sea.

13. Royal Route Travel

Our special packages include flights, five-star hotels, and personal guides in every city. You'll enjoy fine dining, private museum tours, and top-class service from start to finish. Ideal for travellers who prefer elegance and comfort. Each itinerary is tailored to your interests, from art to gastronomy.

14. Eco Trails

We offer guided walks through forests, lakes, and mountain valleys — but we return to a cozy local guesthouse every evening. You'll spend the day outdoors but sleep in comfort, with the help of camping gear. Evening talks from local rangers help visitors learn more about the region's wildlife.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

LIST OF HEADINGS:

A) Some of the challenges the building project has to deal with
B) A reason for choosing to deal with a certain company
C) An advantage the building project will bring to the country
D) The period of time needed for the building project
E) Different services that the building will offer
F) Expert consulting and material testing for tower construction
G) The impact of the Kingdom Tower on global tourism
H) A comparison between Kingdom Tower and historical landmarks

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE KINGDOM TOWER

I. Work has just started on the new Kingdom Tower in the coastal city of Jeddah, Saudi Arabia. Its developers say it will be the tallest building in the world when it has been completed. Not only that, the Tower will also have the world's fastest and highest double-decker elevator. The building is expected to take five years to complete and will be ready by 2019 at the latest.

II. The idea behind the project belongs to a member of the Saudi royal family, Prince Al Waleed bin Talal. The prince envisions that this project will make Saudi Arabia — particularly Jeddah — a global highlight and boost its international trade and business connections. He also hopes that the project will provide hundreds of jobs for the people of Saudi Arabia.

III. The Kingdom Tower will measure 1 km. This is 173 meters taller than the current world record holder, Dubai's Burj Khalifa standing at 827 meters, and four times taller than The Shard in London, which is currently the tallest building in Western Europe. It is estimated that the building will cost $1.23 billion, using approximately 530,000 square meters of concrete and 80,000 tons of steel for its 200 floors. It will have a five-star hotel, apartments, office space and an observatory – a room from where people can watch the planets and stars – as well as amazing views of the Red Sea.

IV. The Jeddah Economic Company (JEC), which is responsible for building the Kingdom Tower, says the building will have a total of 59 elevators, including five that are double. These have a travel speed of over 10 meters per second and will take visitors to the observatory. Speaking for JEC, Mounib Hammoud said they plan to work with elevator company Kone because they have the best technology in the business. This means that elevators can travel to heights that are twice the distance that was previously possible, while still being environmentally friendly.

V. However, building a tower of this height is not simple. Because it is near the salt water of the sea, it is extremely important that the correct building materials are used. Wind can also be a problem for such a tall building, but the architects have found a solution. One of them, Gordon Gill, explains that 'because it changes shape every few floors, the wind loads go round the building and won't be as extreme as on a solid block.'

VI. A special team of technical advisers has also been employed on the project to ensure the highest standards of quality and safety. The Advanced Construction Technology Services Company is actively involved in experimenting and analyzing the materials required for constructing the tower. Their role includes assessing the durability, strength, and environmental impact of the materials to ensure they meet industry standards and regulatory requirements. Additionally, they provide expert recommendations on innovative building techniques and cutting-edge construction solutions to enhance the tower's structural integrity and sustainability.

PART 4

Questions 21–29

Read the following text for questions 21-29.

THE BENEFITS OF BOREDOM

Nowadays, wherever you look, it's normal to see people plugged into various electronic devices such as smartphones and tablets. This information overload, designed to stimulate our minds and keep us distracted, seems like a very modern-day matter, but it isn't. One unique thinker addressed a similar issue over seventy years ago: radical, or extreme boredom. In 1942, a German writer called Siegfried Kracauer described how city life provided people with too many things that kept their minds occupied. And he suggested we should cut ourselves off for controlled periods to experience 'extraordinary, radical boredom'. On pleasant afternoons when everyone else was outside, he recommended instead that people should stay at home, draw the curtains and do nothing whatsoever on the sofa.

Kracauer believed that actively practicing boredom was a valuable means of unlocking playful wild ideas far away from plain reality. It's a beautiful theory and one that would definitely appeal to many people, and modern research suggests that it might actually have a strong psychological basis.

To test the potential benefits of boredom, psychologist Dr Sandi Mann asked a group of forty people to complete a task designed to demonstrate their creativity. But before they started the task, a smaller group of people from this larger group was asked to perform a suitably dull task – copying numbers from the telephone directory for 15 minutes. The results of the overall test suggested that the smaller group that had done the boring task actually displayed more creative talent than those who hadn't done it. According to psychologists, when people become bored and start to daydream about being on holiday in an exotic location or being rich, for instance, their minds use different processes which can help them work out more creative solutions to problems.

This might suggest then, that by keeping our minds continuously busy, we're not just making ourselves more stressed, we're also missing out on a chance to separate our thoughts from daily routines and to think more creatively. Psychologists explain that despite its bad reputation, boredom has a definite purpose. Mann says that without it, we'd be like very young children in a constant state of amazement at the world around us. Mann further points out that we shouldn't teach small children that boredom and lack of stimulation are things to be feared rather than welcomed.

So how should we learn to get used to periods of radical boredom? The first step is realizing that it's different from simply taking time to think about what you've done since getting up that morning. Mann explains that we can use boredom positively by creating opportunities when our minds aren't occupied. This could be just staring out of the window or watching the rain. Anything that allows you to lose concentration is beneficial, according to Mann – a bit like taking a holiday from your brain!

Furthermore, embracing boredom can also improve mental well-being by reducing stress and anxiety. In today's fast-paced world, where people are constantly bombarded with notifications and deadlines, moments of boredom provide a rare opportunity for relaxation and introspection. Studies suggest that allowing the mind to wander freely can enhance problem-solving skills and emotional resilience. Instead of viewing boredom as an inconvenience, experts argue that it should be seen as a necessary mental reset—one that helps individuals regain focus, boost productivity, and cultivate a deeper sense of mindfulness in their daily lives.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 What does the passage suggest about Kracauer's idea of 'radical boredom'?

A) It was an outdated theory that has been proven incorrect.
B) It encourages people to disconnect from distractions to enhance creativity.
C) It emphasizes the importance of constant engagement with stimulating activities.
D) It suggests that boredom leads to stress and frustration.

22 What was the main finding of Dr. Sandi Mann's experiment?

A) People who engaged in a dull task before a creative one showed higher levels of creativity.
B) Participants who copied numbers from a phone book performed worse on creativity tasks.
C) Boredom negatively affected people's ability to focus on creative work.
D) Engaging in stimulating activities before a task led to more innovative solutions.

23 Why does the author mention young children in the discussion about boredom?

A) To illustrate that children naturally seek out boredom as a way to learn.
B) To argue that young children have an exceptional ability to stay focused.
C) To highlight that without boredom, people would be overwhelmed by constant novelty.
D) To suggest that adults should adopt the same approach to learning as children.

24 According to the passage, what is the key to benefiting from boredom?

A) Completely avoiding electronic devices and distractions.
B) Actively seeking moments of boredom to allow creative thinking.
C) Engaging in complex tasks immediately after a period of relaxation.
D) Training the brain to ignore distractions while staying occupied.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 Siegfried Kracauer recognized that for many years people have allowed themselves to get distracted.

A) True
B) False
C) No Information

26 According to Kracauer, practicing extreme boredom can improve people's relationships.

A) True
B) False
C) No Information

27 Dr Mann's experiment showed that periods of boredom lead to a decrease in creativity.

A) True
B) False
C) No Information

28 Dr Mann says that it's wrong to encourage youngsters to believe that boredom is a bad thing.

A) True
B) False
C) No Information

29 Dr Mann recommends making a conscious effort to create periods of extreme boredom.

A) True
B) False
C) No Information

PART 5 Questions 30–35

Read the following text for questions 30-35.

HIGH PRICE OF PROGRESS

Throughout history, human progress has often been celebrated as a triumph of intelligence and ambition. New inventions have allowed us to live longer, travel faster, and communicate instantly across the planet. Yet, every major leap forward has also brought its own set of dangers and ethical questions. The debate over how much risk society should tolerate in the name of progress remains unresolved, especially in an age when technological change happens faster than ever before.

The Industrial Revolution, for example, transformed economies and improved living standards for millions. But it also introduced several serious safety issues such as factory pollution, dangerous working conditions, and the exploitation of child labor. At the time, few questioned these consequences because industrialization promised growth and national power. In hindsight, we can see that the benefits were undeniable, but so were the costs. Similar patterns continue today in the digital age, where convenience often overshadows caution.

Artificial intelligence (AI) is one of the clearest examples of this dilemma. Supporters argue that AI can revolutionize medicine, transportation, and education by performing tasks faster and with more accuracy than humans. Yet, critics warn of serious dangers — from job losses to privacy violations, and even the possibility that machines could make harmful decisions without human control. Calls for stronger ethical regulation are often dismissed by those who fear that too much caution could slow innovation. The question, then, is not whether we should develop AI, but rather how to do so responsibly.

Some economists compare this situation to the early years of nuclear energy. When nuclear power was first developed, it was praised as a clean, efficient alternative to coal and oil. Few people imagined it would also lead to catastrophic accidents like Chernobyl or Fukushima, or that the same science could be used to create weapons of mass destruction. Advocates of progress often insist that the potential benefits outweigh the risks, but this argument assumes that human beings are capable of managing those risks perfectly — something history repeatedly disproves.

Nevertheless, a complete rejection of risk is neither realistic nor productive. Without taking risks, humanity would never have discovered vaccines, electricity, or the internet. What is needed is not blind fear or blind faith, but a middle path — a method of making informed decisions about risk. This means weighing the probable benefits against the potential harm, while ensuring that the people affected by new technologies have a voice in deciding whether they should be adopted.

Public awareness also plays a vital role. Many of the problems associated with new technology arise not from the inventions themselves, but from how they are used or misunderstood. For instance, social media was originally designed to connect people, yet it has contributed to misinformation and mental health issues. Similarly, genetic editing could cure diseases but might also be misused to create "designer babies." In each case, society must decide whether the moral and social costs justify the advantages.

Ultimately, progress is not a single direction but a balance between innovation and responsibility. The more powerful our technologies become, the more humility we need in applying them. History suggests that true progress is not defined by how quickly we advance, but by how wisely we choose to move forward.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

During the Industrial Revolution, improved living standards came at the cost of severe **(30)**_____ problems in factories.

Advocates of AI believe it could transform areas like healthcare, transportation, and education by improving both speed and **(31)**_____.

According to the passage, a balanced approach requires a system of **(32)**_____ risk.

One danger of social media is that it spreads **(33)** _____, despite its original purpose to bring people together.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 What is the writer's attitude toward technological progress?

A) It should be slowed down until all risks are removed.
B) It is dangerous and should be avoided.
C) It is necessary but must be guided by responsibility.
D) It benefits everyone equally.

35 What message does the writer mainly want to convey?

A) The greatest threat to progress is excessive regulation.
B) Human progress must balance innovation with moral awareness.
C) AI is the most dangerous invention in human history.
D) Every new technology will eventually create more harm than good.

MOCK TEST 10

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) In the fridge.
B) It's in the street.
C) On the table.

2

A) I don't want it, thanks.
B) I'll have coffee.
C) I'll talk to you later.

3

A) Sure, I'll carry it.
B) I'll pack them later.
C) OK, take this box from me.

4

A) After 5 minutes.
B) From platform 3, I think.
C) To Paris, maybe.

5

A) No, we did.
B) Sure, I'll watch it.
C) Yes, it was great.

6

A) Under the tree.
B) On Main Street.
C) I think it's closed today.

7

A) It's sunny.
B) He's feeling very angry.
C) Looks like it.

8

A) I'll open it later.
B) It's already closed.
C) Sure, no problem.

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

WORK EXPERIENCE

- **Name:** Jessica **(9)**_____.
- **Job:** Online language teacher
- **Taught:** Pupils in **(10)**_____
- **(11)**_____ was applied to interact students.
- **Number of students:** up to **(12)**_____
- **In lessons:** talked, played **(13)**_____ and sang songs
- **Worked:** from **(14)**_____ to September

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (1-4) to the description about living and studying far from home(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

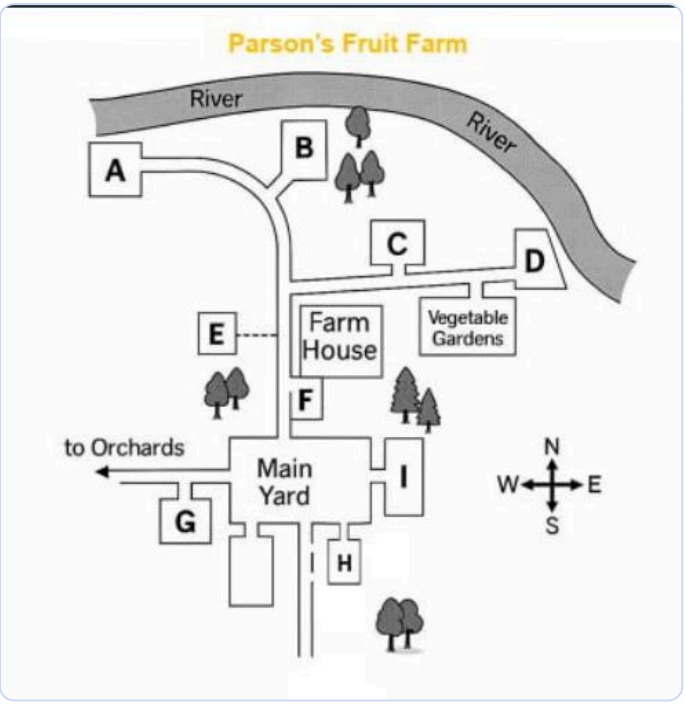

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

A) I'm still in touch with the people I lived with at first.
B) I'm still closest to the people I grew up with.
C) I found that joining a sports club helped me make friends.
D) I didn't share many interests with my classmates.
E) It was easier making friends at a small college.
F) It was hard getting out to make friends at first.

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

19. Workshop

20. Lunch room

21. Farm office

22. First aid room

23. Store Shed

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You will hear three students, Steve, David, and Susan talking about their last semester.

24 What is the main topic of the discussion?

A) The grades they received
B) The books they are studying
C) The lecturers and subjects.

25 What do they say about the book 'Welfare State'?

A) It's too difficult to understand
B) It doesn't relate to their course
C) It's too long but well written

Extract Two

You will hear two students, Frank and Nicole, discussing their research on university waste.

26 Nicole received the best information from the

A) staff.
B) students.
C) cleaners.

27 The product used most wastefully was

A) copying paper.
B) plastic.
C) paper plates and cups.

Extract Three

You will hear an interview with a professional athlete called Ann Brown.

28 What does Ann think of the idea of taking a 'day off' from training?

A) She thinks all athletes need one sometimes.
B) She would like to have more of them.
C) She doesn't find them necessary.

29 What is Ann's attitude towards the other competitors in races?

A) She avoids close social contact with them.
B) She's made a few good friends amongst them.
C) She finds it easy to talk to them when she has to.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

AGRICULTURAL PROGRAMME IN MOZAMBIQUE

The programme focused on a dry and **arid** region in Chicualacuala district, near the Limpopo River.

People depended on the forest to provide **(30)** _____ as a source of income.

(31)_____ was seen as the main priority to ensure the supply of water.

Most of the work organised by farmers' associations was done by **(32)**_____.

Fenced areas created to keep animals away from crops.

The programme provided **(33)**_____ for the fences and **(34)**_____ for suitable crops as well as water pumps.

The farmers provided labour and **(35)**_____ for the fences on their land.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

THE MISSING PAINTING

A famous artist once lived in a small seaside town. Every day, he painted beautiful pictures of the sea and sold the **(1)** _____ in a little near shop the harbour. People came from faraway cities to see his work, and some even waited hours just to meet him.

One day, the artist woke up and found that his newest painting was gone! It had disappeared from his studio. Shocked, he ran to the **(2)**_____ to tell everyone what had happened. The townspeople were surprised and offered to help him search.

The artist's neighbour, a young fisherman, said he had seen someone walking near his **(3)**_____ late at night. The artist and the fisherman followed a trail of sandy footprints leading down to the beach. There, half-buried in the sand, they found a small piece of the painting's golden frame.

Just as they were about to give up, they heard barking. The fisherman's dog came running from behind a boat — with the missing painting in its mouth! The artist laughed in joy, relieved that his work was safe. Apparently, the **(4)**_____ had sneaked into the studio and taken it, thinking it was a game.

The artist didn't get angry at that time. Instead, he cleaned the **(5)**_____, fixed the frame, and later painted a new picture — of the playful dog sitting proudly beside the sea. He called it "The Art Thief."

From that **(6)**_____ on, visitors came not only to see the paintings but also to meet the clever dog. The artist said it was his greatest masterpiece, because it had made everyone in town smile.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. You want to learn how to write stories and share them with an online audience.

B. You'd like to join a short art course while travelling abroad.

C. You prefer a quiet place to paint landscapes with personal guidance.

D. You want to create digital designs and learn to use modern tools.

E. You want to take part in group performances and improve your acting skills.

F. You want to turn your photography hobby into a small business.

G. You'd like to join weekend pottery classes near your home.

H. You want to meet other musicians and play in a band.

I. You're looking for a course that combines creativity with relaxation in nature.

J. You want to study art history and visit famous museums.

7. The Clay Corner

Looking for something hands-on? Our studio in the city centre offers weekend workshops where you can learn to shape, glaze, and decorate your own creations. Classes are small, so there's plenty of personal attention from our friendly instructors. You can take your finished pieces home as unique souvenirs or gifts.

8. WordWeavers Online

This writing course is perfect for creative minds who love storytelling. You'll get weekly challenges, feedback from published authors, and a chance to publish your short tales on our student blog. Many students later enter writing competitions or self-publish their work.

9. Lens & Light Academy

You would like to earn money from your camera? Our course teaches you how to take professional portraits, advertise online, and manage clients. Graduates often start their own small studios within months. You'll also build a professional portfolio to show your best work.

10. ArtEscape Retreats

Recharge your imagination with our five-day retreat in the countryside. Paint, draw, and meditate in peaceful surroundings. All materials, meals, and accommodation are included — just bring your imagination. Evening campfires and group reflections make the experience unforgettable.

11. DesignNow Studio

If you're interested in digital creativity, this course introduces you to graphic design software and current illustration equipment. By the end, you'll be able to create logos, posters, and social media visuals like a pro. No previous experience is needed — just curiosity and creativity.

12. StageSteps Theatre Group

Express yourself on stage! Join our weekly drama classes to learn voice control, movement, and teamwork through fun exercises. Members often perform short plays for local audiences at the end of each term. It's a great way to build confidence and make new friends.

13. The Travelling Painter

Spend your holiday learning to paint Mediterranean landscapes. Our week-long drawing course takes place in Germany and France, with daily outdoor lessons and evening discussions about painting techniques. We provide all painting equipment, so you can focus on enjoying the view.

14. SoundCircle Clu

Join local choirs every Friday evening for jam sessions and live performances. Whether you play guitar, drums, or sing, you'll find a welcoming community and opportunities to perform on stage. Members also collaborate to write original songs for local festivals.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

LIST OF HEADINGS:

A) Music and the human brain
B) The link between music and memory
C) How technology has changed our listening habits
D) The emotional influence of music
E) Music as a universal language
F) The role of music in medicine
G) From traditional to modern sounds
H) Music connecting people across borders

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE POWER OF MUSIC

I. From ancient tribal drums echoing through forests to today's digital pop hits, music has always been an inseparable part of human civilization. Every society, regardless of its size or isolation, has produced its own forms of musical expression. This universality suggests that music is far more than a form of amusement — it is a vital channel for sharing feelings, preserving stories, and building connections among people. Even when listeners do not understand the lyrics, they can still sense the tone and emotion behind a melody. Music functions as a shared language of emotion, transcending cultural and linguistic barriers.

II. Music has a remarkable power to shape our moods. A delicate, slow melody can bring relaxation or peace, while an energetic rhythm can awaken excitement or tension. Filmmakers skillfully use soundtracks to influence how viewers interpret a scene's atmosphere. According to neuroscientists, musical sounds stimulate the brain to produce substances such as dopamine — a chemical closely linked to pleasure, motivation, and reward. In this way, music does not merely reflect emotions; it actively alters them by changing our brain activity.

III. In modern medicine, music has earned recognition as a tool for recovery and psychological well-being. Hospitals increasingly use music therapy to reduce anxiety, enhance sleep quality, and stabilize blood pressure. For patients coping with mental health conditions or memory disorders like Alzheimer's disease, familiar tunes often evoke a sense of comfort and help them recall happy experiences. Through these effects, music supports both emotional healing and physical rehabilitation, proving itself to be a natural form of therapy.

IV. Technological development has completely transformed how people consume and share music. In earlier times, audiences relied on live performances or purchased physical recordings. Now, digital platforms and streaming apps allow instant access to millions of songs from anywhere in the world. This convenience has revolutionized listening habits, making music highly personalized and ever-present. However, it has also weakened the collective experience once found in communal listening — at concerts, festivals, or family gatherings. Technology has expanded availability but reduced the shared social aspect of music.

V. Music holds an extraordinary ability to awaken memories long forgotten. A single familiar tune can transport someone back to a wedding, a childhood celebration, or a distant holiday. Scientists explain that music stimulates both emotional and memory-related regions of the brain simultaneously, allowing old experiences to resurface vividly. This is why people with memory loss can often recall lyrics or melodies even when other recollections have faded. Music serves as a key to unlock emotional and autobiographical memories.

VI. Whether performed in a Tokyo concert hall, sung in a Peruvian village, or played by an orchestra in Vienna, music resonates across humanity. It surpasses linguistic boundaries and unites listeners from every corner of the world. At global celebrations such as the Olympic Games, songs inspire collective emotion and a sense of belonging among diverse audiences. Music reminds us of our shared human experience, acting as a bridge between cultures and nations.

PART 4

Questions 21–29

Read the following text for questions 21-29.

THE INVENTION OF THE CAMERA

Photography is so common today that people rarely stop to consider how revolutionary the invention of the camera truly was. From simple family snapshots to scientific discoveries, cameras have shaped how we see and record the world. Yet the history of photography stretches back far before the first photograph was taken.

The earliest concept of the camera came from a simple optical principle known as the camera obscura, meaning "dark chamber" in Latin. Ancient philosophers in China and Greece discovered that when light passes through a small hole into a dark room, it projects an upside-down image of the outside scene on the opposite wall. Artists in the Renaissance used this device to trace realistic images, but the pictures faded immediately.

That changed in the early 19th century. In 1826, a French inventor named Joseph Nicéphore Niépce managed to capture the first permanent image using a metal plate coated with a special chemical. However, his process required prolonged time of exposure to light. A few years later, Louis Daguerre, also French, refined the technique and introduced the daguerreotype, which produced clearer pictures in a fraction of the time. His invention quickly spread across Europe and the United States, marking the true beginning of photography as both an art and a science.

The next great leap came when photographic negatives were invented. British scientist Henry Fox Talbot developed a process called the calotype, which used paper coated with light-sensitive chemicals. Unlike Daguerre's method, the calotype created a negative image that could be reproduced numerous times. This idea — making many prints from one negative — became the foundation of modern photography.

By the late 19th century, cameras were becoming smaller and easier to use. American entrepreneur George Eastman revolutionized photography by introducing roll film and launching his company, Kodak, in 1888. His slogan, "You press the button, we do the rest," showed how simple photography had become. Now, anyone could capture moments of their lives without technical knowledge. This shift transformed photography from a scientific process into a popular hobby.

In the 21th century, cameras evolved rapidly. Portable film cameras were replaced by instant Polaroids, and later by digital devices that stored thousands of images on memory cards. Today, smartphone cameras combine sophisticated lenses and computer software to produce high-quality photos instantly. While the technology has changed dramatically, the goal remains the same: to preserve a moment in time.

The invention of the camera did more than create images — it changed human memory. People could now record their lives, share experiences, and even witness events they never attended. From documenting wars to capturing the first steps on the moon, cameras have not only reflected history but have also helped shape it.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 What was the main limitation of the camera obscura?
A) It produced blurred images.
B) It required a long exposure time.
C) The images could not be kept permanently.
D) It was too expensive for most artists.

22 Why was Daguerre's invention important?
A) It allowed photographs to be printed in color.
B) It made photography quicker with greater clarity.
C) It used roll film for the first time.
D) It introduced the concept of the negative.

23 What made Henry Fox Talbot's method different from Daguerre's?
A) It produced images on metal plates.
B) It was cheaper but less clear.
C) It could produce multiple copies of the same image.
D) It used digital techniques to enhance pictures.

24 What was George Eastman's main contribution to photography?
A) He simplified the photographic process.
B) He developed instant photography.
C) He invented color film.
D) He discovered light-sensitive chemicals.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 The idea of the camera obscura was first discovered during the Middle Ages.
A) True
B) False
C) No Information

26 Niépce's initial photograph took many hours under light before the image could fully form.
A) True
B) False
C) No Information

27 The calotype process could produce only one image at a time.
A) True
B) False
C) No Information

28 George Eastman's main goal was to make photography affordable for professional photographers.
A) True
B) False
C) No Information

29 Digital photography completely dominated all other types of cameras in the 21st century.
A) True
B) False
C) No Information

PART 5 — Questions 30–35

Read the following text for questions 30-35.

THE PSYCHOLOGY OF THE 'FLOW STATE'

In the landscape of human psychology and productivity, few concepts are as sought-after as the 'flow state'. Coined by psychologist Mihaly Csikszentmihalyi, flow describes a state of complete immersion in an activity, where one feels energized, focused, and enjoys the process immensely. It is often referred to as being "in the zone." During flow, your sense of self seems to vanish, your perception of time becomes distorted—hours can feel like minutes—and your concentration is so absolute that all other distractions fade away. This ephemeral state is not just the peak of productivity; Csikszentmihalyi's research suggests it is also the peak of human happiness, a key component of a life well-lived.

Achieving this state, however, is not a matter of chance. It requires a specific set of conditions to be met. First, the activity must have clear, moment-to-moment goals. One must know what they are doing and why they are doing it, providing a clear path forward. Second, the activity must provide immediate and unambiguous feedback, allowing for continuous adjustments. A musician knows instantly if they've hit a wrong note; a rock climber knows if their grip is secure. This constant feedback loop keeps the person engaged and focused on the present.

Perhaps the most crucial condition is maintaining a delicate equilibrium between the challenge of a task and the skill of the individual. If the task is too easy relative to one's skills, it leads to boredom and apathy. Conversely, if the task is too hard, it leads to frustration. The flow state exists in the narrow channel where the task is just challenging enough to stretch your existing skills, forcing you to grow and adapt without becoming overwhelmed. It is this perfect balance that makes the experience so compelling and rewarding.

The neurological foundations of flow are equally fascinating. Brain imaging studies suggest that during a flow state, the brain experiences something called 'transient hypofrontality'. In simpler terms, the prefrontal cortex—the part of the brain responsible for our sense of self and our nagging inner critic—temporarily quiets down. This neurological shift explains the loss of self-consciousness and the silencing of self-doubt. Simultaneously, the brain is flooded with a cocktail of performance-enhancing and pleasure-inducing neurochemicals, including dopamine which sharpens focus and generates a feeling of deep satisfaction.

The implications of cultivating flow are profound. It is the antidote to the apathy often experienced during passive leisure, such as scrolling through social media or watching television. By actively seeking out activities that induce flow—be it in our work, hobbies, or even in deep conversation—we engage in tasks that are intrinsically motivating. This pursuit not only enhances our skills and productivity but also contributes significantly to our overall sense of well-being and fulfillment.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

CONDITIONS FOR ACHIEVING FLOW

A person must have a precise understanding of their **(30)** _____ at every stage of the activity. It is also essential to receive instant **(31)**_____ on one's performance. Achieving a state of flow is dependent on several key factors. The task itself must not be so difficult that it causes **(32)**_____, nor so simple that it results in boredom.

During a flow state, the brain's prefrontal cortex becomes less active, reducing self-doubt, while chemicals such as **(33)**_____ enhance focus and pleasure.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 According to the passage, what happens in the brain during a flow state?

A) The brain releases hormones that cause anxiety and high alert.

B) All parts of the brain become more active simultaneously to boost performance.

C) A part of the brain associated with self-awareness becomes less active.

D) The brain's activity is identical to its state during passive leisure.

35 What is the writer's main purpose in the reading passage?

A) To provide a definitive scientific formula for achieving happiness.

B) To describe the concept of the flow state, its conditions, and its benefits.

C) To argue that modern work environments prevent the flow state.

D) To compare the productivity of artists with that of athletes.

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) So good to see you again.
B) Yes, she is very old.
C) No, you aren't her.

2

A) I'm lovely, thank you.
B) I met someone yesterday.
C) Lovely to meet you too!

3

A) My home is very big.
B) I'm from Valencia.
C) There are many parks.

4

A) Yeah, that's him.
B) No, they aren't.
C) Yes, that did.

5

A) You can also join our club.
B) No, it is nice of them to leave.
C) Yes, I'm happy to be here.

6

A) Never mind.
B) You're right.
C) Yeah, we can.

7

A) Hi there!
B) Sure!
C) Nice joke!

8

A) I am very tall these days.
B) I am twenty-five years old.
C) I've been great, thanks!

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

NEW MATHS COURSE

- **Name of Ben's organisation:** Bright Numbers
- **Aim of course:** Applying maths in **(9)**_____ situations.
- Closest course location for this group: **(10)**_____ hub.
- **Length of course:** **(11)**_____.
- Examples of activities we will do:
  - Design and construct basic frameworks or small-scale builds.
  - Create a detailed **(12)**_____ to manage the expenses of a modest gathering.
  - Design a **(13)**_____ path for kids to try.
  - You can even ask your **(14)**_____ to come.

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (15-18) to things they dislike about their public transport(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

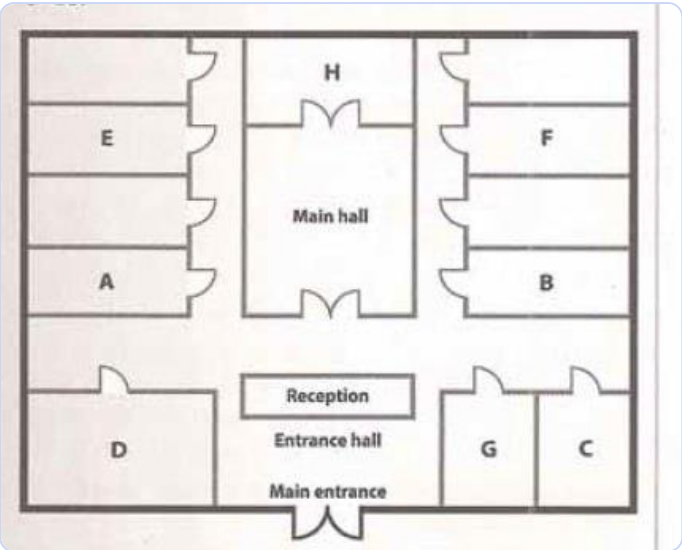

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

A) Travelling at peak times is stressful due to lack of space
B) The system is badly managed and routes are inconvenient
C) The level of comfort and cleanliness is disappointing
D) Overcrowded with people and it moves very fast.
E) Transport services end too early for modern lifestyles
F) The service is untrustworthy and communication about delays is poor

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

19. Setting up a Fitness Centre ...

20. Healthy Eating Schemes ...

21. Transport Initiatives ...

22. Running Sports Teams ...

23. Conference Coordinator's Office ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You hear part of a radio discussion about Monarch butterflies.

24 According to the man, in what way do Monarch butterflies differ from other butterflies?

A) They fly very long distances.
B) They spend the winter in a warm climate.
C) They survive best at high altitude.

25 What does the man find surprising about Monarch butterflies?

A) They can only migrate once.
B) They migrate in large groups.
C) They migrate to a precise location.

Extract Two

You hear two friends talking about the final of a cookery competition they saw on television.

26 They agree that the winning contestant ...

A) performed well at a crucial moment.
B) fully deserved to win the contest.
C) used an intriguing range of ingredients.

27 The woman thinks that yesterday's cookery programme could be improved by ...

A) adding a new person to the judges' panel.
B) varying the format of the presentation.
C) specifying what style of cooking contestants must do.

Extract Three

You hear two friends discussing a trip to a game park in South Africa.

28 Before the woman went to South Africa, the man had told her that ...

A) the sheer size of the animals would be impressive.
B) the game park would be the highlight of the trip.
C) the sunsets were spectacular in this kind of landscape.

29 The woman thought the elephant approached their jeep because ...

A) it wanted to warn them off.
B) it was searching for food.
C) it was simply curious.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

CHEETAHS

Volunteers were required to be flexible jobs that need doing. due to the number of different

Anna particularly appreciated being able to make **(30)** _____ out of doors.

Anna mentions a vehicle **(31)**_____ to explain the way a cheetah's feet function.

Anna's work involved using a new kind of **(32)** _____ developed to track the cheetahs.

Anna collected detailed information about the cheetahs' direction position and speed.

Anna found out that the speed of a cheetah is less important than the way it can turn **(33)**_____ suddenly.

Anna's results showed that **(34)**_____ was the most popular time of day for hunting.

Anna was surprised to find out that cheetahs went into areas of dense **(35)**_____ to hunt for food.

MOCK TEST 11

📖 READING

5 parts · 35 questions

⏱ 60 minutes

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

REDUCING AVIATION'S IMPACT ON CLIMATE CHANGE

The Earth's temperature is increasing. Many countries do not want the **(1)**_____ to become too warm. That is why they have set a goal to limit how much the **(2)**_____ increases. To reach their goal, the world must reach net-zero greenhouse gas emissions. That means the amount of greenhouse gases released into the atmosphere is the same as the amount removed from the atmosphere.

The aviation industry produces a significant amount of carbon dioxide. This is a **(3)**_____ gas. Airplanes use fossil fuels as an energy source. Burning fossil fuels releases greenhouse gases. Scientists predict that the total greenhouse gas emissions released by **(4)**_____ will increase. That's because more people are traveling by air. How can the aviation industry reach net-zero greenhouse gas emissions?

There are many options. One way is for people to fly less. Another one is to make more efficient airplanes. **(5)** _____ option is to offset the carbon dioxide produced by air travel. That means that the industry pays someone else to remove carbon dioxide from the atmosphere. But this can be tricky if it is not done correctly. The last option is to switch the fuel used by airplanes. Instead of fossil fuels, planes could use a **(6)**_____ that does not produce greenhouse gases when used.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. This place is perfect for history lovers and showcases objects from different time periods.

B. Visitors can enjoy spectacular views from a high point and take stunning photographs.

C. This attraction is famous for its impressive natural beauty and scenic landscapes.

D. People come here to see and interact with exotic animals from around the world.

E. You can explore an underground world filled with natural wonders and guided tours.

F. This location has a deep connection to an ancient civilization and its traditions.

G. Visitors can take part in exciting outdoor activities that test their courage.

H. This attraction features masterpieces from international artists.

I. Visitors can stroll through exquisitely landscaped gardens that showcase a variety of extraordinary and unique plant species.

J. This location is renowned for its spiritual importance and remains an active center for religious practices.

7. THE GRAND MOUNTAIN

This towering peak is one of the most breathtaking locations for nature lovers and adventure seekers. Hikers can enjoy panoramic views of valleys, rivers, and snow-capped peaks. At sunrise and sunset, the view from the top is absolutely unforgettable.

8. NATIONAL HISTORY MUSEUM

A must-visit for history enthusiasts, this museum holds a vast collection of artifacts, including ancient tools, royal crowns, medieval weapons, and interactive exhibits about past civilizations. Visitors can take guided tours to learn more about the world's rich heritage.

9. OCEAN CAVES

Hidden beneath the coastline, these incredible caves offer a thrilling underwater experience. With guided boat tours, visitors can witness mesmerizing rock formations, glowing mineral deposits, and mysterious tunnels carved by the sea over thousands of years.

10. WILD SAFARI PARK

Home to some of the world's most fascinating wildlife, this park allows visitors to see lions, elephants, zebras, and giraffes roaming freely. Guests can take a safari tour in open jeeps and even have close encounters with some friendly species in designated areas.

11. THE ANCIENT TEMPLE

This centuries-old temple stands as a symbol of faith and tradition. With intricate carvings, sacred sculptures, and beautifully decorated prayer halls, it continues to be a place of worship and pilgrimage for visitors from around the world.

12. MODERN ART GALLERY

Art lovers will be amazed by the diverse collection of contemporary artwork, featuring abstract paintings, stunning sculptures, and digital art installations. The gallery hosts exhibitions from renowned artists and offers workshops for aspiring creatives.

13. ROYAL BOTANIC GARDENS

This beautifully designed garden is a paradise for plant lovers. It features rare flowers, exotic trees, and tranquil walking paths. Visitors can relax in peaceful surroundings, explore themed gardens, and learn about conservation efforts.

14. ADVENTURE VALLEY

Perfect for thrill-seekers, this attraction offers adrenaline-pumping openair actions such as zip-lining, rock climbing, and white-water rafting. Whether you're looking for a challenge or just an exciting day outdoors, this destination has something for every adventure lover.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

LIST OF HEADINGS:

A) The psychological reasons behind excessive social media use
B) How online personalities impact public views
C) The connection between social media and emotional well-being
D) The consequences of misinformation in the digital world
E) Factors that make certain online content widely popular
F) The impact of digital interactions on personal bonds.
G) The growing dominance of brief video content online
H) The strategies businesses use to shape user preferences

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE INFLUENCE OF SOCIAL MEDIA

I. Studies suggest that social media can have both positive and negative effects on mental health. While it allows people to stay connected, it can also lead to anxiety, depression, and low self-esteem, especially when users compare themselves to others. Additionally, excessive social media use has been linked to sleep disturbances and reduced productivity. Spending long hours online may also reduce time spent on physical activity, further impacting overall well-being.

II. One of the key explanations why people spend so much time on social media is because it is designed to be addictive. Features like endless scrolling, notifications, and personalized content trigger dopamine release in the brain, making it difficult to stop. These platforms use sophisticated algorithms to keep users engaged for as long as possible. This design can make it challenging for individuals to control their usage, leading to habitual checking throughout the day.

III. Many users rely on social media for news, but not everything they read is accurate. The spread of fake news has become a major issue, influencing public opinion and even political decisions. False information can be shared rapidly, making it challenging to distinguish between credible sources and misleading content. Users are encouraged to verify information with multiple trustworthy sources before forming opinions.

IV. Social media influencers have become incredibly powerful in marketing and public relations. With millions of followers, they can shape opinions on fashion, technology, and even political issues. Their endorsements often lead to significant trends, affecting consumer behavior and cultural movements. Influencers can also promote social causes and awareness campaigns, reaching audiences that traditional media may not.

V. While social media connects people across the world, it can also harm real-life relationships. Many people find themselves distracted by their phones during face-to-face conversations, leading to a decline in meaningful social interactions. Over time, this can weaken personal connections and create feelings of isolation. Excessive use may also reduce empathy and listening skills, making communication less effective.

VI. Short-form video content, such as TikTok and Instagram Reels, has become one of the most popular trends in social media. These quick, engaging videos appeal to short attention spans and are often designed to be highly shareable. As a result, brands and creators are increasingly focusing on producing concise, attention-grabbing videos to maximize audience engagement. The popularity of these videos has also influenced how information and entertainment are consumed, favoring shortness over depth. Critics warn that constant exposure to short-form content may reduce attention span over time.

PART 4

Questions 21–29

Read the following text for questions 21-29.

DESERT TRAVELS

I checked my mobile phone and then looked towards the dirt path lit by our car lights. 'It should be to our left,' I said. We were passing through a small village, trying to reach the place I'd entered on my phone's Global Positioning System (GPS).

Within minutes, we spotted what we were looking for. My companion stopped the vehicle. We looked into the night as our eyes got used to the dark and the view. We'd arrived at the start of our adventure. The plan was straightforward: leave the car and carry enough food and water in our backpacks to last a few days, and set out across the desert until we reached the road. And we'd chosen to do all this at the time of a full moon, which meant we could start our journey and walk mainly in the cool of the night. However, we wouldn't set off on our desert adventure just yet. We put up the tent that we'd picked up while buying food at a local shop before setting off. The tent wouldn't protect us from wind or rain, but it wasn't complicated to put together, didn't weigh much and cost less than a CD. Most importantly, it gave us somewhere to get a few hours' rest.

We got up under the moonlight, lifted our backpacks and walked across some rough ground towards the sand. Our route was easy – we simply had to go east. We recorded how far we'd gone on my phone's GPS, and checked our progress by counting the dunes – the great hills of sand that rose up like mountains across the desert. My GPS told me exactly how many there would be in total. Although it was still the early hours of the morning it was already hot, but we could just about handle it. After the night had passed, and as the sun moved higher in the sky, the heat became more unkind. There was no wind and no shade, but we carried on.

It is tiring to walk uphill; to do so with a heavy backpack is harder still, and walking on sand makes the whole experience almost impossible. I knew I had to save my energy, and even though I'd carefully planned what to take on the trip, at that point in time I was sure I'd got it wrong. I was glad, however, that I'd taken along two walking sticks.

These sticks actually served several purposes. As mid-morning approached, we stopped at the first tree we saw. We used it, my walking sticks and an old sheet to give us some shelter from the sun, resting as we waited for the cruel heat of the day to pass. It was only day one, and I already felt a strange mixture of excitement and exhaustion.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 Why did the travelers choose to walk during the night?
A) They wanted to admire the stars.
B) They had to follow the directions on their GPS.
C) It was too hot to walk during the day.
D) They didn't have enough time to complete the journey.

22 What was the main advantage of the tent they bought?
A) It was easy to carry and put up.
B) It kept them warm at night.
C) It protected them from bad weather.
D) It allowed them to carry more supplies.

23 What made the journey especially difficult?
A) The danger of getting lost.
B) The lack of a clear route.
C) The weight of their backpacks.
D) The strong wind.

24 How did the author feel at the end of the first day?
A) He regretted taking part in the journey.
B) He was unsure if he had made the right choices.
C) He was worried about getting lost.
D) He felt ready to continue without a break.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 He was confused about which direction to take.
A) True
B) False
C) No Information

26 The landscape helped the writer to understand how far he had walked.
A) True
B) False
C) No Information

27 He was able to deal with the early-morning heat.
A) True
B) False
C) No Information

28 He regretted taking his walking sticks.
A) True
B) False
C) No Information

29 He took a break of four hours from walking.
A) True
B) False
C) No Information

PART 5

Questions 30–35

Read the following text for questions 30-35.

THE FUTURE OF ARTIFICIAL INTELLIGENCE IN HEALTHCARE

Artificial Intelligence (AI) is revolutionizing the healthcare industry, offering groundbreaking solutions that were once thought impossible. From diagnosing complex diseases to enhancing treatment plans and managing patient data, AI is transforming medical practices worldwide. Advanced AI-powered algorithms can now process vast amounts of medical data within seconds, making disease detection not only faster but also more precise. Machine learning models, for example, have demonstrated exceptional accuracy in identifying cancerous tumors in radiology scans. In many cases, their diagnostic performance is comparable to, or even superior to, that of experienced medical professionals.

As AI continues to improve, its role in predictive analytics is becoming increasingly important, helping doctors detect illnesses in their early stages before they become critical. Despite these remarkable advancements, the integration of AI in healthcare is not without its challenges. One major concern is data privacy, as AI systems rely on extensive patient records to function effectively. Ensuring that sensitive medical information is securely stored and ethically used remains a top priority for both medical institutions and regulatory bodies.

The risk of data breaches and unauthorized access has raised serious ethical and legal concerns, prompting calls for stricter data safety policies. Additionally, algorithmic bias is another matter that must be addressed. If an AI system is trained primarily on data from a specific demographic, it may struggle to provide accurate results for individuals outside that group. This bias can lead to disparities in healthcare outcomes and reinforce existing inequalities in medical treatment.

Another pressing issue is decision-making autonomy in medical practice. While AI can offer valuable insights and recommendations, it lacks human judgment and the ability to consider the full complexity of a patient's condition. Doctors still play a crucial role in interpreting AI-generated results and ensuring that medical conclusions align with a patient's unique needs.

Ethical concerns also arise when AI is used in life-or-death situations, such as critical surgeries or emergency care. If an AI-driven diagnosis or treatment leads to a fatal mistake, determining accountability becomes a complex issue. Should the blame fall on the medical professional overseeing the AI, the developers who designed the system, or the hospital that implemented the technology? These questions remain at the forefront of AI ethics discussions.

Despite these challenges, AI continues to reshape the healthcare industry at an unprecedented pace. The development of deep learning and robotic surgery has opened new possibilities for patient care, making procedures less invasive and recovery times shorter.

Additionally, AI is being used to streamline hospital operations, optimize resource allocation, and even predict disease outbreaks before they occur. As research in this field advances, AI's potential in medicine is expanding rapidly, promising a future where medical treatments are more precise, efficient, and accessible to people around the world.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

AI has transformed the field of **(30)**_____, making disease detection faster and more precise. However, worries remain, particularly regarding **(31)**_____ protection, as vast amounts of patient records are needed for AI to function effectively. Another issue is **(32)** _____, which occurs when When AI is involved in major operations or urgent healthcare intervention, deciding **(33)**_____ becomes complicated if it causes a deadly fault.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 Why is AI considered beneficial in healthcare?

A) It completely eliminates the need for human doctors.
B) It allows hospitals to replace all traditional treatments.
C) It enhances accuracy and efficiency in medical analysis.
D) It increases healthcare costs.

35 What is a potential ethical problem with AI in healthcare?

A) AI might cause a financial crisis in the medical industry.
B) It can make critical decisions without human oversight.
C) Patients refuse to allow AI to be used in treatments.
D) AI will eventually stop improving in accuracy.

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) Yes, I packed them yesterday.
B) No thanks, I understand everything.
C) They are very different.

2

A) On the farm.
B) In the centre.
C) At the balcony.

3

A) Sure, why not.
B) Yes, he can.
C) Is it the old car?

4

A) No, I don't.
B) Well, I didn't play.
C) Can you teach him?

5

A) When did she call you?
B) What did she do?
C) What did she tell you?

6

A) Nice game!
B) Best of luck!
C) Welcome to the club!

7

A) No, that doesn't.
B) No, this cannot.
C) No, it isn't.

8

A) Yes, I was in Rabat last month.
B) Yes, I haven't.
C) Yes, we saw pyramids there.

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

TRIP TO CHESTER

- **Coach leaves:** 9.15 a.m.
- **The length of the trip:** **(9)**_____
- **First place to visit:** **(10)**_____
- **Ticket price for adults:** (11) £_____
- **Where they will have lunch:** **(12)**_____
- **Where they will go after lunch:** **(13)**_____
- **Advice about clothes:** wearing **(14)**_____ footwear is recommended.

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (15-18) to things they enjoy most about their job(A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

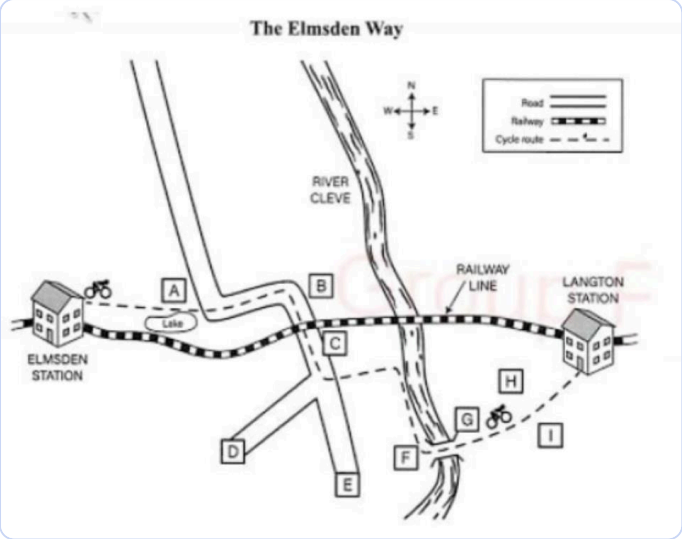

15. Speaker 1 ...
16. Speaker 2 ...
17. Speaker 3 ...
18. Speaker 4 ...

A) extending existing skills
B) travelling abroad
C) keeping regular hours
D) working as a team
E) meeting new people
F) satisfying customers

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A–I). There are FOUR extra options which you do not need to use. Mark your answers on the answer sheet.

19. Rocks ...

20. Corley nature reserve ...

21. Ashington chine factory ...

22. Langton Forest ...

23. Captain cook statue ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You hear two friends talking about a book.

24 What do the friends agree about?

A) They find the characters in the book very convincing.
B) They immediately found the storyline absorbing.
C) They would like to see the place where the book was set.

25 According to the woman what is the author's reason for writing the book?

A) to explore a new aspect of human psychology
B) to show that people have different interpretations of the same event
C) to make an interesting point that no one has made before

Extract Two

You hear two people talking about a piece of jewellery.

26 What does the man say about the origins of his bracelet?

A) It was chosen as a way to thank him for his hard work.
B) It shows that his uncle had a good opinion of him.
C) It shows he is a man of high rank.

27 The woman understands that, for the man, the bracelet represents

A) the importance of having clear goals.
B) the role he will have in the future.
C) the need to help other people.

Extract Three

You hear two women talking about clothes for a special occasion.

28 They both agree that ...

A) the dress Louise tries on is a rather unflattering colour.
B) trouser suits always look like office wear.
C) pashminas are a very adaptable clothing accessory.

29 What do we learn about Jack's attitude to clothes?

A) He is not worried about his appearance.
B) He rarely buys expensive clothes.
C) He disapproves of designer clothing.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than ONE WORD for each answer.

BASKETBALL TRAINER

- Bradley says that lack of communication causes most problems in a team.
- From his studies, Bradley finds what he learnt about the **(30)**_____ body particularly useful.
- Bradley finds injuries to players' **(31)**_____ are the most common.
- Bradley dismisses most of the new ideas about ways of increasing strength as unhelpful.
- Bradley says exercises focusing on improving **(32)** _____ are the most effective.
- Bradley advises players about **(33)**_____ to help them recover after a match.
- Bradley tries to match his approach to the particular **(34)** _____ in the team.
- According to Bradley, it is absolutely essential to have a sense of **(35)**_____ if you want to succeed as a trainer.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

THE SIGNIFICANCE OF SLEEP

Sleep is essential for our physical and mental health. Scientists recommend that adults get at least seven hours of sleep every night. However, many **(1)**_____ struggle to get enough rest due to busy schedules and stress.

When we sleep, our bodies repair themselves. The brain releases hormones that help with growth and healing. This is why good sleep is important for both children and adults.

Sleep also affects our **(2)**_____. Scientists have found that people who do not get enough rest have a problem with memory and concentration. This can make learning and working more difficult.

Another **(3)**_____ caused by poor sleep is a weak immune system. The body needs rest to fight off illnesses. People who do not sleep **(4)**_____ often get sick more easily.

Technology can also impact sleep. Many people use their **(5)** _____ before bed, but the light from screens can make it harder to fall asleep. **(6)**_____ suggest turning off phones at least one hour before sleeping.

To improve sleep, it is important to follow a routine. Going to bed at the same time every night and creating a comfortable sleeping environment can help people feel more rested and energized.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A. You can work here even if you lack experience.

B. You must be available for work on weekends.

C. They offer free transportation to employees.

D. You will have to deal with customers daily.

E. The job allows you to work under the blue sky.

F. You can earn extra money based on your performance.

G. You will receive a special reward for staying a year.

H. The company provides accommodation for workers.

I. You can do this job from anywhere.

J. They are looking for someone to manage a team.

7. Pulse Fitness Center

"Join our team as a Personal Trainer! Location: Miami, FL. Requirements: Certified fitness trainer with at least 2 years of experience. Benefits: Flexible schedule, performance-based bonuses, and free gym membership. Apply at pulsefitness.com/careers."

8. SkyServe Airlines

"Now hiring Flight Attendants! Location: Various international airports. Experience: No prior knowledge required; training provided. Benefits: Travel perks, free accommodation during layovers, and full insurance coverage. Apply at skyserveairlines.com/jobs."

9. GreenTech Landscaping

"Looking for a Landscape Technician! Location: Austin, TX. Experience: At least 1 year in landscaping or outdoor maintenance. Benefits: Work in natural settings, health insurance, and career advancement opportunities. Email us at careers@greentech.com."

10. Nexus Call Center

"We're hiring Customer Service Representatives! Location: Chicago, IL (Remote positions available). Requirements: Strong communication skills, no prior experience needed. Perks: Paid training, performance-based bonuses, and work-from-home options. Apply at nexuscc.com/apply."

11. Urban Bites Restaurant

"Join our team as a Head Chef! Location: San Francisco, CA. Experience: 5+ years in high-end restaurant kitchens. Perks: Company-provided housing, meal discounts, and a supportive team. Apply now at urbanbites.com/careers."

12. Summit Realty Group

"Seeking a Sales Associate! Location: New York City, NY. Experience: 3+ years in sales, preferably in real estate. Benefits: Commission-based earnings, mentorship programs, and company-sponsored events. Apply at summitrealty.com/jobs."

13. Horizon Logistics

"Logistics Coordinator position open! Location: Atlanta, GA. Requirements: Experience in supply chain management preferred but not required. Perks: Annual travel reward, company car for senior employees, and professional growth support. Apply at horizonlogistics.com."

14. Elite Motors

"Now hiring Sales Managers! Location: Los Angeles, CA. Requirements: 4+ years of experience in sales management. Facilities: Base salary plus commission, company car, and leadership training. Apply at elitemotors.com/careers."

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

LIST OF HEADINGS:

A) Why your brain prefers unhealthy food
B) The secret tricks behind supermarket layouts
C) How companies make you trust them without realizing it
D) The psychology of impulse buying
E) Some services keep suggesting "just one more"
F) The surprising science behind favorite colors
G) How social pressure influences what you buy
H) The true motivation behind businesses promoting time-sensitive offers

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

YOUR DAILY DECISIONS

I. Ever walked into a store for one item and left with ten? That's not an accident. Supermarkets are designed to make you spend more. Essentials like milk and bread are placed at the back, so you have to walk past tempting products first. Brightly colored displays, strategic lighting, and background music all influence how long you stay and how much you buy.

II. Have you ever noticed that some brands "feel" more trustworthy than others? That's because companies use psychological tactics to create a sense of reliability. Simple logos, familiar colors, and friendly-sounding slogans all work together to make customers feel comfortable. Some brands even use specific scents in stores to trigger positive emotions.

III. People often assume they choose their favorite colors randomly, but science suggests otherwise. Studies show that certain colors are linked to emotions—blue can create feelings of calm, red increases excitement, and yellow grabs attention. That's why fast-food chains use bright colors to make food seem more appealing, while luxury brands often stick to black and gold for sophistication.

IV. Why do we feel you have to buy something just because others are? The fear of being left out plays a huge role in decision-making. Whether it's buying the latest gadget or trying a new trend, people tend to follow the crowd. Marketers take advantage of this by showing customer reviews, "best-seller" tags, and influencer endorsements to make products seem more desirable.

V. Streaming platforms use complex algorithms to keep you watching. Features like autoplay, personalized recommendations, and countdown timers between episodes trick your brain into staying longer. Every time you finish a show, the platform immediately suggests another, creating an endless loop of entertainment that's hard to break.

VI. If a store tells you a sale is ending soon, do you feel the urge to buy something immediately? That's because our brains react to scarcity. Limited-time deals, countdown timers, and "only a few left in stock" messages make people act fast. It's a powerful marketing tool that creates urgency—even when there's no real rush.

PART 4

Questions 21–29

Read the following text for questions 21-29.

OUR SHOPPING HABITS

If you have ever been shopping and thought you were getting a bargain simply because the price appeared in red, or have left a shop because the sales assistant talked too much, you're not alone. In fact, your actions are quite typical, according to experts on customer behaviour.

When it comes to shopping, experts explain that women think about everything much more carefully than men. A recent study showed that when men saw an advertisement with the prices written in red, they believed the shop was offering greater price savings than those printed in black. They felt very positive about buying the product as well.

In contrast, red didn't have the same effect on female shoppers. It actually made them suspicious. Experts explain that if women see an ad in red, they question what's happening and think they have to be extra careful. 'Am I being tricked?' they will ask themselves. Women also seem to have a much better memory than men when it comes to the prices in advertisements.

This could be because men don't think so hard about adverts or because they just aren't that interested.

In a separate study, it was found that customers seem to prefer sales people who can correctly read moods. This is news for managers who believe that sales will increase if shop assistants are always happy and friendly to customers. Researchers believe that the findings suggest that customers don't always want sales staff to be extremely happy and chatty. Instead, we prefer staff who understand body language.

The key to a successful sale, then, is reading the customer's mood and matching that mood. The experts explain that it isn't advisable to match the mood of a customer who's angry; a customer who is in a hurry or in a bad mood would rather deal with a sales person who understands them, can serve them quickly or just leave them alone – and not try to get them to chat about their family.

There are of course some factors which are outside the control of shop owners – like the weather, which can really change people's moods. Experts are confident that good weather means good news for shop owners.

As much as 60–80% of customer decisions are made while people are actually in a shop, rather than before or after their visit. And as more people are out and about during nice weather, there is a higher chance they are shopping and therefore more opportunity for shops to make a sale. Rain and snow have the opposite effect, as people prefer to stay at home.

Another interesting finding from recent research is the growing impact of online shopping environments on customer psychology. Just like in physical stores, colours, layout, and tone of communication can influence buyers' emotions and choices. For instance, websites that use bright colours and simple designs often make shoppers feel more confident about their purchases, while those that appear cluttered or confusing may cause hesitation. Moreover, customer reviews and ratings now play a major role in decision-making — far more than traditional advertising. This shows that, whether shopping online or in-store, people's feelings and perceptions remain key drivers of their buying behaviour.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 According to one study, when men saw prices written in red ...
A) they were not sure about the quality of the product.
B) the colour used made no difference to them.
C) they thought the product was more expensive than usual.
D) they thought they were getting a bargain.

22 The same study showed that women ...
A) cannot shop as quickly as men.
B) do not trust ads as easily as men.
C) are not such careful shoppers as men.
D) believe red prices always indicate high quality.

23 When remembering prices ...
A) women pay more attention than men.
B) men and women are equally good.
C) men have better memories than women.
D) both men and women remember prices perfectly.

24 According to experts, what kind of sales staff do customers prefer?
A) ones who look happy and friendly.
B) ones who enjoy chatting to customers.
C) ones who understand their customers' moods.
D) ones who always suggest extra products to buy.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 Most people have been unhappy with a shop assistant at some point.
A) True
B) False
C) No Information

26 It's a good idea for sales assistants to respond to the customer's mood.
A) True
B) False
C) No Information

27 Shop owners' moods can change as much as their customers' moods.
A) True
B) False
C) No Information

28 Most shoppers have decided what they will buy before entering a shop.
A) True
B) False
C) No Information

29 Shop sales usually increase when the weather is bad.
A) True
B) False
C) No Information

PART 5 Questions 30–35

Read the following text for questions 30-35.

A SCIENTIFIC PIONEER

Marie Curie, born in 1867 in Warsaw, Poland, was a physicist and chemist whose groundbreaking work on radioactivity earned her two Nobel Prizes. From an early age, she demonstrated an exceptional aptitude for science, but as a woman in the late 19th century, she faced numerous barriers to higher education in her home country. Determined to pursue her passion, she moved to Paris to study at the Sorbonne, where she excelled despite financial hardships.

Curie's research, conducted alongside her husband Pierre Curie, led to the discovery of two new elements, polonium and radium. Her work revolutionized the scientific understanding of radiation and its potential applications, particularly in medicine. However, prolonged exposure to radioactive materials took a toll on her health, leading to her death in 1934. Despite the risks, her discoveries paved the way for life-saving treatments such as radiotherapy, applied to combat cancer.

In addition to her scientific achievements, Curie played a crucial role in World War I by developing mobile X-ray units identified as "Little Curies," which were used to diagnose battlefield injuries. She trained medical personnel to operate these machines, ensuring that wounded soldiers received proper treatment. Her contributions to medical science extended beyond her own discoveries, as she influenced upcoming generations of scholars and physicians.

Marie Curie remains an inspirational figure in science, not only for her findings but also for breaking gender barriers. She was the first woman to win a Nobel Prize and remains the only person to have won in two different scientific fields. Her legacy lives on through the institutions she founded, including the Curie Institute, which continues to be a leader in medical research today. Curie's life demonstrates the power of perseverance and dedication, proving that scientific progress often comes with personal sacrifice.

Throughout her career, Curie remained committed to the advancement of science and the promotion of education. She strongly believed in sharing knowledge and collaborated with fellow scientists worldwide. Despite facing skepticism and discrimination, she remained focused on her work, letting her discoveries speak for themselves. Her relentless pursuit of knowledge and dedication to scientific inquiry continue to inspire scientists, particularly women, to break barriers and pursue their passions in STEM fields.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

Marie Curie, originally from **(30)**_____, overcame numerous challenges to study science. Alongside her husband, she discovered polonium and radium, which contributed significantly to medical advancements.

Despite the dangers, her findings led to the development of vital healthcare procedures such as radiotherapy, which is used to treat **(31)**_____. Additionally, she developed mobile X-ray units to assist wounded soldiers during World War I.

Her impact on medical science went beyond her own discoveries, inspiring future researchers and **(32)** _____. Marie Curie continues to inspire the scientific community, both for her groundbreaking discoveries and for challenging **(33)**_____ norms.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 Why did Marie Curie move to Paris?

A) To escape political unrest in her home country.
B) To continue her scientific research with Pierre Curie.
C) To access educational opportunities unavailable to women in Poland.
D) To work at the Curie Institute.

35 What is one of Marie Curie's most significant achievements?

A) She developed mobile X-ray units used in World War I.
B) She pioneered the use of X-rays in modern medicine.
C) She won three Nobel Prizes for her contributions to science.
D) She was the first person to discover radioactivity.

Mock Test 3 · Listening

PART 1 — Mock Test 3

1. I am not sure if I can read this.
2. Can you tell me how to go to the test center?
3. I really like this one, but I'd love to see a few more before deciding.
4. How long have you known Jonathan?
5. I have many things to do but I am so stressed.
6. It is getting hot; I need something to cool me off.
7. This winter is going to be very dry and cold.
8. My manager is quite firm and expects everyone to be serious.

PART 2 — Mock Test 3

Hello everyone, this is Mrs. Turner. I hope you're all excited about our school trip tomorrow! I'd like to go over the plan carefully, so please listen and make a few notes if you need to. We'll be meeting at the school gate at 8:45 in the morning, and the coach will leave promptly at nine. Please don't be late, because we won't be able to wait for anyone. The journey should take about an hour, and we'll arrive just after ten. When we arrive, our first activity will be a walk around the lake. It's a really peaceful area with paths through the trees, and you might see some ducks, fish, and even swans. I'd like you to stay close to your group and listen to your team leader during the walk. After that, you'll have some free time in the park. There's a large open space where you can sit, play games, or just relax. Please remember to take your rubbish with you and be respectful of other visitors. At one o'clock, we'll meet again near the picnic tables by the big oak tree. We'll have a picnic lunch together, so don't forget to pack your sandwiches, snacks, and a drink. If you ordered a school lunch, I'll hand those out at that time. Once lunch is finished, we'll head to the local museum. It's about a ten-minute walk from the park, and it has some really interesting exhibitions about the history of the area, including old farming tools and photographs from the 19th century. Finally, before we get back on the coach at around 3:30, please make sure you have all your belongings.

Oh, and one more thing—don't forget to bring a raincoat. The weather forecast says there might be light rain in the afternoon, and we'll be outdoors for most of the day. That's all for now. I'm sure it's going to be a fun and educational trip. See you all tomorrow morning!

PART 3 — Mock Test 3

Speaker 1.

A: Hi! I didn't expect to see you here!

B: Hi. Why not? I come here three times a week. We are training for the competition now.

A: Yeah, I understand. I can't say I take sport too seriously. I come here from time to time... just because this place is close to my home.

B: I see.

A: And, to be honest, the water feels too cold. I wish it were warmer.

B: It can't be warmer. You're training here, not taking a bath.

Speaker 2.

A: I want to ask you for help if you have time...

B: Why, yes, sure. We still have about five minutes before the bell.

A: The problem is that I've left my textbook somewhere. Probably I left it in the swimming pool where I was waiting for my brother yesterday...

B: I get it. But what can I do about that?

A: I just mean we could share your book now. I won't be able to do the tasks otherwise. ...

B: Yes, sure we can. Just sit down next to me. Here. I'll fetch your bag.

Speaker 3.

A: Hi. And where's Mike?

B: He's taking a shower, I think.

A: Look, Dan, your brother Mike is only four-years-old. When I asked you to look after him, I didn't mean that you would play on your telephone and he would be taking a shower.

B: But Mum, everything is alright. He's eaten the porridge you left for him. But after that... we realised that he really needed a shower.

A: Oh, gosh! And there's porridge spread all over the floor!

B: Sorry, Mum. But my brother is not very careful while eating, is he?

Speaker 4.

A: The weather is unusually warm today, isn't it?

B: Yeah, I would really like to go to the beach.

A: Oh, no! The sea is still too cold for swimming. And we've called your sister's family to our picnic, remember? Will you help me with the food basket, please?

B: Yes, sure. And where do you want me to put this picnic blanket?

A: Right here, close to the roses.

B: It's too hot here, in the sun. I suggest we move it under that apple tree.... Just like this. Now we'll be in the shade... but still close enough to your roses.

PART 4

Mock Test 3

Good morning, everyone, and welcome to the new Greenhill Community Centre. Before you start exploring, I'll quickly show you around some of our main facilities to help you find your way. We'll start right here at the reception area, which is located just inside the entrance, on the right-hand side. This is your go-to spot for signing in, asking questions about upcoming activities, or booking rooms for events such as workshops and classes. Now, if you enter through the main doors and turn immediately left, you'll come across the bike racks. These are provided for visitors who cycle to the centre. They're conveniently placed under a covered area, so your bikes will stay dry even on wet days. Let's head back inside. If you walk straight ahead from the entrance, you'll find the kitchen room, which is located just beside the computer room. The kitchen is used for cooking classes, food preparation during meetings, and sometimes even for small catering events. The computer room next door is open to all visitors and has internet access, printers, and basic software for public use. Moving into the central section of the building, you'll see the music room, which is situated just below the games room. The music room is fully soundproof and equipped with a variety of instruments. If you continue towards the top right corner of the centre, you'll reach the shower room, which is positioned right next to the gym. These facilities are available to anyone using the sports hall, fitness classes, or gym equipment. The gym itself is well-equipped and open throughout the week. And finally, before you head off to explore, it's useful to know that the restroom is located between the library and the large community meeting room. Both of these spaces are often used for quiet reading, study sessions, and larger group events. We've just covered the main spots. Take your time to explore the rest of the centre — hope you have a great visit!

PART 5

Mock Test 3

Extract One

Man: Have you checked out the new library they opened near the town square?

Woman: I did last weekend. It's impressive—spacious, modern design, and they've got these interactive screens to help you find books.

Man: Oh, I love those. And the reading pods looked cozy. Did you try the café?

Woman: Briefly. It's nice, but honestly, I went in the evening and it was packed. I had to wait ten minutes just to find a seat.

Man: Really? I thought evenings would be quieter. Maybe after work hours it gets busy.

Woman: Exactly. I was hoping for a peaceful spot to study, but it felt more like a social hub.

Man: Hmm, maybe mornings are better. Still, it's great to have a place like that in town.

Woman: Definitely. Just wish it wasn't so crowded when I need it most.

Extract Two

Woman: Did you finally try that new coffee shop on Elm Street?

Man: Yeah, I went yesterday afternoon. It's smaller than I expected—only a few tables inside.

Woman: Oh, I thought it was more spacious. How was the atmosphere?

Man: Really nice, actually. Soft jazz playing, warm lighting, and the staff were friendly. But the service was a bit slow. I waited nearly ten minutes for a cappuccino.

Woman: That's not ideal. Were they busy?

Man: Not really. Just a couple of people ahead of me. I think they're still figuring things out.

Woman: Hmm, maybe they'll improve with time. Did you like the coffee?

Man: It was good. I'll probably go back—just not when I'm in a rush.

Extract Three

Man: I've been thinking about getting a dog, but I'm not sure I'm ready for the responsibility.

Woman: It's definitely a big step. Pets need daily care—feeding, walking, grooming. And don't forget vet visits.

Man: Yeah, I've read about that. I was looking at larger breeds, but they seem to require even more attention.

Woman: That's true. Bigger dogs usually need more space and exercise. If you're new to pet ownership, maybe consider a smaller one?

Man: Like a terrier or something?

Woman: Exactly. They're easier to manage, especially if you live in a flat. Less demanding, but still great company.

Man: That sounds more realistic. I'll do some research before deciding.

PART 6

Mock Test 3

When people talk about marketing, branding often comes up as one of the most influential factors. It's not just about having a recognizable logo or catchy slogan—branding can actually shape how a company performs in its industry. A strong brand helps a business stand out and, in many cases, even take the lead in its particular market. Think of Apple. Their products are known not only for their design and functionality but also for the reputation they've built over time. Customers associate Apple with high quality, and that perception adds value. It's why people are willing to pay more—they're not just buying a phone or a laptop, they're buying into an experience. And that experience is often emotional. Many brands don't rely solely on logic or technical specifications to attract buyers. Instead, they tap into feelings. Coca-Cola is a good example. When someone drinks it, they're not thinking about the ingredients. What they connect with is the feeling of happiness—a mood the brand has carefully cultivated through its advertising and global presence. In the online world, branding takes on a slightly different form. Digital businesses use tools to understand what their customers like. One common method is tracking browsing behavior through cookies. These small data files help companies learn about user preferences, which allows them to personalize recommendations and improve the overall shopping experience. And it's not just about making things easier for the customer. This kind of insight can lead to better sales. When people feel that a brand understands them, they're more likely to return, make purchases, and even recommend it to others. That's the power of branding—it builds trust, creates emotional connections, and drives business forward. So, whether it's through storytelling, smart data use, or a reputation for excellence, branding remains a central pillar of modern marketing.

Mock Test 4 · Listening

PART 1

Mock Test 4

1. Do you know when the next train to Berlin leaves?

2. Can I help you with anything else today?

3. Excuse me — I just have one more question.

4. What's the price for a single ticket?

5. Is it okay if I pay with my debit card? 6 How often do you have pizza?

7. Good afternoon — what can I do for you?

8. Could you tell me when the next plane to Bukhara departs?

PART 2

Mock Test 4

Manager: Hello everyone, and welcome to your first day at Fit Zone Gym. My name is Emma Foster,

and I'm the manager here. I'm really happy to see some new faces joining our team. Let me give you some important information about how things work. First, the opening shift starts at 7 a.m., so if you're on that shift, please arrive at least fifteen minutes early to get ready. The gym needs to be fully prepared before members start arriving at half past seven. Now, in case you're wondering, the gym is located on the second floor of this building. You'll find the reception area right when you come up the stairs or out of the elevator. The first floor is for the swimming pool and spa, while we handle all the fitness equipment upstairs. It's very important that you follow our dress code. You must always wear black shoes as part of your uniform. They should be clean, comfortable, and suitable for moving around the gym safely. If you work at reception, you'll receive a list of member check-ins, a copy of the daily schedule, and a small allowance for refreshments during long shifts. The reception area is also where members come for information, so make sure to smile and greet everyone politely. Finally, don't forget about your personal belongings. Please put your things in the lockers in the staff room before your shift starts. The staff room is located behind the main office, and you'll need your keycard to enter. That's everything for now! Once again, welcome to the team, and if you have any questions, feel free to come and see me anytime.

PART 3

Mock Test 4

Speaker 1. I wouldn't pretend I knew the best way, but I have an idea of what seems to work OK for me. I think you need to be in a good atmosphere, and to try to enjoy yourself – there's no reason for studying to be a hard or miserable thing to do, is there? If you have a friend that you get on with in a relaxed way, try saying you'll do some studying together. Get some snacks to eat – but turn the music off – and get on with it. See how much you can get done in a block of time, say an afternoon, or morning, whatever works best for you.

Speaker 2. My problem is not that I don't want to study – because I do – but that I fall asleep very easily. I can't tell you how many times I've sat down to do some studying, felt my eyes get a bit heavy, and the next thing I know I'm waking up an hour or so later. None of my friends will admit to the same problem, so it must just be me. I've learnt, I think, that food really doesn't help, so I try now to study when I'm feeling a bit hungry. It's also useful to avoid getting too comfortable in any way, such as sitting on a sofa or listening to relaxing music.

Speaker 3. I don't think there's any one perfect way to study ... some magical solution. You just have to do your best to stay focussed, motivated. A big part of that is being realistic. If you try to read a whole book in one go, it's not going to work. Divide work up into bite-sized chunks that you can handle, like the next ten pages, revising one set of notes, that kind of thing. If you take this step-by-step approach, you can keep going much longer, but you need a pace that you're comfortable with. Otherwise, simple stuff: don't call your friends, don't put the radio on, don't lie on the bed.

Speaker 4. I play a lot of sport, and maybe it's because of this that I look at studying as a basically physical thing, something to be in training for, to be fit for. I like to feel awake when I study, so I make sure I do some good physical exercise in the morning, say running, which will clear my mind and get me focussed on studying in the afternoon. I have enough to eat, fruit and so on, so being hungry isn't preventing me from concentrating. I have a good, solid chair and my desk is at the right height and I have a good lamp. These things really help.

PART 4

Mock Test 4

Good afternoon, everyone, and welcome to the Grand Shopping Mall. Before you begin your shopping, let me take a moment to show you around some of our key facilities. We'll start here near the entrance, where you can find our café on the left-hand corner side of the map. It's a cozy spot offering coffee, sandwiches, and pastries — perfect for taking a short break during your shopping trip. Just inside the main area, a little further ahead, you'll see a small kiosk in the center. You can pick up newspapers, snacks, and bottled drinks there. Now, if you walk straight to the back and look to your far-left corner, you'll find the computer store. It sells laptops, accessories, and repair services for electronic devices. Moving toward the middle, between furniture and the women's wear section, there's the Men's Wear section, offering everything from formal suits to casual clothes. Continue walking along that same row, besides the women's wear section, you'll come to the Shoes department. It has a wide range of footwear for adults, including men, women, and children too. Now, on the opposite side of the building, to the far right, you'll find the Accessories shop. It's just below the Toy Store and sells handbags, belts, and sunglasses. Above that, at the top right corner, there's the Children's Clothes store, which has a great selection for all ages. Finally, before you go exploring, note that the toilets are on the left-hand side of the mall, above the

café. That's the main layout of our shopping mall. Feel free to explore at your own pace, and enjoy your shopping experience at Grand Mall!

PART 5

Mock Test 4

Extract One

F: Hi Seldon, have you gone through the latest issue of our school newspaper?

M: Hi, Becky! Yes, I have, I've read your article about the planets, really interesting. Good job!

F: Thanks! But I didn't find any writing of yours. Weren't you doing some research on robots?

M: Yeah, you're right, but I didn't submit it in the end. I had to study for a test. I'll work on the final paragraph and you should see it in next month's issue.

F: Great! Which part of the newspaper did you like the most? I'm always keen on reading the interviews!

M: I really enjoy the short stories. I can't get enough of them every time!

F: Really? I don't find them very realistic.

M: That's exactly what I love about them! They're so funny!

Extract Two

M: Hello, I'm here to see Dr Green; I called this morning? My name's Ted Willow.

F: Eeeeer, yes. Have a seat, Mr Willow, the doctor will see you soon.

M: Is she not here?

F: She was in the operation room, but she's finished. She'll be with you shortly.

M: OK. It's just that I have a terrible stomach-ache. It's been like this for two days now!

F: I understand. Could you fill in this form while you're waiting? See if you can think of anything that could be the cause.

M: Well, now that you mention it, I did try a new fast-food restaurant on Friday.

F: It sounds like food poisoning. It usually takes four days to fully recover.

M: Will you be able to give me a medical certificate to take to work? The school I work at requires one.

F: Sure, we can sign one for you after we have the results.

Extract Three

F: Um, hi. I bought this blue cardigan here some days ago, but I'm not happy with it and I'd like to return it, please.

M: OK, no problem. Let's see what I can do. Do you have the receipt with you?

F: Yes, here you are. I bought it by credit card.

M: OK, so the item looks fine. Can I ask why you want to return it?

F: Well, actually, I don't think it suits me well. It' s a bit too loose for my taste.

M: Err... would you like to exchange it for a different size? Or a different colour maybe?

F: I'll just take the refund, if that's OK.

M: Sure, no problem. I'll just need to issue the refund back to your card. It will only take a moment.

F: Thank you.

PART 6

Mock Test 4

Lecturer: During today's seminar we will be looking at English Gothic architecture and its origins with a specific case study of Wells Cathedral in England. The Gothic style was initially brought over to England from France. This was at a period of time in which England was ruled from France by the Normans, starting with William the Conqueror who first defeated the English army at the Battle of Hastings on October 14th, 1066. After 1072 when some smaller rebellions in northern England had been defeated, the Normans gained complete control of the English monarchy, which they controlled until 1154. The peace that ensued in England had a large impact on many aspects of daily life. Thousands of French words entered the English language for the first time such as beef, fruit, city and hour. French ideas and styles, like Gothic, also began to flow across The Channel to England too, examples of which can still be seen in the architecture of many listed buildings. A listed building is one that is protected from alteration or demolition because of its historical or stylistic importance. One such building is Wells Cathedral. Construction on Wells Cathedral began in 1175 at a time when Gothic architecture as a style was in its infancy. As a result, it is one of the first entirely Gothic buildings ever constructed. From the first designs to the date, it was completed in 1490, Gothic architecture flourished in England. Therefore, later additions to the building were still influenced by this Gothic style, rather than by later architectural styles such as Tudor architecture. Older cathedrals in England would have initially been influenced by Romanesque architecture, alternatively known as Norman architecture in England. As the former name suggests, Romanesque was a building style based on the skills passed on to various areas of Europe by the Romans. When the Western Roman Empire collapsed in the 5th Century, these methods were retained by Rome's former colonies and developed further. One such Roman gift to the Romanesque architects was the round arch, also known as the true arch. The Romans perfected this style by using wedge-shaped stones called voussoirs, which created pressure that held the structure together at the top. Cathedrals in England such as the ones in Ely and Canterbury were started before the arrival of Gothic

architecture. Even though parts of those two cathedrals which were constructed later are in the Gothic style, other sections predating the arrival of Gothic architecture are Romanesque. The result is known as eclectic because the building is constructed using more than one style. All of these cathedrals belong to a group known as the medieval cathedrals of England. There are twenty-six different buildings that belong to this group in total; all of which were constructed or added to during a five-hundred-year period from 1040 to 1540.

Mock Test 5

1. Are you ready to order?

2. Which sport do you like?

3. What do you think about the jacket?

4. I'm very tired.

5. Do you like cooking?

6. What did you do yesterday?

7. Are you free this evening?

8. Is it your smartphone?

PART 2

Mock Test 5

Host: Hello everyone! I've got some exciting news about an event you won't want to miss. The annual Festy Music Festival is back again this summer, and it's going to be bigger and better than ever! This year, the festival will take place in Green Park, right in the center of town. It's a beautiful open area surrounded by trees, perfect for music, food, and fun. The event will last for three days, starting on Friday and finishing on Sunday evening. Each day will be full of live performances, local food stalls, and family activities. Now, let's talk about tickets. Adults need to buy a regular ticket online, but the great news is that children under 12 years old can enter for free! That makes it a perfect weekend for families to enjoy together. If you're planning to stay for several performances, don't forget to bring a chair or a blanket so you can sit comfortably on the grass. There will be plenty of shaded areas, but it's also a good idea to bring sunscreen and a bottle of water. The festival starts every day at 10 a.m., and gates will open half an hour earlier. Arriving early means you can find a good spot before the first band begins. And finally, if you need more information about the schedule, tickets, or directions, just visit the official website at www.festy.com. So, mark your calendars and get ready for three days of great music, food, and fun at the Park!

PART 3

Mock Test 5

Speaker 1 : I know people often complain that the internet distracts students, but for me, it's been the complete opposite. I've taken several online courses, joined study groups on different platforms, and even found a mentor abroad who helps me practise my English. It's incredible how much educational material is available if you actually know where to look. I used to rely only on textbooks, but now I can access the latest research in seconds. The only real challenge is managing your time — because there's always something new to read or watch.

Speaker 2 : The internet has completely changed the way I work. I'm a marketing consultant, and all my meetings are online now. I can design campaigns for clients on the other side of the world without leaving my living room. It's made my career far more flexible and, honestly, much more profitable. Of course, the downside is that you never really "switch off" — emails and messages come in at any hour, so it can feel like you're working nonstop. But overall, I wouldn't trade this freedom for anything.

Speaker 3 : Sometimes I feel like the internet has taken over people's lives. You see groups of friends sitting together, but everyone's just staring at their phones instead of actually talking. I think social media gives us this illusion of connection, but in reality, it's quite isolating. People spend hours trying to look perfect online, and it's exhausting. Don't get me wrong, I use it too, but I try to limit my screen time. I'd rather meet someone for coffee than send endless messages.

Speaker 4 : I rely on the internet a lot, but one thing that really frustrates me is the lack of reliability in what you read. News articles, health advice, even product reviews — half the time you can't tell what's genuine and what's sponsored. It takes so much effort to fact-check everything, and not everyone bothers. I think people underestimate how easily misinformation spreads. It's made me quite skeptical, to be honest, and I find myself questioning almost everything I see online.

PART 4

Mock Test 5

Good morning, everyone, and welcome to the New Fitness Centre on Village Road. I'll be giving you a short tour of the main facilities to help you get familiar with the layout before you begin your activities. Let's go through the key areas one by one. We'll begin outside the building at the Car Park. It's located just behind the centre and offers plenty of space for visitors arriving by car. Once you step inside, you'll arrive at the Reception Area, located centrally near the entrance. This is your first stop for signing in, asking questions, or getting help with bookings. Now, once you're inside the gym, look to the right side, and you'll find the Staff Room. This area is reserved for our team members and is not open to the public. Moving slightly upward, below the snack room and above the changing room, you'll come across the Showers. These are available to all guests and are conveniently located next to the changing rooms. Just above the snack room is the Aerobics Room. It's used for group classes like yoga, dance, and fitness workouts. The space is bright and energetic, perfect for high-movement sessions. On the right corner of the building, next to the main hall is the Indoor Swimming Pool, marked D. It's ideal for casual swimming, aqua fitness, or simply relaxing after a workout. Now let's look at the outdoors. In the north corner, between three trees, you'll reach the Outdoor Gym Area. It's surrounded by trees and includes equipment for strength training and cardio exercises in the fresh air. And finally, next to the spa room, you'll see the Cycling Area. This open-air zone is designed for spin classes and personal training sessions using stationary bikes. That wraps up our tour of the main facilities. Feel free to explore the rest of the centre and enjoy your visit!

PART 5

Mock Test 5

Extract One

Interviewer: It certainly sounds a great job to have, but does it have any negative aspects?

Adriana: Well, the agency may expect you to go to some fairly unpleasant places, though if it's a country where there's armed conflict going on I normally refuse. And being completely on one's own in the jungle or desert can get some people down, but I can't say it bothers me. Spending so much time away from my daughters, though, is a different matter, but unfortunately it goes with the job. Whenever I'm home I always try to make up for that by spending as much time as I can with them.

Interviewer: Tell me, how easy is it to get a job as a wildlife photographer?

Adriana: Well, it's certainly an attractive career, and nowadays there are just so many people out there doing it to such a high standard that it's difficult to get into. On the other hand, the public don't show any sign of losing interest in pictures of wildlife, and even though you can find millions of them online, people always seem to want new ones.

Extract Two

Interviewer: How did you feel as your journey began?

Amy: To be honest it didn't start terribly well. I was too late for the airport bus and ended up taking a taxi so as not to miss my flight, only to find at the terminal that it'd been delayed for two hours. So I spent the morning shopping there, until I suddenly noticed my wallet was half empty, and I hadn't even left the country yet. Feeling a bit angry with myself, I decided to get something to eat, but the high prices put me off and I wished I'd brought some sandwiches, as the other two had.

Interviewer: And how did you get on?

Amy: Quite well at first, but then there were a couple of disagreements, including one between the other two about who should go out for bread. I don't eat it much so I wasn't really bothered, nor was I particularly concerned about Carla's habit of accidentally locking herself out of the flat, but I did get irritated when I kept seeing used cups , saucers and plates lying around next to the sofa or armchair where she'd been sitting. It's not something anyone in my family would have done.

Extract Three

Interviewer: Now, you're constantly coming up with fresh ideas. Do you sleep with a notebook by the bed in case you dream up a best-selling idea in your sleep?

James: Absolutely. I text myself with my ideas as I have them, then each day I go through my texts to see what ideas I have sent myself.

Interviewer: So what's next?

James: Aah, I have several ideas ... but I'm not telling you!

Interviewer: OK, fair enough! Well, finally, have you got any tips for would-be entrepreneurs listening now?

James: Don't give up at the first sign of hardship. I've had my fingers burnt and lost money through some of my schemes in the past, but I've never let it get me down. I've had setbacks – but you can't dwell on them. You just move on.

PART 6

Mock Test 5

Hello, my name's Anne Ruskin. Thank you very much for inviting me to your college this evening to talk about my experiences on a one-day archery course. When you were little, I imagine many of you, like me, used to have bows and shoot arrows from them – wooden bows you made from branches or maybe a plastic one like mine. Lots of kids love them – I even saw a little metal set in a toyshop the other day.

Anyway, I decided that now I was an adult I'd have a go at the real thing, and signed up for a beginners' archery course. I had planned to read up a bit on the history of archery beforehand, not knowing much about it. But I ran out of time and only managed a quick scan through the rules. I've found out more about it since, and it's fascinating. The archery courses are generally held in a variety of locations, depending on the season and the weather. In winter, they even use a large gym if the weather's really bad. I was happy that mine was in the field they use in the summer, though I suppose a medieval castle or some woods would be the ideal setting. There was so much to learn, I really had to concentrate. It was far harder than I'd imagined to stand in the right way, but how to hold the bow correctly came to me relatively quickly. I was also taught to place the arrows in exactly the right position in the bow. Soon most of my body was aching! The teacher showed me some exercises to strengthen my hands, so I'll be able to grip the bow tightly for longer. He told me my shoulders were too tense and reassured me that my arms would eventually become stronger if I practised enough. I hope he's right! Perhaps due to beginner's luck, most of my arrows went in the right direction, and into the target, though I never managed to hit the middle! And I did manage to hit a tree, narrowly missing a bench and a bag I'd left underneath it! That certainly wasn't deliberate! Someone else hit the target next to theirs instead of their own! There were regular breaks, and part of the appeal of archery is the delightfully calm rhythm. There was a lot of time to drink tea, and enjoy the view, and I did plenty of both. There were some archery books and photographs to look through showing us how we could improve, and some people took the opportunity to check their phones for messages, but I preferred to chat. I asked some of the other people there why they had decided to do the course. In fact, I'd imagined it might be because of a website or something. In fact, it turned out to be because of a TV series. The archery courses are advertised on local radio too, but none of us had actually heard about them that way. The teacher made sure we practised loads of shooting and it was thrilling when he finally let us do some scoring. There are rings on the targets, and you get points depending on where your arrow lands. It was fun to see how well I was doing compared to everyone else! And I must say, I wasn't too bad! I loved it, and archery is one of those rare sports that almost anyone can do, including children, though they must be over the age of ten. Some of my friends have said they'll join me next time I go, and I'm working on my parents at the moment, in the hope that they'll come along as well. Thank you all for listening. I hope some of you will consider taking archery up. It really is a great leisure activity. Now, have any of you got any questions? I'd be happy to tell you more about ...

Mock Test 6 · Listening

PART 1 — Mock Test 6

1. I don't understand this dialect.

2. Can you tell me how to go to the Centre?

3. How much is the dress next to the black one?

4. How long have you known your best friend since you met?

5. Excuse me, this seat is for you?

6. What would you like to drink?

7. How do you get to work?

8. When is your next English class?

PART 2 — Mock Test 6

Speaker: Hello everyone, my name's Rachel, and I'm the coordinator of the Elmfield Neighbourhood Writing Club. Thanks for joining me today. I'm going to tell you a bit about our club, what we do, and how you can become a member. To become a member, there's a small annual fee of thirty pounds. This helps us cover the cost of renting the room, printing materials, and inviting guest writers to give talks or workshops. We think it's a very fair price for what you get! Our club has been running for more than three years, and we welcome people of all ages and writing levels — from complete beginners to experienced writers. We focus on creative writing, storytelling, and short fiction, but we also have members who enjoy writing poetry or personal blogs. Now, about our classes. The writing class takes place every Wednesday evening, from six to eight p.m. We meet in the community center's second-floor hall. The sessions are relaxed and supportive, and we usually begin with short writing exercises followed by group discussions. For younger writers, we also have a special Junior Course, designed for children aged ten to fifteen. It's held on Saturday mornings, and it focuses on creativity and confidence building. Many of our young members have even entered local story competitions! If you'd like to join or ask for more details, you can send us an email. The address is efn.library.org — again, that's e-f-n dot library dot org. You'll receive a reply within two days with the registration form and schedule. We'd love to see more new members this year, so if you enjoy writing or just want to meet friendly people who share the same passion, please come along and give it a try. Thank you for listening!

PART 3 — Mock Test 6

Speaker 1.

A: It was great, wasn't it? And where will we go next?

B: To the roller coaster. I haven't been there since I was ten.

A: Me neither. But the line is pretty long, can you see it?

B: Never mind. I'm determined to go there anyway.

A: OK. Fine. And after that we'll drive the bumper cars. And I want to go to the big wheel too!

B: You want to do everything! But it's getting cold and windy. Don't you think so?

Speaker 2.

A: Can we change seats?

B: What do you mean? Why? Do you feel cold here or what?

A: No, it's not that. I just enjoy sitting by the window and that table next to it is vacant now. The people who were eating there have just left.

B: Have they? So what? Do you mean moving all these plates and cups from one table to another?

A: Do not exaggerate. There are only two bowls of soup on our table at the moment. If you can't carry yours, I can take your bowl too!

Speaker 3.

A: Where are we now?

B: Somewhere over the ocean. If you want to know the precise place, switch on the monitor in front of you, or ask the flight attendant.

A: No, no need. I just asked to make conversation. It's easier for me to talk ...because when I don't talk...

B: I don't think I understand what you mean I'm afraid.

A: I'm just trying to say that the flying over the ocean makes me feel really scared,

Speaker 4.

A: Look, Kate, when you talk about getting lost in the jungle, you need to sound scared. And you sound as if you are enjoying yourself in an amusement park.

B: OK. I understand.

A: Just imagine that any moment you could come across some wild beast a tiger or a huge wild monkey.

B: I'm not afraid of monkeys. They are smart and funny.

A: OK. Then think about something you are afraid of. Spiders, mice, whatever! I want to hear horror in your voice. Come on. Say your lines again.

PART 4 — Mock Test 6

Hello and welcome to this short guide on the planned changes in Newshire City. Let's begin with the new school area. It is located below the park area, which is planned to be built

later. The old building will be replaced with a larger, modern facility that includes upgraded classrooms and a safe outdoor play area. Now we turn our attention south to Low Street. A new road is planned to be constructed on the bend in the middle of the street to connect the new school site to this street. This new stretch is expected to ease traffic during busy hours. A new traffic light is planned at the intersection of Low Street and Main Street. These will be placed at a busy junction to improve safety and help regulate the increased flow of vehicles from the new road. Higher up on City Park Street, a new library will be built. It is located in the middle of the map, near a new park planned to be built on the map. It will be a bright and big space with study rooms and free Wi-Fi. Next, a new parking area will be added below the shopping mall. It's designed for long-term use and includes spaces for electric vehicles and disabled access. Now let's turn our attention to Main Street. A flower shop will be added below the bank. This store was added to the main roadmap based on the demands and wishes of the city's residents. Finally, let's look at High Street. A new supermarket will be opened at the beginning of the street, on the left side of the old high school. It's expected to become a central shopping spot for the local community. The last change is the change in the location of the bus stop. The old bus stop is located to the left of the Town Hall, near the intersection of City Park Street and High Street, while the new stop will be located to the right of the Town Hall, closer to Main Street. That concludes our overview of the main roadmap of Newshire City development. These updates aim to improve transport, education, and public services for everyone.

PART 5 — Mock Test 6

Extract One

Sam: Hi Liz. How do you feel about starting university here?

Liz: A little bit nervous, but I'm confident I can handle it. This orientation program seems like it will help us a lot.

Sam: Sure. I'm looking at the timetable here myself. It seems that there are choices available.

Liz: I can see. So, what are you going to do Monday afternoon? In the morning we all have the opening lecture, but it looks like we have a choice later that day, as you said.

Sam: Well, the 'Careers Lecture' might be helpful, but I am interested in the 'Uni Tour'. It's probably too early to be thinking of careers now, anyway, and I want to know what's what at this new university, so. I'm doing the tour.

Liz: Alright. I'll come along with you. Might learn something interesting. After all, we haven't seen much of this place yet, and we will be spending four years here.

Sam: Tuesday is another full day, too. In the afternoon there's a lecture about study skills, but that morning offers another choice.

Extract Two

Eric: Hi, Ms Harris. Here we are, talking once again.

Ms Harris: Well, I'm always willing to help out wherever possible. Is anything troubling you?

Eric: Well, your advice last week about writing summaries was very useful, and I'm using these summaries a lot in order to prepare my final master's thesis.

Ms Harris: But you're having problems, right?

Eric: Yes, I have a few issues to discuss. Obviously, I want a good essay, and I want to achieve high marks. But I'm not sure on the best way to start.

Ms Harris: That's an easy question. Start with a topic, but not one that I necessarily suggest, but one that you want to explore. You will always write better when doing so on a topic you are interested in, not one imposed upon you by others.

Eric: Well, I'm interested in ...

Extract Three

Interviewer: OK. so, what happened next?

Jackie: Well, Olivia was turned down for a part in the musical Mary Poppins. She reached the last ten for the role of Jane Banks. She didn't get the part and was distraught. But she quickly picked herself up and then we took both children to the Palladium auditions for The Sound of Music.

Interviewer: What was that like?

Jackie: Well, we arrived for the auditions at 8.30 a.m., as instructed, only to find a huge crowd ahead of us. Eventually, more than 1,000 children turned up. They said at first that they could only see 230 kids. We were at about number 250 and, with a visit to our local festival planned for the next day, we couldn't come back. We begged them to see our daughters and eventually they agreed.

PART 6 — Mock Test 6

Thanks to nanotechnology, there could be a major breakthrough in the field of transportation with the production of more durable metals. These could be virtually unbreakable, lighter and much more pliable leading to planes that are 50 times lighter than at present. Those same improved capabilities

will dramatically reduce the cost of travelling into space making it more accessible to ordinary people and opening up a totally new holiday destination. In terms of technology, the computer industry will be able to shrink computer parts down to minute sizes. We need nanotechnology in order to create a new generation of computers that will work even faster and will have a million times more memory but will be about the size of a sugar cube. Nanotechnology could also revolutionise the way that we generate power. The cost of solar cells will be drastically reduced so harnessing this energy will be far more economical than at present. But nanotechnology has much wider applications than this and could have an enormous impact on our environment. For instance, tiny airborne nano-robots could be programmed to actually rebuild the ozone layer, which could lessen the impact of global warming on our planet. That's a pretty amazing thought, isn't it? On a more local scale, this new technology could help with the clean-up of environmental disasters as nanotechnology will allow us to remove oil and other contaminants from the water far more effectively. And, if nanotechnology progresses as expected – as a sort of building block set of about 90 atoms – then you could build anything you wanted from the bottom up. In terms of production, this means that you only use what you need and so there wouldn't be any waste.

Mock Test 7 · Listening

PART 1 — Mock Test 7

1. Where is your new car?

2. Where will you be on your holiday?

3. Where is my key?

4. What is your phone number?

5. Do you like movies?

6. What is your favourite subject at school?

7. Can I pay by card?

8. What was the trip like?

PART 2

Mock Test 7

Hello! My name's Daniel, and I'm really excited to tell you about a special event happening at our local library. If you enjoy reading and sharing books, this is something you won't want to miss. So, when is it happening? The event will take place in August. That's right—August is the month to

remember. It's usually warm and sunny, so it's a perfect time to get out and do something fun. Now, to take part, there's one simple thing you need to do: bring some books with you. Not just one or two—we're asking everyone to bring 15 books. These can be books you've already read, or ones you think others might enjoy. Sharing is part of the fun, and the more books we have, the better! The event will be held on a Saturday, which is great because most people are free on weekends. You won't need to worry about work or school. And the time? It starts at 3 p.m., so you'll have plenty of time to get ready and arrive. There is a small cost to join the event. This helps cover snacks, materials, and some fun activities we've planned. The cost is 50 pounds. We think it's a fair price for everything included. If you'd like more information or want to register, you can visit our website. Just go to www.activities.com. That's spelled A-C-T-I-V-I-T-I-E-S—dot com. You'll find all the details there, including how to sign up and what to expect. We really hope you'll join us. It's going to be a fantastic day full of books, fun, and friendly faces.

PART 3

Mock Test 7

Speaker 1. Twenty years in a job is a long time and especially in one that can be as stressful as teaching. But the days aren't too long and for the most part the students behave themselves. We have an exceptional group of staff members and it makes such a difference having good people alongside you. Of course, most people suspect that people go into this job for the holidays and to great extent it's true. It's definitely true in my case. Working with children for 9 months of the year, and I think everybody would agree, they are deserved. Of course, if you don't genuinely have a desire for it, I'm afraid you'll have many very long days and the pupils will very quickly let you know how they feel.

Speaker 2. Most of my career has been in some sort of involvement with environmental protection. Without a doubt, it's my passion. Living and learning about the world around us, that's my job. I wouldn't change it for the world. The hours are long and the amount of travelling can be quite gruelling. But then when you get to wherever it is you may have been posted, it could be a natural park in New Zealand, or I even had the chance to spend a month in Greenland studying the local wildlife, you realize why you still do the job. To come and live in some of the most beautiful places on the planet is what I've always dreamed of. To be able to combine it with work is phenomenal.

Speaker 3. My job gives me a lot. The days are long, but the money is good and I get a company car. My average day consists of driving to retailers in different areas of the country, marketing new products and taking

supply orders and maintaining good between supply and retailer. I must also admit that I have hopes of moving up through the company. In this business you generally start from the bottom and work your way up, which is what I'm hoping to do. It's in my contract that after every 12 month period, the directors put us through an evaluation process and promote two new people to higher positions. I've been with the company for two and a half years now, and the standard length of time is generally three to four years, but I'm hoping to advance sooner if I can.

Speaker 4. I suppose I got into the state sector as it was a natural progression from what I'd studied and what little work experience I'd gained from placement programs, working with various sections of the city council. I know most people decry public workers. It's the typical view of bureaucracy, and honestly, people are not entirely wrong to hold that view. But I relish the job. I need my work to be stimulating or be challenging in some way, and it certainly is. My own department is responsible for allocating funds for public works. We receive proposals all the time, but without endless resources deciding which project merits funding as opposed to another is difficult. Any use of public funds requires careful consideration as to how best to make it work for the people.

PART 4

Mock Test 7

Welcome to the Newtown Marketplace. I'll give you a quick overview of some key sections to help you find your way around. Let's begin near the entrance and move through the market step by step. As you enter from the bottom left corner, the first thing you'll notice is the big Parking Lot, located in the lower area. It's spacious and provides easy access to all parts of the market. If you walk straight from the entrance, you'll come to the Bakery, and above it is a place that sells fruits. It's filled with fresh produce, including apples, bananas, and seasonal berries. It's right next to the bakery, so you can grab something sweet and healthy. Moving further into the centre of the marketplace, you'll come across a circular area with four round smaller stalls. The one to the left of these stalls is the Milk stall. It's positioned below the meats and above seed stalls, making it easy to pick up all your essentials in one place. The one to the right is the eggs stall. It's stocked with free-range and organic options, and it's one of the most popular stops for regular shoppers. If you look at the right corner of the map, besides the parking lot, you'll reach the T-shirt section. This area features casual clothing and accessories, perfect for a quick browse after your grocery shopping. Now if you head to the top left corner of the market, where the Fish section is located. It offers a wide variety of fresh seafood. You'll find everything from salmon to shrimp, delivered daily.

Finally, in the top right corner of the market, there is a place in which you can buy vegetables. It's packed with leafy greens, root vegetables, and herbs. That's a quick overview of the main sections. Feel free to explore the rest of the market and enjoy your visit!

PART 5

Mock Test 7

Extract One

M: What do you think of Noel's new girlfriend, Jenny?

F: She seems very nice, John, and they certainly seem to get on well together.

M: I'm just a bit worried that they don't seem to spend much time together. They don't really have the same interests at all.

F: Well in some ways don't you think that's a good thing? They like each other but they also have their own lives.

F: Yes, I suppose you're right. With his last girlfriend they always did the same things together, they were never apart.

F: And they always did what she wanted, never what he wanted. Eventually it was just too much for him.

F: Yes, perhaps you're right. It's better if two people are a little bit independent. Sometimes it's good to have a break and do something on your own, and then come back together.

F: I'm sure they'll be fine. But it's early days yet.

Extract Two

F: Oh, hi, I've just been to the new supermarket; it's fantastic, and so cheap.

M: Yes, I went last week. It certainly seems to have everything you need.

F: Oh, I think the town has needed something like this for a long time.

M: In a way, yes, but I worry about the small shops in the High Street. They're already suffering.

F: Yes, I suppose it depends on what you want. Quite honestly, I don't have time to go from one shop to another, and the parking is so difficult, especially on Saturdays.

M: I agree with you about the parking, and not just on Saturdays. Something has to be done about that, and the town is starting to lose its character.

F: Yes, I heard that the butcher's shop is closing soon. I suppose that's because supermarket shopping is so easy.

M: Well, it had to happen sooner or later, I suppose. It's such a shame though

Extract Three

M: Hello, police.

F: Hello. I can't find my hotel. Can you help please?

M: You can't find your hotel?

F: Yeah, it's called the Wallington Hotel and I've been driving around for hours and I've had to pull over and I just don't know what to do next.

M: Right, madam. You've called the police emergency number. Now this is not really an emergency call, is it?

F: No, it's not, no, so what can I do?

M: Well, is there someone on the street that you can ask for directions or have you got a map? It's not an emergency call.

F: No, it isn't. I'm sorry. I've asked several people, I'm sorry. I couldn't think what else to do. Sorry.

PART 6

Mock Test 7

Marianne: Hi! I'm Marianne. Now, if you love exciting rides at theme parks, you'll think what I do – designing high-speed rides called roller coasters – is a great job! It is – but it's also hard work! I've got some questions people have emailed me, and here's the first one. Dan asks what the first roller coasters were like. Well, it's not a new idea, Dan. In Russia, for example, people used to ride on tree trunks down slopes of ice. The first ride that actually charged a fare, though, was in the States and made use of train tracks which had previously been used to transport coal down a mountainside. Next, Sarah asks what qualifications I have. Well, I studied engineering at university, which included courses in maths and physics. Both these subjects are essential in my job. Having a basic qualification in art has also been valuable – it means I can design things that look beautiful, as well as being functional. Now, Carrie asks how I start on a new design. Well, there are lots of things to consider, like the client's budget, for example, and choice of materials, but the landscape – you know, whether it's hilly or completely flat – is also a major consideration. Another thing to think about is what we call the capacity of the roller coaster. Theme park owners normally think more about the number of passengers they can fit in, because that's where their profit comes from! But designers have to think about the weight that the ride will need to carry, as that affects the design. Paul asks if lots of people are involved in the design process. Yes, Paul, because we need different expertise. Most importantly, though, the ride has to be safe and enjoyable, and luckily my team has people who are experts in all the forces that passengers will experience during the ride, like exposure to wind and also gravity. We aim to reduce those – and if we get it wrong, it might not be a fun ride!

Of course, our designs are all based on years of research, because we have to ensure passenger safety while they're on our rides. We make use of studies that have been done into airline pilots – what kind of pressure their bodies can cope with when flying long distances – and that's supplied us with the majority of the data we have. And studying astronauts has provided us with some useful information about how being in space affects them. This leads to a question from Peter, who asks what people don't like about our rides. Well, I guess they'd tell us if they were boring, or too tame, because roller coaster fans are thrill-seekers! But they do let us know if they find them painful, which the rides can be if we throw passengers around at speed. Even the most dedicated riders dislike that!

PART 1

Mock Test 8

1. Have you seen the doctor?

2. Where did you go?

3. Do you know how to play chess?

4. What would you like for dessert?

5. Is it yours?

6. What kind of sauce is this?

7. Will you have some tea?

8. Can you please show me your passport?

PART 2

Mock Test 8

Hi! This is Rachel Atkins speaking. I've got some exciting news for young dancers out there. There's a fantastic dance competition coming up, and I think it's perfect for anyone who loves performing. The competition is open to children aged between 13 and 15. So if you're in that age group, you can take part. It's a great chance to show off your skills and have fun with others who enjoy dancing too. Now, let's talk about the important dates. The competition itself will be held in early August, but you need to enter by the 12th of July. That gives you a few weeks to get everything ready. Don't leave it too late! To enter, you don't need to fill out a long form or pay anything. All you have to do is upload a video of yourself dancing. It can be something you've already recorded, or you can make a new one just for this event. Make sure it shows your best moves! If you want more details, you can visit our website. The address is www.jittersea.com. That's spelled J-I-T-T-E-R-S-E-A. You'll find all the rules and tips for recording your video there. The competition will take place at the college, the one just opposite the park. It's easy to get to and has a great space for performances.

And here's the best part—there are prizes! The first prize is £175, which is a great reward for your hard work. There's also a second prize, so even if you don't win, you might still go home with something. So, get your dancing shoes ready and start preparing your video. We can't wait to see what you've got!

PART 3

Mock Test 8

Speaker 1 : People often assume my job is just sitting in front of a screen all day, and honestly, that's partly true — but it's far from dull. I deal with systems that keep entire offices running smoothly, so when something breaks, I'm the one they call. It's funny because when I was younger, I wanted to be an engineer, maybe even build machines. Now I'm more of a problem-solver, just in a digital way. Sometimes I have to work late to fix issues before the morning rush, but I like the challenge. The best part is knowing that no two problems are ever the same — there's always a new puzzle waiting.

Speaker 2 : I never thought I'd end up working with people every single day — I used to be quite shy. But now I spend hours explaining, listening, and trying to motivate others. It's demanding work, especially when deadlines or tests are approaching. I do a bit of planning too, designing materials and activities to make learning enjoyable. My friends in the business world say I should switch careers for better pay, but I couldn't give up the satisfaction of seeing someone finally understand something they've been struggling with. That moment makes all the effort worthwhile.

Speaker 3 : I've always loved showing people new places, so I guess it's no surprise I ended up doing this. My job involves describing destinations, helping clients plan trips, and sometimes even leading groups myself. Of course, not everything is glamorous — delays, lost luggage, or bad weather can make things stressful. But when a family tells me their holiday was unforgettable, it's worth all the trouble. I actually studied languages at university, thinking I might become a translator, but now I use those skills to help travellers feel more at ease wherever they go.

Speaker 4 :

I spend a lot of time trying to understand what catches people's attention — whether it's an image, a phrase, or even the music behind an advert. It's not as simple as just "selling things"; it's about creating a feeling that connects people to a brand. I work closely with designers, analysts, and sometimes even psychologists to make campaigns more effective. When I started, I thought I might go into journalism, but I realised I preferred shaping stories rather than just reporting them. It's fast-paced, competitive, and sometimes exhausting — but when you see your campaign go viral, it's an amazing feeling.

PART 4

Mock Test 8

Welcome to the River Farm. I'll be giving you a short tour of the main areas so you can get familiar with the layout before you begin your visit. Let's start near the southern edge and work our way around the property. As you walk up from the entrance, you will see a corn field on your left. It's a wide, open area used for growing maize, and it's one of the farm's most productive zones during harvest season. Further up, there is a well. It provides fresh water for both the animals and the crops. Above the well is the chicken coop. This small building houses the farm's hens and roosters. It's a busy spot in the mornings, especially when eggs are being collected. Further up, at the end of the path to the left, you will see the shed. It is used for storing tools, equipment, and seasonal supplies. You'll come across the orchard area just to the right of the shed. This area is filled with fruit trees—apples, pears, and plums—and it's especially beautiful in spring when everything is in bloom. At the end of the path to the right, stands the farmhouse. It's the main residential building and visitors often stop here to ask questions or get directions. Just behind the farmhouse, near the river, is the vegetable garden. It's a well-organized plot with rows of carrots, lettuce, tomatoes, and other seasonal vegetables. This area supplies fresh produce for the local market. Between the Tractor Garage and the Greenhouse is the windmill. It's a tall structure used to generate power and pump water. Though it's no longer the farm's main energy source, it remains a proud symbol of the property's history. That concludes our tour of River Farm. Feel free to explore the rest of the property and enjoy the peaceful surroundings!

PART 5

Mock Test 8

Extract One

Interviewer: OK. now the outcome is a magazine that's filled with competitions, short stories, puzzles, and a cartoon strip. Flicking through the first issue. I'd say two things become apparent – enthusiasm and the language used.

Kate: Enthusiasm is incredibly important. When I was at school, it didn't matter what you were teaching children if you totally believed in it. When you give a bad lesson, you can see those blank faces looking back at you. I really hope I get that belief across, and that children find it entertaining and become interested in what's going on around them all the time.

Interviewer: How about the actual style of writing itself?

Kate: The whole brief to my writers was that they should approach it as if they are talking to intelligent people. Of course, you can't use some words because they would go above children's heads. But when I was doing my research, I put a number of texts in front of children. They are very perceptive – if they feel they are being talked down to, they see it. So it's all written in a direct way, rather than assuming you have to use a very childish style – the readers wouldn't like that.

Extract Two

Dir. A: Okay, we've got to decide who to promote to Leading Education Officer.

Dir. B: Someone from the arts faculty, I suppose.

Dir. A: Well, it can be from any faculty, since the position requires more general skills: handling personnel, settling disputes, and motivating them to focus on the task. It was the last position which involved computer knowledge, not this one.

Dir. B: Surely computer knowledge would help. So too would knowledge in the arts.

Dir. A: Sure, it would help, but the key criterion is being able to direct the staff appropriately.

Dir. B: So, it doesn't matter then from which faculty we select our candidates?

Dir. A: Not really, but I've already looked at those from computing, and rejected them all.

Dir. B: Why?

Dir. A: They'll all too new, lacking in sufficient experience, whereas these ones from the business faculty are longtimers, so we'll take someone from there.

Extract Three

Interviewer: So you have quite a lot of contact with artists?

Rachel: Yes. Sometimes I spend nearly all day on the phone and about fifty percent of the time it's artists. I send letters explaining why we can't show their work – some of them phone up to argue about it – I find those calls very hard to deal with. Artists we do exhibit also phone to find out if we've managed to sell anything and, if we have, when the money will be coming through. I don't mind those so much. Most other calls are from clients. We have a new artist exhibiting here every two to four weeks and before the show takes place, we send out a catalogue to the clients on our database.

Interviewer: Obviously the catalogue's illustrated?

Rachel: Oh yes, and as soon as the catalogue goes out, we start getting phone calls because people see something they like and want to reserve it. Sometimes they even buy things over the phone. The catalogue also contains a commentary about the artist, which I have to write and research. I try to find out what has influenced them, where they learned to paint, what the subject matter represents, that sort of thing, but I try to avoid quoting from positive reviews of their work; it's not meant to be advertising as such.

PART 6

Mock Test 8

Mars has fascinated scientists and explorers for decades. But while the idea of sending humans there is exciting, the reality is far more complex. A round-trip mission could take many months, and just reaching the planet itself requires a significant amount of time—far longer than a single day. That kind of journey demands careful planning and resilience. One of the biggest concerns is the environment beyond Earth's protective shield. Without the benefit of our atmosphere, astronauts are exposed to intense radiation, which can be harmful over long periods. Shielding and monitoring systems are essential to reduce the risks. Then there's the financial side. Developing spacecraft, life support systems, and safety protocols for interplanetary travel comes at a steep price. It's no surprise that missions like these are considered extremely expensive, often requiring international collaboration and years of investment. But it's not just technical or financial challenges. The human aspect is equally important. Spending months in confined quarters, far from family and familiar surroundings, can lead to feelings of isolation. Maintaining mental health and team morale becomes a top priority. Of course, not everyone agrees that space exploration should be a priority. Some argue that the resources used for missions to Mars could be redirected to address urgent issues here on Earth—like poverty, education, or healthcare. It's a debate that continues to shape public opinion and policy. And finally, there's the question of safety when it comes to Martian soil. Scientists are cautious about the possibility of unknown microbes—tiny organisms that might exist on Mars and could pose risks if brought back to Earth. That's why strict containment procedures are part of every sample-return plan. Despite these challenges, the dream of exploring Mars remains strong. Each step forward brings us closer to understanding our place in the universe—and what it might take to live on another world.

Mock Test 9 · Listening

PART 1

Mock Test 9

1. Where did you get the jacket?

2. What do you eat for breakfast?

3. Shall I help you carry the box?

4. Is this your first time in London?

5. How much did you pay for it?

6. What time is your meeting?

7. Can I give you a hand?

8. Can I give you a lift?

PART 2

Mock Test 9

Welcome to Lincoln library! You'll all be coming here quite often, so it's important to understand how everything works. I'm going to give you some useful information to help you get started. Let's begin with the opening hours. During term time, the library is open 24 hours a day. That means you can come in early in the morning or even late at night—whenever it suits you. It's great for students who like to study at different times. However, outside term time, the hours are shorter. The library opens at 8:30 in the morning and closes at 7:00 in the evening. So, if you're planning to visit during the holidays, make sure you come before closing time. Now, what can you borrow from the library? There's a wide selection of items available. You can take out books, of course, but also magazines and CDs. You're allowed to borrow up to ten items in total. But remember, only six of those can be books. So, for example, you could borrow six books and four magazines, or five books and five CDs. Please make sure you return everything on time. If you're late, you'll have to pay a fine. The fine is two pounds per day for each book, and one pound per day for other items like CDs or magazines. So it's a good idea to keep track of your return dates. To borrow anything, you'll need a library card. Getting your first card is free, but you do need to fill in a form and provide a photo. If you ever lose your card, don't worry—you can get a replacement. But a new card will cost five pounds. That's everything for now. If you have questions, just ask a member of staff. We're always happy to help. Enjoy your time at the library!

PART 3

Mock Test 9

Speaker 1.

A: Hey, could you look after my bag for a while? I just want to buy a bottle of water. I always feel nervous and thirsty before a flight.

B: Yes, sure. And buy one for me please. Without gas, just still water.

A: OK. Oh your bag is so heavy! You must be a champion in weightlifting if you are able to travel with such heavy luggage. B:

A: I just asked you to look after the bag, not to hold it.

B: OK. I won't. Come on. Fetch the water and we'll go to the check-in area.

Speaker 2.

A: What are you doing? Why are you moving the furniture?

B: I just want to redesign my room. It was written in some magazine that if you change the design in your room, it helps you to become more creative and it inspires new ideas.

A: I don't think that moving your writing desk to the darkest corner of the room will give you anything but eye problems.

B: Don't you?

A: If you want something to be changed why not start with tidying up your room? Just move your clothes from the sofa to the wardrobe, dust the shelves, and water the flowers look they are fading without your care.

Speaker 3.

A: Hi! You are early today.

B: Yes. I've been exercising with the ball and now I'll try to throw it into the basket. I've decided to spend more time on training.

A: Why? Are you taking part in a competition?

B: No. But the coach of our basketball team told me that he would allow me to join the team...

A: Oh, did he?

B: Yes. But only if I am fit to join. Pass me the ball, will you?

Speaker 4.

A: You read the labels so carefully... Why?

B: Because, I always read the labels before I decide to buy food or not. I want to know exactly what we are going to eat.

A: Is it so important?

B: To me yes. Just look: this butter contains too much fat, which means too many calories. And this butter, on the other hand, has too little fat. It means it may be not tasty... As for the other products...

A: I'm sorry, but ... if you are planning to analyse all the goods you want to buy like this, I'd rather be off. I can't spend the whole evening here.

PART 4

Mock Test 9

Welcome everyone to the History Museum! Before we begin our tour, I'll quickly guide you through some of the main facilities you might want to visit during your time here. We're standing right now near the reception desk, which is in the center of the building above the locker room. From here, if you look slightly to your left from the desk, you'll see the tour guide desk, where you can sign up for guided tours that start every hour. Just behind us, in the middle of the hall, above the reception desk and tour guide desk, there's an interactive display — it's a touch-screen table that allows you to explore historical maps and ancient artifacts digitally. It's a great way to learn more before seeing the real items. Now, if you walk towards the upper left side of the museum, you'll find the museum shop, located just beside the South American Exhibitions. You can buy souvenirs, postcards, and some historical books there. Moving across to the opposite side, at the top right corner, next to the sculpture hall, there's the Reading Room. It's a quiet area where visitors can read historical journals or research materials related to our exhibitions. And finally, before you start exploring, you might want to know that the restrooms are located in the bottom right corner, right next to the locker room — a convenient place to leave your bags while you walk around. That's a quick overview of the main facilities. Now, let's begin our tour with the Sculptures section, which is just ahead of us.

PART 5

Mock Test 9

Extract One

Ann: I wasn't expecting to enjoy that lecture quite as much as I did. Usually, those afternoon sessions are a bit of a struggle to get through.

Ben: Same here. I thought it'd be one of those overly theoretical talks, but the lecturer had this clever way of breaking things down. It wasn't just slides and definitions — he made it feel practical somehow.

Ann: Yes, it's like he anticipated the points we'd find confusing and addressed them before anyone even asked. That kind of structure really works for me.

Ben: Agreed. Though I can't help thinking I'd have followed it better if I'd read the material, he

uploaded beforehand.

Ann: Don't remind me. I skimmed it on the bus this morning and immediately regretted not starting earlier.

Ben: We keep saying we'll prepare in advance next time, but somehow it never happens.

Ann: Maybe after today's lecture we've finally learned our lesson.

Extract Two

Woman: I still can't believe how intense those two days in Brussels were. Everything seemed to hinge on that one presentation.

Man: I know. I was worried it might all be a waste of time, but in the end, I think we managed to tip the balance in our favour. The board seemed far more open to our proposal by the end of the meeting.

Woman: You think so? I couldn't quite read them. Some of them looked skeptical.

Man: Sure, but that's to be expected. The important thing is that they're now considering our plan seriously. That's what we set out to do, and we pulled it off.

Woman: True. I was so nervous beforehand, but it was worth the trip. I can't say I enjoyed every minute, but I'm glad the outcome justified the effort.

Man: Exactly. It feels good when the long hours of preparation actually lead somewhere.

Extract Three

Interviewer: You've had quite a career in molecular biology. Did you ever imagine you'd reach this point when you started out?

Scientist: Not at all. When I began, I was just thrilled to be part of a lab doing meaningful work. I never thought the projects I joined would end up influencing the direction of the field. It's been far beyond what I initially pictured.

Interviewer: That's wonderful. What would you say to younger researchers hoping to follow a similar path?

Scientist: I'd tell them not to romanticize the work. Research isn't about sudden breakthroughs every week — it's about understanding the discipline itself. You need to know what's expected of you, the standards, the ethics, the patience it requires. Without that awareness, you won't last long.

Interviewer: So, being a researcher is as much about knowing the rules as it is about innovation?

Scientist: Exactly. It's knowing where creativity fits within structure. That's something I wish someone had told me at the beginning.

PART 6

Mock Test 9

Lecturer: In the last lecture, we looked at the adverse effects of desert dust on global climate. Today we're going to examine more closely what causes dust storms and what other effects they can have.

As you know, dust storms have always been a feature of desert climates, but what we want to focus on today is the extent to which human activity is causing them. And it is this trend that I want to look at, because it has wide-ranging implications. So – what are these human activities? Well, there are two main types that affect the wind erosion process, and thus the frequency of dust storms. There are activities that break up naturally wind- resistant surfaces such as off-road vehicle use and construction and there are those that remove protective vegetation cover from soils, for example, mainly farming and drainage. In many cases the two effects occur simultaneously which adds to the problem. Let's look at some real examples and see what I'm talking about. Perhaps the best-known example of agricultural impact on desert dust is the creation of the USA's 'dust bowl' in the 1930s. The dramatic rise in the number of dust storms during the latter part of that decade was the result of farmers mismanaging their land. In fact, choking dust storms became so commonplace that the decade became known as the 'Dirty Thirties'. Researchers observed a similar, but more prolonged, increase in dustiness in West Africa between the 1960s and the 1980s when the frequency of the storms rose to 80 a year and the dust was so thick that visibility was reduced to 1,0 metres. This was a hazard to pilots and road users. In places like Arizona, the most dangerous dust clouds are those generated by dry thunderstorms. Here, this type of storm is so common that the problem inspired officials to develop an alert system to warn people of oncoming thunderstorms. When this dust is deposited it causes all sorts of problems for machine operators. It can penetrate the smallest nooks and crannies and play havoc with the way things operate because most of the dust is made up of quartz which is very hard. Another example – the concentration of dust originating from the Sahara has risen steadily since the mid-1960s. This increase in wind erosion has coincided with a prolonged drought, which has gripped the Sahara's southern fringe. Drought is commonly associated with an increase in dust-raising activity but it's actually caused by low rainfall which results in vegetation dying off.

Mock Test 10

1. Where did you put my book?
2. Do you want tea or coffee?
3. Can you help me with this box?
4. When does the train leave?
5. Did you enjoy the film?
6. Where is the nearest bank?
7. What is the weather like today?
8. Can you close the window?

PART 2

Mock Test 10

Hello! My name's Jessica Chapman, that's spelled JESSICA C-H-A-P-M-A-N. I'd like to tell you about a job I did a few months ago. It was a really interesting experience, and I learned a lot from it. I worked as an online language teacher, helping schoolchildren in China to learn English. It was my first time teaching online, and I found it both exciting and challenging. I used special software to connect with the students, and we had lessons twice a week, every Monday and Wednesday. Each lesson lasted two hours, which gave us plenty of time to talk, learn new words, and practise speaking. My students were all quite young—between eight and ten years old—and they were at about the same level in English. That made it easier to plan the lessons because I could use similar activities for everyone. The groups were small, usually three to six students, so I had time to help each child individually. One of the best parts of the job was using an interactive whiteboard. It appeared on my screen, and I could write and draw on it during the lesson. The students could see everything I did, and they could also take part. We used the whiteboard to play word games, draw pictures, and even sing songs together. It made the lessons fun and helped the children stay focused. I first saw an advertisement for the job in January, and I applied straight away because it sounded perfect for me. I waited about a month, and then I got a reply saying I had been accepted. I started working in July, and continued until September. I really loved my job, and I was sad when the job came to an end.

PART 3

Mock Test 10

Speaker 1 I wanted to study fashion, so I had to come to the capital, but it was hard leaving my friends back home. My older sister studied here too. She made friends really quickly because she's really into sports and joined loads of clubs. But I've always been quite shy, so I didn't do that. Fortunately, the college accommodation office found me a room in a residence and I got friendly with the other girls living there. I don't know how I'd have got on at a big university, but here everyone knows each other – so you get to know people you wouldn't normally have that much in common with – it's nice.

Speaker 2

In my first few weeks here, I came down with a heavy cold that meant I couldn't go out much. I'd been put in a student residence with a bunch of younger guys who were all studying theatre – so as a scientist I had nothing in common with them – they weren't even into football! So I really needed to get to know my classmates better – yet there I was stuck in my room coughing and sneezing. I spent a lot of time chatting to friends back home on the internet. Anyway, in a big college like this, you eventually have to make friends – so it all sorted itself out in the end.

Speaker 3 I was put in a student residence at first with people I didn't get along with that well. I mean, we didn't fall out or anything, but I didn't hang out with them either. I don't know what I'd have done if I hadn't signed up for volleyball training with the college team. It's a whole lot easier making friends with people who share your interests than with people who share your kitchen! The only downside for me in that first term was that I spent too much time on court and not enough in the library! I don't regret it, but had to make up for lost time later on!

Speaker 4 The people I hung out with in the first few weeks didn't become close friends actually. We were just people who happened to be thrown together in the same residence, but it was good to have someone to chat to when I got in from lectures. We still play tennis occasionally and I get invited to their parties, but I soon moved out to go live with some guys on my course. That was a big mistake actually. With friends at school, it was great to study together in the evenings – but I soon found that the last thing I wanted to talk about when I got back from lectures was economics!

PART 4

Mock Test 10

Alright. I'd like to quickly go over where everything is located. So look at your maps of Parsons Fruit Farm and find the main yard. It's towards the bottom of your maps. That really is the center of the farm. Okay. The first place I'll mention is the workshop. This is close to the main yard. But you actually have to leave the yard to get into it. So, you need to take the road that goes out to the orchards, and you access the workshop from there. Then the lunch room. On the north side of the map, there's a road that curves sharply round to the left. Halfway around this bend, you'll find the entrance to the lunch room. It's a pretty place, next to the river and also beside a little wood. You also need to be able to find the farm office.

So if you look at the main yard, you'll see there's a number of different buildings located around it, and the farm office is the smallest one. It's on the South side. Obviously, the first aid room is important. Now this is close to the main yard, so it's quick to get there, And it's actually more or less in the middle of your maps. That little building that's attached to the farmhouse. Then the store shed. From the main yard, take the road heading north. Go past the farmhouse and turn right. The store is down that road. If you come to the vegetable gardens, you've gone too far. Now the other thing is the farmhouse is further than you'd expect.

PART 5

Mock Test 10

Extract One

Susan: Well gentlemen, we've almost finished our second semester at this university. What do you think of all the courses we attend?

David: On the whole, I'd say they're quite good, apart from Social History, which I find to be a little too inexact.

Steve: Yes, the lecturer's style is also very very dull.

Susan: I certainly agree with you there, although I would say that the textbook is more interesting. 'Welfare State'. The subtitle says, 'An examination of social development in the 20th century.'

David: Yes, 'Welfare State' is a good book, but look how many pages it has. 458!

Steve: I agree. It's just too long to be easily read. Far too long, although it's certainly well written in parts.

David: Yes, and if you compare it to the textbook for Cultural Studies —what's it called?

Susan: 'Inner Views', I think.

David: No, that's the book for Media Studies, and we finished that subject last semester. The book you're thinking of is 'In Perspective'

Extract Two

Frank: Hi, Nicole. As you know, we've got to decide on the best ways this university can reduce its waste. You inspected the eastern campus, and I did the western buildings. Did you do all the interviews as well?

Nicole: Yes, I interviewed all the staff, who made some good observations, and I interviewed some of the students. The students said little that was interesting. They don't seem to care that much. It was the cleaners, surprisingly, who revealed the most relevant facts.

Frank: That's not surprising to me. They empty all the bins, so they see the waste first- hand, whereas the staff just throw things away without thinking. What item was most commonly disposed of?

Nicole: Well, it really depended on where I interviewed. In the cafeteria precinct, obviously paper plates and cups were thrown away all over the place. There was almost no attempt at recycling.

However, across the university in general, it was paper copying that filled up most bins, far more than plastic, or other forms of waste.

Extract Three

Interviewer: Do you train every day or do you take a day off?

Ann: The accepted idea is that all professional sportspeople should have at least one rest day a week, so the body can recover. I'm not a great believer in that though. At my age I find I can keep going without one. I do five hours a day and I'd even like to be able to do more than that, but I don't want to push my body too hard, because that can lead to other problems.

Interviewer: What about your competitors in races – do you get to know them as friends?

Ann: I race against athletes from all sorts of places. I wouldn't say I've got friendships with them, though I'm sure some of them are really good guys, but I tend to keep a professional distance. It'd be too easy to let friendships start interfering with the way I run races. Of course, at my age chatting about life, having fun and a good social life are important to me. I share a house with three mates. They're the people I really get on well with.

PART 6

Mock Test 10

I'm going to report on a case study of a programme which has been set up to help rural populations in Mozambique, a largely agricultural country in South-East Africa. The programme worked with three communities in Chicualacuala district, near the Limpopo River. This is a dry and arid region, with unpredictable rainfall. Because of this, people in the area were unable to support themselves through agriculture and instead they used the forest as a means of providing themselves with an income, mainly by selling charcoal. However, this was not a sustainable way of living in the long term, as they were rapidly using up this resource. To support agriculture in this dry region, the programme focused primarily on making use of existing water resources from the Limpopo River by setting up systems of irrigation, which would provide a dependable water supply for crops and animals. The programme worked closely with the district government in order to find the best way of implementing this. The region already had one farmers' association, and it was decided to set up two more of these. These associations planned and carried out activities including water management, livestock breeding and agriculture, and it was notable that in general, women formed the majority of the workforce. It was decided that in order to keep the crops safe from animals, both wild and domestic, special areas should be fenced off where the crops could be grown. The community was responsible for creating these fences, but the programme provided the necessary wire for making them. Once the area had been fenced off, it could be cultivated. The land was dug, so that vegetables and cereals appropriate to the climate could be grown, and the programme provided the necessary seeds for this. The programme also provided pumps so that water could be brought from the river in pipes to the fields. However, the labour was all provided by local people, and they also provided and put up the posts that supported the fences around the fields.

Mock Test 11 · Listening

PART 1

Mock Test 11

1. Is that you, Emma? Wow, it's been ages!

2. It's lovely to meet you.

3. Where is your hometown?

4. Is that man Rick?

5. Really nice of you to join us.

6. We have to leave now. It's getting late.

7. Tell your sister I said hi!

8. Fred, how have you been these days?

PART 2

Mock Test 11

Ben: Hello, everyone. My name's Ben, and I'm here to tell you about a new maths course you can join on Saturday mornings. I work for an organisation called "Bright Numbers." We run weekend courses for young people who want to improve their maths skills in fun and practical ways. At school, you often learn maths from books, but this course is different. It's designed to help you use maths in real life. We usually hold our sessions in places that are easy to reach. Sometimes we use classrooms, but for your group, we've booked a space at the local community centre. It's nearby and has everything we need.

The course lasts for 12 weeks, and you'll spend six hours with us each Saturday. That might sound like a lot, but most students say the time goes quickly because the activities are so enjoyable. During the course, you'll work on projects that involve real-world maths. For example, you'll learn how to measure and build simple structures, plan a budget for a small event, and even design your own board game using maths puzzles. Last time, students created their own maths-themed escape rooms. This time, we'll ask you to design a maths trail that younger children can follow in the park. You'll make signs, write clues, and test the trail yourselves. When it's ready, you can invite your family to try it out. We think you'll have a great time and learn a lot. Now, does anyone have any questions?

PART 3

Mock Test 11

Speaker 1 :

I rely on the bus every morning to get to work, and honestly, it's one of the most stressful parts of my day. The timetable says a bus should come every fifteen minutes, but that almost never happens. Some days two buses arrive at once, and other times you can stand there for half an hour with no sign of one. What's worse is that there's no proper information system — no display to tell you if it's delayed or cancelled. You just have to wait and hope. When it's raining or freezing cold, that's the last thing you want to be doing. It really feels like the transport company doesn't care about how unreliable it's become.

Speaker 2 : My main complaint is the overcrowding, especially on the underground trains in the morning. It's honestly unbearable. By the time the train reaches my stop, there's barely enough space to stand, let alone breathe comfortably. Everyone's squeezed together, trying not to step on anyone's toes. You can feel people's bags and elbows pressing against you, and sometimes you can't even reach the handrail to hold on. It's uncomfortable and kind of stressful too. I've started leaving home earlier just to avoid the worst of it, but even then it's packed. I really wish they'd add more trains during rush hour or at least make the carriages bigger.

Speaker 3 : I don't use public transport every single day, but when I do, it's usually in the evening. That's exactly when it becomes a problem — because the buses and trains stop running so early. The last bus to my area leaves before midnight, which makes it nearly impossible to go out for a late dinner or see a movie with friends unless I plan to walk home or spend a fortune on a taxi. It's frustrating because our city isn't that small, and a lot of people work shifts or finish late. Extending the service hours would make such a big difference. I just don't understand why they haven't done it yet.

Speaker 4 : What really puts me off using public transport is how dirty everything is. The buses, the trains, even the stations — they all seem neglected. You sit down and notice stains on the seats or bits of chewing gum stuck under the tables. Sometimes the floors are sticky, and it's obvious no one has cleaned them properly in days. It's not just unpleasant — it makes the whole journey feel uncomfortable. I think if they spent more effort on keeping things clean and tidy, more people would actually want to use public transport. Right now, it just feels unhygienic, especially during flu season when everyone's coughing and sneezing.

PART 4

Mock Test 11

OK, now let's move on to some details about the conference and what will be happening where. Let me just briefly take you through the map that you've all got in your welcome pack. Right, here on the map, we've marked all the sessions that are taking place this morning, and you've already indicated which ones you'll each be attending. For those of you going to the session on Setting Up a Fitness Centre at work, you go out of the Main Hall here through those doors, turn right at reception and go along the corridor to the Taylor Room, which is on your left. You'll get lots of good advice there on the possibilities and costs of a workplace fitness centre.

The talk on Healthy Eating Schemes is in the Martin Suite. For that, you need to go out of this hall the other way, through the doors at that end, and that takes you straight through to the Martin Suite. If you're keen to introduce healthy eating schemes in your canteens and restaurants, or to improve ones you've already got, you'll get lots of really good ideas from that session.

Now, those of you attending the session on Transport Initiatives, you're in the Fender Room. To get there, you need to go out of those doors that bring you out opposite reception, turn left and left again into a corridor. The Fender Room is the third door on your right. The session will cover everything from how to encourage people to walk or cycle to work to car-sharing schemes. For those of you who have signed up for the workshop on Running Sports Teams, that will take place in the Gibson Suite. The whole issue of organising company teams, recruiting people for them, encouraging people to take part in them whatever their sporting ability, taking part in competitions – all that will get covered in the workshop. You'll find that if you go out of here, turn right at reception and then right again. The first door you come to on the left is the Gibson Suite.

Finally, if you need any more information or have any queries while the conference is going on, you'll find me in the Conference Coordinator's Office. From here, that's to the left of Reception and along the corridor past the Entrance Hall. If you keep going along the corridor, you'll find my door at the end on your right. Please come and see me if there's anything you want to ask or find out. OK, let's get started. I hope that you all enjoy ...

PART 5

Mock Test 11

Extract One

Interviewer: ... so Monarch butterflies live in the Rocky Mountains of North America, don't they?

Man: That's right, but unlike other insects in temperate climates, they can't survive a long cold winter. So, they overwinter either along the Californian coast, or high in the mountains of Mexico.

Interviewer: Is there a consistent pattern to their behaviour?

Man: Well, the migration is driven by seasonal changes. Both daylight and temperature influence the

movement of the Monarch.

Interviewer: And is this migration unusual?

Man: Well, in fact no other butterflies migrate quite like these do. They travel much further than any other species.

Interviewer: Oh? And where do they settle?

Man: Well, they fly in masses to the same winter roosts, often the same tree, unbelievable I think really. It's an amazing sight.

Interviewer: That's more the type of migration you expect from birds and whales surely?

Man: Except that unlike birds and whales, these butterflies have a very short lifespan so only a small proportion make the migration trip.

Interviewer: They only do it once then ...

Man: To explain it in human terms, it's actually their children's grandchildren that return south the following fall.

Interviewer: I see.

Extract Two

Woman: Did you watch the Cook of the Year final?

Man: You bet. The winning dish Salima cooked yesterday was really unusual. The colours were fantastic!

Woman: Yeah, I felt she pulled out all the stops just when it mattered. She hasn't performed consistently throughout the competition though - she's had real ups and downs. I thought Ali should have got the prize - he performed so steadily in all the rounds.

Man: Well, at the key moment, Salima shone and he let himself down.

Woman: Mm. I wonder if the next series will be the same? I enjoy watching it, but it is getting a bit repetitive.

Man: Oh, I like that, it's reassuring! Although it would be good to have someone new on the expert chef panel to make their decisions.

Woman: Mmm, well, I think they need a few innovative featHures each week. ... Man: What, like um, something about the countries the recipes come from?

Woman: Exactly.

Man: Huh. Maybe they should try a programme where people can only cook in one particular style, you know, Italian, Thai, whatever.

Woman: Mmm, sounds good in theory, but would it be rather limiting?

Man: Well, I suppose it might be ...

Extract Three

Peter: Hi, Claire, how was the South African trip then?

Claire: Oh, it was fantastic, Peter. And the best part was the game park, just like you'd led me to expect.

Peter: Well, we went two years ago and I've never forgotten seeing all those animals for real. Elephants, lions, giraffe - it is so much better than seeing them on screen - huge animals suddenly emerging from the trees. And the landscape - wide horizons in every direction...

Claire: Yeah, and what about those sunsets? They were just out of this world, weren't they? But we did have one rather unnerving encounter ...

Peter: Oh?

Claire: Yeah, with an elephant. It started poking at the windows of our jeep with its trunk. Then it sort of wrapped itself around the vehicle and started wiggling it.

Peter: That must have been scary.

Claire: Well, not really.

Peter: Elephants can be aggressive...

Claire: Not this one. It jostled the jeep with its tusks, and then just turned and walked away.

Peter: Was it after the provisions you had on board?

Claire: 'I think it was probably just wondering what we were, and having checked us out it left us alone.

Peter: You won't forget that!

Claire: Certainly won't!

PART 6

Mock Test 11

Last month I spent some time at a Cheetah Conservation Centre in Namibia in South West Africa. Anyone can go. You don't need to be an expert but they emphasise that you have to be flexible - there's such a wide range of tasks you might be involved in. And of course, you need to be tolerant of high temperatures and able to walk on rough terrain. I'd always dreamt of sleeping under the African stars but there were so many strange noises I didn't really enjoy it. We had all our meals outside and made a proper camp fire and barbecued food on it - I wasn't particularly good at any of that but learning to bake bread was fantastic and I took on that role. The fire made it taste so much better than an indoor oven. And of course, the work was so interesting. Cheetahs are a bit like sports cars - designed for speed - they're long and slim rather than muscular like a lion or tiger and, unlike other members of the cat family, their paws are extremely narrow with claws which grip the ground in a similar way to a car tyre. They look quite similar to leopards but I soon learnt to tell them apart.

So, what was I actually doing? Well, I helped to follow the movements of the cheetahs. The data was collected in a special collar, which had been perfected after years of research. Scientists wanted a way of attaching something very light and small to the animals which could be powered by solar batteries and now they've done it. I was following three female and two male cheetahs. The equipment was only activated when the animal moved and it recorded where each cheetah was, which direction it was headed, and how fast it was moving, with the data being sent up to 300 times a second via radio signals. I'd always thought that cheetahs are such good hunters because they run so fast but in fact, I discovered that what gives them a huge advantage is their ability to 'turn sideways. This is something they can do in a second or so when they spot some food and it's that rather than the way they move forwards, which makes them so agile. We wanted to check on when the cheetahs preferred to hunt, expecting it to be the cooler ends of the day. This indeed was the case but our research showed that more hunting took place at dawn than at twilight and that some hunting was even done at night. We also looked at where the cheetahs spend their time. They're mostly seen in open grassland, only occasionally venturing among shrubs and trees. But in fact, what the tracking equipment unexpectedly revealed was that they also headed into thick vegetation sometimes, leaving the open ground. It was so interesting to learn more about these beautiful creatures and how they live. I'm really hoping I can return to the centre again next year.

Mock Test 12 · Listening

PART 1

Mock Test 12

1. Do you have any more questions?

2. Where is your friend's flat?

3. Can you please speak to John about the new car?

4. Do you know how to play bingo?

5. Emily talked to me last night.

6. I am planning to open a football club.

7. Is this tomato sauce?

8. Have you ever visited Morocco?

PART 2

Mock Test 12

Hello everyone. Before we finish today, I'd like to tell you a bit more about our trip to the town of Chester tomorrow. I hope you're all looking forward to it! The coach will leave at 9:15 in the morning, so please make sure you arrive at least 15 minutes early. We don't want to leave anyone behind! The journey will take about an hour and a half, so we should arrive in Chester at around 10:45. That gives us a little time to stretch our legs and maybe have a quick cup of coffee or tea before we begin our first activity. Our first stop will be a visit to the castle. It's a very old and beautiful building with lots of history. You'll be able to walk around the rooms, see the old furniture, and even climb one of the towers if you like. The view from the top is fantastic! I'm sure you'll enjoy it. Tickets cost £3.50 for adults, and if you're coming with children, you can get a family ticket for just £8. We'll spend about two hours at the castle, and then we'll head to the park for lunch. We'll bring sandwiches and drinks, and we'll all eat together on the grass. If you'd like to bring your own snacks or something extra, that's absolutely fine. And the good news is – the weather forecast says it will be sunny and warm, so don't forget your sunglasses or a hat. After lunch, we'll take a walk around the old market. It's a great place to explore. There are lots of small shops and stalls where you can buy souvenirs, handmade gifts, and local food. It's the perfect place to get presents for your friends or family. We'll spend about an hour and a half there, and then we'll meet back at the coach at around 3:30 p.m. to return home. Please remember to wear comfortable shoes, as we'll be walking quite a bit. And if you have any questions or special needs, feel free to come and speak to me after this talk.

PART 3

Mock Test 12

Speaker 1 : I need to stay on top of trends as it's no good stocking stuff that nobody will want. If I want to put a new range of clothes in the shop, I have to drop an existing supplier, even if they've had a long relationship with us. There are two key seasons: early in the year and the summer, and during those months I go all over the place to international trade shows. I have to do really long days then but I love the stimulus of going to different places. When I'm back in the office I spend a lot of time looking at budgets and gross profits.

Speaker 2 : My job is all about giving instructions and processing large amounts of complex data. You also have to be able to cooperate with those working alongside you. We can't risk one person not pulling their weight and it's a good feeling that we can all trust each other. Because situations can develop really

quickly, you've got to stay calm and really be on the ball. The busier it is, the more you need to focus. There are so many people travelling nowadays that we're required twenty-four hours each day so I work different shifts but when it's time to go home, I take my headset off and I switch off completely.

Speaker 3 : I work closely with curators, deciding how things will be displayed, and liaising with designers and project managers on anything from writing audio guides to discussing what should go on the website or in the shop. My other responsibility is to raise our international profile by travelling abroad. That could take over completely but I make sure it doesn't. I start work early, around seven thirty, and finish about five thirty every day so that's a real bonus as I know the rest of the day is for my family. I have daily team meetings with curators and about twice a week I meet people from marketing and we look at the promotion budgets.

Speaker 4 : In this job you have to accept that longer hours will be expected and required of you at times. I like the people I work with but because we're all on top of each other I sometimes see a little more of them than I want to. Each job I do is different. I might be working on a divorce case one week and a neighbourhood dispute the next. For the most part I have to negotiate and communicate with two sides so I'm always learning different ways of dealing with situations. That appeals to me. I get bored otherwise. I'm hoping one day I'll be able to take my skills abroad.

PART 4 Mock Test 12

Welcome to our holiday special. Today I'll be talking about a new cycle route in this area called the Elmsdon Way. It's well signposted so you can see exactly where to go and it's an easy ride with no steep hills. It's 35 kilometers long from Elmsdon to Langton, and consists partly of cycle paths and partly of roads. Let me outline the route briefly, starting at Elmsdon Railway Station. The first part is a cycle path running eastwards, roughly parallel to the rail track. Almost immediately the railway curves away and goes around the southern side of a little lake, but the cycle path takes the northern route around the lake. Keep your eyes open for the swans that nest there. The path then joins the road, and the next landmark is a group of massive rocks that tower over the countryside. You'll see them to the east of the road just before the road goes under the railway. They're imposing. Soon, you'll come to a fork in the road where you'll leave the road and head off towards the river. But if you want to make a detour to Corley Nature Reserve, go straight on instead of leaving the road here. Continuing along the cycle path, you'll reach the River Cleave. The cycle path follows the river southwards. After a bit, you'll see the Ashington China factory, which closed in 1962. It now offers guided tours to the public, which is worth a visit. Right after the factory, there's a bridge over the river, and you carry on with farmland to the north right after the bridge and the Langton Forest to the south. Somewhere between the cycle route and the railway line cited a statue of Captain Cook, which dates back to the eighteenth century. The route ends at Langton Village, where you'll find a railway station. So you can either catch the train here or cycle back to Elmston.

PART 5 Mock Test 12

Extract One

Maria: What did you think of the book I lent you, David?

David: Well, it was slow to start with, Maria.

Maria: Oh, I thought it was a real page-turner ...

David: Well, I did get into it once I'd worked out why all the characters kept contradicting themselves! It didn't seem plausible that they'd do that.

Maria: Oh, I thought they were fantastic characters - the contradiction's all part of the plot, isn't it?

David: I guess so ...

Maria: Did you like the descriptions of Istanbul?

David: I did, yeah, I've never been there but I'd love to see the places the author writes about.

Maria: She was born there, so I imagine she's got the detail right, but I'd love to check that out for myself.

David: Mmm. Is it a book you'd reread?

Maria: Definitely. I liked the style and with the chapters all being told through the eyes of a different person, you get a varied perspective on what happens.

David: Is that it then? We never know what's really happened because no two people see things the same? And they change their minds from day to day?

Maria: Absolutely. Not an original approach, but that's exactly what the author wanted to put across.

Extract Two

Paula: Great bracelet, Simon.

Simon: This? I got it when I was a young man, still living in Zambia.

Paula: Oh, was it a gift?

Simon: Well, it's been in my family for several generations It came to me from my uncle, whose father, my grandfather, had worn it before him. It's made of elephant hair. In my tribe, the Kaonde, the elephant represents the good qualities of leadership - anything with a link to an elephant is said to confer gifts of responsibility, hard work and success. So, when he gave me this bracelet, my uncle was telling me he thought! had the capacity to be a leader.

Paula: That's fascinating.

Simon: I wear the bracelet every day and it makes me aware of the need to be focused in life.

Paula: I see. So, when you look at it you think about what really matters. Does it help with your work at the community centre? Lots of people there come from Africa, don't they?

Simon: Yeah, or their parents did.

Paula: So, anyone who had grown up in Zambia would look at this bracelet and understand the significance of it.

Simon: Yes, people often mention it.

Paula: That's really interesting.

Extract Three

Louise: Well, I think this dress is the best thing so far, but I'll need something to go over it.

Joanna: I like it Louise, it's an unusual shade of pink. It wouldn't suit everyone, but it's good on you. How about a white jacket to go over it?

Louise: Well, I was thinking I could just wrap a pashmina round me. I think they're warm and practical but look quite glamorous.

Joanna: Yeah. You can wear them with anything really, even over a coat.

Louise: Right.

Joanna: You've decided not to get the trouser suit then?

Louise: Well, it would be more useful, but I've got lots of others... too much like work.

Joanna: Okay - but the cream one you just tried on didn't look like something you'd wear to the office. What's Jack wearing then?

Louise: Oh, he's finally bought a really stunning new suit.

Joanna: What? After saying for years that no one was going to make him wear one?

Louise: Absolutely. And he's paid a lot for it too ... it's a designer number, great cut.

Joanna: 'That's a real turnaround!

Louise: Isn't it? He's always been image-conscious of course but that normally means searching the sales for T-shirts and jeans!

Joanna: Ha! Good for him.

Louise: Yeah.

Hello, I'm going to give you some insight into what's actually involved in my job as a basketball trainer. What I enjoy most is seeing an athlete perform at a high level, knowing that I helped them get there. There are numerous challenges of course but most of the time things go smoothly unless there's a breakdown in communication. Everything goes wrong then - from training programmes right down to players' concentration - if the coaches, management, players and medical staff aren't on the same track. I was lucky enough to study sports science at college like you, and most of what we did is still relevant but there've been massive developments in the psychology of sport in areas such as the motivation for athletes to succeed. What is constant though is the human body - I'm grateful for all the hours we spent in those classes as I use my depth of knowledge every day, much more than practical skills. A large part of my job is obviously assessing injuries and interestingly although back problems put players out of the sport for greater lengths of time, it's damage to ankles which dominates. Longer term, some players have problems with their knees and that can end their career altogether. We have to assess new trends in sports training to see if they're really going to benefit our players. A lot of companies knock on our door with the latest equipment and training programmes to improve players' strength but I find they're not worth the money and it's more effective to concentrate on injury prevention and general health. That's what has the most impact on results. The daily exercise schedule I use with the team hasn't changed much over the years. Strangely enough, it's the simplest exercises which aim to help players' balance that are the most beneficial to their game. Around those we also do lots of practice on technique of course and individual skills. After a big series of matches, I keep an eye on the players as it's easier for them to switch off and get into bad habits. They'll be exhausted and they need some time to sleep and rest. I make sure I suggest a nutrition programme to help them restore the energy they've lost.

Every sports trainer implements a team's fitness programme in a different way. But what I have learned is that in order to get the best out of the players I have to understand their personalities and which method is going to best suit each one. Once I have the right methods for each one, their fitness levels will improve much faster and they will develop the skills they need. Of all the things I've talked about - having a flexible approach, a constant awareness of what's going on in the team and specialised knowledge - we shouldn't ignore a sense of humour. Without that, none of the rest will work - it's a very challenging job and things go wrong all the time - so you won't get far without it. Thank you very much for listening ...
