AUDIO SCRIPTS

TEST 1 PART 1

1. I am not sure if I can read this.

2. Can you tell me how to go to the test center?

3. I really like this one, but I'd love to see a few more before deciding.

4. How long have you known Jonathan?

5. I have many things to do but I am so stressed.

6. It is getting hot; I need something to cool me off.

7. This winter is going to be very dry and cold.

8. My manager is quite firm and expects everyone to be serious.

TEST 1 PART 2

Hello everyone, this is Mrs. Turner. I hope you're all excited about our school trip tomorrow! I'd like to go over the plan carefully, so please listen and make a few notes if you need to.

We'll be meeting at the school gate at 8:45 in the morning, and the coach will leave promptly at nine. Please don't be late, because we won't be able to wait for anyone. The journey should take about an hour, and we'll arrive just after ten.

When we arrive, our first activity will be a walk around the lake. It's a really peaceful area with paths through the trees, and you might see some ducks, fish, and even swans. I'd like you to stay close to your group and listen to your team leader during the walk.

After that, you'll have some free time in the park. There's a large open space where you can sit, play games, or just relax. Please remember to take your rubbish with you and be respectful of other visitors.

At one o'clock, we'll meet again near the picnic tables by the big oak tree. We'll have a picnic lunch together, so don't forget to pack your sandwiches, snacks, and a drink. If you ordered a school lunch, I'll hand those out at that time.

Once lunch is finished, we'll head to the local museum. It's about a ten-minute walk from the park, and it has some really interesting exhibitions about the history of the area, including old farming tools and photographs from the 19th century.

Finally, before we get back on the coach at around 3:30, please make sure you have all your belongings.

Oh, and one more thing—don’t forget to bring a raincoat. The weather forecast says there might be light rain in the afternoon, and we’ll be outdoors for most of the day.
That’s all for now. I’m sure it’s going to be a fun and educational trip. See you all tomorrow morning!

TEST 1 PART 3

Speaker 1.

A: Hi! I didn't expect to see you here!
B: Hi. Why not? I come here three times a week. We are training for the competition now.
A: Yeah, I understand. I can't say I take sport too seriously. I come here from time to time... just because this place is close to my home.
B: I see.
A: And, to be honest, the water feels too cold. I wish it were warmer.
B: It can't be warmer. You're training here, not taking a bath.

Speaker 2.

A: I want to ask you for help if you have time...
B: Why, yes, sure. We still have about five minutes before the bell.
A: The problem is that I've left my textbook somewhere. Probably I left it in the swimming pool where I was waiting for my brother yesterday...
B: I get it. But what can I do about that?
A: I just mean we could share your book now. I won't be able to do the tasks otherwise. ...
B: Yes, sure we can. Just sit down next to me. Here. I'll fetch your bag.

Speaker 3.

A: Hi. And where's Mike?
B: He's taking a shower, I think.
A: Look, Dan, your brother Mike is only four-years-old. When I asked you to look after him, I didn't mean that you would play on your telephone and he would be taking a shower.
B: But Mum, everything is alright. He's eaten the porridge you left for him. But after that... we realised that he really needed a shower.
A: Oh, gosh! And there's porridge spread all over the floor!
B: Sorry, Mum. But my brother is not very careful while eating, is he?

Speaker 4.

A: The weather is unusually warm today, isn't it?

B: Yeah, I would really like to go to the beach.

A: Oh, no! The sea is still too cold for swimming. And we've called your sister's family to our picnic, remember? Will you help me with the food basket, please?

B: Yes, sure. And where do you want me to put this picnic blanket?

A: Right here, close to the roses.

B: It's too hot here, in the sun. I suggest we move it under that apple tree.... Just like this. Now we'll be in the shade... but still close enough to your roses.

TEST 1 PART 4

Good morning, everyone, and welcome to the new Greenhill Community Centre. Before you start exploring, I'll quickly show you around some of our main facilities to help you find your way.

We'll start right here at the reception area, which is located just inside the entrance, on the right-hand side. This is your go-to spot for signing in, asking questions about upcoming activities, or booking rooms for events such as workshops and classes.

Now, if you enter through the main doors and turn immediately left, you'll come across the bike racks. These are provided for visitors who cycle to the centre. They're conveniently placed under a covered area, so your bikes will stay dry even on wet days.

Let's head back inside. If you walk straight ahead from the entrance, you'll find the kitchen room, which is located just beside the computer room. The kitchen is used for cooking classes, food preparation during meetings, and sometimes even for small catering events. The computer room next door is open to all visitors and has internet access, printers, and basic software for public use.

Moving into the central section of the building, you'll see the music room, which is situated just below the games room. The music room is fully soundproof and equipped with a variety of instruments.

If you continue towards the top right corner of the centre, you'll reach the shower room, which is positioned right next to the gym. These facilities are available to anyone using the sports hall, fitness classes, or gym equipment. The gym itself is well-equipped and open throughout the week.

And finally, before you head off to explore, it's useful to know that the restroom is located between the library and the large community meeting room. Both of these spaces are often used for quiet reading, study sessions, and larger group events.

We've just covered the main spots. Take your time to explore the rest of the centre — hope you have a great visit!

TEST 1 PART 5

Extract One

Man: Have you checked out the new library they opened near the town square?

Woman: I did last weekend. It's impressive—spacious, modern design, and they've got these interactive screens to help you find books.

Man: Oh, I love those. And the reading pods looked cozy. Did you try the café?

Woman: Briefly. It's nice, but honestly, I went in the evening and it was packed. I had to wait ten minutes just to find a seat.

Man: Really? I thought evenings would be quieter. Maybe after work hours it gets busy.

Woman: Exactly. I was hoping for a peaceful spot to study, but it felt more like a social hub.

Man: Hmm, maybe mornings are better. Still, it's great to have a place like that in town.

Woman: Definitely. Just wish it wasn't so crowded when I need it most.

Extract Two

Woman: Did you finally try that new coffee shop on Elm Street?

Man: Yeah, I went yesterday afternoon. It's smaller than I expected—only a few tables inside.

Woman: Oh, I thought it was more spacious. How was the atmosphere?

Man: Really nice, actually. Soft jazz playing, warm lighting, and the staff were friendly. But the service was a bit slow. I waited nearly ten minutes for a cappuccino.

Woman: That's not ideal. Were they busy?

Man: Not really. Just a couple of people ahead of me. I think they're still figuring things out.

Woman: Hmm, maybe they'll improve with time. Did you like the coffee?

Man: It was good. I'll probably go back—just not when I'm in a rush.

Extract Three

Man: I've been thinking about getting a dog, but I'm not sure I'm ready for the responsibility.

Woman: It's definitely a big step. Pets need daily care—feeding, walking, grooming. And don't forget vet visits.

Man: Yeah, I've read about that. I was looking at larger breeds, but they seem to require even more attention.

Woman: That's true. Bigger dogs usually need more space and exercise. If you're new to pet ownership, maybe consider a smaller one?

Man: Like a terrier or something?

Woman: Exactly. They're easier to manage, especially if you live in a flat. Less demanding, but still great company.

Man: That sounds more realistic. I'll do some research before deciding.

TEST 1 PART 6

MULTILEVEL ZONE MOCK EXAM

When people talk about marketing, branding often comes up as one of the most influential factors. It's not just about having a recognizable logo or catchy slogan—branding can actually shape how a company performs in its industry. A strong brand helps a business stand out and, in many cases, even take the lead in its particular market.

Think of Apple. Their products are known not only for their design and functionality but also for the reputation they've built over time. Customers associate Apple with high quality, and that perception adds value. It's why people are willing to pay more—they're not just buying a phone or a laptop, they're buying into an experience.

And that experience is often emotional. Many brands don't rely solely on logic or technical specifications to attract buyers. Instead, they tap into feelings. Coca-Cola is a good example. When someone drinks it, they're not thinking about the ingredients. What they connect with is the feeling of happiness—a mood the brand has carefully cultivated through its advertising and global presence.

In the online world, branding takes on a slightly different form. Digital businesses use tools to understand what their customers like. One common method is tracking browsing behavior through cookies. These small data files help companies learn about user preferences, which allows them to personalize recommendations and improve the overall shopping experience.

And it's not just about making things easier for the customer. This kind of insight can lead to better sales. When people feel that a brand understands them, they're more likely to return, make purchases, and even recommend it to others. That's the power of branding—it builds trust, creates emotional connections, and drives business forward.

So, whether it's through storytelling, smart data use, or a reputation for excellence, branding remains a central pillar of modern marketing.

TEST 2 PART 1

1. Do you know when the next train to Berlin leaves?
2. Can I help you with anything else today?
3. Excuse me — I just have one more question.
4. What's the price for a single ticket?
5. Is it okay if I pay with my debit card?
6 How often do you have pizza?
7. Good afternoon — what can I do for you?
8. Could you tell me when the next plane to Bukhara departs?

TEST 2 PART 2

Manager: Hello everyone, and welcome to your first day at Fit Zone Gym. My name is Emma Foster,

and I'm the manager here. I'm really happy to see some new faces joining our team.
Let me give you some important information about how things work. First, the opening shift starts at 7 a.m., so if you're on that shift, please arrive at least fifteen minutes early to get ready. The gym needs to be fully prepared before members start arriving at half past seven.
Now, in case you're wondering, the gym is located on the second floor of this building. You'll find the reception area right when you come up the stairs or out of the elevator. The first floor is for the swimming pool and spa, while we handle all the fitness equipment upstairs.
It's very important that you follow our dress code. You must always wear black shoes as part of your uniform. They should be clean, comfortable, and suitable for moving around the gym safely.
If you work at reception, you'll receive a list of member check-ins, a copy of the daily schedule, and a small allowance for refreshments during long shifts. The reception area is also where members come for information, so make sure to smile and greet everyone politely.
Finally, don't forget about your personal belongings. Please put your things in the lockers in the staff room before your shift starts. The staff room is located behind the main office, and you'll need your keycard to enter.
That's everything for now! Once again, welcome to the team, and if you have any questions, feel free to come and see me anytime.

TEST 2 PART 3

Speaker 1.
I wouldn't pretend I knew the best way, but I have an idea of what seems to work OK for me. I think you need to be in a good atmosphere, and to try to enjoy yourself – there's no reason for studying to be a hard or miserable thing to do, is there? If you have a friend that you get on with in a relaxed way, try saying you'll do some studying together. Get some snacks to eat – but turn the music off – and get on with it. See how much you can get done in a block of time, say an afternoon, or morning, whatever works best for you.

Speaker 2.
My problem is not that I don't want to study – because I do – but that I fall asleep very easily. I can't tell you how many times I've sat down to do some studying, felt my eyes get a bit heavy, and the next thing I know I'm waking up an hour or so later. None of my friends will admit to the same problem, so it must just be me. I've learnt, I think, that food really doesn't help, so I try now to study when I'm feeling a bit hungry. It's also useful to avoid getting too comfortable in any way, such as sitting on a sofa or listening to relaxing music.

Speaker 3.

I don't think there's any one perfect way to study … some magical solution. You just have to do your best to stay focussed, motivated. A big part of that is being realistic. If you try to read a whole book in one go, it's not going to work. Divide work up into bite-sized chunks that you can handle, like the next ten pages, revising one set of notes, that kind of thing. If you take this step-by-step approach, you can keep going much longer, but you need a pace that you're comfortable with. Otherwise, simple stuff: don't call your friends, don't put the radio on, don't lie on the bed.

Speaker 4.

I play a lot of sport, and maybe it's because of this that I look at studying as a basically physical thing, something to be in training for, to be fit for. I like to feel awake when I study, so I make sure I do some good physical exercise in the morning, say running, which will clear my mind and get me focussed on studying in the afternoon. I have enough to eat, fruit and so on, so being hungry isn't preventing me from concentrating. I have a good, solid chair and my desk is at the right height and I have a good lamp. These things really help.

TEST 2 PART 4

Good afternoon, everyone, and welcome to the Grand Shopping Mall. Before you begin your shopping, let me take a moment to show you around some of our key facilities.

We'll start here near the entrance, where you can find our café on the left-hand corner side of the map. It's a cozy spot offering coffee, sandwiches, and pastries — perfect for taking a short break during your shopping trip.

Just inside the main area, a little further ahead, you'll see a small kiosk in the center. You can pick up newspapers, snacks, and bottled drinks there.

Now, if you walk straight to the back and look to your far-left corner, you'll find the computer store. It sells laptops, accessories, and repair services for electronic devices. Moving toward the middle, between furniture and the women's wear section, there's the Men's Wear section, offering everything from formal suits to casual clothes.

Continue walking along that same row, besides the women's wear section, you'll come to the Shoes department. It has a wide range of footwear for adults, including men, women, and children too.

Now, on the opposite side of the building, to the far right, you'll find the Accessories shop. It's just below the Toy Store and sells handbags, belts, and sunglasses. Above that, at the top right corner, there's the Children's Clothes store, which has a great selection for all ages.

Finally, before you go exploring, note that the toilets are on the left-hand side of the mall, above the

café.
That's the main layout of our shopping mall. Feel free to explore at your own pace, and enjoy your shopping experience at Grand Mall!

TEST 2 PART 5

Extract One
F: Hi Seldon, have you gone through the latest issue of our school newspaper?
M: Hi, Becky! Yes, I have, I've read your article about the planets, really interesting. Good job!
F: Thanks! But I didn't find any writing of yours. Weren't you doing some research on robots?
M: Yeah, you're right, but I didn't submit it in the end. I had to study for a test. I'll work on the final paragraph and you should see it in next month's issue.
F: Great! Which part of the newspaper did you like the most? I'm always keen on reading the interviews!
M: I really enjoy the short stories. I can't get enough of them every time!
F: Really? I don't find them very realistic.
M: That's exactly what I love about them! They're so funny!

Extract Two
M: Hello, I'm here to see Dr Green; I called this morning? My name's Ted Willow.
F: Eeeeer, yes. Have a seat, Mr Willow, the doctor will see you soon.
M: Is she not here?
F: She was in the operation room, but she's finished. She'll be with you shortly.
M: OK. It's just that I have a terrible stomach-ache. It's been like this for two days now!
F: I understand. Could you fill in this form while you're waiting? See if you can think of anything that could be the cause.
M: Well, now that you mention it, I did try a new fast-food restaurant on Friday.
F: It sounds like food poisoning. It usually takes four days to fully recover.
M: Will you be able to give me a medical certificate to take to work? The school I work at requires one.
F: Sure, we can sign one for you after we have the results.

Extract Three
F: Um, hi. I bought this blue cardigan here some days ago, but I'm not happy with it and I'd like to return it, please.
M: OK, no problem. Let's see what I can do. Do you have the receipt with you?

F: Yes, here you are. I bought it by credit card.

M: OK, so the item looks fine. Can I ask why you want to return it?

F: Well, actually, I don't think it suits me well. It' s a bit too loose for my taste.

M: Err… would you like to exchange it for a different size? Or a different colour maybe?

F: I'll just take the refund, if that's OK.

M: Sure, no problem. I'll just need to issue the refund back to your card. It will only take a moment.

F: Thank you.

TEST 2 PART 6

Lecturer: During today's seminar we will be looking at English Gothic architecture and its origins with a specific case study of Wells Cathedral in England. The Gothic style was initially brought over to England from France. This was at a period of time in which England was ruled from France by the Normans, starting with William the Conqueror who first defeated the English army at the Battle of Hastings on October 14th, 1066.

After 1072 when some smaller rebellions in northern England had been defeated, the Normans gained complete control of the English monarchy, which they controlled until 1154. The peace that ensued in England had a large impact on many aspects of daily life. Thousands of French words entered the English language for the first time such as beef, fruit, city and hour. French ideas and styles, like Gothic, also began to flow across The Channel to England too, examples of which can still be seen in the architecture of many listed buildings. A listed building is one that is protected from alteration or demolition because of its historical or stylistic importance. One such building is Wells Cathedral.

Construction on Wells Cathedral began in 1175 at a time when Gothic architecture as a style was in its infancy. As a result, it is one of the first entirely Gothic buildings ever constructed. From the first designs to the date, it was completed in 1490, Gothic architecture flourished in England. Therefore, later additions to the building were still influenced by this Gothic style, rather than by later architectural styles such as Tudor architecture.

Older cathedrals in England would have initially been influenced by Romanesque architecture, alternatively known as Norman architecture in England. As the former name suggests, Romanesque was a building style based on the skills passed on to various areas of Europe by the Romans. When the Western Roman Empire collapsed in the 5th Century, these methods were retained by Rome's former colonies and developed further. One such Roman gift to the Romanesque architects was the round arch, also known as the true arch. The Romans perfected this style by using wedge-shaped stones called *voussoirs*, which created pressure that held the structure together at the top.

Cathedrals in England such as the ones in Ely and Canterbury were started before the arrival of Gothic

architecture. Even though parts of those two cathedrals which were constructed later are in the Gothic style, other sections predating the arrival of Gothic architecture are Romanesque. The result is known as eclectic because the building is constructed using more than one style.

All of these cathedrals belong to a group known as the medieval cathedrals of England. There are twenty-six different buildings that belong to this group in total; all of which were constructed or added to during a five-hundred-year period from 1040 to 1540.

TEST 3 PART 1

1. Are you ready to order?
2. Which sport do you like?
3. What do you think about the jacket?
4. I'm very tired.
5. Do you like cooking?
6. What did you do yesterday?
7. Are you free this evening?
8. Is it your smartphone?

TEST 3 PART 2

Host: Hello everyone! I've got some exciting news about an event you won't want to miss. The annual Festy Music Festival is back again this summer, and it's going to be bigger and better than ever!

This year, the festival will take place in Green Park, right in the center of town. It's a beautiful open area surrounded by trees, perfect for music, food, and fun.

The event will last for three days, starting on Friday and finishing on Sunday evening. Each day will be full of live performances, local food stalls, and family activities.

Now, let's talk about tickets. Adults need to buy a regular ticket online, but the great news is that children under 12 years old can enter for free! That makes it a perfect weekend for families to enjoy together.

If you're planning to stay for several performances, don't forget to bring a chair or a blanket so you can sit comfortably on the grass. There will be plenty of shaded areas, but it's also a good idea to bring sunscreen and a bottle of water.

The festival starts every day at 10 a.m., and gates will open half an hour earlier. Arriving early means you can find a good spot before the first band begins.

And finally, if you need more information about the schedule, tickets, or directions, just visit the official website at www.festy.com.

So, mark your calendars and get ready for three days of great music, food, and fun at the Park!

TEST 3 PART 3

Speaker 1:

I know people often complain that the internet distracts students, but for me, it's been the complete opposite. I've taken several online courses, joined study groups on different platforms, and even found a mentor abroad who helps me practise my English. It's incredible how much educational material is available if you actually know where to look. I used to rely only on textbooks, but now I can access the latest research in seconds. The only real challenge is managing your time — because there's always something new to read or watch.

Speaker 2:

The internet has completely changed the way I work. I'm a marketing consultant, and all my meetings are online now. I can design campaigns for clients on the other side of the world without leaving my living room. It's made my career far more flexible and, honestly, much more profitable. Of course, the downside is that you never really "switch off" — emails and messages come in at any hour, so it can feel like you're working nonstop. But overall, I wouldn't trade this freedom for anything.

Speaker 3:

Sometimes I feel like the internet has taken over people's lives. You see groups of friends sitting together, but everyone's just staring at their phones instead of actually talking. I think social media gives us this illusion of connection, but in reality, it's quite isolating. People spend hours trying to look perfect online, and it's exhausting. Don't get me wrong, I use it too, but I try to limit my screen time. I'd rather meet someone for coffee than send endless messages.

Speaker 4:

I rely on the internet a lot, but one thing that really frustrates me is the lack of reliability in what you read. News articles, health advice, even product reviews — half the time you can't tell what's genuine and what's sponsored. It takes so much effort to fact-check everything, and not everyone bothers. I think people underestimate how easily misinformation spreads. It's made me quite skeptical, to be honest, and I find myself questioning almost everything I see online.

TEST 3 PART 4

Good morning, everyone, and welcome to the New Fitness Centre on Village Road. I'll be giving you a short tour of the main facilities to help you get familiar with the layout before you begin your activities. Let's go through the key areas one by one.

We'll begin outside the building at the Car Park. It's located just behind the centre and offers plenty of

space for visitors arriving by car.
Once you step inside, you'll arrive at the Reception Area, located centrally near the entrance. This is your first stop for signing in, asking questions, or getting help with bookings.
Now, once you're inside the gym, look to the right side, and you'll find the Staff Room. This area is reserved for our team members and is not open to the public.
Moving slightly upward, below the snack room and above the changing room, you'll come across the Showers. These are available to all guests and are conveniently located next to the changing rooms.
Just above the snack room is the Aerobics Room. It's used for group classes like yoga, dance, and fitness workouts. The space is bright and energetic, perfect for high-movement sessions.
On the right corner of the building, next to the main hall is the Indoor Swimming Pool, marked D. It's ideal for casual swimming, aqua fitness, or simply relaxing after a workout.
Now let's look at the outdoors. In the north corner, between three trees, you'll reach the Outdoor Gym Area. It's surrounded by trees and includes equipment for strength training and cardio exercises in the fresh air.
And finally, next to the spa room, you'll see the Cycling Area. This open-air zone is designed for spin classes and personal training sessions using stationary bikes.
That wraps up our tour of the main facilities. Feel free to explore the rest of the centre and enjoy your visit!

TEST 3 PART 5

Extract One
Interviewer: It certainly sounds a great job to have, but does it have any negative aspects?
Adriana: Well, the agency may expect you to go to some fairly unpleasant places, though if it's a country where there's armed conflict going on I normally refuse. And being completely on one's own in the jungle or desert can get some people down, but I can't say it bothers me. Spending so much time away from my daughters, though, is a different matter, but unfortunately it goes with the job. Whenever I'm home I always try to make up for that by spending as much time as I can with them.
Interviewer: Tell me, how easy is it to get a job as a wildlife photographer?
Adriana: Well, it's certainly an attractive career, and nowadays there are just so many people out there doing it to such a high standard that it's difficult to get into. On the other hand, the public don't show any sign of losing interest in pictures of wildlife, and even though you can find millions of them online, people always seem to want new ones.

Extract Two
Interviewer: How did you feel as your journey began?

Amy: To be honest it didn't start terribly well. I was too late for the airport bus and ended up taking a taxi so as not to miss my flight, only to find at the terminal that it'd been delayed for two hours. So I spent the morning shopping there, until I suddenly noticed my wallet was half empty, and I hadn't even left the country yet. Feeling a bit angry with myself, I decided to get something to eat, but the high prices put me off and I wished I'd brought some sandwiches, as the other two had.

Interviewer: And how did you get on?

Amy: Quite well at first, but then there were a couple of disagreements, including one between the other two about who should go out for bread. I don't eat it much so I wasn't really bothered, nor was I particularly concerned about Carla's habit of accidentally locking herself out of the flat, but I did get irritated when I kept seeing used cups , saucers and plates lying around next to the sofa or armchair where she'd been sitting. It's not something anyone in my family would have done.

Extract Three

Interviewer: Now, you're constantly coming up with fresh ideas. Do you sleep with a notebook by the bed in case you dream up a best-selling idea in your sleep?

James: Absolutely. I text myself with my ideas as I have them, then each day I go through my texts to see what ideas I have sent myself.

Interviewer: So what's next?

James: Aah, I have several ideas … but I'm not telling you!

Interviewer: OK, fair enough! Well, finally, have you got any tips for would-be entrepreneurs listening now?

James: Don't give up at the first sign of hardship. I've had my fingers burnt and lost money through some of my schemes in the past, but I've never let it get me down. I've had setbacks – but you can't dwell on them. You just move on.

TEST 3 PART 6

Hello, my name's Anne Ruskin. Thank you very much for inviting me to your college this evening to talk about my experiences on a one-day archery course.

When you were little, I imagine many of you, like me, used to have bows and shoot arrows from them – wooden bows you made from branches or maybe a plastic one like mine. Lots of kids love them – I even saw a little metal set in a toyshop the other day.

Anyway, I decided that now I was an adult I'd have a go at the real thing, and signed up for a beginners' archery course. I had planned to read up a bit on the history of archery beforehand, not knowing much about it. But I ran out of time and only managed a quick scan through the rules. I've found out more about it since, and it's fascinating.

The archery courses are generally held in a variety of locations, depending on the season and the weather. In winter, they even use a large gym if the weather's really bad. I was happy that mine was in the field they use in the summer, though I suppose a medieval castle or some woods would be the ideal setting.

There was so much to learn, I really had to concentrate. It was far harder than I'd imagined to stand in the right way, but how to hold the bow correctly came to me relatively quickly. I was also taught to place the arrows in exactly the right position in the bow.

Soon most of my body was aching! The teacher showed me some exercises to strengthen my hands, so I'll be able to grip the bow tightly for longer. He told me my shoulders were too tense and reassured me that my arms would eventually become stronger if I practised enough. I hope he's right!

Perhaps due to beginner's luck, most of my arrows went in the right direction, and into the target, though I never managed to hit the middle! And I did manage to hit a tree, narrowly missing a bench and a bag I'd left underneath it! That certainly wasn't deliberate! Someone else hit the target next to theirs instead of their own!

There were regular breaks, and part of the appeal of archery is the delightfully calm rhythm. There was a lot of time to drink tea, and enjoy the view, and I did plenty of both. There were some archery books and photographs to look through showing us how we could improve, and some people took the opportunity to check their phones for messages, but I preferred to chat.

I asked some of the other people there why they had decided to do the course. In fact, I'd imagined it might be because of a website or something. In fact, it turned out to be because of a TV series. The archery courses are advertised on local radio too, but none of us had actually heard about them that way.

The teacher made sure we practised loads of shooting and it was thrilling when he finally let us do some scoring. There are rings on the targets, and you get points depending on where your arrow lands. It was fun to see how well I was doing compared to everyone else! And I must say, I wasn't too bad!

I loved it, and archery is one of those rare sports that almost anyone can do, including children, though they must be over the age of ten. Some of my friends have said they'll join me next time I go, and I'm working on my parents at the moment, in the hope that they'll come along as well.

Thank you all for listening. I hope some of you will consider taking archery up. It really is a great leisure activity. Now, have any of you got any questions? I'd be happy to tell you more about …

TEST 4 PART 1

1. I don't understand this dialect.
2. Can you tell me how to go to the Centre?
3. How much is the dress next to the black one?
4. How long have you known your best friend since you met?
5. Excuse me, this seat is for you?
6. What would you like to drink?
7. How do you get to work?
8. When is your next English class?

TEST 4 PART 2

Speaker: Hello everyone, my name's **Rachel**, and I'm the coordinator of the Elmfield Neighbourhood Writing Club. Thanks for joining me today. I'm going to tell you a bit about our club, what we do, and how you can become a member.

To become a member, there's a small **annual fee of thirty pounds**. This helps us cover the cost of renting the room, printing materials, and inviting guest writers to give talks or workshops. We think it's a very fair price for what you get!

Our club has been running for more than **three years**, and we welcome people of all ages and writing levels — from complete beginners to experienced writers. We focus on creative writing, storytelling, and short fiction, but we also have members who enjoy writing poetry or personal blogs.

Now, about our classes. The **writing class takes place every Wednesday evening**, from six to eight p.m. We meet in the community center's second-floor hall. The sessions are relaxed and supportive, and we usually begin with short writing exercises followed by group discussions.

For younger writers, we also have a special **Junior Course**, designed for children aged ten to fifteen. It's held on Saturday mornings, and it focuses on creativity and confidence building. Many of our young members have even entered local story competitions!

If you'd like to join or ask for more details, you can send us an email. The address is **efn.library.org** — again, that's *e-f-n dot library dot org*. You'll receive a reply within two days with the registration form and schedule.

We'd love to see more new members this year, so if you enjoy writing or just want to meet friendly people who share the same passion, please come along and give it a try. Thank you for listening!

TEST 4 PART 3

Speaker 1.

A: It was great, wasn't it? And where will we go next?

B: To the roller coaster. I haven't been there since I was ten.
A: Me neither. But the line is pretty long, can you see it?
B: Never mind. I'm determined to go there anyway.
A: OK. Fine. And after that we'll drive the bumper cars. And I want to go to the big wheel too!
B: You want to do everything! But it's getting cold and windy. Don't you think so?

Speaker 2.
A: Can we change seats?
B: What do you mean? Why? Do you feel cold here or what?
A: No, it's not that. I just enjoy sitting by the window and that table next to it is vacant now. The people who were eating there have just left.
B: Have they? So what? Do you mean moving all these plates and cups from one table to another?
A: Do not exaggerate. There are only two bowls of soup on our table at the moment. If you can't carry yours, I can take your bowl too!

Speaker 3.
A: Where are we now?
B: Somewhere over the ocean. If you want to know the precise place, switch on the monitor in front of you, or ask the flight attendant.
A: No, no need. I just asked to make conversation. It's easier for me to talk ...because when I don't talk...
B: I don't think I understand what you mean I'm afraid.
A: I'm just trying to say that the flying over the ocean makes me feel really scared,

Speaker 4.
A: Look, Kate, when you talk about getting lost in the jungle, you need to sound scared. And you sound as if you are enjoying yourself in an amusement park.
B: OK. I understand.
A: Just imagine that any moment you could come across some wild beast a tiger or a huge wild monkey.
B: I'm not afraid of monkeys. They are smart and funny.
A: OK. Then think about something you are afraid of. Spiders, mice, whatever! I want to hear horror in your voice. Come on. Say your lines again.

TEST 4 PART 4
Hello and welcome to this short guide on the planned changes in Newshire City.
Let’s begin with the new school area. It is located below the park area, which is planned to be built

later. The old building will be replaced with a larger, modern facility that includes upgraded classrooms and a safe outdoor play area.
Now we turn our attention south to Low Street. A new road is planned to be constructed on the bend in the middle of the street to connect the new school site to this street. This new stretch is expected to ease traffic during busy hours.
A new traffic light is planned at the intersection of Low Street and Main Street. These will be placed at a busy junction to improve safety and help regulate the increased flow of vehicles from the new road.
Higher up on City Park Street, a new library will be built. It is located in the middle of the map, near a new park planned to be built on the map. It will be a bright and big space with study rooms and free Wi-Fi.
Next, a new parking area will be added below the shopping mall. It's designed for long-term use and includes spaces for electric vehicles and disabled access.
Now let's turn our attention to Main Street. A flower shop will be added below the bank. This store was added to the main roadmap based on the demands and wishes of the city's residents.
Finally, let's look at High Street. A new supermarket will be opened at the beginning of the street, on the left side of the old high school. It's expected to become a central shopping spot for the local community.
The last change is the change in the location of the bus stop. The old bus stop is located to the left of the Town Hall, near the intersection of City Park Street and High Street, while the new stop will be located to the right of the Town Hall, closer to Main Street.
That concludes our overview of the main roadmap of Newshire City development. These updates aim to improve transport, education, and public services for everyone.

TEST 4 PART 5

Extract One

Sam: Hi Liz. How do you feel about starting university here?
Liz: A little bit nervous, but I'm confident I can handle it. This orientation program seems like it will help us a lot.
Sam: Sure. I'm looking at the timetable here myself. It seems that there are choices available.
Liz: I can see. So, what are you going to do Monday afternoon? In the morning we all have the opening lecture, but it looks like we have a choice later that day, as you said.

Sam: Well, the 'Careers Lecture' might be helpful, but I am interested in the 'Uni Tour'. It's probably too early to be thinking of careers now, anyway, and I want to know what's what at this new university, so. I'm doing the tour.
Liz: Alright. I'll come along with you. Might learn something interesting. After all, we haven't seen much of this place yet, and we will be spending four years here.
Sam: Tuesday is another full day, too. In the afternoon there's a lecture about study skills, but that morning offers another choice.

Extract Two
Eric: Hi, Ms Harris. Here we are, talking once again.
Ms Harris: Well, I'm always willing to help out wherever possible. Is anything troubling you?
Eric: Well, your advice last week about writing summaries was very useful, and I'm using these summaries a lot in order to prepare my final master's thesis.
Ms Harris: But you're having problems, right?
Eric: Yes, I have a few issues to discuss. Obviously, I want a good essay, and I want to achieve high marks. But I'm not sure on the best way to start.
Ms Harris: That's an easy question. Start with a topic, but not one that I necessarily suggest, but one that you want to explore. You will always write better when doing so on a topic you are interested in, not one imposed upon you by others.
Eric: Well, I'm interested in …

Extract Three
Interviewer: OK. so, what happened next?
Jackie: Well, Olivia was turned down for a part in the musical Mary Poppins. She reached the last ten for the role of Jane Banks. She didn't get the part and was distraught. But she quickly picked herself up and then we took both children to the Palladium auditions for The Sound of Music.
Interviewer: What was that like?
Jackie: Well, we arrived for the auditions at 8.30 a.m., as instructed, only to find a huge crowd ahead of us. Eventually, more than 1,000 children turned up. They said at first that they could only see 230 kids. We were at about number 250 and, with a visit to our local festival planned for the next day, we couldn't come back. We begged them to see our daughters and eventually they agreed.

TEST 4 PART 6
Thanks to nanotechnology, there could be a major breakthrough in the field of transportation with the production of more durable metals. These could be virtually unbreakable, lighter and much more pliable leading to planes that are 50 times lighter than at present. Those same improved capabilities

will dramatically reduce the cost of travelling into space making it more accessible to ordinary people and opening up a totally new holiday destination.
In terms of technology, the computer industry will be able to shrink computer parts down to minute sizes. We need nanotechnology in order to create a new generation of computers that will work even faster and will have a million times more memory but will be about the size of a sugar cube.
Nanotechnology could also revolutionise the way that we generate power. The cost of solar cells will be drastically reduced so harnessing this energy will be far more economical than at present.
But nanotechnology has much wider applications than this and could have an enormous impact on our environment. For instance, tiny airborne nano-robots could be programmed to actually rebuild the ozone layer, which could lessen the impact of global warming on our planet. That's a pretty amazing thought, isn't it? On a more local scale, this new technology could help with the clean-up of environmental disasters as nanotechnology will allow us to remove oil and other contaminants from the water far more effectively. And, if nanotechnology progresses as expected – as a sort of building block set of about 90 atoms – then you could build anything you wanted from the bottom up. In terms of production, this means that you only use what you need and so there wouldn't be any waste.

TEST 5 PART 1

1. Where is your new car?

2. Where will you be on your holiday?

3. Where is my key?

4. What is your phone number?

5. Do you like movies?

6. What is your favourite subject at school?

7. Can I pay by card?

8. What was the trip like?

TEST 5 PART 2

Hello! My name's Daniel, and I'm really excited to tell you about a special event happening at our local library.
If you enjoy reading and sharing books, this is something you won't want to miss.
So, when is it happening? The event will take place in **August**. That's right—**August** is the month to

remember. It’s usually warm and sunny, so it’s a perfect time to get out and do something fun.
Now, to take part, there’s one simple thing you need to do: bring some books with you. Not just one or two—we’re asking everyone to bring **15 books**. These can be books you’ve already read, or ones you think others might enjoy. Sharing is part of the fun, and the more books we have, the better!
The event will be held on a **Saturday**, which is great because most people are free on weekends. You won’t need to worry about work or school. And the time? It starts at **3 p.m.**, so you’ll have plenty of time to get ready and arrive.
There is a small cost to join the event. This helps cover snacks, materials, and some fun activities we’ve planned. The cost is **50 pounds**. We think it’s a fair price for everything included.
If you’d like more information or want to register, you can visit our website. Just go to **www.activities.com**. That’s spelled A-C-T-I-V-I-T-I-E-S—dot com. You’ll find all the details there, including how to sign up and what to expect.
We really hope you’ll join us. It’s going to be a fantastic day full of books, fun, and friendly faces.

TEST 5 PART 3

Speaker 1.

Twenty years in a job is a long time and especially in one that can be as stressful as teaching. But the days aren't too long and for the most part the students behave themselves. We have an exceptional group of staff members and it makes such a difference having good people alongside you. Of course, most people suspect that people go into this job for the holidays and to great extent it's true. It's definitely true in my case. Working with children for 9 months of the year, and I think everybody would agree, they are deserved. Of course, if you don't genuinely have a desire for it, I'm afraid you'll have many very long days and the pupils will very quickly let you know how they feel.

Speaker 2.

Most of my career has been in some sort of involvement with environmental protection. Without a doubt, it's my passion. Living and learning about the world around us, that's my job. I wouldn't change it for the world. The hours are long and the amount of travelling can be quite gruelling. But then when you get to wherever it is you may have been posted, it could be a natural park in New Zealand, or I even had the chance to spend a month in Greenland studying the local wildlife, you realize why you still do the job. To come and live in some of the most beautiful places on the planet is what I've always dreamed of. To be able to combine it with work is phenomenal.

Speaker 3.

My job gives me a lot. The days are long, but the money is good and I get a company car. My average day consists of driving to retailers in different areas of the country, marketing new products and taking

supply orders and maintaining good between supply and retailer. I must also admit that I have hopes of moving up through the company. In this business you generally start from the bottom and work your way up, which is what I'm hoping to do. It's in my contract that after every 12 month period, the directors put us through an evaluation process and promote two new people to higher positions. I've been with the company for two and a half years now, and the standard length of time is generally three to four years, but I'm hoping to advance sooner if I can.

Speaker 4.

I suppose I got into the state sector as it was a natural progression from what I'd studied and what little work experience I'd gained from placement programs, working with various sections of the city council. I know most people decry public workers. It's the typical view of bureaucracy, and honestly, people are not entirely wrong to hold that view. But I relish the job. I need my work to be stimulating or be challenging in some way, and it certainly is. My own department is responsible for allocating funds for public works. We receive proposals all the time, but without endless resources deciding which project merits funding as opposed to another is difficult. Any use of public funds requires careful consideration as to how best to make it work for the people.

TEST 5 PART 4

Welcome to the Newtown Marketplace. I'll give you a quick overview of some key sections to help you find your way around. Let's begin near the entrance and move through the market step by step.

As you enter from the bottom left corner, the first thing you'll notice is the big Parking Lot, located in the lower area. It's spacious and provides easy access to all parts of the market.

If you walk straight from the entrance, you'll come to the Bakery, and above it is a place that sells fruits. It's filled with fresh produce, including apples, bananas, and seasonal berries. It's right next to the bakery, so you can grab something sweet and healthy.

Moving further into the centre of the marketplace, you'll come across a circular area with four round smaller stalls. The one to the left of these stalls is the Milk stall. It's positioned below the meats and above seed stalls, making it easy to pick up all your essentials in one place. The one to the right is the eggs stall. It's stocked with free-range and organic options, and it's one of the most popular stops for regular shoppers.

If you look at the right corner of the map, besides the parking lot, you'll reach the T-shirt section. This area features casual clothing and accessories, perfect for a quick browse after your grocery shopping.

Now if you head to the top left corner of the market, where the Fish section is located. It offers a wide variety of fresh seafood. You'll find everything from salmon to shrimp, delivered daily.

Finally, in the top right corner of the market, there is a place in which you can buy vegetables. It's packed with leafy greens, root vegetables, and herbs.
That's a quick overview of the main sections. Feel free to explore the rest of the market and enjoy your visit!

TEST 5 PART 5

Extract One

M: What do you think of Noel's new girlfriend, Jenny?
F: She seems very nice, John, and they certainly seem to get on well together.
M: I'm just a bit worried that they don't seem to spend much time together. They don't really have the same interests at all.
F: Well in some ways don't you think that's a good thing? They like each other but they also have their own lives.
F: Yes, I suppose you're right. With his last girlfriend they always did the same things together, they were never apart.
F: And they always did what she wanted, never what he wanted. Eventually it was just too much for him.
F: Yes, perhaps you're right. It's better if two people are a little bit independent. Sometimes it's good to have a break and do something on your own, and then come back together.
F: I'm sure they'll be fine. But it's early days yet.

Extract Two

F: Oh, hi, I've just been to the new supermarket; it's fantastic, and so cheap.
M: Yes, I went last week. It certainly seems to have everything you need.
F: Oh, I think the town has needed something like this for a long time.
M: In a way, yes, but I worry about the small shops in the High Street. They're already suffering.
F: Yes, I suppose it depends on what you want. Quite honestly, I don't have time to go from one shop to another, and the parking is so difficult, especially on Saturdays.
M: I agree with you about the parking, and not just on Saturdays. Something has to be done about that, and the town is starting to lose its character.
F: Yes, I heard that the butcher's shop is closing soon. I suppose that's because supermarket shopping is so easy.
M: Well, it had to happen sooner or later, I suppose. It's such a shame though

Extract Three

M: Hello, police.

F: Hello. I can't find my hotel. Can you help please?
M: You can't find your hotel?
F: Yeah, it's called the Wallington Hotel and I've been driving around for hours and I've had to pull over and I just don't know what to do next.
M: Right, madam. You've called the police emergency number. Now this is not really an emergency call, is it?
F: No, it's not, no, so what can I do?
M: Well, is there someone on the street that you can ask for directions or have you got a map? It's not an emergency call.
F: No, it isn't. I'm sorry. I've asked several people, I'm sorry. I couldn't think what else to do. Sorry.

TEST 5 PART 6

Marianne: Hi! I'm Marianne. Now, if you love exciting rides at theme parks, you'll think what I do – designing high-speed rides called roller coasters – is a great job! It is – but it's also hard work! I've got some questions people have emailed me, and here's the first one.
Dan asks what the first roller coasters were like. Well, it's not a new idea, Dan. In Russia, for example, people used to ride on tree trunks down slopes of ice. The first ride that actually charged a fare, though, was in the States and made use of train tracks which had previously been used to transport coal down a mountainside.
Next, Sarah asks what qualifications I have. Well, I studied engineering at university, which included courses in maths and physics. Both these subjects are essential in my job. Having a basic qualification in art has also been valuable – it means I can design things that look beautiful, as well as being functional.
Now, Carrie asks how I start on a new design. Well, there are lots of things to consider, like the client's budget, for example, and choice of materials, but the landscape – you know, whether it's hilly or completely flat – is also a major consideration.
Another thing to think about is what we call the capacity of the roller coaster. Theme park owners normally think more about the number of passengers they can fit in, because that's where their profit comes from! But designers have to think about the weight that the ride will need to carry, as that affects the design.
Paul asks if lots of people are involved in the design process. Yes, Paul, because we need different expertise. Most importantly, though, the ride has to be safe and enjoyable, and luckily my team has people who are experts in all the forces that passengers will experience during the ride, like exposure to wind and also gravity. We aim to reduce those – and if we get it wrong, it might not be a fun ride!

Of course, our designs are all based on years of research, because we have to ensure passenger safety while they're on our rides. We make use of studies that have been done into airline pilots – what kind of pressure their bodies can cope with when flying long distances – and that's supplied us with the majority of the data we have. And studying astronauts has provided us with some useful information about how being in space affects them.

This leads to a question from Peter, who asks what people don't like about our rides. Well, I guess they'd tell us if they were boring, or too tame, because roller coaster fans are thrill-seekers! But they do let us know if they find them painful, which the rides can be if we throw passengers around at speed. Even the most dedicated riders dislike that!

TEST 6 PART 1

1. Have you seen the doctor?
2. Where did you go?
3. Do you know how to play chess?
4. What would you like for dessert?
5. Is it yours?
6. What kind of sauce is this?
7. Will you have some tea?
8. Can you please show me your passport?

TEST 6 PART 2

Hi! This is Rachel Atkins speaking. I've got some exciting news for young dancers out there. There's a fantastic dance competition coming up, and I think it's perfect for anyone who loves performing.

The competition is open to **children** aged between **13 and 15**. So if you're in that age group, you can take part. It's a great chance to show off your skills and have fun with others who enjoy dancing too.

Now, let's talk about the important dates. The competition itself will be held in early August, but you need to **enter by the 12th of July**. That gives you a few weeks to get everything ready. Don't leave it too late!

To enter, you don't need to fill out a long form or pay anything. All you have to do is **upload a video** of yourself dancing. It can be something you've already recorded, or you can make a new one just for this event. Make sure it shows your best moves!

If you want more details, you can visit our website. The address is **www.jittersea.com**. That's spelled J-I-T-T-E-R-S-E-A. You'll find all the rules and tips for recording your video there.

The competition will take place at the **college**, the one just opposite the park. It's easy to get to and has a great space for performances.

And here's the best part—there are prizes! The **first prize is £175**, which is a great reward for your hard work. There's also a second prize, so even if you don't win, you might still go home with something.

So, get your dancing shoes ready and start preparing your video. We can't wait to see what you've got!

TEST 6 PART 3

Speaker 1:

People often assume my job is just sitting in front of a screen all day, and honestly, that's partly true — but it's far from dull. I deal with systems that keep entire offices running smoothly, so when something breaks, I'm the one they call. It's funny because when I was younger, I wanted to be an engineer, maybe even build machines. Now I'm more of a problem-solver, just in a digital way. Sometimes I have to work late to fix issues before the morning rush, but I like the challenge. The best part is knowing that no two problems are ever the same — there's always a new puzzle waiting.

Speaker 2:

I never thought I'd end up working with people every single day — I used to be quite shy. But now I spend hours explaining, listening, and trying to motivate others. It's demanding work, especially when deadlines or tests are approaching. I do a bit of planning too, designing materials and activities to make learning enjoyable. My friends in the business world say I should switch careers for better pay, but I couldn't give up the satisfaction of seeing someone finally understand something they've been struggling with. That moment makes all the effort worthwhile.

Speaker 3:

I've always loved showing people new places, so I guess it's no surprise I ended up doing this. My job involves describing destinations, helping clients plan trips, and sometimes even leading groups myself. Of course, not everything is glamorous — delays, lost luggage, or bad weather can make things stressful. But when a family tells me their holiday was unforgettable, it's worth all the trouble. I actually studied languages at university, thinking I might become a translator, but now I use those skills to help travellers feel more at ease wherever they go.

Speaker 4:

I spend a lot of time trying to understand what catches people's attention — whether it's an image, a phrase, or even the music behind an advert. It's not as simple as just "selling things"; it's about creating a feeling that connects people to a brand. I work closely with designers, analysts, and sometimes even psychologists to make campaigns more effective. When I started, I thought I might go into journalism, but I realised I preferred shaping stories rather than just reporting them. It's fast-paced, competitive, and sometimes exhausting — but when you see your campaign go viral, it's an amazing feeling.

TEST 6 PART 4

Welcome to the River Farm. I'll be giving you a short tour of the main areas so you can get familiar with the layout before you begin your visit. Let's start near the southern edge and work our way around the property.

As you walk up from the entrance, you will see a corn field on your left. It's a wide, open area used for growing maize, and it's one of the farm's most productive zones during harvest season.

Further up, there is a well. It provides fresh water for both the animals and the crops. Above the well is the chicken coop. This small building houses the farm's hens and roosters. It's a busy spot in the mornings, especially when eggs are being collected.

Further up, at the end of the path to the left, you will see the shed. It is used for storing tools, equipment, and seasonal supplies. You'll come across the orchard area just to the right of the shed. This area is filled with fruit trees—apples, pears, and plums—and it's especially beautiful in spring when everything is in bloom.

At the end of the path to the right, stands the farmhouse. It's the main residential building and visitors often stop here to ask questions or get directions. Just behind the farmhouse, near the river, is the vegetable garden. It's a well-organized plot with rows of carrots, lettuce, tomatoes, and other seasonal vegetables. This area supplies fresh produce for the local market.

Between the Tractor Garage and the Greenhouse is the windmill. It's a tall structure used to generate power and pump water. Though it's no longer the farm's main energy source, it remains a proud symbol of the property's history.

That concludes our tour of River Farm. Feel free to explore the rest of the property and enjoy the peaceful surroundings!

TEST 6 PART 5

Extract One

Interviewer: OK. now the outcome is a magazine that's filled with competitions, short stories, puzzles, and a cartoon strip. Flicking through the first issue. I'd say two things become apparent – enthusiasm and the language used.

Kate: Enthusiasm is incredibly important. When I was at school, it didn't matter what you were

teaching children if you totally believed in it. When you give a bad lesson, you can see those blank faces looking back at you. I really hope I get that belief across, and that children find it entertaining and become interested in what's going on around them all the time.

Interviewer: How about the actual style of writing itself?

Kate: The whole brief to my writers was that they should approach it as if they are talking to intelligent people. Of course, you can't use some words because they would go above children's heads. But when I was doing my research, I put a number of texts in front of children. They are very perceptive – if they feel they are being talked down to, they see it. So it's all written in a direct way, rather than assuming you have to use a very childish style – the readers wouldn't like that.

Extract Two

Dir. A: Okay, we've got to decide who to promote to Leading Education Officer.

Dir. B: Someone from the arts faculty, I suppose.

Dir. A: Well, it can be from any faculty, since the position requires more general skills: handling personnel, settling disputes, and motivating them to focus on the task. It was the last position which involved computer knowledge, not this one.

Dir. B: Surely computer knowledge would help. So too would knowledge in the arts.

Dir. A: Sure, it would help, but the key criterion is being able to direct the staff appropriately.

Dir. B: So, it doesn't matter then from which faculty we select our candidates?

Dir. A: Not really, but I've already looked at those from computing, and rejected them all.

Dir. B: Why?

Dir. A: They'll all too new, lacking in sufficient experience, whereas these ones from the business faculty are longtimers, so we'll take someone from there.

Extract Three

Interviewer: So you have quite a lot of contact with artists?

Rachel: Yes. Sometimes I spend nearly all day on the phone and about fifty percent of the time it's artists. I send letters explaining why we can't show their work – some of them phone up to argue about it – I find those calls very hard to deal with. Artists we do exhibit also phone to find out if we've managed to sell anything and, if we have, when the money will be coming through. I don't mind those so much. Most other calls are from clients. We have a new artist exhibiting here every two to four weeks and before the show takes place, we send out a catalogue to the clients on our database.

Interviewer: Obviously the catalogue's illustrated?

Rachel: Oh yes, and as soon as the catalogue goes out, we start getting phone calls because people see something they like and want to reserve it. Sometimes they even buy things over the phone. The catalogue also contains a commentary about the artist, which I have to write and research. I try to find out what has influenced them, where they learned to paint, what the subject matter represents, that sort of thing, but I try to avoid quoting from positive reviews of their work; it's not meant to be advertising as such.

TEST 6 PART 6

Mars has fascinated scientists and explorers for decades. But while the idea of sending humans there is exciting, the reality is far more complex. A round-trip mission could take many months, and just reaching the planet itself requires a significant amount of time—far longer than a single **day**. That kind of journey demands careful planning and resilience.

One of the biggest concerns is the environment beyond Earth's protective shield. Without the benefit of our atmosphere, astronauts are exposed to intense **radiation**, which can be harmful over long periods. Shielding and monitoring systems are essential to reduce the risks.

Then there's the financial side. Developing spacecraft, life support systems, and safety protocols for interplanetary travel comes at a steep price. It's no surprise that missions like these are considered extremely **expensive**, often requiring international collaboration and years of investment.

But it's not just technical or financial challenges. The human aspect is equally important. Spending months in confined quarters, far from family and familiar surroundings, can lead to feelings of **isolation**. Maintaining mental health and team morale becomes a top priority.

Of course, not everyone agrees that space exploration should be a priority. Some argue that the resources used for missions to Mars could be redirected to address urgent issues here on Earth—like **poverty**, education, or healthcare. It's a debate that continues to shape public opinion and policy.

And finally, there's the question of safety when it comes to Martian soil. Scientists are cautious about the possibility of unknown **microbes**—tiny organisms that might exist on Mars and could pose risks if brought back to Earth. That's why strict containment procedures are part of every sample-return plan.

Despite these challenges, the dream of exploring Mars remains strong. Each step forward brings us closer to understanding our place in the universe—and what it might take to live on another world.

TEST 7 PART 1

1. Where did you get the jacket?
2. What do you eat for breakfast?
3. Shall I help you carry the box?
4. Is this your first time in London?

5. How much did you pay for it?
6. What time is your meeting?
7. Can I give you a hand?
8. Can I give you a lift?

TEST 7 PART 2

Welcome to Lincoln library! You'll all be coming here quite often, so it's important to understand how everything works. I'm going to give you some useful information to help you get started.

Let's begin with the opening hours. During term time, the library is open 24 hours a day. That means you can come in early in the morning or even late at night—whenever it suits you. It's great for students who like to study at different times.

However, outside term time, the hours are shorter. The library opens at 8:30 in the morning and closes at 7:00 in the evening. So, if you're planning to visit during the holidays, make sure you come before closing time.

Now, what can you borrow from the library? There's a wide selection of items available. You can take out books, of course, but also magazines and CDs. You're allowed to borrow up to ten items in total. But remember, only six of those can be books. So, for example, you could borrow six books and four magazines, or five books and five CDs.

Please make sure you return everything on time. If you're late, you'll have to pay a fine. The fine is two pounds per day for each book, and one pound per day for other items like CDs or magazines. So it's a good idea to keep track of your return dates.

To borrow anything, you'll need a library card. Getting your first card is free, but you do need to fill in a form and provide a photo. If you ever lose your card, don't worry—you can get a replacement. But a new card will cost five pounds.

That's everything for now. If you have questions, just ask a member of staff. We're always happy to help. Enjoy your time at the library!

TEST 7 PART 3

Speaker 1.

A: Hey, could you look after my bag for a while? I just want to buy a bottle of water. I always feel nervous and thirsty before a flight.

B: Yes, sure. And buy one for me please. Without gas, just still water.

A: OK.
Oh your bag is so heavy! You must be a champion in weightlifting if you are able to travel with such heavy luggage. B:
A: I just asked you to look after the bag, not to hold it.
B: OK. I won't. Come on. Fetch the water and we'll go to the check-in area.

Speaker 2.
A: What are you doing? Why are you moving the furniture?
B: I just want to redesign my room. It was written in some magazine that if you change the design in your room, it helps you to become more creative and it inspires new ideas.
A: I don't think that moving your writing desk to the darkest corner of the room will give you anything but eye problems.
B: Don't you?
A: If you want something to be changed why not start with tidying up your room? Just move your clothes from the sofa to the wardrobe, dust the shelves, and water the flowers look they are fading without your care.

Speaker 3.
A: Hi! You are early today.
B: Yes. I've been exercising with the ball and now I'll try to throw it into the basket. I've decided to spend more time on training.
A: Why? Are you taking part in a competition?
B: No. But the coach of our basketball team told me that he would allow me to join the team...
A: Oh, did he?
B: Yes. But only if I am fit to join. Pass me the ball, will you?

Speaker 4.
A: You read the labels so carefully... Why?
B: Because, I always read the labels before I decide to buy food or not. I want to know exactly what we are going to eat.
A: Is it so important?
B: To me yes. Just look: this butter contains too much fat, which means too many calories. And this butter, on the other hand, has too little fat. It means it may be not tasty... As for the other products...
A: I'm sorry, but ... if you are planning to analyse all the goods you want to buy like this, I'd rather be off. I can't spend the whole evening here.

TEST 7 PART 4

Welcome everyone to the History Museum! Before we begin our tour, I'll quickly guide you through some of the main facilities you might want to visit during your time here.

We're standing right now near the reception desk, which is in the center of the building above the locker room. From here, if you look slightly to your left from the desk, you'll see the tour guide desk, where you can sign up for guided tours that start every hour.

Just behind us, in the middle of the hall, above the reception desk and tour guide desk, there's an interactive display — it's a touch-screen table that allows you to explore historical maps and ancient artifacts digitally. It's a great way to learn more before seeing the real items.

Now, if you walk towards the upper left side of the museum, you'll find the museum shop, located just beside the South American Exhibitions. You can buy souvenirs, postcards, and some historical books there.

Moving across to the opposite side, at the top right corner, next to the sculpture hall, there's the Reading Room. It's a quiet area where visitors can read historical journals or research materials related to our exhibitions.

And finally, before you start exploring, you might want to know that the restrooms are located in the bottom right corner, right next to the locker room — a convenient place to leave your bags while you walk around.

That's a quick overview of the main facilities. Now, let's begin our tour with the Sculptures section, which is just ahead of us.

TEST 7 PART 5

Extract One

Ann: I wasn't expecting to enjoy that lecture quite as much as I did. Usually, those afternoon sessions are a bit of a struggle to get through.

Ben: Same here. I thought it'd be one of those overly theoretical talks, but the lecturer had this clever way of breaking things down. It wasn't just slides and definitions — he made it feel practical somehow.

Ann: Yes, it's like he anticipated the points we'd find confusing and addressed them before anyone even asked. That kind of structure really works for me.

Ben: Agreed. Though I can't help thinking I'd have followed it better if I'd read the material, he

uploaded beforehand.
Ann: Don't remind me. I skimmed it on the bus this morning and immediately regretted not starting earlier.
Ben: We keep saying we'll prepare in advance next time, but somehow it never happens.
Ann: Maybe after today's lecture we've finally learned our lesson.

Extract Two
Woman: I still can't believe how intense those two days in Brussels were. Everything seemed to hinge on that one presentation.
Man: I know. I was worried it might all be a waste of time, but in the end, I think we managed to tip the balance in our favour. The board seemed far more open to our proposal by the end of the meeting.
Woman: You think so? I couldn't quite read them. Some of them looked skeptical.
Man: Sure, but that's to be expected. The important thing is that they're now considering our plan seriously. That's what we set out to do, and we pulled it off.
Woman: True. I was so nervous beforehand, but it was worth the trip. I can't say I enjoyed every minute, but I'm glad the outcome justified the effort.
Man: Exactly. It feels good when the long hours of preparation actually lead somewhere.

Extract Three
Interviewer: You've had quite a career in molecular biology. Did you ever imagine you'd reach this point when you started out?
Scientist: Not at all. When I began, I was just thrilled to be part of a lab doing meaningful work. I never thought the projects I joined would end up influencing the direction of the field. It's been far beyond what I initially pictured.
Interviewer: That's wonderful. What would you say to younger researchers hoping to follow a similar path?

Scientist: I'd tell them not to romanticize the work. Research isn't about sudden breakthroughs every week — it's about understanding the discipline itself. You need to know what's expected of you, the standards, the ethics, the patience it requires. Without that awareness, you won't last long.
Interviewer: So, being a researcher is as much about knowing the rules as it is about innovation?
Scientist: Exactly. It's knowing where creativity fits within structure. That's something I wish someone had told me at the beginning.

TEST 7 PART 6
Lecturer: In the last lecture, we looked at the adverse effects of desert dust on global climate. Today we're going to examine more closely what causes dust storms and what other effects they can have.

MULTILEVEL ZONE MOCK EXAM

As you know, dust storms have always been a feature of desert climates, but what we want to focus on today is the extent to which human activity is causing them. And it is this trend that I want to look at, because it has wide-ranging implications.

So – what are these human activities? Well, there are two main types that affect the wind erosion process, and thus the frequency of dust storms. There are activities that break up naturally wind-resistant surfaces such as off-road vehicle use and construction and there are those that remove protective vegetation cover from soils, for example, mainly farming and drainage. In many cases the two effects occur simultaneously which adds to the problem.

Let's look at some real examples and see what I'm talking about. Perhaps the best-known example of agricultural impact on desert dust is the creation of the USA's 'dust bowl' in the 1930s. The dramatic rise in the number of dust storms during the latter part of that decade was the result of farmers mismanaging their land. In fact, choking dust storms became so commonplace that the decade became known as the 'Dirty Thirties'.

Researchers observed a similar, but more prolonged, increase in dustiness in West Africa between the 1960s and the 1980s when the frequency of the storms rose to 80 a year and the dust was so thick that visibility was reduced to 1,0 metres. This was a hazard to pilots and road users.

In places like Arizona, the most dangerous dust clouds are those generated by dry thunderstorms. Here, this type of storm is so common that the problem inspired officials to develop an alert system to warn people of oncoming thunderstorms. When this dust is deposited it causes all sorts of problems for machine operators. It can penetrate the smallest nooks and crannies and play havoc with the way things operate because most of the dust is made up of quartz which is very hard.

Another example – the concentration of dust originating from the Sahara has risen steadily since the mid-1960s.

This increase in wind erosion has coincided with a prolonged drought, which has gripped the Sahara's southern fringe. Drought is commonly associated with an increase in dust-raising activity but it's actually caused by low rainfall which results in vegetation dying off.

TEST 8 PART 1

1. Where did you put my book?
2. Do you want tea or coffee?
3. Can you help me with this box?
4. When does the train leave?
5. Did you enjoy the film?

6. Where is the nearest bank?
7. What is the weather like today?
8. Can you close the window?

TEST 8 PART 2

Hello! My name's Jessica Chapman, that's spelled JESSICA C-H-A-P-M-A-N. I'd like to tell you about a job I did a few months ago. It was a really interesting experience, and I learned a lot from it.

I worked as an online language teacher, helping schoolchildren in China to learn English. It was my first time teaching online, and I found it both exciting and challenging. I used special software to connect with the students, and we had lessons twice a week, every Monday and Wednesday. Each lesson lasted two hours, which gave us plenty of time to talk, learn new words, and practise speaking.

My students were all quite young—between eight and ten years old—and they were at about the same level in English. That made it easier to plan the lessons because I could use similar activities for everyone. The groups were small, usually three to six students, so I had time to help each child individually.

One of the best parts of the job was using an interactive whiteboard. It appeared on my screen, and I could write and draw on it during the lesson. The students could see everything I did, and they could also take part. We used the whiteboard to play word games, draw pictures, and even sing songs together. It made the lessons fun and helped the children stay focused.

I first saw an advertisement for the job in January, and I applied straight away because it sounded perfect for me. I waited about a month, and then I got a reply saying I had been accepted. I started working in July, and continued until September.

I really loved my job, and I was sad when the job came to an end.

TEST 8 PART 3

Speaker 1

I wanted to study fashion, so I had to come to the capital, but it was hard leaving my friends back home. My older sister studied here too. She made friends really quickly because she's really into sports and joined loads of clubs. But I've always been quite shy, so I didn't do that. Fortunately, the college accommodation office found me a room in a residence and I got friendly with the other girls living there. I don't know how I'd have got on at a big university, but here everyone knows each other – so you get to know people you wouldn't normally have that much in common with – it's nice.

Speaker 2

In my first few weeks here, I came down with a heavy cold that meant I couldn't go out much. I'd been put in a student residence with a bunch of younger guys who were all studying theatre – so as a scientist I had nothing in common with them – they weren't even into football! So I really needed to get to know my classmates better – yet there I was stuck in my room coughing and sneezing. I spent a lot of time chatting to friends back home on the internet. Anyway, in a big college like this, you eventually have to make friends – so it all sorted itself out in the end.

Speaker 3

I was put in a student residence at first with people I didn't get along with that well. I mean, we didn't fall out or anything, but I didn't hang out with them either. I don't know what I'd have done if I hadn't signed up for volleyball training with the college team. It's a whole lot easier making friends with people who share your interests than with people who share your kitchen! The only downside for me in that first term was that I spent too much time on court and not enough in the library! I don't regret it, but had to make up for lost time later on!

Speaker 4

The people I hung out with in the first few weeks didn't become close friends actually. We were just people who happened to be thrown together in the same residence, but it was good to have someone to chat to when I got in from lectures. We still play tennis occasionally and I get invited to their parties, but I soon moved out to go live with some guys on my course. That was a big mistake actually. With friends at school, it was great to study together in the evenings – but I soon found that the last thing I wanted to talk about when I got back from lectures was economics!

TEST 8 PART 4

Alright. I'd like to quickly go over where everything is located. So look at your maps of Parsons Fruit Farm and find the main yard. It's towards the bottom of your maps. That really is the center of the farm.

Okay. The first place I'll mention is the workshop. This is close to the main yard. But you actually have to leave the yard to get into it. So, you need to take the road that goes out to the orchards, and you access the workshop from there.

Then the lunch room. On the north side of the map, there's a road that curves sharply round to the left. Halfway around this bend, you'll find the entrance to the lunch room. It's a pretty place, next to the river and also beside a little wood. You also need to be able to find the farm office.

So if you look at the main yard, you'll see there's a number of different buildings located around it, and the farm office is the smallest one. It's on the South side. Obviously, the first aid room is important. Now this is close to the main yard, so it's quick to get there, And it's actually more or less in the middle of your maps. That little building that's attached to the farmhouse.
Then the store shed. From the main yard, take the road heading north. Go past the farmhouse and turn right. The store is down that road. If you come to the vegetable gardens, you've gone too far.
Now the other thing is the farmhouse is further than you'd expect.

TEST 8 PART 5

Extract One

Susan: Well gentlemen, we've almost finished our second semester at this university. What do you think of all the courses we attend?
David: On the whole, I'd say they're quite good, apart from Social History, which I find to be a little too inexact.
Steve: Yes, the lecturer's style is also very very dull.
Susan: I certainly agree with you there, although I would say that the textbook is more interesting. 'Welfare State'. The subtitle says, 'An examination of social development in the 20th century.'
David: Yes, 'Welfare State' is a good book, but look how many pages it has. 458!
Steve: I agree. It's just too long to be easily read. Far too long, although it's certainly well written in parts.
David: Yes, and if you compare it to the textbook for Cultural Studies—what's it called?
Susan: 'Inner Views', I think.
David: No, that's the book for Media Studies, and we finished that subject last semester. The book you're thinking of is 'In Perspective'

Extract Two

Frank: Hi, Nicole. As you know, we've got to decide on the best ways this university can reduce its waste. You inspected the eastern campus, and I did the western buildings. Did you do all the interviews as well?
Nicole: Yes, I interviewed all the staff, who made some good observations, and I interviewed some of the students. The students said little that was interesting. They don't seem to care that much. It was the cleaners, surprisingly, who revealed the most relevant facts.
Frank: That's not surprising to me. They empty all the bins, so they see the waste first- hand, whereas the staff just throw things away without thinking. What item was most commonly disposed of?
Nicole: Well, it really depended on where I interviewed. In the cafeteria precinct, obviously paper plates and cups were thrown away all over the place. There was almost no attempt at recycling.

However, across the university in general, it was paper copying that filled up most bins, far more than plastic, or other forms of waste.

Extract Three

Interviewer: Do you train every day or do you take a day off?

Ann: The accepted idea is that all professional sportspeople should have at least one rest day a week, so the body can recover. I'm not a great believer in that though. At my age I find I can keep going without one. I do five hours a day and I'd even like to be able to do more than that, but I don't want to push my body too hard, because that can lead to other problems.

Interviewer: What about your competitors in races – do you get to know them as friends?

Ann: I race against athletes from all sorts of places. I wouldn't say I've got friendships with them, though I'm sure some of them are really good guys, but I tend to keep a professional distance. It'd be too easy to let friendships start interfering with the way I run races. Of course, at my age chatting about life, having fun and a good social life are important to me. I share a house with three mates. They're the people I really get on well with.

TEST 8 PART 6

I'm going to report on a case study of a programme which has been set up to help rural populations in Mozambique, a largely agricultural country in South-East Africa.

The programme worked with three communities in Chicualacuala district, near the Limpopo River. This is a dry and arid region, with unpredictable rainfall. Because of this, people in the area were unable to support themselves through agriculture and instead they used the forest as a means of providing themselves with an income, mainly by selling charcoal. However, this was not a sustainable way of living in the long term, as they were rapidly using up this resource.

To support agriculture in this dry region, the programme focused primarily on making use of existing water resources from the Limpopo River by setting up systems of irrigation, which would provide a dependable water supply for crops and animals. The programme worked closely with the district government in order to find the best way of implementing this. The region already had one farmers' association, and it was decided to set up two more of these. These associations planned and carried out activities including water management, livestock breeding and agriculture, and it was notable that in general, women formed the majority of the workforce.

It was decided that in order to keep the crops safe from animals, both wild and domestic, special areas should be fenced off where the crops could be grown. The community was responsible for creating these fences, but the programme provided the necessary wire for making them.

Once the area had been fenced off, it could be cultivated. The land was dug, so that vegetables and

cereals appropriate to the climate could be grown, and the programme provided the necessary seeds for this. The programme also provided pumps so that water could be brought from the river in pipes to the fields. However, the labour was all provided by local people, and they also provided and put up the posts that supported the fences around the fields.

TEST 9 PART 1

1. Is that you, Emma? Wow, it's been ages!
2. It's lovely to meet you.
3. Where is your hometown?
4. Is that man Rick?
5. Really nice of you to join us.
6. We have to leave now. It's getting late.
7. Tell your sister I said hi!
8. Fred, how have you been these days?

TEST 9 PART 2

Ben: Hello, everyone. My name's Ben, and I'm here to tell you about a new maths course you can join on Saturday mornings.

I work for an organisation called "Bright Numbers." We run weekend courses for young people who want to improve their maths skills in fun and practical ways. At school, you often learn maths from books, but this course is different. It's designed to help you use maths in real life.

We usually hold our sessions in places that are easy to reach. Sometimes we use classrooms, but for your group, we've booked a space at the local community centre. It's nearby and has everything we need.

The course lasts for 12 weeks, and you'll spend six hours with us each Saturday. That might sound like a lot, but most students say the time goes quickly because the activities are so enjoyable.

During the course, you'll work on projects that involve real-world maths. For example, you'll learn how to measure and build simple structures, plan a budget for a small event, and even design your own board game using maths puzzles.

Last time, students created their own maths-themed escape rooms. This time, we'll ask you to design a maths trail that younger children can follow in the park. You'll make signs, write clues, and test the trail yourselves. When it's ready, you can invite your family to try it out.

We think you'll have a great time and learn a lot. Now, does anyone have any questions?

TEST 9 PART 3

Speaker 1:

I rely on the bus every morning to get to work, and honestly, it's one of the most stressful parts of my day. The timetable says a bus should come every fifteen minutes, but that almost never happens. Some days two buses arrive at once, and other times you can stand there for half an hour with no sign of one. What's worse is that there's no proper information system — no display to tell you if it's delayed or cancelled. You just have to wait and hope. When it's raining or freezing cold, that's the last thing you want to be doing. It really feels like the transport company doesn't care about how unreliable it's become.

Speaker 2:

My main complaint is the overcrowding, especially on the underground trains in the morning. It's honestly unbearable. By the time the train reaches my stop, there's barely enough space to stand, let alone breathe comfortably. Everyone's squeezed together, trying not to step on anyone's toes. You can feel people's bags and elbows pressing against you, and sometimes you can't even reach the handrail to hold on. It's uncomfortable and kind of stressful too. I've started leaving home earlier just to avoid the worst of it, but even then it's packed. I really wish they'd add more trains during rush hour or at least make the carriages bigger.

Speaker 3:

I don't use public transport every single day, but when I do, it's usually in the evening. That's exactly when it becomes a problem — because the buses and trains stop running so early. The last bus to my area leaves before midnight, which makes it nearly impossible to go out for a late dinner or see a movie with friends unless I plan to walk home or spend a fortune on a taxi. It's frustrating because our city isn't that small, and a lot of people work shifts or finish late. Extending the service hours would make such a big difference. I just don't understand why they haven't done it yet.

Speaker 4:

What really puts me off using public transport is how dirty everything is. The buses, the trains, even the stations — they all seem neglected. You sit down and notice stains on the seats or bits of chewing gum stuck under the tables. Sometimes the floors are sticky, and it's obvious no one has cleaned them properly in days. It's not just unpleasant — it makes the whole journey feel uncomfortable. I think if they spent more effort on keeping things clean and tidy, more people would actually want to use public transport. Right now, it just feels unhygienic, especially during flu season when everyone's coughing and sneezing.

TEST 9 PART 4

OK, now let's move on to some details about the conference and what will be happening where. Let me just briefly take you through the map that you've all got in your welcome pack. Right, here on the map, we've marked all the sessions that are taking place this morning, and you've already indicated which ones you'll each be attending. For those of you going to the session on Setting Up a Fitness Centre at work, you go out of the Main Hall here through those doors, turn right at reception and go along the corridor to the Taylor Room, which is on your left. You'll get lots of good advice there on the possibilities and costs of a workplace fitness centre.

The talk on Healthy Eating Schemes is in the Martin Suite. For that, you need to go out of this hall the other way, through the doors at that end, and that takes you straight through to the Martin Suite. If you're keen to introduce healthy eating schemes in your canteens and restaurants, or to improve ones you've already got, you'll get lots of really good ideas from that session.

Now, those of you attending the session on Transport Initiatives, you're in the Fender Room. To get there, you need to go out of those doors that bring you out opposite reception, turn left and left again into a corridor. The Fender Room is the third door on your right. The session will cover everything from how to encourage people to walk or cycle to work to car-sharing schemes.

For those of you who have signed up for the workshop on Running Sports Teams, that will take place in the Gibson Suite. The whole issue of organising company teams, recruiting people for them, encouraging people to take part in them whatever their sporting ability, taking part in competitions – all that will get covered in the workshop. You'll find that if you go out of here, turn right at reception and then right again. The first door you come to on the left is the Gibson Suite.

Finally, if you need any more information or have any queries while the conference is going on, you'll find me in the Conference Coordinator's Office. From here, that's to the left of Reception and along the corridor past the Entrance Hall. If you keep going along the corridor, you'll find my door at the end on your right. Please come and see me if there's anything you want to ask or find out.
OK, let's get started. I hope that you all enjoy …

TEST 9 PART 5

Extract One

Interviewer: ... so Monarch butterflies live in the Rocky Mountains of North America, don't they?
Man: That's right, but unlike other insects in temperate climates, they can't survive a long cold winter. So, they overwinter either along the Californian coast, or high in the mountains of Mexico.
Interviewer: Is there a consistent pattern to their behaviour?
Man: Well, the migration is driven by seasonal changes. Both daylight and temperature influence the

movement of the Monarch.
Interviewer: And is this migration unusual?
Man: Well, in fact no other butterflies migrate quite like these do. They travel much further than any other species.
Interviewer: Oh? And where do they settle?
Man: Well, they fly in masses to the same winter roosts, often the same tree, unbelievable I think really. It's an amazing sight.
Interviewer: That's more the type of migration you expect from birds and whales surely?
Man: Except that unlike birds and whales, these butterflies have a very short lifespan so only a small proportion make the migration trip.
Interviewer: They only do it once then ...
Man: To explain it in human terms, it's actually their children's grandchildren that return south the following fall.
Interviewer: I see.

Extract Two
Woman: Did you watch the Cook of the Year final?
Man: You bet. The winning dish Salima cooked yesterday was really unusual. The colours were fantastic!
Woman: Yeah, I felt she pulled out all the stops just when it mattered. She hasn't performed consistently throughout the competition though - she's had real ups and downs. I thought Ali should have got the prize - he performed so steadily in all the rounds.
Man: Well, at the key moment, Salima shone and he let himself down.
Woman: Mm. I wonder if the next series will be the same? I enjoy watching it, but it is getting a bit repetitive.
Man: Oh, I like that, it's reassuring! Although it would be good to have someone new on the expert chef panel to make their decisions.
Woman: Mmm, well, I think they need a few innovative featHures each week.
... Man: What, like um, something about the countries the recipes come from?
Woman: Exactly.
Man: Huh. Maybe they should try a programme where people can only cook in one particular style, you know, Italian, Thai, whatever.
Woman: Mmm, sounds good in theory, but would it be rather limiting?
Man: Well, I suppose it might be ...

Extract Three

Peter: Hi, Claire, how was the South African trip then?

Claire: Oh, it was fantastic, Peter. And the best part was the game park, just like you'd led me to expect.

Peter: Well, we went two years ago and I've never forgotten seeing all those animals for real. Elephants, lions, giraffe - it is so much better than seeing them on screen - huge animals suddenly emerging from the trees. And the landscape - wide horizons in every direction...

Claire: Yeah, and what about those sunsets? They were just out of this world, weren't they? But we did have one rather unnerving encounter ...

Peter: Oh?

Claire: Yeah, with an elephant. It started poking at the windows of our jeep with its trunk. Then it sort of wrapped itself around the vehicle and started wiggling it.

Peter: That must have been scary.

Claire: Well, not really.

Peter: Elephants can be aggressive...

Claire: Not this one. It jostled the jeep with its tusks, and then just turned and walked away.

Peter: Was it after the provisions you had on board?

Claire: 'I think it was probably just wondering what we were, and having checked us out it left us alone.

Peter: You won't forget that!

Claire: Certainly won't!

TEST 9 PART 6

Last month I spent some time at a Cheetah Conservation Centre in Namibia in South West Africa. Anyone can go. You don't need to be an expert but they emphasise that you have to be flexible - there's such a wide range of tasks you might be involved in. And of course, you need to be tolerant of high temperatures and able to walk on rough terrain.

I'd always dreamt of sleeping under the African stars but there were so many strange noises I didn't really enjoy it. We had all our meals outside and made a proper camp fire and barbecued food on it - I wasn't particularly good at any of that but learning to bake bread was fantastic and I took on that role. The fire made it taste so much better than an indoor oven.

And of course, the work was so interesting. Cheetahs are a bit like sports cars - designed for speed - they're long and slim rather than muscular like a lion or tiger and, unlike other members of the cat family, their paws are extremely narrow with claws which grip the ground in a similar way to a car tyre. They look quite similar to leopards but I soon learnt to tell them apart.

So, what was I actually doing? Well, I helped to follow the movements of the cheetahs. The data was collected in a special collar, which had been perfected after years of research. Scientists wanted a way of attaching something very light and small to the animals which could be powered by solar batteries and now they've done it.

I was following three female and two male cheetahs. The equipment was only activated when the animal moved and it recorded where each cheetah was, which direction it was headed, and how fast it was moving, with the data being sent up to 300 times a second via radio signals.

I'd always thought that cheetahs are such good hunters because they run so fast but in fact, I discovered that what gives them a huge advantage is their ability to 'turn sideways. This is something they can do in a second or so when they spot some food and it's that rather than the way they move forwards, which makes them so agile.

We wanted to check on when the cheetahs preferred to hunt, expecting it to be the cooler ends of the day. This indeed was the case but our research showed that more hunting took place at dawn than at twilight and that some hunting was even done at night.

We also looked at where the cheetahs spend their time. They're mostly seen in open grassland, only occasionally venturing among shrubs and trees. But in fact, what the tracking equipment unexpectedly revealed was that they also headed into thick vegetation sometimes, leaving the open ground.

It was so interesting to learn more about these beautiful creatures and how they live. I'm really hoping I can return to the centre again next year.

TEST 10 PART 1

1. Do you have any more questions?
2. Where is your friend’s flat?
3. Can you please speak to John about the new car?
4. Do you know how to play bingo?
5. Emily talked to me last night.
6. I am planning to open a football club.
7. Is this tomato sauce?
8. Have you ever visited Morocco?

TEST 10 PART 2

Hello everyone. Before we finish today, I'd like to tell you a bit more about our trip to the town of Chester tomorrow. I hope you're all looking forward to it!
The coach will leave at 9:15 in the morning, so please make sure you arrive at least 15 minutes early. We don't want to leave anyone behind! The journey will take about an hour and a half, so we should arrive in Chester at around 10:45. That gives us a little time to stretch our legs and maybe have a quick cup of coffee or tea before we begin our first activity.
Our first stop will be a visit to the castle. It's a very old and beautiful building with lots of history. You'll be able to walk around the rooms, see the old furniture, and even climb one of the towers if you like. The view from the top is fantastic! I'm sure you'll enjoy it. Tickets cost £3.50 for adults, and if you're coming with children, you can get a family ticket for just £8.
We'll spend about two hours at the castle, and then we'll head to the park for lunch. We'll bring sandwiches and drinks, and we'll all eat together on the grass. If you'd like to bring your own snacks or something extra, that's absolutely fine. And the good news is – the weather forecast says it will be sunny and warm, so don't forget your sunglasses or a hat.
After lunch, we'll take a walk around the old market. It's a great place to explore. There are lots of small shops and stalls where you can buy souvenirs, handmade gifts, and local food. It's the perfect place to get presents for your friends or family. We'll spend about an hour and a half there, and then we'll meet back at the coach at around 3:30 p.m. to return home.
Please remember to wear comfortable shoes, as we'll be walking quite a bit. And if you have any questions or special needs, feel free to come and speak to me after this talk.

TEST 10 PART 3

Speaker 1:
I need to stay on top of trends as it's no good stocking stuff that nobody will want. If I want to put a new range of clothes in the shop, I have to drop an existing supplier, even if they've had a long relationship with us. There are two key seasons: early in the year and the summer, and during those months I go all over the place to international trade shows. I have to do really long days then but I love the stimulus of going to different places. When I'm back in the office I spend a lot of time looking at budgets and gross profits.
Speaker 2:
My job is all about giving instructions and processing large amounts of complex data. You also have to be able to cooperate with those working alongside you. We can't risk one person not pulling their weight and it's a good feeling that we can all trust each other. Because situations can develop really

quickly, you've got to stay calm and really be on the ball. The busier it is, the more you need to focus. There are so many people travelling nowadays that we're required twenty-four hours each day so I work different shifts but when it's time to go home, I take my headset off and I switch off completely.

Speaker 3:
I work closely with curators, deciding how things will be displayed, and liaising with designers and project managers on anything from writing audio guides to discussing what should go on the website or in the shop. My other responsibility is to raise our international profile by travelling abroad. That could take over completely but I make sure it doesn't. I start work early, around seven thirty, and finish about five thirty every day so that's a real bonus as I know the rest of the day is for my family. I have daily team meetings with curators and about twice a week I meet people from marketing and we look at the promotion budgets.

Speaker 4:
In this job you have to accept that longer hours will be expected and required of you at times. I like the people I work with but because we're all on top of each other I sometimes see a little more of them than I want to. Each job I do is different. I might be working on a divorce case one week and a neighbourhood dispute the next. For the most part I have to negotiate and communicate with two sides so I'm always learning different ways of dealing with situations. That appeals to me. I get bored otherwise. I'm hoping one day I'll be able to take my skills abroad.

TEST 10 PART 4

Welcome to our holiday special. Today I'll be talking about a new cycle route in this area called the Elmsdon Way. It's well signposted so you can see exactly where to go and it's an easy ride with no steep hills. It's 35 kilometers long from Elmsdon to Langton, and consists partly of cycle paths and partly of roads. Let me outline the route briefly, starting at Elmsdon Railway Station.

The first part is a cycle path running eastwards, roughly parallel to the rail track. Almost immediately the railway curves away and goes around the southern side of a little lake, but the cycle path takes the northern route around the lake. Keep your eyes open for the swans that nest there. The path then joins the road, and the next landmark is a group of massive rocks that tower over the countryside. You'll see them to the east of the road just before the road goes under the railway.

They're imposing. Soon, you'll come to a fork in the road where you'll leave the road and head off towards the river. But if you want to make a detour to Corley Nature Reserve, go straight on instead of leaving the road here. Continuing along the cycle path, you'll reach the River Cleave. The cycle path follows the river southwards.

After a bit, you'll see the Ashington China factory, which closed in 1962. It now offers guided tours to the public, which is worth a visit. Right after the factory, there's a bridge over the river, and you carry on with farmland to the north right after the bridge and the Langton Forest to the south. Somewhere between the cycle route and the railway line cited a statue of Captain Cook, which dates back to the eighteenth century. The route ends at Langton Village, where you'll find a railway station.

So you can either catch the train here or cycle back to Elmston.

TEST 10 PART 5

Extract One

Maria: What did you think of the book I lent you, David?

David: Well, it was slow to start with, Maria.

Maria: Oh, I thought it was a real page-turner ...

David: Well, I did get into it once I'd worked out why all the characters kept contradicting themselves! It didn't seem plausible that they'd do that.

Maria: Oh, I thought they were fantastic characters - the contradiction's all part of the plot, isn't it?

David: I guess so ...

Maria: Did you like the descriptions of Istanbul?

David: I did, yeah, I've never been there but I'd love to see the places the author writes about.

Maria: She was born there, so I imagine she's got the detail right, but I'd love to check that out for myself.

David: Mmm. Is it a book you'd reread?
Maria: Definitely. I liked the style and with the chapters all being told through the eyes of a different person, you get a varied perspective on what happens.
David: Is that it then? We never know what's really happened because no two people see things the same? And they change their minds from day to day?
Maria: Absolutely. Not an original approach, but that's exactly what the author wanted to put across.

Extract Two
Paula: Great bracelet, Simon.
Simon: This? I got it when I was a young man, still living in Zambia.
Paula: Oh, was it a gift?
Simon: Well, it's been in my family for several generations It came to me from my uncle, whose father, my grandfather, had worn it before him. It's made of elephant hair. In my tribe, the Kaonde, the elephant represents the good qualities of leadership - anything with a link to an elephant is said to confer gifts of responsibility, hard work and success. So, when he gave me this bracelet, my uncle was telling me he thought! had the capacity to be a leader.
Paula: That's fascinating.
Simon: I wear the bracelet every day and it makes me aware of the need to be focused in life.
Paula: I see. So, when you look at it you think about what really matters. Does it help with your work at the community centre? Lots of people there come from Africa, don't they?
Simon: Yeah, or their parents did.
Paula: So, anyone who had grown up in Zambia would look at this bracelet and understand the significance of it.
Simon: Yes, people often mention it.
Paula: That's really interesting.

Extract Three
Louise: Well, I think this dress is the best thing so far, but I'll need something to go over it.
Joanna: I like it Louise, it's an unusual shade of pink. It wouldn't suit everyone, but it's good on you. How about a white jacket to go over it?
Louise: Well, I was thinking I could just wrap a pashmina round me. I think they're warm and practical but look quite glamorous.
Joanna: Yeah. You can wear them with anything really, even over a coat.
Louise: Right.

Joanna: You've decided not to get the trouser suit then?
Louise: Well, it would be more useful, but I've got lots of others... too much like work.
Joanna: Okay - but the cream one you just tried on didn't look like something you'd wear to the office. What's Jack wearing then?
Louise: Oh, he's finally bought a really stunning new suit.
Joanna: What? After saying for years that no one was going to make him wear one?
Louise: Absolutely. And he's paid a lot for it too ... it's a designer number, great cut.
Joanna: 'That's a real turnaround!
Louise: Isn't it? He's always been image-conscious of course but that normally means searching the sales for T-shirts and jeans!
Joanna: Ha! Good for him.
Louise: Yeah.

TEST 10 PART 6

Hello, I'm going to give you some insight into what's actually involved in my job as a basketball trainer. What I enjoy most is seeing an athlete perform at a high level, knowing that I helped them get there. There are numerous challenges of course but most of the time things go smoothly unless there's a breakdown in communication. Everything goes wrong then - from training programmes right down to players' concentration - if the coaches, management, players and medical staff aren't on the same track.

I was lucky enough to study sports science at college like you, and most of what we did is still relevant but there've been massive developments in the psychology of sport in areas such as the motivation for athletes to succeed. What is constant though is the human body - I'm grateful for all the hours we spent in those classes as I use my depth of knowledge every day, much more than practical skills.

A large part of my job is obviously assessing injuries and interestingly although back problems put players out of the sport for greater lengths of time, it's damage to ankles which dominates. Longer term, some players have problems with their knees and that can end their career altogether.

We have to assess new trends in sports training to see if they're really going to benefit our players. A lot of companies knock on our door with the latest equipment and training programmes to improve players' strength but I find they're not worth the money and it's more effective to concentrate on injury prevention and general health. That's what has the most impact on results.

The daily exercise schedule I use with the team hasn't changed much over the years. Strangely enough, it's the simplest exercises which aim to help players' balance that are the most beneficial to their game. Around those we also do lots of practice on technique of course and individual skills.

After a big series of matches, I keep an eye on the players as it's easier for them to switch off and get into bad habits. They'll be exhausted and they need some time to sleep and rest. I make sure I suggest a nutrition programme to help them restore the energy they've lost.

MULTILEVEL ZONE MOCK EXAM

Every sports trainer implements a team's fitness programme in a different way. But what I have learned is that in order to get the best out of the players I have to understand their personalities and which method is going to best suit each one. Once I have the right methods for each one, their fitness levels will improve much faster and they will develop the skills they need.

Of all the things I've talked about - having a flexible approach, a constant awareness of what's going on in the team and specialised knowledge - we shouldn't ignore a sense of humour. Without that, none of the rest will work - it's a very challenging job and things go wrong all the time - so you won't get far without it.

Thank you very much for listening …
