MULTILEVEL · CEFR

HOW TO USE THIS BOOK

2 mock tests
Listening + Reading

This book contains **two complete Multilevel mock tests** in the real exam format. Treat each one like the real exam: keep to the time, write on the answer sheet and check your score.

🎧 Listening
6 parts · 35 questions. Scan the QR / open the channel and play the audio for each test. Each recording is played twice.

📖 Reading
5 parts · 35 questions · 60 minutes. Do the test in one sitting, without a dictionary.

📝 Answer sheets
Write your answers on the answer sheet at the back of the book — just like the real exam.

🔑 Answer key
Check your answers and count your score out of 35 for each skill.

📈 Track progress
Repeat the mocks after a few weeks and compare your scores.

🎧 Audio for all listening tests
Scan the QR code to open our Telegram channel.

t.me/multilevel_express

Skill	Part	Task	Questions
🎧	1	Choose the correct reply	1–8
🎧	2	Complete the notes	9–14
🎧	3	Match speakers to statements	15–18
🎧	4	Label a map / plan	19–23
🎧	5	Multiple choice (extracts)	24–29
🎧	6	Complete the lecture notes	30–35
📖	1	Gap fill (one word)	1–6
📖	2	Match texts to statements	7–14
📖	3	Match headings to paragraphs	15–20
📖	4	Multiple choice + True/False/NI	21–29
📖	5	Summary completion + multiple choice	30–35

MOCK TEST 1

🎧 LISTENING

6 parts · 35 questions
⏱️ approx. 35 minutes
🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C).**
Mark your answers on the answer sheet.

1

A) This is the plan.
B) That sounds lovely.
C) That's looks awful.

2

A) Yes, you can!
B) No, I don't!
C) Of course!

3

A) Well, that's unfortunate.
B) I bought a new wallet last week.
C) I don't like going to malls.

4

A) No, I don't forecast.
B) Yes, it says it might rain.
C) I usually go for a walk.

5

A) Don't do it!
B) Really?
C) What's the matter?

6

A) No, they shouldn't.
B) Get out!
C) Good idea.

7

A) Congratulations!
B) What a pity!
C) Poor thing!

8

A) It's next to the pharmacy.
B) Well, you can bring me some new clothes.
C) Yes, can you get me biscuits

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space.**
Write ONE WORD and / or A NUMBER for each answer.

ADVENTURE HOLIDAYS

The Netherlands tour:	You can see fields, villages as well as **9** _____ while riding a park along paths. In Amsterdam, you can rise a boat on the canals.
Iceland: It lasts **10**_____ The trip only runs until mid-autumn.	
Florence and Milan: You can visit popular **11**_____ . You can participate in a design workshop.	
Kenya: You can get to stay in **12**_____ . You can look after animals like elephants and rhinos	
French Baking Experience:	You can try **13**_____ a goat.
Website:	www. **14**_____ com

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (15-18) to their opinion about their best friend(A-F). There are TWO EXTRA options which you do not need to use.**
Mark your answers on the answer sheet.

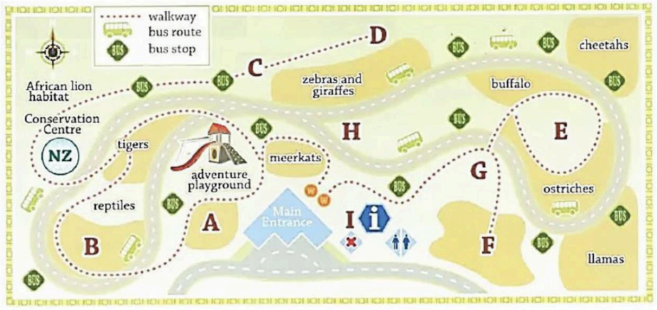

15. Speaker 1 ....
16. Speaker 2 ....
17. Speaker 3 ....
18. Speaker 4 ....

A) She liked to be the centre of attention.
B) She had unpredictable changes of mood.
C) She often used to get into trouble with the teachers.
D) She used to do well without really trying.
E) She didn't take much interest in her schoolwork.
F) She was always ready to help other people

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use.
Mark your answers on the answer sheet.

19. New Zealand Birds ...
20. African Village ...
21. Picnic Area ...
22. Afternoon walkabout meeting place ...
23. Jomo's café ...

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract.
Mark your answers on the answer sheet.

Extract One

You hear a university tutor talking to a student called Neil.

24 What does the tutor want to achieve by speaking to Neil?

A) To reassure Neil about something.
B) To make Neil aware of his many spelling mistakes.
C) To ask Neil to be more enthusiastic about his project.

25 Neil acknowledges that

A) he should double-check his work before he hands it in.
B) he may not use the most reliable sources when researching the topic.
C) he spends too much time on less relevant details.

Extract Two

You hear a student talking to a university accommodation officer.

26 According to the woman, what's the primary reason for offering campus accommodation to all first-year students?

A) It is easier for them to meet other students socially.
B) It removes any concerns about independent living.
C) It means they are close to all university facilities.

27 The student decides on campus accommodation because ...

A) the rooms are usually quiet.
B) there is a sense of community with other students.
C) he doesn't want the distractions of everyday life.

Extract Three

You hear two psychology students talking about their repetition of a well-known research study.

28 What are the students doing?

A) querying some of the data
B) expressing surprise at their research results
C) criticizing the experiment which they reproduced

29 The main conclusion the students come to is that ...

A) the majority of people do what a group expects.
B) results will vary greatly with different participants.
C) conformity is a relatively new feature of modern life

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space.
Write no more than one word for each answer.

THE GREAT CHEESE FESTIVAL, WISCONSIN, USA

Bradley says the festival takes place during what's known locally as 'Dairy Month'.

The festival started because a cheese **(30)** _____.. opened in another region of the USA.

Every year the three-day festival starts with a special **(31)** _____

Bradley's favourite part of the festival is the display of cheese sculptures.

This year there will be a cheese **(32)** _____ competition for all visitors.

Bradley particularly recommends the **(33)** _____ show for younger children.

It is essential to get advance tickets for the festival.

It's possible to do **(34)** _____ tours in the mornings only.

The people from the community who organise the festival are all volunteers.

Money raised at this year's festival will finance a **(35)** _____ park in the town

MOCK TEST 1

📖 READING

5 parts · 35 questions
⏱️ 60 minutes

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

There is good news for people who want to work in New Zealand. The country has relaxed its visa rules. It wants to attract "digital nomads" to live and work in the **1**_____ for up to nine months. A digital nomad is someone who can travel and live anywhere because they work online. New Zealand has a new visa that allows visitors to work remotely for a foreign employer for three months. This can be extended for up to nine **2**_____. However, someone staying for nine months may have to pay tax. Economic growth minister Nicola Willis hopes the new **3**_____ will help New Zealand's economy. She said: "We want more wealthy and super-talented people coming [through] the arrival gates."

New Zealand's **4**_____ has suffered in recent years. The Covid pandemic hurt the country's tourism industry. It has not yet recovered to pre-Covid levels. Another thing that is affecting the economy is the number of young people leaving New Zealand. Record numbers of **5**_____ in their twenties are going overseas to work. Immigration Minister Erica Stanford hoped the visitors with the new visa will spend more money. This will boost the economy. She said: "I expect in their time here, **6**_____ will spend longer than they normally would. They will spend more because they're here for longer. And the thing that we're really hoping for, is that they fall in love with the place."

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A) You can go there to enjoy some comic books.

B) You and your girlfriend want a groovy time.

C) Children can enter there without paying.

D) Performances last 14 days.

E) A fresh and romantic performance by theatre actors.

F) You check out a special someone's clothing and rooms.

G) This classic performance is for those who are looking forward to amusement.

H) You can get a drink before the show.

I) A Reward will be given there to contesters.

J) This theatre closes down next week

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below.
There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

List of Headings:

A) Like me and you
B) Nobody will see you in it
C) Some facts about robots
D) At your service
E) Your own indicator
F) A robot for a pet
G) For coach potatoes
H) They are among us

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

ROBOTS

I. The word 'robot' is a Czech word for a servant or slave. It was invented by a Czech writer Karel Capek in 1920. The word 'robotics' was first used by Isaac Asimov in 1937 in a story called Robby. The smallest robot in the world is nano-bot. They are small enough to travel inside your blood vessels. One of the hardest things to make a robot do... is walk.

II. Aibo the dog, designed by Sony, can walk, talk and wag its tail. It can express emotions of happiness, sadness, surprise, fear and dislike. You can talk to it and it will respond. Aibo can read your e-mail and take pictures. You can programme Aibo to respond to a specific name. You can also change its software so that it becomes a puppy. You don't have to clean after it and its feeding is very cheap — just recharge its batteries.

III. If you are sick and tired of helping your parents around the house, then a new robot can be the answer. It has been designed to make the people's lives easier. This yellow robot with bright eyes can do different jobs for you and help you remember things you have to do. It's so clever that when his batteries run out, the robot knows that it needs to recharge them and does it itself.

IV. Asimo is a humanoid robot. It has two legs, two arms and red lights for eyes. It can walk, talk, climb stairs and even dance. It can also recognize people's faces, gestures and voices. It took Honda's engineers 16 years to create Asimo. Today's model is 120 cm tall and weighs 43 kg. The robot is not for sale because its creators want it to become even more intelligent.

V. If you want to have a robot that can understand how you feel, then the creation of two US scientists will be of interest. They'd like their model to be sensitive to our moods and emotions. Their robot won't have emotions of its own but it should be able to respond to its owner's mood. So, if you feel sad, the robot will ask if it can help you. It's not an easy job because everyone shows emotions in quite different ways.

VI. A Japanese professor has invented an invisibility coat. A camera on the back of the person's head films the scene behind them and projects it onto the coat. The technology has practical applications: in the future doctors could see 'through' their hands or other obstacles when they are doing operations.

PART 4

Questions 21–29

Read the following text for question 21-29.

Scientists aiming to bring back woolly mammoth create woolly mice

Scientists at the US biotechnology company Colossal Biosciences plan to "de-extinct" the prehistoric pachyderms by genetically modifying Asian elephants to give them woolly mammoth traits. They hope the first calf will be born by the end of 2028. Ben Lamm, co-founder and chief executive of Colossal, said the team had been studying ancient mammoth genomes and comparing them with those of Asian elephants to understand how they differ and had already begun genome-editing cells of the latter.

Now the team say they have fresh support for their approach after creating healthy, genetically modified mice that have traits geared towards cold tolerance, including woolly hair. "It does not accelerate anything but it's a massive validating point," Lamm said. In the research, which has not yet been peer-reviewed, the team used a number of genome editing techniques to either genetically modify fertilised mouse eggs or modify embryonic mouse stem cells and inject them into mouse embryos, before implanting them into surrogates. The team focused on disrupting nine genes associated with hair colour, texture, length or pattern or hair follicles. Most of these genes were selected because they were already known to influence the coats of mice, with the induced disruptions expected to produce physical traits similar to those seen in mammoths, such as golden hair.

However, two of the genes targeted in the mice were also found in mammoths, where they are thought to have contributed to a woolly coat, with the changes introduced by the researchers designed to make the mouse genes more mammoth-like. The team also disrupted a gene associated with the way fats are metabolised in mice and was also found in mammoths, which they suggest could play a role in cold adaptation. The researchers edited different combinations of these genes, with one technique allowing them to make as many as eight edits in seven different genes at the same time.

While many of the experiments did not result in mouse pups, mice that were born had various combinations of distinctive hair types including woolly coats, long hair and golden-brown coats. However, they had a similar average body mass whether or not the gene relating to fat metabolism was modified. "The efficiency of the edits varied, but many individuals [were] 100% for all attempted edits," said Beth Shapiro, Colossal's chief science officer. Lamm said the team hoped to be able to carry out behavioural tests for cold tolerance in the coming months.

Robin Lovell-Badge, head of stem cell biology and developmental genetics at the Francis Crick Institute in London, who was not involved in the work, praised the technical aspects of the study.

But he said it did not unpick the mechanisms by which the genes produce different hair types, and that de-extincting mammoths would be far more complex than simply altering a few genes for cold tolerance – not least as it was unclear if genetic modifications would be needed to ensure the animals not just look like mammoths but behave like them too. "My overall concern is whether this is a sensible use of resources rather than spending the money on trying to prevent species becoming extinct," Lovell-Badge said, adding another problem is that, at present, there are no results on whether the modified mice are indeed cold-tolerant. "As it is, we have some cute-looking hairy mice, with no understanding of their physiology, behaviour, etc," he said. "It doesn't get them [the researchers] any closer to know if they would eventually be able to give an elephant useful mammoth like traits and we have learned little biology."

Others stressed the work did not involve introducing mammoth genes into mice, but mainly involved making changes to mouse genes to produce known effects on their coats. Dr Tori Herridge of the University of Sheffield, said: "Engineering a mammoth-like elephant presents a far greater challenge: the actual number of genes likely to be involved is far higher, the genes are less well understood – and still need to be identified – and the surrogate will be an animal that is not normally experimented upon." And while some said the goal of reviving the mammoth had drawn closer, others were more sceptical. "Mammoth de-extinction doesn't seem to be on the horizon anytime soon," said Herridge.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 The first calf of the woolly mammoth...

A) will lead to making new Asian elephants.
B) will be born by the end of this decade.
C) will help us to understand how different Asian elephants are.
D) will be the first genetically modified animal in history.

22 According to the passage, genome editing techniques ...

A) weren't that efficient.
B) were used to make a modified mouse.
C) weren't effective on embryos.
D) resulted in different kinds of mouse.

23 What is the suspected role of the disrupted fat-metabolism gene?

A) It helps the mice to become woolly.
B) It controls the mice's temperature
C) It may help with cold environment.
D) It may be combined with other genes.

24 Despite mice which were researched resulted in different hairs ...

A) they couldn't survive in cold conditions.
B) they all become too fat.
C) their weigh doesn't seem to be changed.
D) their metabolism was modified.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 Lamm claims that despite the breakthrough, the progress doesn't seem be accelerated.

A) True
B) False
C) No Information

26 The new genetically modified mice were indeed cold-tolerant.

A) True
B) False
C) No Information

27 Colossal Biosciences team are planning to revive other species after woolly mammoth.

A) True
B) False
C) No Information

28 **Dr. Tori Herridge claims that mammoth extinction seems to become real very soon.**

A) True
B) False
C) No Information

29 **De-extinct, genetically modified mammoths won't act like their original counterparts at all.**

A) True
B) False
C) No Information

PART 5

Questions 30–35

Read the following text for questions 30-35.

When the Tulip Bubble Burs

Long before anyone ever heard of Qualcomm, CMGI, Cisco Systems, or the other high-tech stocks that have soared during the current bull market, there was Semper Augustus. Both more prosaic and more subline than any stock or bond, it was a tulip of extraordinary beauty, its midnight-blue petals topped by a band of pure white and accented with crimson flares. To denizens of 17th century Holland, little was as desirable.

Around 1624, the Amsterdam man who owned the only dozen specimens was offered 3,000 guilders for one bulb. While there's no accurate way to render that in today's greenbacks, the sum was roughly equal to the annual income of a wealthy merchant. (A few years later, Rembrandt received about half that amount for painting The Night Watch.) Yet the bulb's owner, whose name is now lost to history, nixed the offer.

Who was crazier, the tulip lover who refused to sell for a small fortune or the one who was willing to splurge. That's a question that springs to mind after reading Tulipmania: The Story of the World's Most Coveted Flower and the Extraordinary Passions It Aroused by British journalist Mike Dash. In recent years, as investors have intentionally forgotten everything they learned in Investing 101 in order to load up on unproven, unprofitable dot-com issues, tulip mania has been invoked frequently. In this concise, artfully written account, Dash tells the real history behind the buzzword and in doing so, offers a cautionary late for our times.

The Dutch were not the first to go gaga over the tulip. Long before the first tulip bloomed in Europe – in Bavaria, it turns out, in 1559 – the flower had enchanted the Persians and bewitched the rulers of the Ottoman Empire. It was in Holland, however, that the passion for tulips found its most fertile ground, for reasons that had little to do with horticulture. Holland in the early 17th century was embarking on its Golden Age. Resources that had just a few years earlier gone toward fighting for independence from Spain now flowed into commerce. Amsterdam merchants were at the center of the lucrative East Indies trade, where a single voyage could yield profits of 400%. They displayed their success by erecting grand estates surrounded by flower gardens. The Dutch population seemed torn by two contradictory impulses: a horror of living beyond one's means and the love of a long shot.

Enter the tulip. "It is impossible to comprehend the tulip mania without understanding just how different tulips were from every other flower known to horticulturists in the 17th century," says Dash. "The colors they exhibited were more intense and more concentrated than those of ordinary plants." Despite the outlandish prices commanded by rare bulbs, ordinary tulips were sold by the pound. Around 1630, however, a new type of tulip fancier appeared, lured by tales of fat profits. These "florists," or professional tulip traders, sought out flower lovers and speculators alike. But if the supply of tulip buyers grew quickly, the supply of bulbs did not. The tulip was a conspirator in the supply squeeze: It takes seven years to grow one from seed. And while bulbs can produce two or three clones, or "offsets," annually, the mother bulb only lasts a few years.

Bulb prices rose steadily throughout the 1630s, as ever more speculators wedged into the market. Weavers and farmers mortgaged whatever they could to raise cash to begin trading. In 1633, a farmhouse in Hoorn changed hands for three rare bulbs. By 1636 any tulip-even bulbs recently considered garbage – could be sold off, often for hundreds of guilders. A futures market for bulbs existed, and tulip traders could be found conducting their business in hundreds of Dutch taverns. Tulipmania reached its peak during the winter of 1636-37 when some bulbs were changing hands ten times in a day. The zenith came early that winter, at an auction to benefit seven orphans whose only asset was 70 fine tulips left by their father. One, a rare Violetten Admirael van Enkhuizen bulb that was about to split in two, sold for 5,200 guilders, the all-time record. All told, the flowers brought in nearly 53,000 guilders.

Soon after, the tulip market crashed utterly, spectacularly. It began in Haarlem, at a routine bulb auction when, for the first time, the greater fool refused to show up and pay. Within days, the panic had spread across the country. Despite the efforts of traders to prop up demand, the market for tulips evaporated. Flowers that had commanded 5,000 guilders a few weeks before now fetched one-hundredth that amount. Tulipmania is not without flaws. Dash dwells too long on the tulip's migration from Asia to Holland. But he does a service with this illuminating, accessible account of incredible financial folly.

Tulipmania differed in one crucial aspect from the dot-com craze that grips our attention today: even at its height, the Amsterdam Stock Exchange, well-established in 1630, wouldn't touch tulips. "The speculation in tulip bulbs always existed at the margins of Dutch economic life," Dash writes. After the market crashed, a compromise was brokered that let most traders settle their debts for a fraction of their liability. The overall fallout on the Dutch economy was negligible. Will we say the same when Wall Street's current obsession finally runs its course?

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

Dutch concentrated on gaining independence by **30** _____ against Spain in the early 17th century; consequently, spare resources entered the area of **31** _____

Prosperous traders demonstrated their status by building great **32**_____. and with gardens in surroundings.

Attracted by the success of profit on tulip, traders kept looking for **33**_____.. lovers and speculator for sale.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 **Which of these following statements agree with the information given in the passage?**

A) In 1624, all the tulip collection belonged to a man in Amsterdam.
B) most primary school children need to lose weight.
C) Holland was the most wealthy country in the world in the 17th century.
D) From 1630, Amsterdam Stock Exchange started to regulate Tulips exchange market.

35 **According to the author, Tulipmania ...**

A) reached its peak in the 16th century.
B) were the first thing that appeared in the Amsterdam Stock Exchange.
C) were the most desired in the winter of 1636-37.
D) made many people homeless and jobless fools.

MOCK TEST 2

🎧 LISTENING

6 parts · 35 questions

⏱️ approx. 35 minutes

🎧 Audio: t.me/multilevel_express

Har bir audio ikki marta eshittiriladi. Javoblarni javoblar varaqasiga yozing.

PART 1

Questions 1–8

🎧 **You will hear some sentences. You will hear each sentence twice. Choose the correct reply to each sentence (A, B, or C). Mark your answers on the answer sheet.**

1

A) It's a pleasure to meet you too.
B) I don't think she has met him.
C) It wasn't.

2

A) That's okay.
B) I hope not.
C) Don't mention it.

3

A) I'll see you later.
B) To the library.
C) We can catch up later.

4

A) Was it interesting?
B) Haven't you?
C) Could you do it for me?

5

A) How's he?
B) How do you know?
C) What's the matter with you?

6

A) No, I wasn't at the party.
B) He looks nice.
C) Yes, I remember Steve.

7

A) Sure!
B) Calm down!
C) That's good!

8

A) Sure, I can!
B) Sure, you do!
C) Sure, we will!

PART 2

Questions 9–14

🎧 **You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write ONE WORD and / or A NUMBER for each answer.**

JOINING THE LEISURE CLUB

Personal Assessment

- New members should describe any health problems.
- The **9** _____ rules will be explained to you before you use the equipment.
- You will be given a six-week **10** _____.. .

Types of membership

- There is a compulsory £90 **11** _____ fee for members.
- Gold members are given free entry to all the LP clubs.
- Premier members are given priority during **12** _____. hours.
- Premier members can bring some **13** _____. every month.
- Members should always take their photo **14** _____ with them.

PART 3

Questions 15–18

🎧 **You will hear people speaking in different situations. Match each speaker (15-18) to the description which they give about their accomodation. (A-F). There are TWO EXTRA options which you do not need to use. Mark your answers on the answer sheet.**

15. Speaker 1 ....
16. Speaker 2 ....
17. Speaker 3 ....
18. Speaker 4 ....

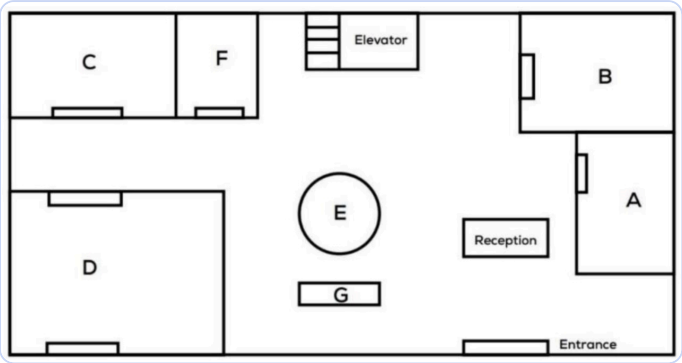

A) I made a mistake there at first.
B) I was able to settle into a new area.
C) I had no choice in the matter.
D) I have recommended it to others.
E) There are more benefits than disadvantages.
F) I would prefer to have more freedom.

PART 4

Questions 19–23

You will hear someone giving a talk. Label the places (19-23) on the map (A-H). There are THREE extra options which you do not need to use. Mark your answers on the answer sheet.

GROUND FLOOR OF KINNEY HOTEL

19. Art Gallery .....

20. Fountain .....

21. Restaurant .....

22. Bakery .....

23. Bar .....

PART 5

Questions 24–29

You will hear three extracts. Choose the correct answer (A, B or C) for each question (24-29). There are TWO questions for each extract. Mark your answers on the answer sheet.

Extract One

You hear two students, Nick and Gemma, talking about a student house.

24 What is Gemma's main hesitation about moving into the house?

A) She won't have a good social life.
B) She won't get on with her housemates.
C) She might be distracted from her studies.

25 How does Nick address Gemma's main concern?

A) He informs her of an agreement within the house.
B) He promises to set up a study group in the house.
C) He reassures her that guests are always welcome.

Extract Two

You hear a mature student talking to a student finance advisor about a student loan.

26 The student has reservations about her ability to ...

A) secure a part-time job.
B) find a suitable bank account.
C) cover her living costs.

27 The student was previously aware that she would ...

A) need a letter of proof from her university.
B) only have to start repaying her loan once she graduated.
C) be required to pay interest from the date she received the loan.

Extract Three

You hear a student talking to a member of the university Drama Club.

28 Why is Darren hesitating to join the Drama Club?

A) He's worried he might get nervous on stage.
B) He doesn't want to over-commit himself.
C) He dislikes certain types of performances.

29 How does Nina persuade Darren to join the club?

A) She points out a less obvious benefit.
B) She claims it will boost his confidence.
C) She says it's stressful but also challenging.

PART 6

Questions 30–35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than one word for each answer.

CAVERS

Cavers explore underground places such as mines and tunnels as well as caves.

When cavers camp underground, they choose places which have **(30)** _____ and fresh air available.

In the UK, the place Mike likes best for caving is Wales.

As a physical activity, Mike compares caving to **(31)** _____..

Cavers can pay as much as £20 for a suitable hard **(32)** _____

Cavers can pay as much as £50 for the right kind of lamp, which is worn on the head.

Mike recommends buying expensive **(33)** _____ to avoid having accidents.

Caving is a sport for people of all ages and backgrounds.

Some caves in Britain are called 'places of special **(34)** _____'

The need for safety explains why people don't organise caving **(35)** _____

PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

Uzbekistan has introduced a new system to better support poor families. Starting from May 15, 2023, families on the Register of Poor Families and those at risk of being added will be divided into three categories: red, yellow, and green.

The new **Q1**_____ are based on how much money families who earn each month and their individual needs. Families in the red group are those who **Q2**_____ less than the minimum amount needed to live and also having a disabled member, a single elderly person in need, or losing the main breadwinner. Families in the yellow group also earn less than the **Q3**_____ amount, but all their members are able to work. **Q4**_____ in the green group earn a little more—between one and one-and-a-half times the minimum amount. From June 1, 2025, these families will receive benefits based on their category. Families in the yellow group will get a fifty percent discount on government service fees, while those in the red group will get a seventy-five **Q5**_____. If a family moves from red or **Q6**_____ to green, they will still receive support for another 12 months. The goal of this system is to give the right help to the right families, so that support is fair and focused. It also includes programs to help families in the red category earn more money and become more stable. This new approach is expected to improve the lives of many poor families in Uzbekistan.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A) This modern language course is organized by a renowned institute.

B) You want to learn a language on your own time.

C) This language course also teaches how to prepare a dish.

D) You can not only visit the city but its countryside.

E) This language course also teaches the culture, dress, and lifestyle.

F) You can communicate with people who speak this language in a club.

G) This study can last for two years.

H) You can visit the sets where popular blockbusters were made.

I) You can learn a language and filming within this course.

J) You can learn a language and have a good time.

7. ENGLISH PLUS FILM STUDIES – LOS ANGELES

• Improve your English while studying filmmaking techniques
• Includes workshops on scriptwriting, acting, and editing
• Field trips to Hollywood studios and local film festivals
• 4- to 12-week course options
Phone: +1 213 555 7788
Email: admissions@laenglishfilm.org
Website: www.laenglishfilm.org

8. CHINESE LANGUAGE SCHOOL – BEIJING

• Immersive Mandarin courses with flexible start dates
• Learn Chinese characters, pronunciation, and speaking skills
• Weekend excursions to the Great Wall and Forbidden City
• Dormitories and homestay options available
Phone: +86 10 6552 3344
Email: learn@beijingmandarin.cn
Website: www.beijingmandarin.cn

9. RUSSIAN LANGUAGE PROGRAM IN ST. PETERSBURG

• Year-round Russian language training for all levels
• Special modules: Russian literature, politics, and media
• Student visa support and accommodation assistance
• Organized trips to Moscow and nearby historical towns
Phone: +7 812 987 6543
Email: info@russianstudies.spb.ru

10. PORTUGUESE & CULTURE IN LISBON

• Learn Portuguese while exploring Lisbon's history and cuisine
• Courses available from 2 to 8 weeks
• Afternoon options: surfing, fado nights, museum visits
• Small classes with experienced native teachers
Phone: +351 213 456 789
Email: contact@lisbonlanguage.pt
Website: www.lisbonlanguage.pt

11. ARABIC FOR BEGINNERS – CAIRO LANGUAGE CENTER

• Learn Modern Standard Arabic and Egyptian dialect
• Guided visits to historical sites like the Pyramids and Islamic Cairo
• Evening conversation clubs with locals
• Affordable tuition and accommodation options
Phone: +20 2 2795 6432
Email: info@cairoarabiccenter.com

12. JAPANESE LANGUAGE & CULTURE PROGRAM IN KYOTO

• Japanese language courses from beginner to advanced
• Optional cultural workshops: tea ceremony, calligraphy, kimono experience
• Summer, winter, and year-long courses
• On-campus dormitories and cultural exchange events
Inquiries: kyoto@nihongo-ac.jp
Website: www.nihongo-ac.jp

13. GERMAN FOR PROFESSIONALS IN BERLIN

Offered by the Goethe Language Institute
• Focus on business German, communication skills, and intercultural training
• Small group and individual lessons available
• Weekend workshops and networking events
• Centrally located with modern facilities

14. SPANISH IMMERSION IN VALENCIA

• Intensive Spanish classes for all levels
• Cultural activities: cooking classes, flamenco dancing, guided city tours
• Courses available year-round (1–12 weeks)
• Accommodation with host families or in student apartments
• Price includes materials and certificates
Phone: +34 961 23 45 67
Email: info@valenciaspanishschool.es
Website: www.valenciaspanishschool.es

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below.
There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

List of Headings:
A) The trend catches on
B) To keep shoes clean
C) Long history
D) An ambitious plan
E) For stage plays
F) An unexpected way out
G) Are they toys?
H) A European royal trend

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

THE PILLOW

I. The pillow was invented so that bugs would not crawl into the noses, ears, and mouths of people while they were sleeping. The pillow was first used in what is present-day Iraq over 9,000 years ago. Back then, it was carved from stone. Ancient Egyptians also used pillows because they wanted to protect their heads. Ancient Chinese used hard pillows (although they knew how to make softer ones) because of the belief that soft pillows depleted the body's energy.

II. The idea of a high heel or platform shoe is actually a seriously ancient one. One of the first traced high-level pieces of footwear in history belonged to actors in Ancient Greece. However, these weren't necessarily worn off stage; they were actually meant as a kind of shorthand about the social class of various characters in Greek drama and comedy. The higher the heel, the more "elevated" the character. There's also evidence that ancient Egyptians used heels, though not for everyday use.

III. Many noblemen of the medieval Persian empire wore heels as riding shoes, often in decadent materials and bright colours, to enable them to get a better grip on their stirrups. The European royals really perked up and took notice when a Persian monarch, Shah Abbas, came to tour European courts and make noble friends in the 1500s. The diplomatic gesture turned into a fashionable one, too: people saw the beautiful heeled shoes worn by the Shah and his entourage, and decided to make them their own.

IV. It feels like a common sense thing to say, but along with the collapse of society, the loss of power, and the lawlessness that will inevitably accompany the end of the world, your chances of using email, telephone, or Facebook to communicate will be practically zilch. Luckily, China has the answer—the carrier pigeon. According to reports, the People's Liberation Army recently trained a "pigeon army" to carry messages between military and political facilities should there be a major collapse in the country's communication network.

V. The idea of the heel actually being a "female" notion took a very long time to develop. One of the places where it took hold, however, was in Venice in the 1400s. But these weren't heels that you'd like to wear clubbing these days. Chopines, as they're called, were staggeringly high, slightly-tilted shoes with as many as 24 inches of narrowed platform underneath. They were originally designed to keep the mud off the more delicate "real" shoes of ladies walking in the street.

VI. Ethiopia is an important trading hub, which makes effective border control difficult to maintain. As a result of limited resources for border enforcement staff, serious organised crime – such as wildlife trafficking – often goes undetected. Wildlife crime is the world's fourth most prevalent form of criminal activity. Animals often die in transit when exported over borders. Cheetahs and other big cats are regularly exported to the Middle East as 'exotic pets'. To a rich elite these animals are just another status symbol, like a sports car or an expensive watch

PART 4

Questions 21–29

Read the following text for question 21-29.

THE KOKAND KHANATE

The Kokand Khanate was one of the most influential states in Central Asia during the 18th and 19th centuries. Situated in the fertile Fergana Valley, the khanate became a center of trade, politics, and culture until it was absorbed into the Russian Empire in the late 19th century. Its history reflects the struggles, ambitions, and transformations of the region during a time of shifting powers.

The Kokand Khanate emerged in the early 1700s after the weakening of the Shaybanid and Ashtarkhanid dynasties in Bukhara. The founder, Shahrukh Biy, was a tribal leader from the Ming clan of the Uzbek people. He established control over parts of the Fergana Valley and chose Kokand as the capital. This location was strategic: the valley was fertile for agriculture and located along important trade routes linking Central Asia with China, India, and Persia.

Over time, Kokand's rulers expanded their influence beyond the valley, bringing under their control regions that today belong to Uzbekistan, Kyrgyzstan, Tajikistan, and southern Kazakhstan. The khanate's expansion often brought it into conflict with its neighbors, especially the Khanate of Khiva and the Emirate of Bukhara.

The ruler of the khanate, known as the khan, held absolute authority, though his power was supported by a network of tribal leaders, military commanders, and religious scholars. Islam played a central role in governance, with Islamic law (sharia) forming the basis of the legal system. Judges, called qadis, were responsible for applying these laws in local disputes.

Society in Kokand was diverse. Uzbeks formed the majority, but the population also included Tajiks, Kyrgyz, and other ethnic groups. Many people lived in rural areas, farming crops such as wheat, barley, rice, and cotton. Urban centers, especially Kokand city, were bustling with markets, craft workshops, and caravanserais (inns for travelers).

The Kokand Khanate benefited greatly from its position on the Silk Road trade network. Merchants traded silk, cotton textiles, dried fruits, and handicrafts in exchange for goods like tea, porcelain, and spices from the east, as well as firearms and manufactured goods from the west. The khanate also levied taxes on caravans passing through its territory, providing a significant source of income.

Agriculture formed the backbone of the economy. The Fergana Valley's rich soil and extensive irrigation canals allowed for high crop yields. Cotton, in particular, became a valuable commodity, both for domestic use and for export.

The Kokand Khanate was known for its vibrant cultural life. Poetry, calligraphy, and music flourished under the patronage of the khans. The rulers also commissioned grand architectural projects, many of which still stand today. The Palace of Khudayar Khan in Kokand is a prime example, with its ornate tilework and grand halls reflecting the artistic style of the time.

Mosques and madrasas (Islamic schools) were built across the khanate, emphasizing the importance of education and religion. Many of these institutions attracted scholars and students from surrounding regions.

By the mid-19th century, the Kokand Khanate faced growing internal and external pressures. Rivalry between tribal factions weakened the central authority, while economic challenges strained the state's resources. At the same time, the expanding Russian Empire began moving into Central Asia, aiming to control its trade routes and resources.

In 1876, after a series of military campaigns, Russian forces annexed the Kokand Khanate. It became part of the Russian-controlled Fergana Oblast, marking the end of Kokand's independence. While this brought new administrative systems and economic links to the Russian Empire, it also ended centuries of local rule.

Today, the history of the Kokand Khanate remains an important chapter in the heritage of Uzbekistan and Central Asia. Its contributions to trade, architecture, and culture continue to be celebrated, and its surviving monuments stand as reminders of a time when Kokand was a powerful and prosperous state in the heart of the Silk Road.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 Why was Kokand chosen as the capital of the khanate?

A) It was the largest trade city in Central Asia.
B) It had an important strategic fort.
C) It was fertile and located on important trade routes.
D) It linked Central Asia with Russia.

22 The khan...

A) had to share his rule with the qadis.
B) was the most powerful figure.
C) had to be a military commander.
D) was weak and had to depend on his network.

23 What was one cultural achievement of the Kokand Khanate mentioned in the text?

A) The invention of a new style of metalwork, handicrafts and firearms.
B) The establishment of the cotton industry and other industries
C) The translation of Kyrgyz and Tajik texts into Uzbek.
D) The construction of notable palaces, mosques, and madrasas.

24 By the mid-19th century, the Kokand Khanate weakened because

A) the central authority was eroded.
B) tribal factions began to fight each other.
C) the economy fully collapsed.
D) Russia stopped trading with them.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 The Kokand Khanate controlled parts of present-day Afghanistan.

A) True
B) False
C) No Information

26 The population of the Kokand Khanate consisted of many different nations.

A) True
B) False
C) No Information

27 Russian annexation of Kokand were complete after a military conquest.

A) True
B) False
C) No Information

28 **The judges in the khanate mainly served as spiritual scholars.**

A) True
B) False
C) No Information

29 **The Khanate benefited greatly from the revenue from trade taxes.**

A) True
B) False
C) No Information

PART 5

Questions 30–35

Read the following text for questions 30-35.

MUSIC AND THE EMOTIONS

Why does music make us feel? One the one hand, music is a purely abstract art form, devoid of language or explicit ideas. And yet, even though music says little, it still manages to touch us deeply. When listening to our favourite songs, our body betrays all the symptoms of emotional arousal. The pupils in our eyes dilate, our pulse and blood pressure rise, the electrical conductance of our skin is lowered, and the cerebellum, a brain region associated with bodily movement, becomes strangely active. Blood is even re-directed to the muscles in our legs. In other words, sound stirs us at our biological roots.

A recent paper in Nature Neuroscience by a research team in Montreal, Canada, marks an important step in revealing the precise underpinnings of the potent pleasurable stimulus' that is music. Although the study involves plenty of fancy technology, including functional magnetic resonance imaging (fMRI) and ligand-based positron emission tomography (PET) scanning, the experiment itself was rather straightforward. After screening 217 individuals who responded to advertisements requesting people who experience 'chills' to instrumental music, the scientists narrowed down the subject pool to ten. They then asked the subjects to bring in their playlist of favourite songs – virtually every genre was represented, from techno to tango – and played them the music while their brain activity was monitored. Because the scientists were combining methodologies (PET and fMRI), they were able to obtain an impressively exact and detailed portrait of music in the brain. The first thing they discovered is that music triggers the production of dopamine – a chemical with a key role in setting people's moods – by the neurons (nerve cells) in both the dorsal and ventral regions of the brain. As these two regions have long been linked with the experience of pleasure, this finding isn't particularly surprising.

What is rather more significant is the finding that the dopamine neurons in the caudate – a region of the brain involved in learning stimulus-response associations, and in anticipating food and other 'reward' stimuli – were at their most active around 15 seconds before the participants' favourite moments in the music. The researchers call this the 'anticipatory phase' and argue that the purpose of this activity is to help us predict the arrival of our favourite part. The question, of course, is what all these dopamine neurons are up to. Why are they so active in the period preceding the acoustic climax? After all, we typically associate surges of dopamine with pleasure, with the processing of actual rewards. And yet, this cluster of cells is most active when the 'chills' have yet to arrive, when the melodic pattern is still unresolved.

One way to answer the question is to look at the music and not the neurons. While music can often seem (at least to the outsider) like a labyrinth of intricate patterns, it turns out that the most important part of every song or symphony is when the patterns break down, when the sound becomes unpredictable. If the music is too obvious, it is annoyingly boring, like an alarm clock. Numerous studies, after all, have demonstrated that dopamine neurons quickly adapt to predictable rewards. If we know what's going to happen next, then we don't get excited. This is why composers often introduce a key note in the beginning of a song, spend most of the rest of the piece in the studious avoidance of the pattern, and then finally repeat it only at the end. The longer we are denied the pattern we expect, the greater the emotional release when the pattern returns, safe and sound. To demonstrate this psychological principle, the musicologist Leonard Meyer, in his classic book *Emotion and Meaning in Music* (1956), analysed the 5th movement of Beethoven's String Quartet in C-sharp minor, Op. 131. Meyer wanted to show how music is defined by its flirtation with – but not submission to – our expectations of order. Meyer dissected 50 measures (bars) of the masterpiece, showing how Beethoven begins with the clear statement of a rhythmic and harmonic pattern and then, in an ingenious tonal dance, carefully holds off repeating it. What Beethoven does instead is suggest variations of the pattern. He wants to preserve an element of uncertainty in his music, making our brains beg for the one chord he refuses to give us. Beethoven saves that chord for the end.

According to Meyer, it is the suspenseful tension of music, arising out of our unfulfilled expectations, that is the source of the music's feeling. While earlier theories of music focused on the way a sound can refer to the real world of images and experiences – its 'connotative' meaning – Meyer argued that the emotions we find in music come from the unfolding events of the music itself. This 'embodied meaning' arises from the patterns the symphony invokes and then ignores. It is this uncertainty that triggers the surge of dopamine in the caudate, as we struggle to figure out what will happen next. We can predict some of the notes, but we can't predict them all, and that is what keeps us listening, waiting expectantly for our reward, for the pattern to be completed.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

The Montreal Study

Participants, who were recruited for the study through advertisements, had their brain activity monitored while listening to their favourite music. It was noted that the music stimulated the brain's neurons to release a substance called **30**_____. in two of the parts of the brain which are associated with feeling **31** _____..

Researchers also observed that the neurons in the area of the brain called the **32**_____. were particularly active just before the participants' favourite moments in the music – the period known as the anticipatory **33** _____.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 **Why does the writer refer to Meyer's work on music and emotion?**

A) to propose an original theory about the subject
B) to offer support for the findings of the Montreal study
C) to recommend the need for further research into the subject
D) to present a view which opposes that of the Montreal researchers

35 **According to Leonard Meyer, what causes the listener's emotional response to music?**

A) the way that the music evokes poignant memories in the listener
B) the association of certain musical chords with certain feelings
C) the listener's sympathy with the composer's intentions
D) the internal structure of the musical composition
